1 DECLARATION OF INTEREST

To receive any declaration of interest by any Member or Officer regarding any item of business.

2 MINUTES OF THE PREVIOUS MEETING (Pages 1 - 6)

To present the minutes of the previous meeting of the Partnership and Regeneration Scrutiny Committee held on 21 June, 2022.

3 MARKET STABILITY REPORT (SOCIAL CARE) (Pages 7 - 250)

To present the report of the Director of Social Services.

4 EDUCATION SCRUTINY PANEL PROGRESS REPORT (Pages 251 - 254)

To present the report of the Scrutiny Manager.

5 GWYNEDD AND YNYS MÔN PUBLIC SERVICES BOARD ANNUAL REPORT 2021/22 (Pages 255 - 272)

To present the report of the Chief Executive.

6 FORWARD WORK PROGRAMME (Pages 273 - 280)

To present the report of the Scrutiny Manager.

PARTNERSHIP AND REGENERATION SCRUTINY COMMITTEE

Minutes of the virtual meeting held on 21 June, 2022,

- PRESENT:** Councillor Dylan Rees (Chair)
Councillor Gwilym O. Jones (Vice-Chair)
- Councillors Non Dafydd, Paul Ellis, Euryrn Morris, Trefor Lloyd Hughes, MBE, John I. Jones, Pip O'Neill, Derek Owen, Margaret M. Roberts, Ken Taylor
- Portfolio Members**
- Councillors Llinos Medi Huws (Leader), Carwyn Jones (Portfolio Member for Economic Development, Leisure and Tourism), Dafydd Rhys Thomas (Portfolio Member Highways, Waste and Property), Gary Pritchard (Portfolio Member for Children - Social Services, and Youth Services), Alun Roberts (Portfolio Member for Adults' Services – Social Services)
- IN ATTENDANCE:** Chief Executive
Deputy Chief Executive
Director of Function (Resources)/Section 151 Officer
Director of Social Services
Head of Adults' Services
Policy and Welsh Language Manager (FO)
Scrutiny Manager (AGD)
Committee Officer (ATH)
- APOLOGIES:** Councillor Ieuan Williams (Portfolio Member for Education and the Welsh Language)
- ALSO PRESENT:** Bethan E. Griffith (Business Support Manager - Democratic Services)
-

The Chair welcomed everyone present to this meeting of the Partnership and Regeneration Scrutiny Committee and he took the opportunity to thank Councillor Gwilym O. Jones, the Committee's previous Chair for his sterling work in that role saying that he looked forward to working with him in his new role as the Committee's Vice-Chair. Members and Officers then introduced themselves.

1 APOLOGIES

Apologies for absence by Councillor Ieuan Williams, Portfolio Member for Education and the Welsh Language were submitted and noted.

2 DECLARATION OF INTEREST

Councillor Euryrn Morris declared a personal but not prejudicial interest in item 7 on the agenda as the contact point for Gwynedd Council's ITC provision for the North Wales Economic Ambition Board.

3 MINUTES OF THE PREVIOUS MEETING

The minutes of the previous meetings of the Partnership and Regeneration Committee held on the following dates were presented –

8 March, 2022

31 May, 2022

It was resolved -

- **To receive the minutes of the meeting of the Partnership and Regeneration Scrutiny Committee held on 8 March, 2022**
- **To approve the minutes of the meeting of the Partnership and Regeneration Scrutiny Committee held on 31 May, 2022.**

4 ANNUAL REPORT WELSH LANGUAGE STANDARDS 2021/22

The Welsh Language Annual Standards Report was presented for the Committee's consideration and comment prior to its submission for delegated approval by the Portfolio Member for publication. The report evaluates the Council's compliance with the Welsh Language Standards in 2021/22 and documents the ways in which the Council promoted and facilitated opportunities to use the Welsh language during the year ensuring that the language was treated no less favourably than English.

Councillor Llinos Medi, Leader of the Council in presenting the report in the Portfolio Member's absence commented that despite the continuing need to respond to the challenges of the Covid-19 pandemic which compelled the Authority to adapt its usual working practices to react at pace to the exceptional challenges, its high standard of Welsh language services was unaffected thanks in large part to the Authority's officers. She spoke about the continued development of the Council workforce's Welsh language skills with over 90% of officers able to use Welsh and she referred also to the development and utilisation of technology to promote and to facilitate use of the language at a time when opportunities to distribute promotional materials were few. This reporting period saw the launch of a new section of website all about the Welsh language as well as the adoption of a new domain name; this microsite brings together a wealth of information and resources about the language. To conclude it was a pleasure to be able to report on an exciting area of Council business where progress is being driven by a heartfelt desire to see the Welsh language and its use within the Council develop and flourish.

The Chief Executive said that although the Authority is duty bound to operate through the medium of Welsh, it does so because it believes that doing so is important and because it sees bilingualism as an integral part of its work. It is also important that the Council operationally reflects the fact that over half the Island's population speaks Welsh. The Council embraces bilingualism and strives to replicate this in all its written and oral communications with the public. It also regards bilingualism as a particular strength and as an aspect of service delivery which it seeks to develop. In terms of noteworthy successes, the Chief Executive referred to the investment which the Council has made over the past three years in bilingual fitness equipment at its leisure centres and also to the role of the Welsh Language Forum in bringing partners together in an area where collaboration is essential. The challenge moving forwards is to continue to build on this body of positive work and to preserve the Council's good name as a fully bilingual organisation. The Council's

Strategic Leadership Team is committed to this task and to meeting the language choice of the people whom the Council serves as well as to developing the organisation's Welsh language skills and proficiency still further.

The Committee welcomed the report and its revised format; in considering the overview of the Council's endeavours during the year both in complying with the Welsh Language standards and in promoting the use of the Welsh language, the Committee sought assurance on the following points –

- Whether the rise in complaints about the Council's use of Welsh in 2020/21 signified any trend that may be a cause of concern.

The Policy and Welsh Language Manager confirmed that despite remaining low at 5 complaints, the figure for complains about service delivery standards was a marked increase on the one complaint the previous year. Similarly 4 complaints were received about policy making standards as opposed to none the previous year. She advised Members that one reason may have been a change in the way that complaints about the language are recorded; previously, complaints were mostly resolved by the responsible service as part of the first stage of the Council's complaints procedure; since July 2021, complaints about the Council's use of Welsh are referred to the Policy and Welsh Language Manager for consideration and to be recorded. The Policy and Language Manager provided assurance that although minor slips can occur she did not believe the complaints received signified any systemic issues of significance. However, the Council needs to be alert to complaints within the community with three complaints having been made about non Welsh house and property names. National planning policy limits the Council's authority in this regard meaning it is only able to encourage the use of Welsh names in this context.

- In noting and welcoming the high number of officers within the Council able to speak Welsh, the Committee wanted to know what more could the Council do to help staff further develop their Welsh language skills.

The Leader of the Council and the Policy and Welsh Language Manager were agreed that one of the best ways to facilitate the use of the Welsh language is by creating the conditions whereby individuals whatever their Welsh language skills level can practice using the language in an inclusive, welcoming and non-judgemental environment. The Policy and Welsh Language Manager advised that informal learning opportunities are as important in practising and improving Welsh language skills as more traditional lessons and the Council does have a range of training options which can be accessed year round. Of importance as well is the culture within teams and workplaces that staff can try out their skills without fear of negativity or judgement; in areas where staff might be lacking in confidence – in written Welsh for example, then it is the Council's duty to ensure it has the resources to support and enable staff to develop those skills.

- The Committee noted that the number of visitors using the English version of the Council's website was significantly higher than the number who chose to use the Welsh version. The Committee wanted know whether with the implementation of the Welsh language policy in schools and the use of Welsh therefore as something that comes naturally to young people, it is expected that the number of people using the Council's Welsh language website will grow.

The Policy and Welsh Language Manager confirmed that that is the hope and objective and with an increasing number of young people having received their education through the medium of Welsh, they will be familiar with the technology and

will not be daunted by switching from the one language to the other. In investing in Welsh language services, the Council needs to ensure that they are accessible and appealing and that people can use them with confidence.

The Chief Executive advised for clarification purposes that the Council assesses the language requirements of all new and vacant posts on a scale of 0 to 5 where 5 is wholly fluent in oral and/or written Welsh; this practice is applied across the Council's services and is a key administrative process. Where there is a request not to apply language requirements to a post then the Council will ask for evidence and the rationale for why a bilingual appointment is not considered necessary. The Council seeks to enable officers to attend Welsh language training in work hours and encourages staff to take advantage of the range of courses provided both to improve language skills and quality. It is just as important that where non Welsh speakers are appointed, the Council continues to support them to learn Welsh and allows them the time to do so.

- The Committee questioned whether any specific risks had been identified in terms of compliance with the Welsh Language standards.

The Chief Executive advised that the labour market – specifically the upheaval created by the Covid pandemic – is seen as both a risk and an opportunity as more people take advantage of hybrid working conditions to work closer to home. The challenge lies in people using this flexibility to make a career change and to seek different and alternative career paths and is something the Council will need to monitor. Although recruitment is not a particular issue at present the labour market remains challenging. Also, the Council's trainee programme provides an opportunity to bring young people into the Council at ground level and to provide them with the support thereafter to progress within the organisation. Should the Council find itself unable to appoint bilingual staff and consequently have to have recourse to agency staff or to staff from across the border working on a remote basis, then that could pose a risk in terms of undermining what is seen as one of the Council's main strengths.

- With regard to maximising the use of Welsh in the Council's administration, the Committee sought clarification of the main challenges in terms of mainstreaming Welsh throughout the organisation.

The Policy and Welsh Language Manager advised that mainstreaming means going beyond meeting the Welsh Language standards. She advised that the Council respects the chosen language of service users and that English and Welsh have equal status within its work and administration. However, in fulfilling its duty to promote and facilitate the use of Welsh, she considered confidence to be a key factor particularly with regard to Welsh writing skills. She believed it important therefore that the Council ensures that it has the resources to support staff to improve their skills and that it makes the most of developing technology and translation provision to make Welsh a natural part of the Council's day to day work. Given that the pandemic severely restricted the opportunities for staff to exercise their Welsh language skills in an informal work setting, the Council can provide support to enable them to regain the confidence to resume practising their skills and to return to programmes that were running prior to the pandemic.

In response to a further question the Leader confirmed that opportunities to learn and improve Welsh language skills are also available to Elected Members.

Members commented that they appreciated the availability of the “Cysgliad” software package to help with Welsh language and grammar accuracy and were also grateful for the Council’s comprehensive translation service. It was also suggested that language awareness sessions might be a useful way of encouraging Welsh speakers as well as Welsh learners to reflect on the language and on Welshness.

- In welcoming the annual report and the clarity with which it was set out, the Committee questioned what additional data would add value to the report.

The Chief Executive responded by saying that he believed a new HR system is needed which would give the data added granularity leading to more effective analysis and the generation of better quality data across Council services. The Policy and Welsh Language Manager confirmed that it would be helpful to be able to track the progress of individuals as they develop their skills and confidence in the Welsh language as their career progresses and to report annually thereon. On the point of Welsh language awareness she advised that this does form part of new appointees’ induction to the Council who are given factual information about the Welsh language standards and requirements hand in hand with the element of awareness raising to inspire them to commit to learning and/or improving their Welsh language skills. Such sessions have been delivered in-house and in collaboration with Menter Iaith Môn and additionally sessions have also been held at team level within services.

In concluding the discussion on this item, the Chair thanked the Committee for its thoughtful scrutiny of the matter and Officers for the assurances provided. He confirmed that the points made by Scrutiny would be forwarded to the Portfolio Member when the report is submitted for delegated approval and subsequent publication.

It was resolved to accept the Welsh Language Standards Annual Report for 2021/22, to note its contents and that Scrutiny’s comments be forwarded to the Portfolio Member as part of its submission for delegated approval and subsequent publication.

5 NOMINATION OF SCRUTINY MEMBERS TO SERVE ON BOARDS AND PANELS

The report of the Director of Function (Council Business)/Monitoring Officer and the Scrutiny Manager inviting the Committee to nominate representatives from among its members to serve on the Social Services Scrutiny Panel/Corporate Parenting Panel; Finance Scrutiny Panel and the Education Scrutiny Panel was presented for consideration. The report detailed the scope, function and remit of each panel and set out their reporting arrangements.

It was resolved to nominate the following members to serve on the Panels as noted below –

- **Social Services Scrutiny Panel/Corporate Parenting Panel (4 members from the Partnership and Regeneration Scrutiny Committee)**

Councillors John I. Jones, Euryrn Morris, Pip O’Neill and Jeff Evans (with Councillor Trefor LI. Hughes, MBE as substitute)

- **Finance Scrutiny Panel (3 members from the Partnership and Regeneration Scrutiny Committee)**

Councillors Paul Ellis, Dylan Rees and Ken Taylor

- **Education Scrutiny Panel (4 members from the Partnership and Regeneration Scrutiny Committee)**

Councillors Non Dafydd, Gwilym O. Jones, Derek Owen and Margaret M. Roberts

6 FORWARD WORK PROGRAMME

The report of the Scrutiny Manager setting out the Partnership and Regeneration Committee's indicative Forward Work Programme for 2022/23 was presented for consideration.

The Scrutiny Manager advised that the Forward Work Programme is a standing item on the agenda of the Committee's scheduled meetings and is reviewed on that basis. She referred to the Committee's next scheduled meeting in September and confirmed the items for that meeting.

It was resolved –

- **To agree the current version of the Forward Work Programme for 2022/23.**
- **To note the progress thus far in implementing the Forward Work Programme.**

7 ITEM FOR INFORMATION – NORTH WALES ECONOMIC AMBITION BOARD QUARTER 4 PROGRESS REPORT

The report of the Chief Executive incorporating a Quarter 4 2021/22 update on the progress of the North Wales Growth Deal programmes and projects was presented for the Committee's information.

It was resolved to note the progress made during Quarter 4, 2021/22.

**Councillor Dylan Rees
Chair**

ISLE OF ANGLESEY COUNTY COUNCIL <u>Scrutiny Report</u>	
Committee:	Partnership and Regeneration Scrutiny Committee
Date:	26/09/2022
Subject:	Market Stability Report (Social Care)
Purpose of Report:	To seek Scrutiny Committee support for the approval of the regional and local Market Stability Reports (Social Care)
Scrutiny Chair:	Councillor Dylan Rees
Portfolio Holder(s):	- Councillor Gary Pritchard - Children (Social Services) and Youth Services. - Councillor Alun Roberts - Adult Services (Social Services) Portfolio Holder.
Head of Service:	Fôn Roberts - Director of Social Services, Head of Children & Family Services Arwel Owen - Head of Adult Services
Report Author:	Regional Lead / SRO: Morwena Edwards and Clare Darlington (Joint Chairs of the Regional Commissioning Board) Regional Contact Officer: Sarah Bartlett / Catrin Perry Local Contact Officer: Emma Edwards- Business Manager Social Services
Tel:	01248 751887
Email:	EmmaEdwards@ynysmon.llyw.cymru
Local Members:	Applicable to the whole of Anglesey

1 - Recommendation/s

The Committee is requested to:

Support the approval of the regional and local Market Stability Reports (Social Care) or MSR.

2 – Link to Council Plan / Other Corporate Priorities

The MSR assessment of the sufficiency and stability of the market for regulated care and support services adds to the assessment of care and support needs of the population contained in the PNA. Both the PNA and MSR documents contribute to regional and local level strategic planning cycles, consequently this will support the local authorities' corporate priorities that are linked to the health and social care needs of its resident population.

A Well-being Assessment must be produced as a requirement of the Well-being of Future Generations (Wales) Act 2015 by each Public Service Board. The population assessment considered the care and support needs of the population while the Well-being Assessment covers prosperity, health, resilience, equality, vibrant culture, global responsibility and cohesive communities. There is overlap between the two so the project team for the MSR are liaising with officers for the PSBs about the progress of the needs assessment and Well-being assessments and sharing information where necessary.

As well as informing our local plans, the next phase of the project will also involve using the population assessment and the market stability report to develop an area plan for the region. Future work on the area plan may involve further research and consultation to explore priority areas in more depth before agreeing which areas to prioritise for regional work. The area plan is to be developed and published in 2023.

3 – Guiding Principles for Scrutiny Members

To assist Members when scrutinising the topic:-

3.1 Impact the matter has on individuals and communities **[focus on customer/citizen]**

3.2 A look at the efficiency & effectiveness of any proposed change – both financially and in terms of quality **[focus on value]**

3.3 A look at any risks **[focus on risk]**

3.4 Scrutiny taking a performance monitoring or quality assurance role **[focus on performance & quality]**

3.5 Looking at plans and proposals from a perspective of:

- Long term
- Prevention
- Integration
- Collaboration
- Involvement

[focus on wellbeing]

3.6 The potential impacts the decision would have on:

- protected groups under the Equality Act 2010

- those experiencing socio-economic disadvantage in their lives (when making strategic decisions)
- opportunities for people to use the Welsh language and treating the Welsh language no less favourably than the English language

[focus on equality and the Welsh language]

4 - Key Scrutiny Questions

1. What is the process for preparing the Market Stability Report (Social Care)?
2. What advantages are there to regional collaboration and how do we ensure that local needs are addressed?
3. The report discusses a number of gaps in the care market. How do you intend to prioritize the work that is required to address these gaps?

5 – Background / Context

The Welsh Government has introduced the Code of Practice for the preparation of Market Stability Reports to support this requirement stated in the Social Services and Wellbeing Act (2014).

The MSR Code of Practice requires that local authorities and local health boards work in partnership to prepare and publish market stability report based on data for each local authority area as well as an aggregated version on an RPB footprint. The Code of Practice states that:

“The duty to prepare and publish a market stability report, as set out in the 2014 Act, sits with each local authority, but the Regulations require them to carry out this function on a regional footprint and in partnership with the Local Health Board, so that one market stability report will be prepared for each of the seven RPB areas across Wales” [CoP Section 3.11]

However, local authorities must ensure that the market stability report also contains an assessment of the market for care and support within each local authority area as well as across the RPB area as a whole [CoP Section 3.13].

In this way, the report will inform both **regional and local decision-making** around commissioning care and support (especially, but not exclusively, regulated services), feeding into the strategic area plan for the RPB area and helping shape local and regional commissioning strategies [CoP Section 3.14].

In preparing their market stability reports, local authorities must carry out, in partnership with the Local Health Board and other RPB partners, an assessment of both:

- a) *the **sufficiency of care and support** in meeting the needs and demand for social care as set out in the population needs assessment, and*
- b) *the **stability of the market** for regulated services providing care and support [CoP section 4.2].*

The market stability assessment focuses on regulated services. These are:

- care home services (adult and children's)
- secure accommodation services (for children)
- residential family centre services
- adoption services
- fostering services
- adult placement ('shared lives') services
- advocacy services
- domiciliary support services

The MSR Code of Practice also states that whilst Preventative services are not regulated services it requires local authorities and Local Health Boards to set out the range and level of preventative services that will be required to meet those needs identified in the Population Needs Assessment and assess how the availability of preventative services can also have a major impact upon the need for regulated services. Therefore, Preventative services must be considered as part of the MSR.

The Code of Practice also notes other themes that must be considered in the MSR including:

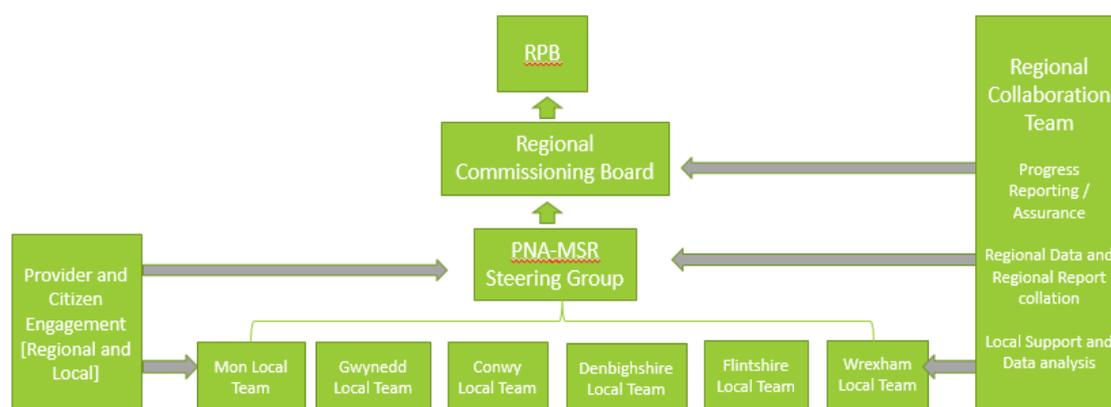

- a) Social Value
- b) The Welsh Language
- c) Workforce
- d) Direct Payments and self-funded provision

There is a strong link between the MSR and the recently produced North Wales Population Needs Assessment 2022 where the population needs assessment sets out current and projected need and demand for care and support, and the range and level of services that will be required to meet that demand. The market stability report will assess the sufficiency of the care and support provided in meeting the needs and demand established through the population needs assessment.

Whilst the MSR is a statutory requirement, this is not the main reason for undertaking the work. The MSR is a vital document that provides an evidence base to support organisations and services across the region, specifically it is to be used for strategic planning cycles underpinning the integration of services and support partnership arrangements.

Significant officer time has been involved in the production of local working papers, data analysis and research to inform the regional report. These working papers, although not published as part of the regional report, are valuable local planning documents. The approach we have taken to this work is detailed in Figure 1 below.

Figure 1 – North Wales Approach to the development of the PNA&MSR

Both the PNA and MSR documents will be used to plan local and regional delivery plan and service development plans going forward.

It is also vital that both documents are kept up to date and are used as live document for on-going planning. Therefore, the PNA-MSR Steering Group [see Figure 1] will continue to meet to undertake this updating and ongoing review of both documents and to work with the local teams on the development of the regional and local implementation/delivery plans.

The requirement to produce an accessible, regional report in a short timescale has limited what can be included. The work has been carried out during a very challenging time due to the pressures and capacity across the partner organisations. It has involved a significant effort by officers to ensure that a meaningful document was produced.

It should also be noted that very little national data on the care market was available and thus we have relied heavily on local and regional commissioning information.

The final MSR document is therefore not perfect and we recommend updating as new national data becomes available and more work is carried out locally e.g. the impact of Covid, financial challenges and the impact of re-balancing social care on

the on the care market. We will develop an on-going process to improve and update the MSR so that it remains meaningful and current. This will also help make it a more manageable process.

The MSR is a co-produced document and engagement led. Local and regional lead officers undertook data analysis, background literature reviews, service reviews and additional focussed local engagement work. The key issues and themes identified are based on consultation and feedback from staff, partner organisations, Public Health Wales and local Health Board colleagues, service users and the general public to identify strategic needs for care and support. This included information from existing commissioning strategies and needs assessments.

As such our co-production approach to the work means that we have a meaningful and informed MSR document that involved a wide variety of people, as opposed to a document created in isolation via a desk-top exercise, which has been the approach employed by some other regions of Wales.

6 – Equality Impact Assessment [including impacts on the Welsh Language]

6.1 Potential impacts on protected groups under the Equality Act 2010

The EqIA is available upon request.

6.2 Potential impacts on those experiencing socio-economic disadvantage in their lives (strategic decisions)

The EqIA is available upon request.

6.3 Potential impacts on opportunities for people to use the Welsh language and treating the Welsh language no less favourably than the English language

The EqIA is available upon request.

7 – Financial Implications

The North Wales Social Care and Wellbeing Services Improvement Collaborative has utilised existing staff to support the development of the MSR. Associated costs, such as translation and for specialist engagement was also funded by the partnership.

There has been a cost to the local authorities, BCUHB and Public Health Wales in staff time and resource to support the project. This includes staff to carry out engagement work with the public, service users, staff and elected members and staff to support the analysis and writing of the report. The majority of this work took place between December 2021 to July 2022 for the MSR.

Going forward the MSR will identify regional and local priorities, it may be the case that these priorities require some level of investment at either regional or local level.

1. Introduction

1.1 Background

The Social Services and Wellbeing (Wales) Act 2014 introduced a new duty on local authorities and health boards to develop a joint assessment of the sufficiency and sustainability of the social care market. The Market Stability Report has been produced by the North Wales Regional Partnership Board in line with the Code of Practice (Welsh Government, 2021a). This is the first Market Stability Report produced and takes into account the findings from the North Wales Population Needs Assessment 2022.

1.2 Purpose of the market stability report

The report helps us to understand the social care market in North Wales, so that we can effectively commission and support providers of health and social care services to meet the needs of the population effectively.

The market stability report will assess:

- The sufficiency of care and support in meeting the needs and demand for social care, as set out in the population needs assessment
- stability of the market for regulated services

Regulated services are those listed in The Partnership Arrangements (Amendment) and Regulated Services (Market Stability Reports) (Wales) Regulations 2021.

Currently these are:

- a care home service (adult and children's)
- a secure accommodation service (for children)
- a residential family centre service
- an adoption service
- a fostering service
- an adult placement
- a domiciliary care service
- an advocacy service

The assessment is the basis on which the Regional Partnership Board should make decisions for future planning and commissioning of care and support services. This will include local area plans, strategic commissioning strategy and market position statements.

This assessment has been undertaken as a joint exercise by the six North Wales local councils, Betsi Cadwaladr University Health Board (BCUHB) and Public Health Wales. The six local councils are Wrexham County Borough Council, Flintshire County Council, Denbighshire County Council, Conwy County Borough Council, Gwynedd Council and Isle of Anglesey County Council.

The market stability report aims to improve our understanding of the social care market in North Wales, and how this will evolve and change over the coming years. The findings within this assessment will assist all public service providers within the region in providing better and sufficient services for our citizens who are in need of care and support.

1.3 Research methods

The research methods include:

- Analysis of local and national data sets to identify trends.
- Evidence from the local authorities and health board.
- Evidence from local, regional and national research.
- Priorities from local, regional and national policies / strategies / plans.
- Responses to the regional survey and other consultation exercises from citizens, organisations, staff and providers.

1.4 Consultation and engagement

The Code of Practice (Welsh Government, 2021a) states that local authorities must take reasonable steps to engage with citizens. As a precursor to the market stability report, the population needs assessment had undertaken a large scale regional consultation and engagement exercise based on the national principles for public engagement in Wales and principles of coproduction. This exercise gave an insight of the direct impact of stability and sustainability of the social care market on people with care and support needs, their carers and families. Further details can be found in the population needs assessment.

Registered providers of social care services were engaged via a regional provider’s survey. An invitation to complete the survey was sent via commissioners to all registered providers across the region.63 responses were received.

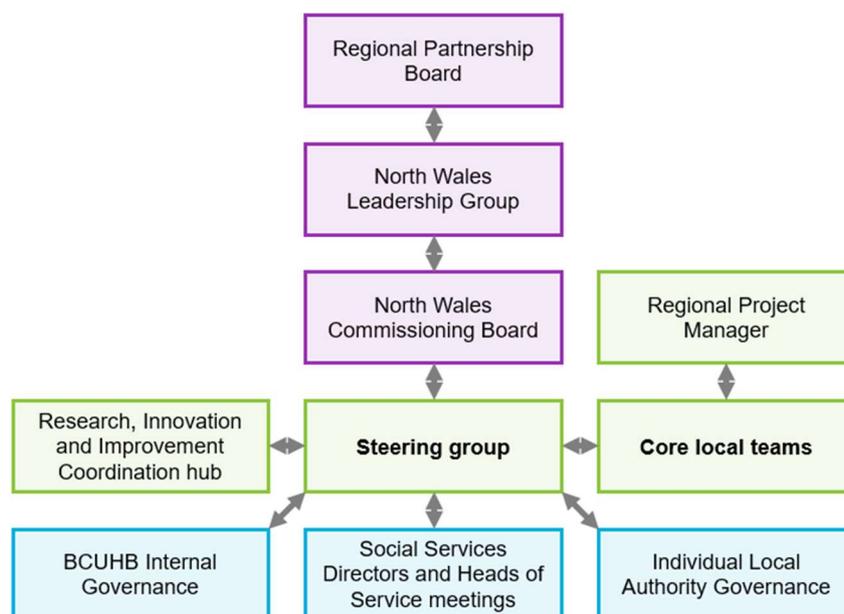

Additionally, local teams have also undertaken their own engagement where this was not being covered at a regional level. Draft chapters were also shared with partners for feedback and comments.

1.5 Project governance

The Regional Partnership Board tasked the North Wales Commissioning Board with oversight of the project. They established a regional steering group to coordinate the development of the Market Stability Report, which included representation from the six local authorities, the health board and Public Health Wales. The project management arrangements ensured that there was consistency for all partners in producing a regional report. Regular project reports were produced and shared with the regional boards as necessary.

This report has been approved by the six local authorities, Betsi Cadwaladr University Health Board and the Regional Partnership Board.

Diagram 1: Project governance arrangements

1.6 Limitations, lessons learnt and opportunities

Preparing a single accessible population needs assessment and market stability report across six local authorities and one health board area within the timescales has been a challenging process. Particularly with the additional pressures of Covid-19. Thanks to the efforts of the project team, the project steering group comprising of local leads, the data-sub group, the engagement group, partner organisation teams, people who use services and providers co-produced this report.

One of the main challenges has been access to good quality data about the population and the social care market. The 2021 census data will not be published in time to include in the assessment and many indicators were unavailable due to changes in the way data is collected since the last assessment and because some data collection paused due to Covid-19.

It is recommended that the joint population needs assessment and market stability report steering group continues regularly scheduled meetings to oversee the updates and to make further recommendations about how to improve the quality, availability and coordination of data to inform future needs assessments.

2. Summary of regional priorities

Domiciliary care (care in people's own homes) is a priority market identified by commissioners, with current private sector providers unable to fulfil the demand for a significant amount of time now, due to staffing challenges. As such, growth and development of services including general and specialist domiciliary care have been identified as opportunities for the future.

Commissioners are keen to work with providers to increase care capacity to meet population needs. The key themes and priorities for providers and commissioners across social care and health are:

- Recruitment of staff. The employment market is highly competitive and competitive pay rates and employment benefits need to be offered in order to attract people.
- Integrated Domiciliary Care recruitment project between local authorities and the health board and development of integrated cross-organisational roles and career pathways.
- Terms and conditions. These need to reflect and be worthy of the social care role, and its importance in the health and care system as well as reflecting that these are skilled roles in the main.
- Retention of staff is poor due to poor terms and conditions in the social care sector. The cost of fuel and the cost of living crisis is now beginning to be felt in the sector where providers are seeing more staff experiencing in-work poverty. Staff are also leaving the sector due to challenging working conditions and lack of respect for the work they do and the levels of responsibility involved. Staff feel undervalued and overworked.
- Staff who are new to the sector are not staying in the sector long term as they feel overwhelmed by the intensity of the roles particularly those supporting people with complex needs and challenging behaviours. Providers and commissioners need to better support for staff to meet the challenges of working in social care.
- Service transformation programmes are a priority and they should accelerate the focus on enabling flexibility in using commissioned care hours, where providers can be trusted to flex the package of care hours in partnership with the individual who is being cared for. While appreciating budget restraints for all, the flexibility

would improve quality and bring costs savings in terms of reduction in administration costs.

- Development of true partnership working between commissioners and providers was identified as a key focus.
- Providers recognise the benefit of the additional Covid payments and the on-going suitability of the sector is recognised as a key priority due to the important work that home care providers do in keeping people well in their own homes, in enabling hospital discharge and preventing unplanned visits to hospital.
- Develop partnerships with care home providers to provide low level residential care / respite services to ease the pressure on home care domiciliary care provisions.
- Develop opportunities in micro commissioning and direct payments as an alternative to the traditional home care model.
- Increase support for unpaid carers to reduce the pressures on the home care service and look at carer led solutions, such as. increased carer breaks (respite)
- Increase the availability of specialist placements in care homes for older people, adults with mental health needs, learning disability and people with dementia.
- Increase the availability of emergency and longer term accommodation for children and young people with complex needs including mental health, learning disability and emotional behavioural needs.

Summary of local themes

Anglesey

- We are committed to service transformation and modernisation is an area of focus with further ambitions to develop accommodation options, building on the work of the transformation programme.
- We have an aging care workforce on the Island and therefore need to attract and retain new social care staff.
- We want to work with providers to ensure stability, particularly in relation to staffing costs, supply, choice, services and delivery.

Gwynedd

- Recruitment and retention problems are a recurring issue, with all services reporting a real shortage and concern.
- Lack of financial support. All services have raised concerns about the ability to maintain quality services with limited resources. The lack of funding often results in having to use out of county providers which results in higher costs which in itself adds to the problem.
- Significant shortfall in care within the county for children who need to be in residential care compared to other services available to children. There is relatively good provision of foster families within the county and there are many resources and services within the county for supporting disabled children. There appears to be inconsistency in provision.

Conwy

- Recruitment and retention of staff across the sector including social workers, care staff and nursing staff. This is linked to pay and conditions but not exclusively.
- Children's residential services. Provision of accommodation for both emergency and longer term placements is needed urgently and we are considering a range of options to increase provision in county and reduce reliance on costly temporary arrangements and out of county placements that are far from the family.
- Provision of domiciliary care services, with current private sector providers unable to fulfil the demand for a significant amount of time now.

Denbighshire

- We want to increase care capacity to meet population needs within Denbighshire including residential care for children, young people, people with complex disabilities, older people (including those with mental health needs), foster care, domiciliary care and reablement.
- We are committed to improving communication internally across services / teams and with partner organisations and sharing of good practice
- Increasing the availability of overnight respite accommodation is a priority within Denbighshire.

Wrexham

Key priorities within Children's Services in Wrexham are:

- Increased placement stability, reducing the number of children looked after through early intervention and preventative services and removing profit from children's placement market
- Provision of emergency accommodation for people in mental health crisis
- Increase in escalation of mental health needs and concerns of children and young people
- Developing new children's homes
- Improvement in quality of practice and performance across Children's Services

Key priorities within Adult Services in Wrexham are;

- Growth and development of services including; Domiciliary Care (includes homecare/reablement; community living and recovery)
- Day and employment services
- Emergency placements

Flintshire

The Domiciliary Care market is a priority in Flintshire to help rebalance the care sector. Independent care providers continue to work creatively with the local authority to ensure the numbers of people waiting for care at home are the lowest possible.

In Flintshire, there are some critical pressures and key issues faced by social services in the areas of workforce, commissioning and funding criteria.

As of January 2022 in Flintshire, areas of ongoing pressures include:

- double-staffed care
- provision of care in rural areas
- provision of care for patients discharged from hospital
- care packages hand-backs from providers as a result of staffing challenges
- increased business costs – utility bills and insurance
- increased fuel costs, borne in the main by care staff themselves.

Since the pandemic the market for adult residential care services has become extremely unstable with several factors contributing to the availability of independent care home provision. The council are moving forward with plans to increase in house provision for people living with dementia and new model of step down care planned to support the discharge to assess and recover programme developed by the health board.

Half of all children in residential care from Flintshire are placed out of the country in England and Scotland. In-house residential care is being developed to rebalance the market in Flintshire.

Over the next five-year period, in order to ensure stability within the market for residential services for children, the council aims to:

- Work with new and existing providers and support them to deliver of models of care that will meet the needs of children.
- Work with new and existing providers and encourage them to develop their businesses in a way that, in addition to improving outcomes for our children, also provides a wider a wider social value to our communities.
- Work with providers who are able to safely care for children with multiple high needs and are able to provide alternative accommodation to secure welfare provision.
- Identify providers who will work in partnership with us during periods of transition, including stepping down to live with a foster carer or reunification with their family.
- Welsh culture is very important to us as a region and we want more providers who are able to deliver their services in Welsh.

3. Residential services (adults)

Population overview

Demand for care home placements is likely to increase

The population assessment shows that the number of people aged over 65 in North Wales increased by 17% between 2010 and 2020 and is projected to increase by a further 20% over the next 20 years. This is likely to increase the demand for care home services. The table below shows the expected change in each county, with Conwy expected to see the biggest increase and Gwynedd the smallest increase.

Table 1: Estimated number of people aged over 65 in 2020 and projected number in 2040

Local council	2020 number	2040 number	Change number	Change percent
Anglesey	18,650	22,500	3,850	17.2%
Gwynedd	28,550	34,300	5,700	16.7%
Conwy	32,950	43,500	10,550	24.3%
Denbighshire	23,500	30,400	6,900	22.6%
Flintshire	33,300	42,400	9,150	21.5%
Wrexham	27,750	34,500	6,750	19.6%
North Wales	164,700	207,600	42,900	20.7%
Wales	668,600	850,750	182,150	21.4%

Source: Mid-year 2020 population estimates, Office for National Statistics; and 2018-based population projections, Welsh Government

The increasing population of older people is not the only factor affecting demand. There are also changes in expectations and policy which mean demand may not increase at the same rate as the total population. For example, demand can change as people are supported to live in their own homes for longer, or take up extra care accommodation to retain independence with the option of receiving support as needed.

People are tending to move into residential care at a later age and when their needs are more complex, for example, due to dementia. The population assessment

estimated a 64% increase between 2017 and 2035 in the number of people living with dementia in North Wales, around 7,000 more people. Although previous increases have not been as high as expected because the proportion of people developing dementia reduced, perhaps due to improvements in health and more years spent in education (Matthews *et al.*, 2016). It is still likely that the trend for needing increasingly specialist nursing and residential home support for older people’s mental health (EMI) will continue.

Market overview

There are around 220 residential care homes and 60 nursing homes in North Wales, which provide around 4,100 residential care placements and 2,500 nursing placements.

Table 2: Current number of **adult care homes** (age 18 and over) by type and area

Local council (a, b, c)	Residential	Residential with mental health	Nursing	Nursing with mental health	Total (d)
Anglesey	12	7	3	2	24
Gwynedd	14	9	7	3	33
Conwy	43	12	13	5	73
Denbighshire	46	13	5	5	69
Flintshire	22	12	7	2	35
Wrexham	16	10	9	2	37
North Wales	153	63	44	19	271

Source: Local authority data collection.

(a) In Anglesey most homes have some mental health beds so these have not been separated out.

(b) Denbighshire has 26 specialist residential homes for people with learning disabilities.

(c) Flintshire has 8 specialist homes for people with learning disabilities included in the residential category.

(d) Flintshire has a number of homes with dual registration. Total numbers do not sum.

Table 3: Current number of permanent care home placements available to all **adults aged 18 and over**

Local council (a, b, c)	Residential	Residential with mental health	Nursing	Nursing with mental health	Total
Anglesey	341	98	115	64	618
Gwynedd	351	199	353	175	1,078
Conwy	671	226	441	144	1,482
Denbighshire	802	0	321	0	1,123
Flintshire	416	261	179	44	900
Wrexham	223	490	526	108	1,347
North Wales	2,804	1,274	1,935	535	6,548

Source: Local authority data collection.

Notes:

- (a) The categories of care have become more fluid since the introduction of the
- (b) Regulation and Inspection of Social Care (Wales) Act 2016 so these categories
- (c) are only illustrative of the split between types of care.
- (d) In Anglesey and Denbighshire most homes have some mental health beds so these have not been separated out.
- (e) Flintshire have 50 specialist placements for people with Learning Disabilities, included in the residential category

Care home fees

The need for sustainable and sufficient care home fees was highlighted in the consultation for the Market Stability Report. Fee levels are based on North Wales methodology with each council taking into account local decisions and affordability considerations. There are ongoing discussions around how the sector is funded, recognising the fragility of the sector, including the rebalancing care work and strategic National Framework for care and support being undertaken by Welsh Government (Welsh Government, 2021c).

Care home vacancies

During the pandemic many care homes have carried higher levels of vacancies than previously. Average vacancy levels would normally be around 10%, which is thought to be sustainable for the sector (Laing, 2020). For some this was due to staff absences or staff vacancies due to recruitment issues, while others have needed to use additional rooms for storage of personal protective equipment (PPE) or for

additional living areas in order to reduce the size of groups of residents sharing facilities. From time to time there have been restrictions on admissions because of Covid-19 outbreaks too.

Care home vacancies were also increasing in Conwy before the pandemic due to the introduction of reablement teams who worked to keep older people in their homes for longer. This work has been less effective during the pandemic as there have been fewer domiciliary care workers out in the community.

Table 4: Percentage of vacant care home placements, 31 March 2021

Local council	Occupied	Unoccupied	Total placements	Percentage unoccupied
Anglesey	548	65	613	11%
Gwynedd	933	122	1,055	12%
Conwy	1,337	115	1452	8%
Denbighshire	1,161	249	1,410	18%
Flintshire	748	152	900	17%
Wrexham	1,059	288	1,347	21%
North Wales	5786	991	6777	15%

Source: Local authority data collection.

Self-funded care home placements

The total number of people who fund their own care home placements across North Wales is not available due to differing council policy. Flintshire had 194 people self-funding placements in care homes as at 1 February 2022.

Estimates from the Office for National Statistics (2021) found that were around 36.7% self-funded care home residents between 2019 and 2020.

Isle of Anglesey market overview

Anglesey has identified the following needs:

- Increased dementia care is required.
- Social isolation may be a particular risk for older people on Anglesey, due to rurality, lack of transport, and the distance many are living from their families.
- There is need for additional specialist services on Anglesey.

- There are not enough older people's mental health (EMI) residential and nursing beds on Anglesey.
- There is reduced demand for general residential beds.
- For older people with a learning disability who also have physical health and dementia needs, there is a lack of specialist residential and nursing placements.

Gwynedd market overview

Gwynedd has identified the following areas where there is a struggle to meet demand:

- Lack of specialist residential and nursing placements for older people with a learning disability who also have physical health and dementia needs.
- Lack of support workers in the community, and residential especially Tan y Marian and within day provision. This makes it difficult to start a service for new individuals and many individuals receive fewer support days / hours in the community.
- It is difficult to maintain and develop a service tailored to the person who needs workers who have received training in 'Personal Behaviour Support (PBS)' and Active Support.
- Demand for dementia specialist care (residential and nursing). There is currently no dementia nursing care in the Meirionnydd / Llyn area.
- There is no specialist mental health provision including for autism and severe mental illness, in Gwynedd. Conwy is the nearest location but the provision is non-Welsh speaking.
- We have seen an increase in the demand for temporary residential care as a result of a shortage of domiciliary care.
- We are unable to fill empty beds in some of the Council's homes due to the high dependency level of residents.
- Inappropriate discharges from hospital without sufficient time for recovery can result in increased dependency.
- Sickness absence and recruitment are a problem.

Future plans

There are plans to increase residential older people's mental health (EMI) provision by adapting units in the council's residential homes.

There are currently 33 providers of older people's residential and nursing homes in Gwynedd. Gwynedd Council provides 11 residential homes for older people directly.

Table 5: Gwynedd older people's care home placements

	Total registered placements	Number of dementia placements
Plas Maesincla	23	23
Plas Ogwen	27	-
Plas Pengwaith	31	-
Plas Hedd	28	7
Plas Hafan	30	8
Plas y Don	30	-
Plas Gwilym	27	-
Hafod Mawddach	25	8
Bryn Blodau	41	17
Cefn Rodyn	22	-
Llys Cadfan	33	15

Source: Local authority data

The following provides an update on our efforts to expand the provision of care for people with dementia:

- Plas Hedd. One respite bed unable to open due to construction. New development underway. Plan to change a further 8 bed unit to support people living with dementia.
- Plas Hafan. Used to full potential.
- Bryn Blodau. 9 beds for people living with dementia, due to staffing situation, unable to support individuals living with dementia, but offering a different service.
- Hafod Mawddach. New development will increase registered places to 30 with 8 beds for people living with dementia. Due for completion in September 2022.
- Cefn Rodyn. 5 beds on the first floor unused due to fire safety issues and wait for new lift. New developments completed in 2021. One room has been developed for bariatric use, the others for people with more intensive residential needs.
- Llys Cadfan. Used to full capacity. 1 respite bed for people living with dementia and 1 residential respite bed.

Over the last 5 years the Council has increased the number of older people's mental health (EMI) residential beds in their in-house homes. There were originally 38 beds between Plas Maesincla and the Bryn Blodau and Llys Cadfan units. There are now units at Plas Hafan, Plas Hedd, an additional unit at Llys Cadfan and Bryn Blodau. Further work is underway to create a second unit at Plas Hedd and a new unit at Hafod Mawddach with the hope of opening later this year. While this is significant progress, more needs to be done to change the balance of older people's mental health (EMI) placements in the county and meet needs. There are significant revenue costs associated with each unit changed from residential to older people's mental health (EMI) placements.

The following gaps have been identified:

- Dementia Specialist Care (residential and nursing) in the Meirionnydd area - there is currently no dementia nursing care there.
- Residential / nursing care for young people with physical and sensory needs.

For the future the Council hopes that residential older people's mental health (EMI) provision will be created at Plas Gwilym and Plas Pengwaith. Gwynedd Council is working in partnership with Betsi Cadwaladr University Health Board, Clwyd Alyn Housing Association and the Welsh Government to develop the Penrhos site, Pwllheli. It is intended to submit a business case to Gwynedd Council's Cabinet for the development of an on-site care home. The number of individuals with dementia is increasing, and we regularly review need and try to adapt council homes to be flexible and suitable to meet future need.

Conwy market overview

Most placements in Conwy are commissioned from private care home providers who provide 98% of the bed spaces in the county. Provision across the coast is reasonable, but there is a shortage of spaces to the south / rural parts of the county and concerns about the provision available in the Welsh language. The county is well serviced with residential and nursing places, but has a shortage of specialist mental health provision for both residential and nursing needs, in particular for those who need very specialist care. The majority of buildings utilised as Care Homes are older and often converted residential dwellings. On the whole they are well maintained by the providers, but repairs and maintenance can be costly. The physical layout of many such homes made it very difficult for the providers to

manage Covid outbreaks during the pandemic, while at the same time, the purpose built homes found that they were better equipped to manage such outbreaks.

Denbighshire market overview

Over 90% of care home placements are commissioned from external providers. There are two in-house care homes. The council closed one of the three residential homes that it had in 2019. The site, in Ruthin, is now being developed to provide more extra care apartments.

There has been a slight reduction in the overall capacity of the care home sector in Denbighshire in recent years. There is reduced demand for residential care without additional support for mental health or complex physical needs.

The majority of care homes in Denbighshire are older buildings that have been adapted. There have been a few occasions where it has not been possible to accommodate people with bariatric needs because of the structure of the buildings – size of doorways or layout of corridors. Also, few care homes have space for ceiling hoists for moving and handling or larger beds. The requirement for more staff input is also a barrier.

There are very few vacancies at the moment.

There are currently around 18 adults placed in care homes because there is insufficient support available to allow them to return to their own homes.

As of May 2021 there are 32 out of county residential older people's mental health (EMI) placements and 29 nursing placements. There are 33 out of county placements in Denbighshire for older people with mental health needs, mainly due to a lack of suitable local placements

Denbighshire has 282 places for specialist learning disability care home provision. They have identified the following trends.

- **Demography.** The number of people with learning disabilities needing support is increasing and people with learning disabilities are living longer. These demographic trends are likely to continue.
- **Attitudes and expectations.** Most individuals and their families want / expect to have a greater level of independence and to be a key part of their community.

- **Finance.** The level of spend on learning disability services has been increasing but we are now faced with supporting more people with less money (as a result of reducing local authority settlements, Independent Living Fund (ILF) closure and Housing Support Grant restrictions).
- **Existing provision.** Support is generally provided via immediate family members and / or long term paid care staff. Less use is made of informal community based assets.

Flintshire market overview

There has been an overall increase in residential provision in the last few years due to the reopening of three homes and the expansion of Marleyfield house in Buckley. One large home has changed from providing nursing to residential care which has simultaneously increased residential care capacity and decreased nursing home capacity. A general nursing home in Holywell closed in 2019 and another in March 2022 which decreased general nursing placements by 75. One care home is currently undergoing renovation work which has temporarily reduced market capacity.

Marleyfield, Croes Atti, and Llys Gwenffrwd are purpose built care homes, owned by the Council, situated in the towns of Buckley, Flint and Holywell. The buildings require little refurbishment or renovation. Llys Gwenffrwd differs in that provision is provided over three floors, which requires a change in staffing levels to creatively support people with dementia on the top floor.

There has been a historical shortage of placements which has led to placements out of county.

In addition, the complexity of need coupled with the lack of placements locally leads to in delayed transfer of care from hospital. This was evident during the pandemic, where at one point, due to active cases in nursing homes, there were no available nursing placements in Flintshire in to which to discharge people from hospital.

Within the Learning Disabilities and Physical Disabilities sector, due to the small choice of local providers and the specialist nature of support, some of these residential placements may need to be made out of county and this can incur higher costs. This has an impact on individuals and maintaining links with family and friends.

Future plans

New homes accessible to all:

- Marleyfield and Croes Atti have separate units for those with dementia related needs.

Supporting people to live at home for longer:

- Llys Gwenffrwd houses rehabilitation placements and all three homes provide a number of respite, step up / step down and assessments placements rather than permanent residential.
- Marleyfield and Croes Atti have adjoining day-care provision which would be affected with some of the options presented.
- Replace Croes Atti with a new care home on the former Flint Hospital site. The new care home will have an additional 25 beds, 12 of which will be accessible to the Health Board earmarked to provide a new model of step down care to support the discharge to assess and recover programme developed within the Health Board.

Provision for people with complex disabilities

Isle of Anglesey County Council have highlighted the need for specialised physical and sensory beds available locally.

Gwynedd Council have identified a struggle to meet demand for residential and nursing care for young people with physical and sensory needs.

Denbighshire County Council identified a lack of capacity for residential accommodation for people with complex disabilities (physical and learning disabilities), which means many people go out of county, away from family and friends. Currently there are 13 placements out of county which can incur higher costs. This also impacts on families visiting and linking to the individual.

In Denbighshire as individuals with complex needs have moved on from health settings to be supported in the community, ongoing work is required to further embed

Positive Behavioural Support (PBS) methodology within the delivery of support. This will ensure the skills and knowledge is available and maintained within the social care workforce.

Extra care, supported living and sheltered housing

Extra care housing includes specially designed self-contained properties for older adults with care and support available at a sufficient level to allow people to remain at home despite frailty, periods of ill-health or disabilities and often without the need to move to residential care.

In supported living or community living people usually live as tenants in a shared house, with formal paid support provided by a registered domiciliary care agency

Sheltered housing also includes self-contained properties for older adults and usually includes help from a scheme manager (warden) or support staff.

Anglesey extra care, supported living and sheltered housing

There are two extra care developments in Anglesey, Hafan Cefni and Penucheldre, currently providing a total of 118 extra care units, all of which are currently occupied. In March 2022, the Council committed to progress a new scheme in the Aethwy area and this will provide 40 units along with 15 specialist residential care rooms.

Analysis conducted by the Isle of Anglesey County Council suggests extra care provision is on target to meet demand up to 2025 with an additional 127 units needed by 2035 to meet projected demand. There are currently 12 people on the waiting list for extra care housing.

Evidence from local consultation supports a move toward the provision of extra care and supported housing provision and away from traditional residential care homes.

There are 71 units of supported accommodation and all are currently occupied. These are provided by 7 care providers in addition to an in house service. Demand currently outweighs capacity in regards to Extra Care and Supported Accommodation

Gwynedd extra care, supported living and sheltered housing

There are three extra care housing schemes in Gwynedd providing a mix of 1 and 2 bed self-contained apartments:

- Cae Garnedd, Bangor: 42 units all occupied and 37 applicants on the waiting list.
- Awel y Coleg, Bala: 30 units, 1 unoccupied and 3 applicants on the waiting list.
- Hafod y Gest, Porthmadog: 40 units, all occupied and 21 on the waiting list.

Extra care units are also part of the conversation regarding the development of Canolfan Llew - the health and care hub in Penygroes with Grŵp Cynefin and the development of the Penyberth site in Penrhos, Pwllheli with Clwyd Alyn. Demand currently exceeds supply and there are plans to develop more.

There are 412 units of sheltered accommodation in Gwynedd, with only 30 units having a full time warden. They are all populated and in general demand exceeds the supply in Gwynedd especially for older people who either don't need or don't qualify for warden support services, which is the main criteria for sheltered housing.

There are 78 supported living settings; 39 third sector (50%), 32 private sector (40%) and 7 in-house (10%).

Historically it is difficult to get staff in rural areas, for example, South Gwynedd and supported housing providers have had difficulty with this. Supported accommodation is a priority for the learning disability field with 75 individuals identified as needing accommodation. A high percentage of these individuals will need a supported housing model so we anticipate a need for market flexibility.

Most providers experience the same type of challenges when it comes to recruiting and retaining staff teams. However, over the last few months we have successfully introduced a number of individuals into new supported housing placements and providers are reporting that they are in a position to submit tender bids for new projects. Some external providers are progressing to develop new accommodation and support opportunities in South Gwynedd. Prior to the pandemic, providers were committed to looking at service delivery differently, such as groups sharing support, but the restrictions have had an impact on this development

Providers working within active support models and 'Personal Behaviour Support (PBS)' have been negatively impacted by the pandemic due to staffing constraints / shortages, so it is essential that we urgently address this with our providers to secure

training and mentoring to promote this way of working and ensure an outcomes based and preventative approach.

Providers generally work closely with the multidisciplinary teams to respond to demand if there is a change in needs, to respond to a crisis and so on. We have seen examples of collaboration and prioritisation with providers committing to work flexibly to ensure that individuals receive a care and support service that meets their needs.

Usually need within the service is met by tailor made packages for individuals and small-scale provision, which is not necessarily attractive or sustainable for prospective providers. Recruitment is difficult and dependent on the local population as people are unlikely to move into the region for the work because of the low rates of pay and language requirements. We are aware that some of the current providers are not on the framework so reopening the tender process for potential new providers could be advantageous. We foresee an increase in need for supported housing within the coming years in Gwynedd. We need to consider the possibility of using a '[keyring approach](#)' (KeyRing, 2022) and look at commissioning or providing the support needed within cluster areas. Consideration has been made in the past but further considerations are needed in consultation with individuals/families/providers.

Each provider is different with some having more support needs than others. The pressure on them from time to time means that they may not be in a strong position to respond to tender opportunities or to tender for the Supported Housing Agreement. Providers who support individuals with severe and complex needs regularly contact the Council to report that the level of inflationary increase offered by is not sufficient.

Providers are generally stable and able to maintain the required levels of service to supported housing provision. It is difficult to say if they are in a position to meet the demand and the increase in need as each provider's situation is different. Providing extra hours through support services has been difficult and challenging with not enough experienced staff available. This has put pressure on carers and we have had to work together as a 'wrap around' with a number of providers to meet needs.

Need close collaboration between social workers, individuals and families to ensure all options are explored. Work is ongoing through an accommodation project to identify individual needs and plan ahead to look at the most appropriate model of

support / retention within their communities and as close as possible to their family. Some individuals are receiving support from more than one provider or a combination of direct payments and commissioned provision.

Commissioner to provider relationship

- Relationships are generally good.
- Contact arrangements strengthened over the pandemic.
- Providers attend a two-monthly HR Transformation Group where they can feed into the agenda.
- Regular liaison between the providers / HR Team at different levels to air any issues that arise so that they receive timely attention.
- Providers are integral to planning future services
- Most providers now link in with our Well-being Service- virtual and face-to-face groups.
- Over the last 18 months the structure of the Learning Disabilities Service has changed - there is more emphasis on the areas - strengthening provision by having a lead for South Gwynedd and Arfon. This has strengthened commissioner / provider links.

Provider to provider relationships

Overall the relationship appears to be good although there has probably been less joint planning over the last two years due to the restrictions. We have seen examples where providers have stepped into a crisis situation to support another provider by offering staff to fill gaps. For example, in one case where an individual's situation broke down and needed 24-hour support, up to 4 providers came together to form a rota to support them in temporary accommodation. In another case where a providers had difficulties maintaining a rota when introducing an individual to a new home, another provider stepped in and agreed to work together on a temporary basis to enable needs to be met. We provided support and guidance in relation to the agreement.

Conwy extra care, supported living and sheltered housing

There are four extra care housing schemes in Conwy county, providing a total of 185 flats. Hafan Gwydir in Llanrwst, Hafod y Parc in Abergele, Llys y Coed in Llanfairfechan and Tan y Fron in Llandudno. In April 2022, there were 62 people on the waiting list of which 10 were from out of county (two from Denbighshire and eight from elsewhere in the UK but with family links to the area).

There are 46 supported living projects run by various private companies, housing associations and the council.

The majority of supported living projects only cater for several people within each project so even though there are 46 projects there are only spaces for 136 people. Which is not a high proportion especially when the population of Conwy is taken into account. There are around only 8 vacancies at present and a high demand for vacant spaces. There are no supported living projects in the south of the county.

Supported living premises are in very short supply and the council struggles to find enough accommodation for clients.

Denbighshire extra care, supported living and sheltered housing

There are three extra care housing schemes in Denbighshire and one soon to open in Denbigh. A recently closed care home in Ruthin will be used as space to expand an extra care housing scheme run by a housing association. There were occasional vacancies due to the pandemic but otherwise it is very rare to have a vacancy in an extra care housing scheme. Although the number of extra care housing flats will be increasing significantly over the year it is expected that demand will continue to increase and exceed the amount of flats available.

Within Denbighshire most people with learning disabilities live in supported housing (community living).

Most new care home placements are viewed as a temporary measure until a suitable tenancy becomes available within a Community Living setting. However, there is still a relatively high number of older people with learning disabilities living in care homes. This is historical and partly a consequence of the closure of the North Wales Hospital. Moving these individuals is not considered feasible or in their best interests.

In Community Living people usually live as tenants in a shared house, with formal paid support provided by a registered domiciliary care agency via block contract with Denbighshire. Within Denbighshire the support service is not provided by (or linked to) the landlord. Support services for all new Community Living schemes are commissioned via an agreed tendering process.

As of September 2021, there are a total of 57 Community Living properties in Denbighshire, delivered between 11 providers. Only 2 of these properties are operated by the Council. There is also a combination of national providers, smaller

local providers and both local and national providers with a charitable status. Contracts are tendered through the regional framework or commissioned through direct payments.

125 people are currently supported (capacity is 136 people), most with over 20 hours of support per week, either shared or 1:1. Most individuals have a tenancy agreement as is usually the case for Supported Living.

There are providers who are able to offer a range of support from low level to more complex needs and 24-hour support.

Recruitment of staff has been problematic for providers during the pandemic and has impacted the number of places offered periodically.

Many existing Community Living contracts have been extended past their original term and there is now considerable pressure for the whole of the scheme to be re-tendered, in line with regulations. Both the providers and the council staff feel this presents a considerable risk to individuals, providers and their staff at the current time. At worst, re-tendering could see many providers losing business, and large numbers of staff leaving the sector at a time where it is almost impossible to recruit. Any uncertainty could have the potential for many staff to leave, even if TUPE applies. This uncertainty could have a devastating effect on the local social care provider market and the citizens they support. Some providers may just hand their contracts back and not wish to bid for more. Especially with such a large number of contracts, ultimately this could all significantly further destabilize the social care provider market in Denbighshire.

Flintshire extra care, supported living and sheltered housing

Extra Care continues to be an extremely popular housing choice for older people in Flintshire, which offers them the opportunity to live independently whilst having the support of an on-site care and support team, if and when needed. This in turn, releases capacity and time in community based domiciliary care.

The benefits of living in an Extra Care facility include:

- Staying independent for longer with on-site support, in your own living space.
- Support can be increased and decreased based on needs.
- Emergency support available, including at night.
- Enables couples where one partner is highly dependent to remain living together.

- Opportunities to socialise with other residents in a community setting.

The Council currently has four Extra Care facilities, Llys Eleanor (Deeside), Llys Jasmine (Mold), Llys Raddington (Flint) and the newly occupied Plas yr Ywen (Holywell), with a total of 238 extra care units.

As of August 2021, there are a total of 60 Supported Living properties in Flintshire, delivered between 10 providers. 16 of these properties are operated by the Council. There is also a combination of national providers, smaller local providers and both local and national providers with a charitable status. Contracts are tendered through the regional framework or commissioned through direct payments.

139 people are supported, most with over 20 hours of support per week, either shared or 1:1. Most individuals have a tenancy agreement as is usually the case for 'Supported Living'.

There are providers who are able to support from a low level to more complex needs on the Framework.

When recommissioning existing services, there is a possibility of a transfer of staff (TUPE) to the new company. For new services, the provider has to recruit which can impact on the timescales and attract staff from existing providers who then have to back fill.

Wrexham extra care, supported living and sheltered housing

There are two extra care housing schemes in Wrexham with a total of 116 units. Plas Telford has 56 units and had 5 vacancies at the end of March 2022. Maes Y Dderwen has 60 units and had 10 vacancies at the end of March 2022.

Demand for those with eligible needs is low, work is currently underway to relaunch scheme to attract more applications. Wrexham County Borough Council are currently evaluating their model of extra care housing to inform further service development to ensure its sustainability in meeting changing and increasing needs. Demand is hard to estimate due to current model seemingly not being able to respond to medium and high needs. Population statistics and evidence of older people's aspirations suggest there should be increasing demand for extra care housing. The priority in the short to medium term is to ensure a sustainable model of extra care housing which provides value for money and quality services which offer real alternative to residential care.

In addition to Wrexham's extra care housing schemes, there is a rolling programme of remodelling being delivered by WCBC Housing Department to deliver improved and increasingly accessible accommodation for older people across the in-house Sheltered Housing Service.

At the time of reporting, 126 people with a range of low-level and complex support needs were supported in the independent sector by 9 supported living providers – a mix of charitable and private organisations. There are 19 people with learning disabilities supported in their own homes by the council's internal supported living service across 10 properties. The majority of the services are 24/7 although some are for day-time support only, where staff are available to support people to become more independent.

Referrals are made predominately from the Disability Service working with people with learning disabilities although there are a number of people living with mental health support needs who are supported by the council's own Recovery Service - 10 people are supported in tenanted properties funded by social care.

It is recognised that re-tendering contracts can be disruptive for the lives of the citizens supported within this model so long-term contracts of 7+3 years are used, with regular quality and wellbeing reviews during the term of the contract. The North Wales Supported Living Framework is now in place and has been used for commissioning new contracts. Recruitment and retention proves to be challenging for providers, particularly for staff who are able to drive and use a supported person's mobility vehicle.

Market stability

Regional challenges

There are some common challenges across North Wales and Wales as a whole affecting the stability of the sector listed below:

- Retention and recruitment of care and nursing staff.
- Care home fees need to be set at a sustainable rate. Increasing numbers of providers are reporting that current financial challenges and are working with commissioners to address these issues.
- Increasing demand for services with decreasing budgets.

- Increasing complexity of care needs. People are staying at home longer with a support package so when they do need a care home placement their needs are more complex and involved.

Positives identified during consultation for the market stability report were the Welsh Government funding, which has helped with voids in the residential sector along with work to promote the sector and funding to try to achieve a real living wage.

Isle of Anglesey market stability

Home closure

At the end of the last financial year in March 2022, Caledonia Residential Home (15 beds) closed.

Demand for places

The demand for care home places dropped in the early stages of the pandemic during 2020, but saw an increase in 2021-22 as the early effects of Covid started to pass and as a result of shortfalls in the domiciliary care sector. A significant increase was seen in the number of people presenting and needing an assessment, but the mostly private domiciliary care sector was at the same time losing staff and having to hand back existing care packages.

Recruitment

The largest challenge facing the sector has been the recruitment and retention of staff at all levels. Many care homes have reported vacancies which they report has impacted on their ability to take on new placements. The staff shortfall has been made worse by staff who are unable to work because they have Covid. This has meant a significant reliance on staffing agencies. We have also noted a number of changes across the sector in management staff.

Inflation

Since the beginning of 2022, the rate of inflation has increased at a faster rate and higher than the rate of increase for fees that are paid to care home providers. Utilities, fuel and insurance costs have also increased dramatically. This is proving very challenging for many providers, who, after managing through the pandemic, are finding it difficult to absorb these costs at a time when government financial support for COVID-19 has stopped.

Gwynedd market stability

Older people's care homes

With the increase in demand there are concerns that the market cannot respond sufficiently and quickly enough to demand given the current staffing crisis.

There has been an increase in the number of providers reporting that older people's residential and nursing fees are inadequate. Providers are frustrated when they report cost increases and are not offered higher payments. There is an increase in top-up charges for residential and nursing care. There's also a slowdown in the number of the workforce registering.

The threshold for self-funding has been increasing and is currently at £50,000 which means that less people are self-funding. Self-funders have a right to have their care commissioned through the council which has implications on the ability of care homes to ask for higher fees from self-funders.

Physical disability, mental health and learning disability

Each provider is different with some having more support needs than others. The pressure on them from time to time means that they cannot be in a strong position, for example, to respond to tender opportunities, or to tender for the Supported Housing Agreement. Providers who support individuals with severe and complex needs regularly contact the council to report that the level of inflation offered by the council is insufficient.

Impact of Covid-19

Some nursing providers have made the most of the financial support available, such as voids, general sustainability support, support for staff and visitor testing. It is noted that the largest providers were bidding for support, with smaller providers tending to inquire later and finding it difficult to keep up with the guidelines and guidelines support available. There is concern over the impact that the end of the financial support will have.

Flexibility of the market

There is potential for adaptation within Council care homes. Potential to adapt roles / tasks within domiciliary care plan but need support from provider to implement. Staffing is a major issue at present for domiciliary care providers and care homes.

Causes of potential business failure and contingency planning

Concerns are identified either through information shared by Care Inspectorate Wales (CIW) or as part of the Quality Assurance Team weekly contact. The team provide early intervention and support if any issues surrounding the viability of businesses arises. Recent financial support (COVID-19 Funds), such as support for additional empty beds due to the pandemic were met by the Hardship Fund and general market sustainability support were offered through a remedial fund through the government's recovery fund. There were no such funds available directly from the council before the pandemic except as a last resort or emergency measures and the current COVID-19 financial aid comes to end at the end of March 2022.

Gwynedd Council are currently looking to start an Open Book Accounting approach with care homes in order to better understand each other's financial obligations/limitations in order to establish whether there are areas we can offer support be that financially or by offering support to the care homes in streamlining their procedures

Care home closures

Gwynedd have had 4 homes close in the last few years. Two residential homes (Llwyn in May 2018 and Foelas in April 2022) and two nursing homes (Penisarwaun in July 2018 and Penrhos in December 2020). It is increasingly difficult for small independent care homes to be financially viable and this may contribute to further closures in the future.

Conwy market stability

Home closure

In the last year two homes have closed in the county. One was a smaller provider and the building maintenance costs of the older converted building exceeded the potential income from residents. The owners tested the market for sale but there were no offers. Conversion to nursing or older people's mental health (EMI) care was considered but the home was not sufficient size or layout to give the required return on investment and the home was closed. The second home that closed was larger and successful. There were no issues with vacant beds or quality of service, but having made enquiries for a lengthy period of time there were no buyers for the business when the owner was ready to retire, so the service closed. In both cases the residents of these homes were successfully re-located to other homes in the county.

Demand for places

Demand for care home places dropped in the early stages of the pandemic during 2020, but saw a significant increase in 2021-22 as the early effects of COVID-19 started to pass and as a result of shortfalls in the domiciliary care sector. We saw a significant increase in the number of people presenting and needing an assessment, but the mostly private domiciliary care sector was at the same time losing staff and having to hand back existing care packages. Most of the increase was on the coast in Colwyn Bay, Llandudno and the surrounding areas for residential and nursing placements. There is not yet data available on the demand for older people's mental health (EMI) care which we feel has also increased.

The number of out of county placements has slowly reduced.

Recruitment

The largest challenge facing the sector has been the recruitment and retention of staff at all levels. Almost all care homes have reported vacancies for health care assistants, senior health care assistants, nurses and domestic staff which they report has impacted on their ability to take on new placements. The staff shortfall has been exacerbated by staff who are unable to work because they have COVID-19. This has meant a significant reliance on staffing agencies who in some cases have been providing 20% to 50% of the staffing for some providers. We have also noted a number of changes across the sector in management staff. Consultation with providers has identified several possible reasons for the recruitment challenge:

- Exiting the EU has had some impact on health and social care, but has had a significant impact on other sectors such retail and hospitality which are very large in Conwy county.
- Competition from retail and hospitality. Care homes report staff leaving to join these two sectors who have increased pay and conditions to attract new staff. The work is often seen as less stressful with more reasonable hours.
- Early retirement. Many providers report staff members taking early retirement during the pandemic.
- Competition from better paid jobs with the health board, local authority and recruitment agencies.

Inflation

Since the beginning of 2022, the rate of inflation has increased faster and higher than the fees that are paid to care home providers. Utilities, fuel and insurance costs

have increased two and sometime three fold compared to previous years. Having managed through the pandemic, many providers are not able to absorb these costs at a time when government financial support for COVID-19 has stopped.

Denbighshire market stability

There has been increased focus on supporting people to remain independent in their own homes for longer. Most people say that they do not want to live in a residential care home if there is an option to remain independent. Denbighshire use “What Matters” conversations with people to enable us to agree the appropriate outcomes of their care and support. We use the resource wheel to ensure we include support that people have from family, friends and communities when discussing how to work towards the agreed outcomes.

There is a diverse provider base in Denbighshire. However, there are limited older people’s mental health (EMI) residential and nursing placements available.

The market is diverse with homes of varying size, in-house and independent. However, the majority are small, independent care homes in older buildings that are not purpose built.

The Contracts and Commissioning Team work closely with providers and offer support that is required.

There has been a lack of trained nursing staff available in the south of the county, meaning Llangollen Fechan faced prohibitive agency fees and therefore decided to cease dual registration for both residential and nursing care, concentrating only on residential beds. This means fewer nursing beds in the south.

A small provider, Chesterton found it was not financially viable so a managed closure took place with weekly meetings between council staff and home managers. All residents were relocated in a safe and acceptable manner.

The pandemic has highlighted the problems of economic viability of small, independent care homes. Difficulty recruiting and retaining staff, lack of flexibility in layouts and facilities have all indicated that there may in future be a move to larger, more modern or purpose-built buildings where economies of scale give greater resilience.

Gaps in service / support:

- Welsh speaking support staff (mainly in the north of the county)
- Social enterprises and independent providers who are based in the south of the county
- Short term, progression focused interventions with agreed outcomes
- Alternatives to traditional services (including respite and day activities)

The learning disability register and housing needs data show that numbers are not changing significantly but the complexity of need is increasing.

In the provider survey for this report, Denbighshire providers reported an average required occupancy of 85% for sustainability. Current average occupancy is 78%. At the time of the survey there was a vacancy rate of 25% in Denbighshire, this was higher than the regional average of 20%.

Denbighshire County Council recognises the value of nurturing and supporting good quality providers - for example, during Covid-19 steps were taken to proactively avoid provider failure. At the same time budgetary pressures mean that commissioners cannot always respond to fee requests in the way that providers would like them to. Generally, we have a good relationship with most providers. This can be more difficult to maintain when we need to raise concerns with a provider (e.g. regarding quality or safeguarding) and when negotiating fee increases or de-commissioning a service. During the pandemic we tried to ensure that providers (for example external day services) could survive financially and we also worked closely with providers on helping to keep people safe and well.

Provider to provider relationships improved during the pandemic and there were good examples of peer support and camaraderie between providers. One long standing good example is a local care home who led on the Person Centred Planning (PCP) community of support, with other mainly domiciliary care providers attending - each sharing good practice regarding person centred approaches, and with guest speakers talking about new initiatives in Denbighshire. Relationships in this meeting are supportive

Other challenges identified are:

- Recruitment and retention.
- High sickness absence.

- Ensuring sufficiency of placements in the local area, are able to meet the individual's level of need, while still supporting choice and control and preventing admission to acute and community hospitals.
- Lack of suitable overnight respite accommodation that can be pre-booked - unpaid carers have difficulty trying to find residential/nursing homes willing to accept people on a one off or occasional basis, particularly if they have higher needs / exhibit challenging behaviour. This may be due to funding, staffing or something else. There is a respite flat in Corwen but this is not well used mostly due to lack of availability of care packages. Staff at a nearby home don't have capacity to cover although not far away. Respite accommodation for people with complex disabilities is very limited - Alexandra House only. Ongoing negotiations with Alexandra House and Conwy CBC.

Flintshire market stability

Flintshire has a diverse provider base with no reliance on one provider but limited nursing and nursing older people's mental health (EMI) placements. The market is diverse with homes of varying size, in-house and independent, family run or as part of a larger organisation. The council is moving ahead with increasing capacity in in-house residential provision. The Contract and Commissioning Team work closely with providers on both entry and exit to ensure the process runs smoothly, offering any support that is required. Although the market is robust and each provider has contingency plans in place to deal with the majority of issues, the COVID-19 pandemic presented exceptional circumstances and providers did not have this included in their plans. These have since been updated.

Business diagnostic reviews conducted with 18 homes in 2017 identified the following issues related to stability:

- Group owned care homes had back of house support and central administration which seemed to reduce time pressures and workload compared to smaller independent homes.
- There was no discrimination identified between private and local authority funded patients but providers were requesting top up fees from local authorities due to financial pressures.
- Recruitment and retention: affected by the size of the home and the way it's managed, it helps to be on a main bus route, some concerns about image of the sectors, wages and competing with the NHS for staff.

- Sickness and absence rates are high and policies in place. The most common cause of absence is sickness and diarrhoea.
- Many homes are in older buildings with poor energy efficiency and difficult to alter. There was more space to expand and better outside space in rural homes, but these are also less convenient to access. Heating costs were a big concern and some homes suggested a joint procurement policy may help give them stronger buying power. Homes would appreciate advice on waste policy too.
- No clear view on minimum number of residents needed to make the home viable, but aware of whether they were losing money or not.
- Appreciation of a recent grant for asset purchase and recommendation for an asset library where expensive, occasional used equipment could be borrowed rather than purchased outright.
- Finances are challenging requiring top ups to local authority fees and a proportion of private patients to survive. The increase in the living wage, a general reduction in unemployment rates, increase in employment and the unknown impact of Brexit suggests that the pool of candidates will get smaller. Profit margins are tight and any increase in interest rates plus increases in other overheads such as business rates, fuel costs and food costs will have an impact on the long term sustainability of the sector.

Since the pandemic the market has become extremely unstable due to:

- Residential and nursing homes going into administration
- Residential and nursing homes being taken over leading to instability and significant changes in services
- Lack of staff due to retirement or leaving the business
- Low number of nursing placements and no providers with open placements to ensure stability of the placement
- Lack of funding to try to assist the providers during a difficult time
- Care Home closures, this could be due to a number of factors such as financial or lack of qualified staff
- Recruitment within Social Services sector is an ongoing concern, this is having an impact on the sustainability of provisions

Discussions with Responsible Individuals highlighted the following issues:

- Rapid changes in guidance
- Cost of living increases

- Hardship Fund tapering
- Recruitment and retention
- Good carers who are not IT savvy and not looking to upskill and undertake additional training for registration

Wrexham market stability

All Wrexham's care homes are outsourced and they are currently evaluating the medium to longer term viability of the private residential market and considering how they might deliver intermediate, short term care solutions in the medium to longer term as this market seemingly has some limitations to delivery in this context.

Fee setting methodology, budgets and lack of agreement regionally on the Pre Placement Agreement which sets the overarching terms and conditions is also hampering flexible, responsive residential care commissioning.

Barriers to entry into the market include suitable facilities and properties and the costs involved in development of a potential property. Plus, the already difficult recruitment market/staff shortages in established facilities. Ideas for ways the local council could support include; assistance to source suitable property, cash incentives, loans to assist with set up and possible recruitment assistance. The lack of flexibility in regional frameworks to reopen may also be a barrier. The council could work with Care Inspectorate Wales (CIW) and Social Care Wales to enable swifter registration processes and inflation beating budget uplifts.

All contracts are subject to regular monitoring under the terms and conditions and this should pick up any potential problems/issues at an early stage to enable preventative measures and/or emergency measures to be put in place to try and avoid a crisis. The main indicators would be; reported difficulties in recruitment, retention of staff - large numbers of leavers, always had difficulties in retaining staff in the industry as a whole, monetary losses, no reserve funds, possibly the accommodation not being suitable moving forward and no funds to make changes. Escalating concerns process including engagement with other commissioning councils.

Escalating concerns

Identifying escalating concerns within care homes is part of the council quality assurance process, with the process leading to improvements in service

performance and quality and a positive impact on staff. This information can change quickly but is included below as a snapshot.

- Anglesey: No providers currently under escalating concerns (May 2022).
- Gwynedd: One home under escalating concerns for business/financial reasons. As at 31 March 2021, there were three providers in the escalating concerns process, with one other about to be placed into escalating concerns. The reasons for implementing the escalating concerns process with those four homes can be summarised as leadership, management and oversight.
- Conwy: One provider under escalating concerns at the time of writing and one further provider during the pandemic. There is a good relationship between the providers and local authority on the whole with areas of concern identified early and resolved without the need for the formal procedures.
- Denbighshire: 2 providers currently in escalating concerns (May 2022) but has been up to around 6 at the height of the pandemic. During the pandemic Denbighshire County Council's policy was to use the escalating concerns process during an outbreak in any care home. This ensured that there was a structured approach to meetings and a multi-disciplinary team was involved.
- Flintshire: 5 care homes placed into escalating concerns between April 2015 and March 2021. Non-compliance/immediate action notice issued to 3 care homes between April 2019 and March 2020 (excludes 3 providers with new owners)
- Wrexham: Three care homes placed in escalating concerned during the reporting period to March 2021, with two of those homes having completed the process within the timescales. One home remained in the process supported by social care and health colleagues until April 2021.

Care home closures

Lessons learned from care home closures

What worked well

Experience of recent closures highlight the following:

- Good working relationship between Care Inspectorate Wales (CIW), the council and health board with colleagues from Continuing Health Care (CHC) and community nursing leads involved alongside social services senior staff, social workers and contracts and commissioning officers.
- Linking to advocacy.

- Provision of list of current vacancies in the sector.
- Health colleagues working with social care staff in Community Resource Teams building stronger relationships, shortening time to achieve outcomes and improving experience for residents.
- Social services senior staff, social workers and contracts and commissioning officers working more closely to improve dialogue and co-working across operational and business support teams.
- Person-centred, outcome focussed work across all teams.
- Regular communications with providers
- Importance of initiating discussions as soon as possible to facilitate joint planning and working.
- Allocated team of council staff to support people with their packing and accounting for their belongings, alongside providing a council presence in the home.

Challenges

- Could provider failure have been anticipated, risk assessed before notice given? Difficult to anticipate based on intelligence available. Perhaps a joint process could be developed based on experiences to guide future scenarios.
- Ensuring sufficiency of placements in the local area are able to meet the individual's level of need, while still supporting choice and control. Also, preventing admission to acute and community hospitals.
- Managing expectations and emotions of staff and residents during the process.
- Understanding equipment ownership – what belongs to the home, Health Board, Stores, Welsh Government such as personal protective equipment (PPE) and ensuring this is moved to a new setting alongside the resident.
- Working with third parties such as administrators. Differing opinions and expected outcomes, accuracy of information, understanding of Welsh policy.
- Maintaining safe level of staffing at the closing setting.
- Accessing staff files to support ease of employment to new employers.
- Complexities of a new provider taking over the home as a going concern. In particular, if there are restrictions on their registration.

Denbighshire supported providers to update contingency plans during the pandemic when new and exceptional difficulties were experienced. Denbighshire Council staff have worked alongside providers when staffing has been impossible to resource otherwise. Brought providers together to foster better relationships and share best

practice, for example, around infection control. Monitoring visits are not yet back on track since the pandemic but all homes with possible risks have been visited and interim measures included phone calls. Provider engagement meetings are now monthly but very poorly attended.

Flintshire has also found that moving away from systematic annual monitoring visits to a practice development approach has helped develop effective constructive and professional relationships with providers, which have been critical in enabling them to meet the challenges of the pandemic together.

Feedback from care home residents

All counties have systems in place to consult and engage with care home residents. A summary of feedback received is below:

- Positive feedback, particularly focussed on staff providing support. They were described as very caring, having time for people and supporting with all aspects of personal care and related needs. Managers and office staff were also mentioned in terms of being approachable and sorting out problems when they arrive. Everyone also said they felt safe in the buildings.
- Some issues were raised by individuals, not often but still important, including training and reminders to staff about issues such as knocking and waiting at doors, use of mobile phones and how their approach to tenants is important. For example, not rushing, treating them as an adult.

Feedback from providers

- Citizen's having rapid deterioration or life changing events such as a stroke then losing mental capacity with finances. Often no Lifetime Power of Attorney (LPA) in place. It would help to promote LPA more and this could reduce the council deputyship waiting list and workload.
- Transport is a huge issue for older people, particularly those living in rural areas and those with limited mobility. Bus services are very limited especially in rural areas and public transport is often not fully accessible or wheelchair friendly. Dial a ride is excellent but only operates in the North of the county and is not cheap. Taxis are expensive and not always available or accessible. One did need a mobile phone to book the new Flecsi bus – now amended.
- Welsh language capacity is problematic.

- Pressures around recruitment and retention with staff leaving sector following the stresses of COVID-19 and the ability of the sector to pay a competitive wage (compared to other sectors such as retail). Regulatory requirements. Lack of skills regarding bid writing and understanding the requirements of a tender process.

Impact of commissioning processes on the market

Each council has systems in place to support and liaise with providers, including regular meetings and discussions with providers and support with training and resources. Examples include Flintshire's 'Progress for Providers' Programme in Care Homes which is a self-assessment tool for managers to use with their staff to check how they are doing in delivering personalised support for people living in care homes.

Supported Living

North Wales commissioners from the six local councils and health board worked together to develop a Supported Living Framework which went live on 1 April 2020. Multiple service providers have already been admitted to the framework agreement following the requisite due diligence and quality checks. This enables commissioners to commission services adopting the framework agreement which can streamline processes while remaining in accordance with relevant legislation and the local authority Contract Procedure Rules.

Denbighshire County Council have 41 supported living contracts due to end 31 March 2023. These have been in place for many years and extended numerous times with a view to re-tendering. Discussions are currently underway regarding how best to re-tender. The concern is that re-tendering could have a destabilising effect on the local market exacerbating existing issues with retaining staff and risking providers handing existing contracts back rather than bid for more. Discussions are underway about what approach to take.

Welsh language

Around 24% of social care staff in North Wales can communicate effectively through the medium of Welsh (Social Care Wales, 2018b)(Social Care Wales, 2018). Across

North Wales 20% of registered care home managers are fluent Welsh speakers, which is highest in Gwynedd where 57% fluent Welsh speakers.

Engagement in Denbighshire identified receiving services in Welsh was a high priority in the Denbigh area and there is not enough care provided through the medium of Welsh in the south of the county. Many staff have some Welsh language skills but lack confidence so an internal project is looking at ways to improve this. An inspection of Cysgod y Gaer care home in Corwen in March 2022 identified that the service does provide an 'Active Offer' of the Welsh language and that it anticipates identifies, and meets the Welsh language and cultural needs of people who use, or may use, the service.

Social value and preventative services

The concept of social value includes the following.

- The value experienced by the users of a service, delivering 'what matters' and co-producing services with people who use them.
- The added social, environmental or economic value a contract can provide over and above the core requirements.
- The duty local councils have to promote social care and preventative services provided by social enterprises, co-operatives, co-operative arrangements, user led services, and the third sector (Welsh Government, 2014).

The Wales Cooperative Centre (2021) has produced a guide to raise awareness of potential social enterprise and co-operative models in the care home sector.

We want to promote 'social value models of delivery' that:

- Achieve well-being outcomes.
- Work co-productively – giving users a strong voice and real control.
- Have a preventative and dependency-reducing orientation.
- Incorporate collaboration, co-operation and partnership.
- Add value - social, economic and environmental.

As well as to promote activities that maintain or strengthen the well-being of unpaid carers and community capacity beyond the market – without which the market cannot be stable.

Each county supports a range of preventative services which can help people to remain in their homes and avoid the need for residential or nursing care. This includes regional projects funded through the Integrated Care Fund (ICF) including falls prevention projects and step up / step down care. 'Step up' is an intermediate care function to receive patients from home/community settings to prevent unnecessary acute hospital admissions or premature admissions to long term care. 'Step down' is an intermediate care function to receive patients from acute care for rehabilitation and to support timely discharge from hospital.

Projects include; community agents, navigator and social prescribing projects which link people up to support and activities available in their local community. They also include; befriending, advocacy and respite services.

The Micro Care and Community Catalysts projects provides support to micro providers to enter the care markets. Direct payments are used to help people access personal care and live as independently as possible.

There is more information about preventative services available in North Wales in the [Population Needs Assessment](#).

Workforce

The table below shows the number of registered adult care home managers in North Wales at the 1 April 2020. Analysis of the data shows:

- In the last year 46 managers left the register and 31 joined, a turnover of 14%.
- The ratio of women to men is 6:1 and 230 are aged over 51.
- Around a third of registered managers have some Welsh language skills and 20% are fluent.

Table 6: Number of registered adult care home managers, 31 March 2020

Local council	Care home managers
Anglesey	30
Gwynedd	61
Conwy	67
Denbighshire	66
Flintshire	39
Wrexham	47
North Wales	310

Source: Social Care Wales, Registered adult care home managers

A regional survey carried out for the Market Stability Report identified that 1 in 5 care worker roles are vacant across the region, including senior care worker and care worker roles.

There are some concerns that since the introduction of the Regulation and Inspection of Social Care (Wales) Act 2016 more homes are offering both residential care and older people’s mental health (EMI) residential care without necessarily providing separate facilities for different residents and possibly without having suitable skill sets and arrangements in place.

There is an increase in training needs due to the lack of available training on offer during the pandemic, which include basic training such as inductions and manual handling.

There are some concerns that staff may have moved away from a reablement ethos due to pressures during the pandemic. For example, individuals becoming very deconditioned due to lack of activity and staff not promoting simple forms of independence, such as going to the toilet unaided.

Local authorities report that it is becoming more difficult to recruit care home managers. Alternative approaches such as the [‘Grow Your Own’](#) (The King’s Fund, 2006) may have the potential to create the conditions for sustainable workforce development.

4. Domiciliary care services

Population overview

It is predicted that the number of people aged 65 and over who struggle with activities of daily living will increase by 25% increase by 2040

There will be more people aged 65 and over living alone

The composition of households can also affect the demand for services to support independence. Data from the 2011 Census shows that there are 44,000 people aged 65 and over living alone, which is 59% of all households aged 65 and over.

Research by Gwynedd Council found a strong relationship between the number of people aged 65 and over who live alone and the number of clients receiving a domiciliary care package in an area (Regional Partnership Board, 2022).

Moreover, around 28% of people in Wales have such low incomes that they do not contribute to the cost of their domiciliary care (CSSIW, 2016). It is anticipated that 30% of people have enough capital to fund their own care in both domiciliary care and care homes (CSSIW, 2016).

Table 7: Predicted number of people aged 65 and over who struggle with activities of daily living

Local council	2020 number	2020 percent	2040 number	2040 percent	Change number	Change percent
Anglesey	5,100	27%	6,550	29%	1,500	23%
Gwynedd	8,000	28%	10,050	29%	2,050	20%
Conwy	9,450	29%	13,050	30%	3,600	27%
Denbighshire	6,450	27%	8,800	29%	2,400	27%
Flintshire	9,150	27%	12,350	29%	3,250	26%
Wrexham	7,550	27%	10,000	29%	2,450	24%

Market sufficiency

Market overview

The average number of hours of domiciliary care per week commissioned by each local authority and the health board is summarised in the table below.

Table 8: Average local authority/health board Commissioned domiciliary care hours per week

County	Older person	Learning disability	Older person mental health	Physical disability	Total
Anglesey	3644	390	-	582	4616
Gwynedd	-	-	-	-	11144
Conwy (a, b)	8024	5523	382	-	13930
Denbighshire	-	-	-	-	5150
Flintshire (c, d)	6,047	913	22	1,160	8142
Wrexham	5599	638	1196	955	8388
North Wales					44558

Source: Local authority data collection. Some figures are rounded so may not sum.

- (a) Learning disability figure also includes physical disability
- (b) Figure includes direct payments
- (c) Learning disability floating support (not in supported living accommodation)
- (d) Older person mental health - independent sector, but majority of support provided by in house mental health team

In terms of the balance of the market, on average more than 70% of the North Wales domiciliary care market is comprised of independent sector providers with the remainder a mixture Local Authority and Third Sector providers. However, this does vary according to local authority. For example, Gwynedd have 44% of domiciliary care being provided internally currently and 56% through the independent sector, whereas in Flintshire the local authority currently provides around 10% of the domiciliary care provision.

Table 9: Percentage market estimated share of domiciliary care sector by type

County	In House	Independent sector
Anglesey (a)	18.5	81.5
Gwynedd	44	56.0
Conwy	9.7	92.3
Denbighshire	10	90.0
Flintshire	10.5	89.5
Wrexham	3	97

(a) Average rate across all population groups

(b) Supported living

(c) Majority of older person mental health supported in house, no average provided.

Regional market overview

Domiciliary care is a priority market identified by commissioners, with current private sector providers unable to fulfil the demand for a significant amount of time now. As such, growth and development of services including general domiciliary care (includes homecare, re-ablement; community living and recovery) have been identified as opportunities for the future.

Isle of Anglesey market overview

In Anglesey, demand is currently exceeding supply (March 2022) due to shortage of staff within domiciliary care providers.

Gwynedd market overview

In Gwynedd there has been insufficient domiciliary care provision to meet need across Gwynedd, particularly in the Eifionydd and Pwllheli area at present.

In Gwynedd, currently there is a lack of available domiciliary care, and the nature of current arrangements mean that providers can refuse to give care, or return

packages. Frequent emergencies can occur, where providers report that they are no longer able to provide care due to staffing problems.

Currently, people have little choice in the field. Getting any care is a challenge, let alone having a choice. People can choose to get Direct Payments to arrange their own care, but it is not easy to find people who can offer care. A project with 'Community Catalysts' has started, to encourage people to set up a small company to provide care, and hopefully this will improve the situation.

Conwy market overview

The numbers of people who receive domiciliary care packages in Conwy has declined over the past four years, as can be seen in the table below.

There have been a couple of principle reasons for this, the impact of COVID and carers workers leaving the sector with the sector unable to recruit new staff.

As it can be seen that during the last 12 months the numbers of citizens receiving domiciliary care had dropped dramatically and evidence from providers is that this is directly due to lack of domiciliary carers. During the May to November 2021 period approximately 950 hours of domiciliary care packages have been handed back due to private sector agencies unable to meet demand.

Table 12: Numbers of people who receive domiciliary care packages in Conwy

Year	Total clients
2017/18	898
2018/19	818
2019/20	799
2021/22	717

Source: Local authority data collection

As of this week 2 of April 2022 there are 698 packages begin delivered to older people across Conwy.

The table below shows the total number of packages and hours that are being delivered, week 2 April 2022. The areas in this table are shown as the Community Resource Team (CRT) Areas.

Table 13: Total number of domiciliary care packages and hours that are being delivered in Conwy (April 2022)

CRT area	Packages	Hours	Average hours per package
Abergele	146	1,709	11.7
Colwyn	206	2,251	10.9
Llandudno	172	2,217	12.9
Coastal	91	1,166	9.0
Rural	83	747	9.0
Total	698	8,091	11.6

Numbers have been rounded so may not sum

Source: Local authority data collection

It can be seen that the Colwyn CRT area has the most packages and Rural has the least. It is also interesting to see that the Llandudno and Coastal areas don't have the most packages but the average hours per package is higher than any other area, this is probably due to the average age of the population in those areas and the fact that they need more intensive support packages.

Denbighshire market overview

There were 585 people who received domiciliary care in Denbighshire during 2020-21. This number has increased over the last year.

Table 14: Demographic of people accessing domiciliary care in Denbighshire

Age group	Percentage of Provision
18-24	1%
25-64	19%
65-74	11%
75-84	24%
85+	45%

Source: Local authority data

Denbighshire does not have enough providers to give people a real choice or to give an element of competition in the market. Commissioners have unmet demand and are unable to provide domiciliary care for all requests. For example, at the end of March 2022 there were 116 people waiting for domiciliary care packages, of which 26 were receiving interim support. The Interim Support Team's function is to provide domiciliary care and support for a short period of time whilst care packages are secured through the provider sector. There are particular challenges in the south of the county where we have minimal independent provision. Our in-house team are only working in the south and their intervention often ends up being long term due to lack of alternative provision. Moreover, the re-ablement teams, both north and south, are finding they are picking up urgent care packages on a regular basis and this in turn has an impact on our ability to offer re-ablement services.

The range of care needs is wide and includes:

- frailty due to age related conditions
- physical disabilities
- learning disabilities, including autistic spectrum disorders
- sensory impairments
- chronic illness
- long term health conditions
- dementia
- mental health, including depression, anxiety
- substance abuse
- palliative care

We are working with Community Catalysts to ensure that Denbighshire residents are able to access the kind of care and support that suits them best. In addition Community Catalyst supports citizens who wish to, to provide care and support in a way that fits with their lifestyle.

Community Catalysts

Community Catalysts is a social enterprise working across the UK to try to make sure that people who need care and support to live their lives can get that help in ways, times and places that suit them, with real choice of attractive local options. They help people across the UK use their energies and talents to set up 'community micro-enterprises'. Community micro-enterprises are really small businesses or ventures or groups that offer help with care or health or wellbeing to local people in their area.

Community Catalysts has lots of experience and expertise and can offer people who want to set up a new care enterprise specialist advice and guidance, so they can do this safely and well.

In Denbighshire, Community Catalysts has been commissioned by the Council to use its expertise to help to tackle social care challenges.

Moving with Dignity / Right sized Care

For many years, it has been established practice across health and social care for people who need to be hoisted, or cared for in bed, to have a care package with two people to assist and carry out the care.

It is unknown where or how, this practice became established, but with innovations in moving and handling equipment and a move to a more person-centred care & support approach, this requirement is increasingly being questioned and challenged.

It has been estimated that at least 37% of Denbighshire citizens could be assisted by one carer (instead of two), with the additional benefits of maintenance of dignity and comfort together with the increased flexibility derived from the provision of only one carer. More specialist moving and handling equipment is being designed and manufactured to facilitate single handed care allowing our Citizens to have their care needs addressed with the minimum of support and intervention.

Denbighshire have been promoting this way of working across Health and Social care and training staff so that they become more familiar with specialist moving and handling equipment and so they are more confident about supporting our Citizens to have their Care needs addressed with the minimum of intervention.

The Moving with Dignity project incorporates promoting independence and appropriate handling techniques for care provision. Using kindness and a gentle, compassionate approach, it involves looking at the number of carers required to attend to a person's needs, when being lifted, transferred or repositioned using specific techniques and items of equipment.

During the last year 5 sessions were held with Occupational Therapists to refresh skills using bed management systems. As a result, the Nordic bed management system is now core stock and can be ordered directly from our Community Equipment Service (CESI) which has reduced the delay between the initial assessment and providing beds to citizens.

Formal training sessions were held with 22 care staff from our in-house Independence at Home team. Following on from the training, the team are now working towards ensuring that care packages for those being discharged from hospital are considered within the ethos of Moving with Dignity before the care is transferred to external domiciliary care providers.

A pilot project was implemented with one Domiciliary Care agency, whereby the Manager and Moving and Handling trainer received an awareness training session to discuss the ethos of Moving with Dignity, which they are now rolling out with their care team. The aim is that once all training has been completed, work will be carried out to review all double handed packages of care

Our Moving with Dignity project lead completed a training session with Betsi Cadwaladr University Health board (BCUHB) Moving and Handling trainers to discuss single handed care.

The newly created Adult Social Services Edge of Care Team fits with our strategic vision for a modern, more effective way of delivering social care support that strengthens individual and community resilience. The Edge of Care team is unique in that it is based within Adult Social Care Services and recruits, trains and deploys Volunteers. The Manager is a qualified Social Worker and Outcome focussed mentor. Two Edge of Care Coordinators support the Manager to deliver the project.

The Team has demonstrated how the project can positively impact on planned care pathways, supporting discharge from hospital for citizens, working closely with our Community Resource Teams in delivering a 'team around the individual' approach, reducing demand for traditional planned care. For example; we have volunteers providing respite to carers, with careful and considered matching of 'cared for and volunteer', the result has been an experience that is meaningful and enjoyable for both carer and cared for. We have examples of where citizens have remained on the 'edge' of planned and unplanned care for example Mental Health Services, Care Home placement and traditional domiciliary care, keeping citizens in the community

Flintshire market overview

With regard to the demographic of people accessing domiciliary care in Flintshire, the largest group are people aged 85 and over, see the table below.

Table 15: Demographic of people accessing domiciliary care in Flintshire

Age group	Percentage of provision
18 to 24	1%
25 to 64	17%
65 to 74	12%
75 to 84	27%
85 and over	43%

Source: Local authority data collection

Of those under the age of 65, a similar proportion of people receive support for a learning disability as a physical or sensory impairment.

As previously reported, the population changes over the next five years will have an impact on the sufficiency of provision. This increase number of people living in the community with dementia and complex needs may increase the demand for domiciliary care services, in particular 'double staffed packages of care'. This is something the authority needs to consider in order to continue to support individuals to live at home for longer.

Flintshire In-house Community Support Service provides care and support for adults who have an assessed need in their own homes. The service is split into three geographical localities and the service is delivered via a team of care staff who work across the whole of Flintshire. These three localities replicate social work and health teams locally and this aids in continuity and developing working relationships across different professions. The three localities are:

- Locality North East – Deeside area
- Locality South – Mold / Buckley area's
- Locality North West – Holywell / Flint area's

The Community Support Service adopts an ethos of re-ablement and supports people in line with the Social Services and Wellbeing (Wales) Act 2014. The Community Support Service provides services to people over 18 years who have

been assessed as having a social care need living in Flintshire. The Community Support Service provide support for a range of health and care needs, including:

- frailty due to age related conditions
- physical disabilities
- Learning disabilities, including autistic spectrum disorders
- sensory impairments
- chronic illness
- long term health conditions
- dementia
- mental health, including depression, anxiety
- substance abuse
- palliative care

The Community Support Service support people via three different care and support models/approaches which vary depending on the individual and what matters to them.

Re-ablement - designed to support people to regain, improve and maintain their daily living skills and maximize their independence whilst continuing to live in their own home. This is a short term service which can be provided for up to six weeks. The service has close links with hospital discharge teams and plays an important role in contributing to a reduction in hospital admissions and readmissions and works closely with a range of professionals including Occupational Therapists, Social Workers, Physiotherapists and District Nurses. The service also plays an important role in working with people to achieve their own personal goals to aid integration back into their own environment at home and into their local community. The aim is to support people to maximize their independence as quickly as possible and ensure that if people need ongoing care and support this is at the appropriate level.

Living Well - provides flexible care and support for people living with dementia. The service is designed to allow independent living and aims to support people to stay active in their home and active in their community for as long as possible. The care and support is tailored around the individual. Care, support and activities are developed over time as the staff build up a relationship with the person and they understand what they need. This approach delivers positive outcomes and contributes to people living with dementia maintaining their independence for as long as possible.

People who have long-term complex care needs are supported to remain independent in their own home. This includes daily living support, helping to achieve identified goals, support with medication as well as end of life / palliative care as required. In supporting people with complex needs the service offers stability and reassurance, and can that can support people overcome a crisis as necessary.

In addition to Local Authority's in-house care provision, the Commissioners in Flintshire actively utilise 28 providers from the North Wales Domiciliary Care Framework. There are also a small number delivering supported living exclusively under an alternative framework.

Both independent sector and Local Authority services are currently delivering around 7500 hours of domiciliary care per week. Flintshire County Council in-house provision delivers approximately 12% of this market, but aims to increase service delivery in this area to support more people to live at home, in line with the Council Plan. These figures exclude the provision of Extra Care, from which the Local Authority delivers around 370 hours of care per week.

Wrexham market overview

The population of Wrexham is just over 135,000 according to the 2017 census. Over 45% (58,359) of that population are over the age of 45 years. Further 23% (31,700) of the population is over the age of 60 years. Those in fair health are 19,000 (14%), those in bad health are 6,500 (5%) and very bad health 1,800 (1%). Domiciliary care provision in Wrexham is provided through a patch-based model.

Of those there are a number who provide care services to those in need who are unpaid. These are broken down as follows: 8,900 provide 1 to 19 hours unpaid care a week; 2,200 provide 20 to 49 hours unpaid care a week and 4,000 provides 50 or more hours unpaid care a week. It is likely that over a five-year period all of these people will need to access services at some level.

Market stability

Regional challenges

A gap in services exists in relation to short home calls for support with medication. Neither health nor social care services provide calls only for medication, but older

people with memory problems do need this vital care (Regional Partnership Board, 2022).

The current economic situation with rising inflation and fuel costs, and wider cost of living pressures in early 2022 are creating instability for domiciliary care providers and their staff for example in-work poverty.

Decreasing budgets could present further challenges around the level of services which are able to be commissioned and provided. Across North Wales, providers have appreciated the support funding throughout the COVID-19 pandemic. For example, an additional £1m for domiciliary care which has provided stability during the pandemic. There is concern over the impact the end of the financial support will have.

Isle of Anglesey market stability

Post pandemic, recruitment and retention of staff remains an issue with the staff turnover rate in Social Services having increased in 2021/22.

There is an increasing demand for services, but budgets along with inflationary pressures are struggling to keep up with this demand.

Gwynedd market stability

Gwynedd has recently begun to establish the new domiciliary care model and early indications are very positive with providers having more recruitment successes. The domiciliary care tender opening in early April 2022 will give commissioners the opportunity to establish the new model across the county, and hopefully achieve much more stability thereafter. It is hoped that it will be possible to recruit more staff, achieve more with the same staffing level, and achieve greater efficiency (less travel and less bureaucracy) which results in more time to care and better outcomes for people (through focus on what makes a difference to the individual and tailor the care appropriately), through the adoption of the new model. The intention in the new model is to maintain the 50:50 split between the internal and external sectors for provision. The inclusion of the new contract for the external providers means that we have the freedom to adjust this ratio over the life of the agreement. Frequent emergencies in domiciliary care where providers report that they are no longer able to provide due to staffing problems. As the new arrangements come into effect a transition period will be required including effective shadowing and training.

Conwy market stability

The Independent sector market has been unable to fulfil the county's domiciliary care requirements since the pandemic. Conwy currently (April 2022) has over 900 hours of un-brokered care that the market cannot supply (60+ packages). This has been consistent for over 12 months and is being met by in house and BCUHB provision. Discussions with providers suggest that this is purely down to staff / recruitment problems faced by the sector. Things are slowly improving but at a pace too slow to meet the rising demand.

Denbighshire market stability

Denbighshire's in house provision adopts an ethos of re-ablement and supports people in line with the Social Services and Wellbeing (Wales) Act 2014, providing services to people over 18 years of age who have been assessed as having a social care need and living in Denbighshire.

Denbighshire's in-house provision consists of Re-ablement, Health and Social Care Workers and the Interim Support Team - all services are intended to be short term interventions.

The Interim Support Team's function is to provide domiciliary care and support for a short period of time whilst care packages are secured through the provider sector in the South of Denbighshire. Increasingly, all elements of the in-house provision are holding cases for longer due to the lack of domiciliary care available. Due to the low number of providers able to deliver care in the south of Denbighshire, there is a commitment to expand the in-house provision.

Across social care there have also been high levels of staff absence that are likely to be linked to high levels of stress and anxiety post the pandemic.

Commissioners are struggling to secure packages of care, particularly in the south of Denbighshire. The main reason for this is lack of available care staff. This is a long term problem which is worsening. Domiciliary care providers handed back around 600 hours of care packages in 2021 due to lack of available staff.

There is a good range of providers in Denbighshire, although not all on the framework actively bid for packages. The domiciliary care sector in the county has been severely affected by the pandemic. In particular, sourcing double handed care packages is a challenge, as is the lack of availability of care provision in the south of

the county and in rural areas. We are also aware that domiciliary care services in rural settings is more expensive – some research suggests up to 20% more, and the average hourly rate is up to 11% higher. Increasing costs of transport fuel is challenging for all providers

Denbighshire County Council are considering opportunities to develop enhanced domiciliary care provision for citizens with higher levels of care and support needs. The model would necessarily be flexible (rather than ‘time and task’), to support care staff to build relationships and person-centred working, gain enhanced skills through training and play a key role in care and support planning for citizens. Ultimately, the provision would have a clear outcomes focus, and success would be measured by those outcomes.

Denbighshire is hoping to conduct a pilot involving electric vehicles for provision of care during 2022.

Flintshire market stability

In Flintshire, the market is a mixed model with continued expansion of in-house domiciliary care. This is a priority for the Council to help rebalance the care sector. Independent care providers continue to work creatively with the local authority to ensure the numbers of people waiting for care at home are the lowest possible. However, during the last 2 years of the COVID-19 pandemic, this has been challenging.

We now start to see creative solutions including the use of electric vehicles to support domiciliary care staff through the proposed WG scheme. They will be used to support domiciliary care staff who cannot drive by accessing WG scheme to prioritise driving tests for domiciliary care workers who are awaiting a test date. Flintshire is continuing the expansion of Micro-care to support individuals locally. The market remains challenging, but all stakeholders continue to work in partnership to overcome the well-known challenges currently faced across the UK.

In Flintshire, considering independent providers only, no provider holds more than 12% of the independent market share in the local area when considering delivered hours, with the average for a provider being 4.5%.

With regard to the balance of the market in Flintshire, the vast majority (12 out of the 18) are local providers either exclusively in Flintshire, or within Flintshire and

neighbouring authorities. Another 4 provider's work across the North Wales region, while they also have 2 national providers.

In Flintshire, there are some critical pressures and key issues faced by social services in the areas of workforce, commissioning and funding criteria. The local authority is looking at how to address some of these issues through the reviewing of social work roles, improving the career pathway in social care, and offering greater clarity on the criteria applied to particular funding streams.

There are other challenges that local, regional, and national work-streams are looking to address, such as recruitment with WeCare Wales and children's placements, however it is important to note that these still present as critical pressures for the delivery of social services in Flintshire.

As of January 2022 in Flintshire, areas of ongoing pressure include:

- double staffed care
- rural areas
- discharge from hospital
- hand-back packages from providers as a result of staffing challenges
- increased business costs – utility bills and insurance
- increased fuel costs, impacting on care staff themselves.

Need outweighs supply in Flintshire. Due to the challenging financial climate and need to encourage more people into the care industry, consideration is being given to other ways for care to be provided for example Micro-care.

There is a challenge of a deficit of care workers, those requiring care are struggling with a decreasing pool of care staff. Large care agencies have premises and overheads to pay for and investors/stakeholders to satisfy, so care per hour costs are higher.

Within older people's services, there is a diverse provider base, no reliance on one provider or sector. However, within learning disability and physical disability services, there is a small number of providers to choose from who are relied upon to meet the needs of the service.

There is a broad range of services available depending on what the individual would prefer such as traditional homecare care, Micro-care and Direct Payments.

Wrexham market stability

There are currently (April 2022) significant shortfalls in all areas of domiciliary care and wider health and social care market in Wrexham which was not seen in the April 2021 figures and is likely a result of wider, national workforce and COVID-19 recovery challenges.

Rotational and other respite solutions also present significant challenges. A lack of capacity to deliver regular and flexible respite and short breaks continues to burden unpaid carers who are already feeling increased demands from their caring role as a result of COVID-19 and other workforce challenges.

More rural areas of the county prove most difficult in achieving sustainable domiciliary care services. Since April 2021, microenterprise capacity has grown and Wrexham have approached English agencies to support to meet the demand but the sustainability of these approaches is not evaluated.

There is little flexibility in the current market (April 2022) due to significant workforce and COVID-19 recovery challenges across health and social care. Whilst there has been a 30% reduction in domiciliary care waiting list times since April 2021, it remains significantly high with any short to medium solutions yet to be evaluated and tested in terms of their longer term market stability. COVID-19 recovery funding and hardship funding supported much of this recovery during 2021-22 with longer term financial stability remaining a challenge.

Domiciliary care registration can also hamper commissioning and service delivery flexibility. RISCA requirements, while attempting to drive up quality, can prove a barrier to some organisations and staff when recruitment is already a challenge. In addition, as a border town, Wrexham does rely on providers from England in some areas. Providers are restricted in the numbers of people they can support outside of Care Inspectorate Wales (CIW) registration which can be very lengthy.

Feedback from citizens and providers

While emergency care is being provided for older people who fall and are injured, a response service is needed for non-injured fallers and for out-of-hours domiciliary care. Currently, if an older person needs additional support due to an unexpected incident, such as their carer becoming unwell, they have no access to support (Regional Partnership Board, 2022)

“Independent domiciliary care providers told us they have managed to start care delivery within the 48 hours but it has been a struggle. The biggest challenges and delays are arranging care for people who have complex needs” (Care Inspectorate Wales, 2019a)

“Independent providers of domiciliary care told us about providing care for people who miss out on a period of re-ablement when there is no capacity in the re-ablement team. We found this is often because there is a waiting list for the service due to it being dominated by people being discharged from hospital with low level needs, requiring convalescence” (Care Inspectorate Wales, 2019a)

Feedback from the Regional Provider’s survey [February 2022] details the challenges faced by providers as:

- Recruitment of staff. The employment market is highly competitive and we must be able to offer a financial package to care workers, that is both competitive and worthy of the role.
- Retention of staff due to poor terms and conditions in the social care sector. The cost of fuel and the cost of living crisis is now beginning to be felt in the sector where providers are seeing more staff suffering in-work poverty.
- Staff leaving the sector due to poor working conditions and lack of respect for the work they do and the levels of responsibility involved. Staff feel undervalued and overworked.
- Retaining staff who are new to the sector who are not able to deal with the intensity of the job supporting people with conditions such as autism, people requiring personal care etc. Need better support for staff to meet the challenges of the role.

Providers also gave suggestions on ways to improve the sector and the quality of care, including:

- Enable flexibility in using commissioned care hours. Whilst appreciating budget restraints for all, it can be frustrating when trusted providers are not able to be flexible with hours etc. More time is spent justifying any variance, rather than being able to 'bank' these hours to achieve people’s outcomes and therefore improve quality. Sometimes flexibility is the best way when supporting someone (make the most of a particular mood or motivation).
- Development of true partnership working with providers.

- A level pay structure for all providers to stop the swapping from one to another for better rates.
- Recognition of the *true* costs of providing care services to enable providers to continue to provide quality services and attract / retain quality staff.
- More emphasis on using local providers instead of national companies with local offices.
- Shared resources between providers such as training of staff.

Other market stability factors

Consideration of market quality

Flintshire use *Progress for Providers* in care homes, a self-assessment tool for managers to use with their staff to check how they are doing in delivering personalised support for people living in care homes. 'Personalised Support' is a key aim of national policy and means tailoring support to the individual, and enabling them to have as much choice and control over their service and life as possible, rather than supporting everyone in the same way. The programme has been expanded to include domiciliary and extra care services in 2020/21.

In Denbighshire, commissioners have recognised the need to work with domiciliary care providers to embrace a more outcome focused approach. Further work will be done co-productively with providers in the future.

In Gwynedd, commissioners have worked with Health Board colleagues on 'Due Diligence' processes. All providers who apply to be part of the Council's new delivery model must meet certain requirements.

Impact of commissioning practices on the market

The Integrated Care Fund and Transformation Funding moving to the Regional Investment Fund's (RIF) five-year programme is welcomed, however we continue to work through the guidance and impact of the changes. Due to the value of this funding, it is critical that any changes in criteria are articulated with notice so local authorities and other partners can consider and plan services with this in mind.

Where there has been a need to commission directly with a provider, current procurement practice has often been a barrier to the need to act rapidly. Procurement processes have proved onerous and unattractive to certain providers,

particularly in the third sector, which then hinders the number of suppliers submitting tender applications.

The Contracts and Commissioning Teams in each Local Authority and the Health Board have facilitated regular meetings with residential care, domiciliary care and Supported Living providers. Whilst these meetings took place before the pandemic, their frequency increased. The support and networking became a vital resource for providers. The meetings were also attended by colleagues from the Environmental Health Team, Health and Safety Officers and BCUHB officers so partners could advise and support when needed

Alongside these meetings, a dedicated email address has been established where providers could pose COVID-19 related questions and queries where they could be responded to in a timely manner.

The team have also had daily phone contact with providers to collect data, enquire about PPE supplies, discuss any arising issues or just to be there to listen and support in this difficult time.

Denbighshire use Third Party Administered Support Budgets. This is where the money is transferred from the Local Authority directly to a third party who could be directly providing some of the person's care and support or providing a managed account service. The money is spent on whatever is agreed in the citizen's care and support plan to assist them in meeting their agreed outcomes. In this arrangement the third party holding the budget is responsible for paying providers or services and one off purchases and co-produce with practitioners.

Denbighshire will also continue to commission some long term managed care and support including domiciliary and residential care for those who need it.

Provision of service in the Welsh language

Information from the Population Needs Assessment (2022)2022 detailed that many care homes and domiciliary care providers find it difficult to follow through with the provision of a Welsh speaker. More needs to be done to attract Welsh speakers to the profession and to support staff to improve their Welsh. This needs to include opportunities for both complete beginners and those who need to gain confidence. Many organisations provide Welsh language training to their staff, either formally or informally. Examples included:

- Courses offered by the local council or health board.
- Lunchtime Welsh language groups.
- Welsh speaking staff delivering workshops to their non-Welsh speaking peers.

In the Provider Survey (February 2022) providers note that it is a challenge to recruit Welsh speakers within their setting, help and support to advertise/translate would be helpful moving forward for smaller companies.

Providers are actively trying to increase our use of the Welsh language, but difficult to sustain any learning when not using it frequently enough (on a personal level as well as for the organisation).

Flintshire note that as part of the Mwy Na Geiriau framework the Council ensures that service users and their families are in receipt of the Active Offer. Whilst this has been taken up for some social work assessments, individuals and their families are aware of the current shortage in care staff and we have not received requests for care to be delivered by Welsh speaking carers. They are however, very conscious of this and throughout the recent pandemic have observed an increase in the numbers of staff who are learning Welsh and those who are re-kindling previous Welsh language skills which may not have been used for many years. The Council works in partnership with our local Further Education Institutions to provide Welsh Language courses at all levels to meet individual's needs.

Denbighshire ensures residents receive the Active Offer whenever they contact the local authority for information, advice or support. In the provider network there is a general lack of capacity and lack of available services with Welsh speakers is an issue for them. Useful tools such as Welsh language symbols on files are used as timely reminders to staff. However, the recruitment crisis affects both Welsh and English speakers currently. There has been discussion about placing recruitment adverts in local Welsh language publications, such as Y Bedol.

The Gwynedd position in terms of Welsh speaking staff is highlighted in the table below.

Gwynedd has a significant Welsh speaking domiciliary care workforce, a significant proportion of whom are fluent Welsh speakers.

Gwynedd has invested heavily in the promotion and development of Welsh language skills amongst care staff and in recruiting care staff who are able to speak Welsh or

are willing to improve their Welsh language skills. In terms of care tasks spoke Welsh skills are more important in communicating with citizens and giving care in their language of choice.

Table 16: Welsh Speaking Care Staff in Gwynedd domiciliary care provision (April 2020)

Position	% of registered who are 'fluent' in Welsh	% of registered who have 'some' Welsh language skills	% of registered with no Welsh language skills
Domiciliary Care Workers	51.2	23.0	9.8
Domiciliary Care Managers	56.4	17.9	12.8

Sustainability of provision

Flintshire County Council has recently employed a Planning and Development Officer to support the independent adult social care sector through the recent COVID-19 pandemic, and to become confident and resilient to meet the support needs of older people in Flintshire into the future. The officer will work closely with the adult social care sector to aid sustainability and recovery following the pandemic. This will include supporting with sustainability plans and recruitment drives in house and across the sector.

People often have little choice in reality. Getting any care is a challenge, let alone having a choice. People can choose to receive Direct Payments to arrange their own care, but it is not easy to find people who can offer care.

Risks to market stability

Both in-house and independent care providers continue to have significant staff vacancies as existing carers vacate the care sector for a variety of well-rehearsed reasons. This is of concern with regard to market stability, and particularly the ability to deliver care particularly to harder to reach areas.

Whilst WG have made provision for the delivery of the Real Living Wage to direct care workers, this will have an impact on pay compression and ability to recruit /

provide career progression to more senior roles. This may have an impact on market stability as the next financial year unfolds.

Business costs, outside of wages are also increasing with inflation escalating and fuel costs in particular increasing significantly. For domiciliary care this has a significant impact on the attractiveness of the role and the financial viability of existing business models.

A consultation exercise with providers [in-house and external] run by Flintshire identified the following market Strengths, Weaknesses, Opportunities and Threats. These themes are shared across the region.

Strengths

- Good Brokerage relationships with providers and excellent communication between the team and providers.
- Support from provider meeting with virtual meetings and senior leadership representation.
- Commissioners are on the end of the phone for support and advice
- Providers work together and not in conflict or competition.
- Additional meetings for Responsible Individuals are positive and helpfully in getting support from peers
- Open working together – developing a support network
- Open book on finances and having honest conversations enables informed decision making
- Commissioners understand “how it is on the ground”

Weaknesses

- Administration of responding to call, for example, if the carer is late
- Still stuck in task and time
- Unemployment in the general economy is low which creates competition for staff, such as with seasonable retail jobs
- Expectations of citizens can be a challenge for tasks over and above the care plan
- Losing staff to other economic sectors, to the health board and to other roles within the social care sector such as care homes / Supported Living
- Carers who are not I.T. savvy
- Providers need better support from Care Inspectorate Wales

- Salaries we can offer to staff are not competitive enough for the work involved in domiciliary care

Opportunities

- Social care is on the political agenda – decision makers cannot ignore social care any more
- Flexibility within time and task time bands
- Engagement with commissioners and the network of framework providers could be built on
- Providers need to engage with potential employees face to face and show them what the work is
- Greater understanding of the cost of running a domiciliary care agency – looking at the “Unfair to Care” document
- Realistic assessment of the responsibilities of the caring role in comparison with other roles for example police officer
- Need to hear more from the citizens and the benefits that this support gives
- Multi-channel advertising of roles not just online, for example, radio, buses, billboards.
- Opportunity for more joint work with health to ensure people in hospital have access to therapists to support discharge.

Threats

- Young people not attracted by domiciliary care or care in general
- Increasing older workforce and no succession planning
- Terms and Conditions in the sector are poor for the type of work and responsibilities involved
- Care not valued or seen as important in comparison to other sectors, for example, emergency service and health
- The registration and qualification frameworks and requirements are putting carer’s off, particularly those will literacy and numeracy challenges
- The care sector is close to collapsing
- The Health sector does not recognise the importance of domiciliary care
- The role of carers is challenging and they are being asked to undertake more complex tasks – need to develop a stronger relationship with district nursing
- Better terms and conditions in local authority care and Health Board roles leading to destabilisation
- State Benefit restrictions disadvantage care workers and creates in work poverty

Preventative services

A long term priority is to continue to support people to regain their independence and reduce reliance on the statutory care sector. This will be done by providing effective access to the social prescribing / third sector services through the Single Point of Access (SPOA) as well as effective management of admissions to set up / step down beds.

Some local examples of community preventative approaches are:

- Age Friendly Communities - The Ageing Well in Flintshire Action Plan identifies what needs to be done and by whom, to make growing older in Flintshire a good place to be.
- A short term project to establish proof of concept for social prescribing is also being run by Flintshire Local Voluntary Centre (FLVC) on behalf of the Health Board.
- Flintshire Social Services and BCUHB commission a carer respite service for carers. This service provides a sitting and domiciliary care service within Flintshire, which is accessed via Carers Trust North Wales Crossroads Care Services. The respite is currently available to those that have high demanding caring roles, including carers of people living with dementia. This service is offered for a 12-week period followed by signposting to SPOA to explore ongoing respite options.
- Community Navigators – Social Prescribing in Denbighshire employed by The British Red Cross and Age Connects. The Community Navigators are part of the four Community Resource Teams. They use ‘Talking Points’ in Denbighshire libraries as a place to meet people, although this was not possible during the COVID-19 pandemic and a lot of support was provided via telephone at that time. They are a source of current, accurate and timely information about a range of support that is available in the community. They are key in connecting people, reducing social isolation and loneliness. During 2020-21, the Community Navigators assisted 2,424 Denbighshire residents.

Denbighshire seek to commission services from providers who embrace:

- Having meaningful conversations with people
- Connecting people with what matters to them
- Working with people to take control of their lives
- Building on the strengths and abilities of people to identify individual solutions

Denbighshire's focus is on earlier intervention, increasing preventative services within the community and helping people maintain their independence. Our mission is to place people at the heart of decisions about the type of community support services they access. For many people, this will mean that they may be given a support budget to manage their own care and support to achieve agreed outcomes. This could be in the form of a Direct Payment, a Third Party Managed Support Budget or a Local Authority Managed Support Budget for the individual. Support budgets will operate under a less restrictive legislative framework, and one that supports innovation. In Denbighshire the following work is taking place.

- Men's Sheds – The national UK Men's Sheds Association is a place for men where they can share the tools and resources they need to work on projects of their own choosing at their own pace and in a safe, friendly and inclusive venue. They are places of skill-sharing and informal learning, of individual pursuits and community projects, of purpose, achievement and social interaction. A local Men's Shed's operates in Denbigh.
- Carers Trust North Wales Crossroads Care Services offer 'Gwalia Care' which takes over the roles of the unpaid carer so they are able to take some time out. This can be on a regular or ad hoc basis and is chargeable.
- Age Connects North East Wales (ACNEW) – ACNEW are part of the national Age Connects Cymru programmes, a social enterprise providing support for people aged 50+. Locally, the service provides short-term housing related support, toe nail cutting, a cleaning and shopping service and social activities.
- Education and Learning – Many local projects are referring people to the University of the Third Age (U3A). U3A provide opportunities for retirees and semi-retired people to come together and learn, not for qualifications, but for 'own reward'.
- DEWIS - Dewis Cymru is a website that aims to help people with well-being, whether that is their own well-being or the well-being of a family member or friend. The website contains information that can help people think about what matters to them and has information on services that can be accessed for support. Organisations across Wales can upload their own information to the site
- Community Agent's – at Wrexham the service is commissioned from and managed by Community Councils. Community Agents can tap into third sector services around the county to support people in their community. GP surgeries are linking people in to the Community Agents.

Wrexham County Borough Council supports the following third sector services.

- NEWCIS (North East Wales Carers Information Service) Carers information, advice, support and respite services
- Alzheimer's support: The main theme within the Welsh Government Dementia Action Plan is to enable people living with dementia (including young-onset dementia) to maintain their independence and remain at home where possible, avoiding unnecessary admissions to hospital or residential care and delays when someone is due to be discharged from care or hospital.
- Community Catalyst: Step up and support of an online directory of social care enterprises in Wrexham to allow easier access to information for citizens and professionals. They provide 6 days' worth of support to the development of third sector organisations interested in developing domiciliary care provision.
- Vision support: The purpose of the service is to enable adults who are blind or visually impaired to carry out their daily activities with confidence, through the provision of professional training in new and/or adaptive independent living skills, as well as to register individuals who have been assessed as having sight loss, or severe sight loss as recommended, by a consultant Ophthalmologist through the Cerebral Visual Impairment (CVI) process. The provider holds a small number of specialist pieces of equipment that can be loaned out to individuals in order to support them with their visual impairment.
- Deaf Support Network: The purpose of this service is to provide practical support, information and advice to children and adults who are deaf (member of the Cultural Deaf Community who use British Sign Language as their first language), living with hearing loss or who are Deaf Blind (dual sensory loss). As well as providing direct support, the provider will signpost individuals to other services who may be able to support that individual. The provider will hold a small number of specialist pieces of equipment that can be loaned out to individuals in order to support them with their communication/ hearing loss.
- Delta (Telecare): Telecare is a service that can help to keep you safe at home and enable assistance to be summoned in the event of an emergency. Telecare can help you to live independently in your home, by providing the peace of mind that someone can be automatically alerted if you need assistance or in the event of an emergency situation.
- British Red Cross: A Third Sector Link Worker has been commissioned to work with the Wrexham's SPOA to ensure that information on third sector provision is readily accessible to relevant professionals. The worker supports Wrexham

citizens to access non-statutory forms of support, including the provision of information, advice and assistance, to enable them to maintain their independence, and prevent escalation of need

- Hafal, part of Adferiad Recovery (partnership with housing): Supported Accommodation and floating support for those with Mental Health conditions
- Recovery Service: Supported Accommodation and floating support for those with Mental Health conditions.
- Stepping Stones: Individual specialist counselling, support and group work for adult survivors of childhood sexual abuse, including counselling support for individual pre-trial, during trial and post-trial. This specialised area of counselling is intended to meet the person's needs, with a commitment to supporting individuals for as long as necessary, recognising that many people are very vulnerable and may at times self-harm or have suicidal feelings.

Other considerations affecting the market

Social value

The North Wales Population Needs Assessment 2022 notes “Co-production and social value: Delivering services for older people must include the views of the population. Older people should have a voice in shaping services that they may access. The Wales Cooperative Centre has published a paper outlining how services, such as domiciliary care, can be commissioned using an outcomes based approach for provision, which focuses on well-being. as well as any immediate need” (Regional Partnership Board, 2022).

Flintshire has moved towards Micro-care delivery models and has a pilot programme as part of the ongoing Social Services offer. To meet the growing demand for care, the Micro-care pilot project has been established to expand both the supply of care in and the choices available for people across Flintshire. Micro-care enterprises are small businesses ranging from sole traders up to businesses employing 5 people who offer flexible and personalised care and support services to vulnerable people, tailored to their individual's needs. The aim is to encourage people to become Micro-carers who are either:

- Interested in providing social care services to older people but may have no experience
- Currently working in the care sector but interested in being their own boss

- Actively supporting people in their local communities
- Want to do something that support others and makes a difference

The Micro-care team work with individuals to:

- Support them to develop their business or idea
- Provide information on training, funding and other available support and resources
- Support individuals to develop and deliver a quality service in line with current WG legislation and regulations
- Providing links to a network of other Micro-care providers for mutual support

As of February 2022, there were 27 Micro-carers trading in Flintshire. The Flintshire Micro-Care Team have also created Micro-care web pages for use by both micro-carers and people looking for Micro-carers. It provides key information for people considering working as a Micro-carer. For the public it also has explanations about Micro-care and lists Micro-carers and their contact details. This will support our aim to develop ongoing sustainability in the project. The website is located at www.careatflintshire.co.uk This programme is now moving out of the 'pilot' phase and incorporated in to Flintshire's offer.

Also in Flintshire the recruitment of volunteers began at the start of April 2021 initiated by colleagues in FLVC. The Flintshire Social Care Workforce Development Team, supported by FLVC, provided basic training to volunteers, relating to safeguarding, food hygiene, health and safety, consent, data protection, dignity, principles of care and confidentiality. By the end of April 2020, following the training and required Disclosure and Barring Service (DBS) checks, a group of 64 volunteers were available for deployment to volunteering opportunities across the county.

Flintshire benefits from a strong third sector presence and networks and a positive relationship between the Council and FLVC. The Wellbeing Team in FLVC and AVOW (Association of Voluntary Organisations Wrexham) supports the third sector and statutory partners in a number of ways:

- Promoting third sector organisations, services and activities to statutory partners
- Representing the third sector at strategic planning and partnership groups
- Engaging the third sector in consultations and engagement about health and social services
- Promoting partnership working within the third sector and across sectors

- Signposting to or providing business support and funding
- Providing training to organisations to improve their capacity and effectiveness
- Explaining the complexities of commissioning and procurement
- Helping keep services up to date with the latest evidence base, whilst guiding them through the changes in NHS and local authority structures.
- Helping the start-up of new services or groups
- Supporting the third sector in Flintshire and Wrexham to access FLVC and AVOW's services

Community Catalyst are commissioned as a project through the Community Transformation WG Fund in Wrexham. The project's aim is to support the development of micro-enterprises to support the domiciliary care offer in Wrexham. The enterprises are not to replace the offer from domiciliary care agencies, rather to support stability and allow choice and control for citizens. It supports the direct payment options for citizens. There are currently 37 microenterprises that have completed the 'Doing it Right' standards and actively on Wrexham's register of providers.

Gwynedd notes that there is 44% of domiciliary care being provided internally today. There are several small independent companies that are local to Gwynedd and a few larger companies. The Gwynedd market does not have many co-operatives and social enterprises, but they are developing. There are third sector providers within the county but not a consistent presence as the local authority would like it be in each part of Gwynedd. Commissioners find it very difficult to obtain provision in rural areas often. Some areas have a strong informal community network already in place.

Gwynedd is proposing to develop Social Enterprises through community hubs that focus on the elements of well-being and also to develop a specialist equipment assessment provision - smart house. Gwynedd has currently 15 Third Sector Providers operating in Gwynedd.

As explained above in Gwynedd people have little choice of domiciliary care provision. Securing care is a challenge, let alone having a choice. People can choose to arrange their own care via Direct Payments, but it is not easy to find people who can offer care. A project with 'Community Catalysts' has started, to encourage people to set up a small company to provide care, and hopefully this will improve the situation.

Direct payments

Local authorities promote Direct Payment through highlighting a person centred service that reflects voice, choice and control by empowering individuals to be as independent as possible in their own local community.

Some benefits of choosing Direct Payments are:

- Individuals choose who delivers their care and support
- Individuals choose when their care is delivered to suit their everyday life
- Direct payments is flexible to meet individual requirements

Isle of Anglesey Council is dedicated to developing the service by consulting regularly with direct payments experts (citizens) and to make sure that the service is fit for purpose.

Our vision and our way of implementing change has resulted in the increase in service take up and its success resulting in 243 individuals taking control of their care package and choosing to receive support through direct payments on the island compared to 35 individuals in 2015.

Denbighshire will continue to develop and utilise Direct Payments, where individuals, or their chosen responsible person, receive money directly from the Council to fund their agreed care and support needs in their chosen way. This might be through recruitment of a Personal Assistant or by paying for services of their chosen agency or organisation.

At present there are not enough providers to give people a choice or to give an element of competition. Community Catalysts are helping small local providers (Micro providers) launch services but few are willing to provide personal care, which is where the biggest gap is. Whilst there may be a reduction in the care and support needed by individuals because of earlier interventions and preventative work, we anticipate growing numbers of people with more complex needs such as dementia. Denbighshire has recruited for two Independent Living Advisers (ILA) posts. Part of their role will be to join things up and offer consistent and helpful advice to families for example about Direct Payments, Micro providers and other support available for citizens and carers.

In Flintshire Direct Payments are an important mechanism by which people can exercise choice, voice and control to decide how to achieve their needs for care and

support and achieve their personal outcomes. In Flintshire the approach focuses on strengths and outcomes, which they aim to enable citizens to retain autonomy over their life, support, self-determination and autonomy and efficient use of resources.

In recent years the Flintshire Direct Payments Support Services has been completely redesigned and now provides a far more holistic service benefitting both Flintshire citizens, social services and third sector partners. Some of the key benefits of the service are:

- Far greater control over the service and how it meets the department's priorities.
- Service works collaboratively with social work teams to embed person-centered practices in line with the SSWB (Wales) 2014 Act
- Shared systems, improved communication, and better access to the service.
- Outcomes focused Referral process centres on what is to be achieved and supports joint working with the individual to own the outcome and develop bespoke solutions.
- Better placed to work in partnership with third sector organisations.
- Autonomy to develop, test and imbed innovation in line with the departments ambition and priorities.
- Far more holistic approach, centred on the needs of citizens in the first instance, but also practitioners, communities, partners etc.
- Consideration for the Personal Assistant market in terms of standards, quality, training and opportunities for progression.
- Support that is proportionate. Importantly, we don't want to over support people, but enable them to manage their own arrangements.

During Quarter 2 (July to Sept) of 2021/22, 498 people received a Direct Payment in Flintshire. This represents the highest number of recipients per head of population of any Welsh Local Authority. Direct Payments currently make up 39% of home based services.

Table 17: Flintshire direct payments by category Q2 2021/22

Service category	Number of direct payments
Learning disabilities	169
Physical / sensory impairment	104
Children with disabilities	78
Older people	65
Children's services	49
Mental health	24
Vulnerable adults	9
Total	498

Source: Local authority data collection

Working in partnership with a small local film company (Follow Films) Flintshire Direct Payments recipients have been supported to tell their unique stories of their lives and how Direct Payments have contributed towards them achieving positive outcomes and improved life experiences. The impact of these films and the feedback received has been significant and the films are now being utilised by local authorities and institutions far and wide.

Workforce

As outlined in The North Wales Social Care and Community Health Workforce Strategy, the sector is under significant pressure as a result of:

- Changes to legislation as a result of the Regulation & Inspection of Social Care (Wales) Act 2016 (RISCA)
- A new qualification framework
- Competitive pay structures with other sectors
- Competition from other sectors

There is an urgent priority around ensuring a sufficient workforce is in place for the delivery of social services and social care functions. The recruitment and retention of Social Workers, Occupational Therapists and direct care workers has become a particular challenge across North Wales.

The North Wales Social Care and Community Health Workforce is in a time of unprecedented change whereby they are required to deliver services differently with a focus on prevention, protection, intervention, partnership and integrated working,

coproduction and empowerment; requiring a different emphasis on workforce skills and training.

Much has been written on the issues surrounding recruitment and selection in the Domiciliary Care workforce. In March 2016, WG published a research report on the 'Factors that affect the recruitment and retention of domiciliary care workers and the extent to which these factors impact upon the quality of domiciliary care' (Atkinson, Crozier and Lewis, 2016). The research, undertaken by Manchester Metropolitan University sought to identify factors that influence whether people choose to 'become and remain working as domiciliary care workers'.

There are approximately 17,000 domiciliary care staff employed by commissioned care providers in Wales (Social Care Wales, 2018a). WG's consultation in to the Domiciliary Workforce (Welsh Government, 2016) recommends that those working in the sector are recognised as the skilled professionals they are. The negative image of the sector must be challenged to encourage people to join the social care workforce.

The key factors highlighted by this consultation included:

- Low wages
- Work pressures
- Unsociable hours
- Poor terms and conditions
- 'Zero hours' or 'non-guaranteed hours' contracts deterring people from joining the sector, as there were no guaranteed hours
- Some call times not enough to address the needs of the individual
- Lack of training and career development opportunities
- Seen as a low status job compared to healthcare

Local Authorities have extended their Care First and other Employee Assistance Programmes to the external [non local authority] workforce. Care First/Employ Assistance Programmes provide confidential, impartial advice and support 24 hours a day, 365 days a year, online or via the free-phone telephone number. The service is free for all employees to access whenever they need it.

The care provided by domiciliary carers for those with mental health needs could be improved by ensuring staff are encouraged to work in the field where they have most talent. Those working with people living with dementia require specialist training and

extra time to complete tasks. There is a lack of dementia trained care workers, which should be addressed by the local authorities. Commissioners are keen to ensure the agencies they employ to provide dementia care are fulfilling their obligations and following care plans carefully. The profile of the profession needs to be raised to attract a high calibre of staff. (Regional Partnership Board, 2022).

Gwynedd note that there is the potential to adapt roles / tasks within their domiciliary care plans but need support from providers to implement. Staffing is a major issue at present for both domiciliary care providers and care homes.

In Flintshire, the local authority has also worked with Mind in North East Wales to provide extra support for social care workers. Information, talking therapies and activities designed to support wellbeing during this difficult time is available.

Providers in Flintshire have reported that the All Wales Jobs Fair is difficult to use and the IT is clunky particularly if you have no digital support.

Flintshire has worked in collaboration with citizens to design and implement a unique platform that supports both Direct Payments employers and Personal Assistants. The [Flintshire PA Portal](#) enables Direct Payments employers to search for available Personal Assistants in their area autonomously and for Personal Assistants to promote themselves and their availability to work. Personal Assistants complete a profile describing themselves, their experience, availability etc. and prospective direct payments employers can search the data base and engage with people they feel may be able to help meet their needs and/or achieve personal well-being outcomes. Recently they have added a vacancy page that enables citizens to post their requirements i.e. needs to be met/outcomes to be achieved, making the system a two-way process.

The Flintshire direct payments scheme has consciously set out to change the support available for this significant, but sometimes disassociated workforce. Some of the initiatives to date are:

- Personal Assistant Coordinator engaging with the workforce. Pastoral support for Personal Assistant's working in complex/isolated positions being built into the role.
- Personal Assistant Code of Conduct developed and implemented. This has helped them understand their role, where they fit in and what the expectations of them are.

- Flintshire Personal Assistant Induction Certificate developed around 7 core modules and designed specifically around the PA role. Since its introduction 11 Personal Assistants have completed the certificate and a further 35 are working towards the award. For those enrolled on the scheme there are a further 50 training modules that they are able to access in their own time. This is the first initiative of its kind and the local authority are in discussions with Social Care Wales regarding the potential for a National approach.
- Personal Assistant Portal developed to aid recruitment for Direct Payments employers and to promote work opportunities for prospective PA's.

The recruitment of care and support staff, has historically been problematic due to the small workforce pool, lack of awareness or recognition of the roles and the risk of destabilising the private market. However, following a review of recruitment and the launch of new initiatives such as, WeCare campaign and the values based recruitment work, we have seen an increase in the number of new and returning candidates to the profession.

5. Residential services (children)

This chapter focuses on residential care services for children and young people. For the purpose of this assessment, the chapter includes those aged between 0 to 18 as well as those who are eligible for services until they are 25 years of age, such as disabled people and care leavers.

Residential services include:

- Care Homes (Children) – care in a home with paid staff
- Secure Accommodation – a secure safe place
- Residential Family Services – accommodation where parents and children stay together to be assessed / receive care

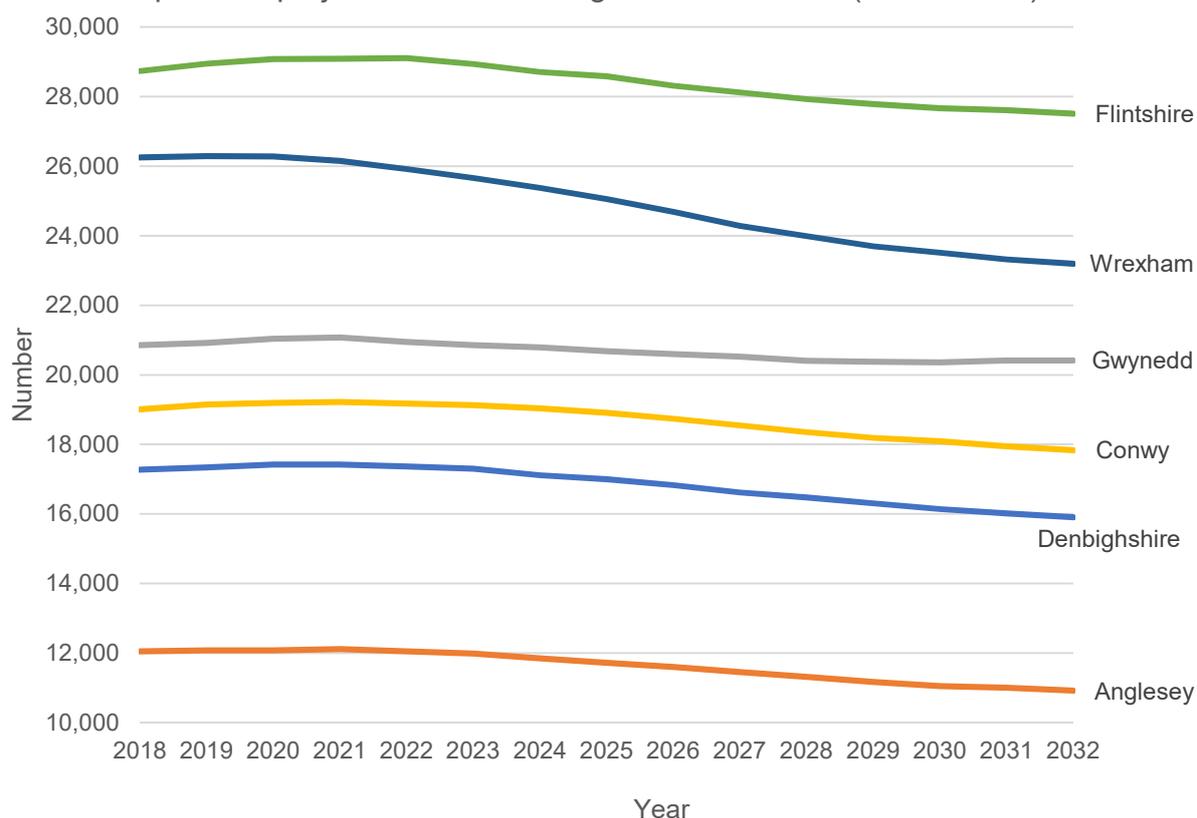

There are separate chapters about fostering and adoption services.

Population overview

The number of children is predicted to decrease

In 2020, there were around 123,700 children aged 0 to 15 in North Wales (Welsh Government, 2021b). There has been little change in the number of children between 2015 and 2020 across North Wales or in each county. The number of children is projected to fall in North Wales by 7% over the next 15 years (Welsh Government, 2020). The level for each local authority varies from a 2% decrease for Gwynedd, to 12% in Wrexham as shown in the chart below. This is a nationwide trend, with numbers also projected to fall by 5% in Wales as a whole.

Chart 1: Population projections, children aged 15 and under (2018 based)

Source: 2018-based local authority population projections for Wales (principal projection), Welsh Government

The number of children receiving care and support has increased

In 2020, there were almost 2,900 children receiving care and support across North Wales. This is 2,300 children for each 100,000 children in the population, which is slightly lower than the rate for Wales as a whole with 2,550 children in need for each 100,000 children in the population. The numbers vary across North Wales and over time with no clear trend.

In 2018-19, there were 575 children on the child protection register in North Wales. Although the numbers vary year to year for each local authority, overall for North Wales, the level has remained similar, with a small decrease of 3% (15 children). Due to the small numbers involved it is not possible to identify clear trends as, for example, a dramatic change from one year to the next may be due to one family moving to or from an area.

The number of looked after children is not expected to continue to increase

Although the overall figures for all looked after children have shown a steady increase year-on-year to date, this is not expected to continue in the future (Regional Partnership Board, 2019).

Children who are care experienced were more vulnerable to the pandemic

The Rapid Review of the Population Needs Assessment (Regional Partnership Board, 2020) highlighted the impact of the pandemic on care experienced children which included isolation and loneliness, and disruptions in access to services. In North Wales, there was an initial dip in child protection referrals but then the rate of referrals returned to expected levels. An increased level of monitoring visits took place to households where there were children on the child protection register – weekly visits instead of the 10-day timescale.

There is an increase in newly accommodated looked after children and young people

In 2021 there were 1,470 local children and young people looked-after by North Wales local authorities, which is similar to the national picture across the whole of Wales. The number of children looked after in North Wales has increased by 350 during the time frame shown in the table below. North Wales has a lower number of children looked after per 100,000 population than the rest of Wales, however there are significant variations across the region, from 800 in Flintshire to 1,300 in Wrexham. It is important to note that the number is currently fluctuating rapidly with a significant increase in newly accommodated young people.

Table 18: Number and rate per 100,000 of children looked after (under 18) by local authority, 2017 and 2021

Local council	2017 No	2017 Rate	2021 No	2021 Rate	Change No
Anglesey	140	1,039	160	1,214	20
Gwynedd	220	927	280	1,210	65
Conwy	180	829	215	1,015	35
Denbighshire	160	825	180	923	20
Flintshire	210	654	255	795	45
Wrexham	215	736	375	1,304	160
North Wales	1,120	805	1,470	1,063	350
Wales	5,960	949	7,265	1,153	1,305

Source: StatsWales

Market overview

Despite a shared commitment to prevention and early intervention, there will always be a small proportion of looked after children who need residential placements.

Depending on care needs this may be in a:

- Residential Care Homes with paid care staff
- Secure Accommodation Unit
- Residential Family Unit

The updated Market Position Statement (Regional Partnership Board, 2019) provided a breakdown of residential care provision in North Wales. As at 31st March 2020, there were 70 North Wales children living in a care home. The total number of children living in a children's home increased by 133% in North Wales between 2016 (30 children) and 2020 (70 children). The table below shows that figure has more than doubled to 158 between 2020 and 2021.

Table 19: Snapshot of number of young people in residential placements at 31 Mar 2021

County	Residential
Anglesey	10
Gwynedd	21
Conwy	37
Denbighshire	20
Flintshire	39
Wrexham	31
North Wales	158

Source: Local authority data collection

Notes: Residential includes children’s homes, family residential services, residential school placements

Market share

There were 17 independent providers of residential care for children, operating 42 settings and providing 180 registered places (‘beds’) across North Wales.

Due to the limited residential in house provision in the region, authorities have to pay external organisers known as ‘providers’. You can find information on work to increase residential in house capacity within the Children’s Transformation Programme section.

Secure accommodation

There is no secure accommodation provision in North Wales. There is a national purpose built secure children’s home in South Wales. Hillside can accommodate up to 18 children and young people of either gender between the ages of 12 to 17 years.

The children placed in secure accommodation are done so by order of a court and numbers are very low, between 0 to 2 per authority each year with no clear trend. There are no plans to extend this provision in North Wales.

Step down provision from secure accommodation and secure welfare placements are discussed in the [emergency accommodation](#) section.

Market sufficiency and stability

Placement within county or nearby is known to be important for children and young people to maintain their established positive social networks both with family (parents, siblings and others) and school – which helps them to develop their identity and emotional maturity (NICE, 2021).

The table below shows that Conwy and Gwynedd have the highest proportion of placements outside of North Wales. Over half of all residential placements across the region are placed outside of North Wales.

Table 20 Number of residential out of county placements

County	Total placements	Placements outside North Wales	% of placements outside North Wales
Anglesey	16	5	31%
Gwynedd	16	10	63%
Conwy	16	12	75%
Denbighshire	10	5	50%
Flintshire	31	17	55%
Wrexham	18	8	44%
North Wales	107	57	53%

Source: Market Position Statement (Regional Partnership Board, 2019)

There is a shortage of local residential providers

In August 2020, ADSS Cymru published a report which examined the case for rebalancing social care provision in Children’s Services (ADSS Cymru, 2020). The report identified a significant imbalance of power in the children’s residential care market, which is affecting placements and choice, the ability to make the best match to a child’s needs, the workload, and the outcomes for children. Without rebalancing, there will be a continued reliance on private providers with, in some cases, high cost, and questionable value for money, greater instability for children and poor outcomes. The aim of any rebalancing must be to develop stable, resilient markets, which offer options and choice, quality care, fewer placement breakdowns, and good outcomes for children.

An increasing demand for residential placements and a lack of supply in local residential providers has resulted in a 'providers market'. Providers are able to be more selective of the young people they accept, which may result in those with higher levels of complex needs and behavioural challenges being more difficult to place. This may be due to the skill/expertise of the provider, a concern about how behaviour might impact other residents and the local community, and worries that all of this might impact upon the outcomes of the service.

Alongside the financial pressure, there is also a pressure on staff time. In the event of a bed becoming available, a number of local services may be seeking to secure it, resulting in competition.

This high demand puts pressure on local authority finances, with providers able to dictate the cost of the provision. There is a risk that expenditure on out of county placements increases as placement costs increase in a demand led market.

North Wales is currently reliant on the independent sector for children's residential care provision. The Children's Transformation Programme and Integrated Care Funding has been used to increase in house provision and fund preventative activity. Local authorities continue to explore opportunities to facilitate a different approach to help reduce the reliance on out of county placements which lead to unsustainable financial pressures for social services and education.

There is a shortage of specialist provision for children and young people with complex behavioural and emotional needs

In 2019 over half of children placed in residential care were receiving care primarily due to emotional and behavioural needs and two thirds of those children were aged between 13 to 16 years old (Regional Partnership Board, 2019).

There is a significant shortage of specialist placements for young people with significant emotional and behavioural needs in North Wales. Children are often placed in England, away from their families. There is limited provision in England. Social workers struggle to place children with severe needs as providers tend to reserve places to try to place a child with less severe needs.

Some children may have received their education through the Welsh language and therefore have difficulty coping in an English medium school and need a tutor or assistant to provide additional support.

Young people in crisis often attend Accident and Emergency and stay in hospital settings in an emergency situation.

There is a shortage of emergency accommodation

Social services across the UK are facing increased pressures to find placements in emergencies. Locally, we do have situations where no placement can be sourced for a child. This necessitates the development of a holding position to provide accommodation and support until a placement can be found. These situations may arise from difficulties in placing young people following the breakdown of relationships at home, transfer of children where the police have used their powers of protection to remove children and a lack of secure beds for young people with high level needs and welfare risks.

It is important to emphasise that these arrangements are used as a last resort in emergency situations, due to exceptional circumstances and for a short period until a regulated provision can be sourced. Safeguards around unregulated placements include the need for senior manager approval, notification to Care Inspectorate Wales (CIW) as our regulator, a care and support plan, completion of social work visits, involvement of Independent Reviewing Officers and supervision of social workers to look at arrangements / move on plans.

The arrangements that local authorities have to put in place in emergencies can amount to unregulated placements. Under the Regulation and Inspection of Social Care (Wales) Act 2016 it is an offence for a person to provide a regulated service without being registered in respect of that service.

Local market overview

The Market Position Statement 2021 appraised the market and set out what is happening, residential services needed for children in the region and aspirations for future providers.

- The number of children who live in a children's home has increased, some of these children are able to live in a foster placement but there are currently not enough foster carers with the right skills to support them.
- Some of our children who live in a children's home live outside of the local authority boundary despite sufficient in-area capacity.

What we don't need:

- We do not encourage expansion in North Wales by independent providers of residential care for children whose services are not developed to meet the needs of our children.
- We do not want providers to operate children's homes without a clear model of care or deliver standard provision only.

What we want:

- We want to work with new and existing providers and support them to deliver models of care that will meet the needs of our children.
- We want to work with new and existing providers and encourage them to develop their businesses in a way that, in addition to improving outcomes for our children, also provide a wider social value to our communities.
- We want providers who are able to safely care for our children with multiple high needs and are able to provide alternative accommodation to secure welfare provision.
- We want providers who will work in partnership with us during periods of transition including stepping down to live with a foster carer or reunification with their family.
- Welsh culture is very important to us as a region and we want more providers who are able to deliver their services in Welsh.

Isle of Anglesey

There are 3 small group home resources on Anglesey with a potential to offer 5 bed spaces for children that require the service. Our 4th property is being renovated and the works will be finished by August 2022. This will enable the local authority to offer another 3 potential bed spaces locally to reach a total of 8 bed spaces.

The Ynys Môn small group homes service enables young people with complex needs to remain with their birth family for as long as possible. The aim is to avoid the need for specialist Out of County residential placements in the event of family breakdown.

Our multi-disciplinary team of professionals support the family and care staff who will be responsible for the day to day care of the young person. This provides consistency across the range of care and support provided to the individuals.

Outcomes

- Be able to develop and offer an increased 'shared care' option for individuals and families to delay complete family breakdown.
- Be an opportunity for the young person to develop new skills and experiences that may enable them to move on to alternative supported accommodation to meet their individual needs.
- Be able to provide longer term care and the opportunity to work in partnership at an earlier stage with Adult Learning Disability Services to support them through the transition process.
- Be available to meet the needs of other young people who have complex care and support needs, dependent on their assessed needs.

Gwynedd

There is an identified shortfall of capacity in residential child care settings in Gwynedd and in Wales more widely. Current provision does not address the need and there is no prospect for new provision in the near future. Current providers are very small ones which leads to children having to go to England which can lead to secondary problems, especially as there is no sufficient supply in England either. Social workers encounter difficulties in placing children with intensive needs as providers tend to keep placements for children with less intensive needs. It has been noted that it is possible to ensure a placement for each individual, but that more discussion is needed in order to place those with more intensive needs. The fees are also very high.

The following issues have been raised as barriers to developing residential care:

- There is still a stigma associated with children's care homes.
- Children placed together in a care home setting need to be able to coincide and they can often have very different or conflicting needs which can be very complicated and a daunting prospect for new providers given the financial risks in establishing such a business.
- The substantial increase in housing stock prices in Gwynedd makes a business case in Gwynedd less attractive.

Conwy

The table below shows the type and number of placements in Conwy over the last five years.

Table 21: Type and number of placements, Conwy, 2017 to 2021

County	2017-18	2018-19	2019-20	2020-21	2021-22	
Foster Placements	-	249	221	212	203	208
Adoption/Placed for Adoption	-	11	16	15	17	22
Independent Living		15	16	23	29	23
Residential Homes/Schools/Hostel		30	31	33	37	48
Young Offenders/Secure Accommodation		1	2	2		
Placed with Parent/other parent		46	41	38	24	39
Est Med/Nursing Care		11	4	1	1	
Family Centre or Mother/baby unit					1	5
Section 38(6) Court Directed Unregulated Placement					3	12
Temporary Placements					3	11

Source: Local authority data collection

The number of looked after children has reduced, this is in parallel with a significant investment and focus on early intervention and preventative services. The Conwy Family Support and Intervention team saw 4,400 referrals between April and September 2021. The team has received an increased number of referrals. Anecdotally there has been an increased complexity of cases.

Key challenges to maintaining provision includes:

- Workforce - Recruitment of child care workers, particularly those with experience is a significant challenge. Experienced social workers look for alternative roles due to the nature of child protection work and the impact that this has on work life

balance and mental health. Local authorities are competing with agencies to attract social workers, who provide higher rates of pay.

- Endeavouring to change the status of looked after children through Special Guardianship Orders (Kinship).
- Working within effective partnerships with Child and Adolescent Mental Health Services (CAMHS) continues to be inconsistent while each agency has different perspectives and conflicting priorities – challenging, high risk, time consuming casework.
- Shortage of emergency accommodation and reliance on out of county / temporary placements. This is a key priority for us at this time.

Costs for placements have almost doubled from an average per week of £3,500 in 2017 to some commanding between £6,000 and £7,000 in 2021/22.

Denbighshire

Denbighshire County Council have 20 children or young people placed within care home provisions, more than half of these children and young people are placed outside of Wales. Whilst these children and young people have been appropriately placed in residential settings based on their presenting needs, the lack of local options have resulted in some placements being made at a considerable distance from their home area.

There is a demand for residential placements for children with mental health issues and who present with complex, trauma induced behaviour. Placements with the ability to support children and young people who have experienced Child Sexual Exploitation or Child Criminal Exploitation are also lacking.

Flintshire

Flintshire County Council commission 39 children's care home services, half of these children and young people are placed out of the country in England and Scotland. A focus is needed on initiatives designed to reduce the number of children who are placed out of county from the outset. While children have been appropriately placed in residential settings based on their presenting needs, there had been few viable alternative approaches available which could have contributed to a de-escalation, eliminating the need for out of county placement.

There is a demand for residential services for children who suffer with their mental health, and there is not the sufficient level of care and support with the local authority area to provide this. Services are being sought out of county which incurs further cost implications.

A number of local residential providers also have plans for expansion, which presents another opportunity to work in partnership to align the provision to meet local needs.

Over the next five-year period, in order to ensure stability within the sector, the council aims to:

- Work with new and existing providers and support them to deliver models of care that will meet the needs of children.
- Work with new and existing providers and encourage them to develop their businesses in a way that, in addition to improving outcomes for our children, also provides a wider social value to our communities.
- Work with providers who are able to safely care for children with multiple high needs and are able to provide alternative accommodation to secure welfare provision.
- Identify providers who will work in partnership with us during periods of transition, including stepping down to live with a foster carer or reunification with their family.
- Welsh culture is very important to us as a region and we want more providers who are able to deliver their services in Welsh.

Wrexham

Wrexham County Borough Council do not commission any in house provision for children's care home services, though we do have 33 children and young people placed in out of the county placements in England and Wales. A focus is needed on initiatives designed to reduce the number of children who are placed out of county from the outset.

Utilising Welsh Government Integrated Care Capital Funding, this year we were able to launch our Care Closer to Home Programme which will remain a priority into the next 4 years. The Programme focuses on the purchase, repurposing and/or redevelopment of property either by WCBC or in partnership with Registered Social Landlords to deliver supported living schemes and small children's homes within

Wrexham, enabling people to return to the Borough to meet their housing and/ or care needs and preventing the need to commission out of county placements in future. This year, we secured three properties and more are in the planning under the new and expanded Welsh Government capital grant schemes.

There is a demand for residential services for children who suffer with their mental health, and there is no the sufficient level of care and support within the local authority area to provide this. Services are being sought out of county which incurs further cost implications.

A number of local residential providers also have plans for expansion, which presents another opportunity to work in partnership to align the provision to meet local needs.

Over the coming year, our priorities will focus on:

- Maximising regional capital funding to expand care closer to home and develop non-profit, local care solutions for looked after children.
- Reunification framework project – using NSCC process to improve reunification success.
- Improving discharge planning with dedicated legal and social work support committed to discharge planning and delivery of Discharge Care Orders.
- Continued growth of special guardianship offer and support.
- Launch of 'Reflect' – programme to support reduction in number of recurring pregnancies ending in children being removed.
- Evaluation of rates of pay for Foster Carers to better reflect costs of living and reducing poverty related risks.
- Delivery of Kick start and Supported Lodgings Projects
- Multi Systemic Therapy – continued roll out of MST approach across services to include move-on / step down support for families.
- Early Permanency Process to be established prioritising permanency from the start.

We also aim to;

- Maximise the use of new and increasing regional capital funding to develop new emergency placement accommodation/ units to increase the provision of emergency respite accommodation for those families in crisis.

In-house children’s care home provision

North Wales secured £3.8m grant funding for a regional transformation programme for children and young people for 2021/22. The strategic partnership of local authorities and health board in each geographical area within the region are overseeing the delivery of the transition programme. In the Central and East areas, two purpose built Residential Assessment Centres will be opened in 2022/23. They will support the provision of in house care closer to home for children with complex behavioural and emotional needs.

Table 22 Additional annual capacity created by Transformation Programme Funding 2021/22

Area	Annual Assessment Placements	Annual Emergency Placements	Care Home placements
West (Anglesey and Gwynedd)	-	-	-
Central (Conwy and Denbighshire)	12	-	12
East (Wrexham and Flintshire)	12	182	4
North Wales	24	182	4

Source: Local authority data

Notes: East and Central annual assessments based on 4, 16 week placements. East annual emergency placements based on 1 placement with a 2 night maximum stay.

Isle of Anglesey and Gwynedd Councils and BCUHB (West)

There was insufficient demand to justify commissioning a full-time residential family centre unit. Current capacity is adequately fulfilled.

The Transformation Team on Anglesey is a new service that will provide a multi-agency provision of intensive services in Anglesey.

The Team will work with families, aged 0 to 25, who are either at risk of coming into the care of the local authority or where there is a possibility for them to return to the home or remain in the care of their parents / carers safely.

The team consists of a practice leader, psychologist, social worker and two support workers. Their focus is on working with children and young people where a neurological condition may be impacting their behaviours at home, school or out in the community.

Denbighshire and Conwy Councils and Betsi Cadwaladr University Health Board (Central)

Bwthyn Y Ddol

The Bwthyn Y Ddol multi-disciplinary team continues to work with children and young people who are at the edge of care and are at risk of becoming looked after.

The team will initially focus on completing a holistic assessment through a consultation process, in order to recommend a program of interventions.

A new evidence based model of care has been developed through a multi-agency team. This has been tailored to the needs of young people within Denbighshire and Conwy. Early indications suggest that the intervention has helped young people remain at home safely.

A person centred, whole family approach has seen multi-agency collaborative discussions routinely taking place which has promoted partnership work across all agencies.

The new residential assessment centre will provide:

- Four placements for residential assessment
- Short term, unplanned 'emergency' accommodation for two children and young people

It is envisaged that the development will be completed in early 2023.

Flintshire and Wrexham Councils and Betsi Cadwaladr University Health Board (East)

Ty Nyth a Residential Assessment Centre and Children's residential home will provide support underpinned by the Multi Systemic Therapy (MST) Family Intervention Transition (FIT) approach.

The MST (Multi Systemic Therapy) Team became operational in May 2020 during the COVID lockdown, comprising of a supervisor, four therapists and an

administrator. The MST team provides intensive assessment and therapeutic support for young people with significant needs, often with high levels of challenging behaviours across multiple areas which can include verbal and physical aggression, substance abuse, missing from home, self-harm and patterns of school exclusion / risk of exclusion. Each family has a bespoke package of care tailored to the needs of their family, leveraging off existing strengths in the family to provide the best possible opportunity for long term sustainability. The MST Team have met the criteria to operate MST UK model under strict licensing requirement including competency to practice through intensive training. MST is an evidence based clinical model that works with all systems surrounding the child, including education, community influences and any significant adults / others in the family. It builds resilience of the family and offer supports that is accessible '24/7'. Acknowledging that problems in the families can occur at any time of the day or night. Appointments take place in the family home at times that are convenient to the family. The team operates with MST's ethos of 'whatever it takes.' The team provides direct support to build the resilience of families for between 3 and 5 months. The focus is preventing out of home placement by care or custody in youth presenting with anti-social behaviour at home, in the community and/or in school.

The service will provide:

- 4 residential assessment placements at any one time (12 to 16 week length of stay) aged 12 to 17 years.
- Support to young people's carers by the MST FIT team to increase skills and support a smooth transition home.
- Ongoing family support for up to a further 4 months and with other key agencies, such as social care and schools' and other community based support networks. The goal is to improve family independence, reducing long term reliance on statutory services.
- 1 placement for children requiring emergency accommodation (2 night maximum stay).

Park Avenue will offer 4 long term placements for those children who do not suit support in larger settings. Indicatively the strategic partnership are seeking to commit to 6 small group homes over the next 3 years.

Consideration of market quality

Regional

Children's Commissioning Consortium Cymru (4C's) are a Welsh National Team working to support Local Authority Children's Social Services Departments to commission and contract placements for Children Looked After. They manage the All Wales Residential Framework for the Provision of Services for Children & Young People Looked After across Wales.

Framework monitoring of Quality Assurance and Risk Management processes within the Framework identifies trends in relation to providers and issues.

Isle of Anglesey

Anglesey has two registered Small Group Homes – known as “Catrefi Clyd Môn” - that are registered and running – Cartref Clyd Bryn Hwfa, and Cartref Clyd Llanfairpwll, - both of which have been running at full capacity throughout the year, working with young people with complex care needs who have suffered early childhood trauma and struggle with attachment disorders.

Following the success of the first two homes, Anglesey is currently nearing opening its third Catrefi Clyd Môn in Caergybi (Holyhead), a specialist small group home, which will be an opportunity for respite for children supported by the specialist children's services.

During the next twelve months a fourth property will be opened, which is still in its planning and registration phase -Cartrefi Clyd Môn Rhosybol.

There is another project with the planning and registration phase of Catrefi Clyd Môn Llangristiolus, which will be a modern facility specialising in Day Services for its Specialist Children's Services. With the opening of these 2 new facilities in 2022, out of county placements will be reduced further.

The facilities at Cartref Clyd Bryn Hwfa in Llangefni and Cartref Clyd Llanfairpwll were inspected by CIW in 2020 and both were judged to be Excellent.

Denbighshire

Denbighshire is committed to continuous improvement through engaging with and listening to children and young people and their carers and paid staff via surveys and at key stages of the support process for example end of placements.

Children have helped to shape contracts for the Care Leaver Service and Regional Advocacy Services through the evaluation process.

There is an ongoing consultation with Children and Young People in conjunction with children and young people about the language used by professionals when discussing verbally or in writing the lives and circumstances of care experienced children and young people. This is in response to requests by Voices from Care, Young Commissioners and the Family Justice Young People's Board who have highlighted the language used by professionals and its impact on children and young people.

Collaborative Conversations Training has enabled Children's Service practitioners to consider how to build better relationships with people. There was significant practitioner feedback as part of a reflective exercise.

Flintshire

During April 2021, Care Inspectorate Wales (CIW) completed an assurance check to review how well the Local Authority Social Services continue to help and support adults and children with a focus on safety and well-being. The key lines of enquiry were focused within the four principles of the Social Services and Well-being (Wales) Act 2014 and findings / judgements were aligned to these – People – Voice and Control, Prevention, Well-Being, Partnerships and Integration.

Current and projected trends

- Challenges in accessing secure welfare beds and local alternatives that provide crisis intervention and diversion from secure accommodation.
- Challenges in sourcing appropriate local placements for children and young people with complex needs.
- Need for additional and appropriate short term care arrangements and facilities for children. This also includes children with additional needs and on occasions their siblings.

- Children ages 16+ often have complex needs and placement options are limited, a strategic approach is needed in supporting the accommodation and support needs of young people ages 16-18 and for care leavers.

Impact of commissioning practices on the market

All Wales Local Authority Frameworks are used to commission individual placements across a range of placement types. These frameworks deliver strategic level partnerships with providers in fostering and residential services. The frameworks are used where either the Regions Sufficiency Duty necessitates external commissioning or where best quality, outcome delivery and value for money is achieved through external commissioning rather than internal service delivery. The All Wales Frameworks are managed by the 4C's.

The vehicle used for e-tendering external fostering and residential placements is the Children's Commissioning Support Resources (CCSR) which offers transparent and outcomes focused placement commissioning for both Framework and Non-Framework regulated placements and allows compliance with the relevant procurement guidance and regulation that underpins commissioning.

Provision of service in the Welsh language

Children who are placed out of country due to lack of specialist placements do not have the option to receive care services in Welsh. This is a particular issue in Gwynedd.

Preventative services

The Population Needs Assessment identified a key priority to support child and adolescent health and well-being with an emphasis on preventative services. This was identified as a key area of priority across the region.

The Integrated Care Fund 2016-22 has been used to explore new and innovative ways to provide early intervention to those in most need. Without this funding children and families may have required increasing interventions from Social Care, Betsi Cadwaladr University Health Board Children and Adolescent Mental Health Services in both Tier's 3 and 4 and North Wales Police, and may have not been able to remain with their families.

Learning from previous projects should be used to further explore the development of preventative services through the Regional Investment Fund 2022-27.

Isle of Anglesey

The children and families service continues to invest in preventative services to decrease the number of children and young people requiring to be looked after. The main preventative provision is the resilient families team. They provide intensive support for families where substance misuse, domestic abuse and parental mental health difficulties have been identified and contribute to the risks that the children and young people may face at home. Through utilising strength based and psychological informed interventions the team has consistently demonstrated that these are effective ways of decreasing risk and facilitating change that allow families to remain together. In addition, a peer mentor programme has been developed and although it's early days we expect this to be an effective addition to the offer.

The Transformation Team is a new service established in 2021. They will provide a multi-agency provision of intensive services in Anglesey. The Team work with families, aged 0 to 25, who are either at risk of coming into the care of the local authority or where there is a possibility for them to return to the home or remain in the care of their parents / carers safely. The team consists of a practice leader, psychologist, social worker and two support workers. Their focus is on working with children and young people where a neurological condition may be impacting their behaviours at home, school or out in the community. In 2022 the team will be incorporated into the resilient families' team widening the remit and scope of that team.

The service aims to provide at the earliest possible opportunity, early intervention and prevention services to families. Provisions include the team around the family that has recently been increased in size from 6 to 8 support workers. Our commissioned services include GORWEL domestic abuse service, Action for Children emotional wellbeing and young carers, Adferiad parental mental health support and the early Help Hub and One Front door multi-agency meetings.

Gwynedd

Through ICF monies, Action for Children have established the Gwynedd Repatriation and Prevention (RAP) service for Looked After Children which provides a direct therapeutic service to reduce the number of Looked After Children, including

reducing the need for, and the number of expensive out of county placements and to support the development of a high quality local care provision for Gwynedd children. The service also prevents family breakdown including adoption breakdowns which result in the need for a looked after placement.

The predominant need from referrals is to stabilise foster placements, we offer support directly and indirectly via carers and other professionals. The support to foster parents is not just to new foster parents but also to experienced and established carers. As always, collaborative working is key to the success and in these instances working in close partnership with fostering is vital particularly focussing on self-care for foster parents. The RAP service has continued to be active to members of the closed Gwynedd fostering Facebook group, sharing advice and links on a variety of topics from parenting to pandemic issues.

The outcomes of the service are to:

- Reduce the number of Children Looked After.
- Develop a whole systems therapeutic approach to the families at risk of breakdown.
- Prevent children becoming looked after by providing Attachment-Focussed Therapy to enable children, young people and their families to better understand trauma and its impact.
- Ensure children and young people are able to achieve and maintain stable care placements by therapeutically supporting carers to understand and manage behaviours that challenge.
- Support and upskill carers to develop nurturing, therapeutic responses to behaviours which helps stabilise placements and prevent placement breakdown.
- Deliver an accessible, timely solution focussed, non-stigmatising service.
- Provide intensive support and therapeutic input for looked after children who are suitable to be repatriated to their home community in Gwynedd.
- Work with adoptive families to achieve placement stability

The service is person centred in its approach, the creativity and adaptable support of the staff ensures this.

The feedback has been very positive with one example below:

“Absolutely brilliant and invaluable support and advice. The service has been a real support and something we feel confident in and know that their always there for us

as a family to help guide us through the bad times and for us to just vent our frustrations to! their level of commitment to us shows in their aftercare contact making sure we are ok after contacts and bad weekends. Cannot rate this service highly enough”

Conwy

Youth Justice

- Referral orders – 38 young people engaged in the last 6 months, 4 re-offended
- Enhanced Restorative Justice Work - 66 initial referrals
- Supported 78 people who had been harmed and then 44 of the young people (perpetrators) were supported to engage in specific interventions guided by the victim’s views to develop an understanding of the impact of their behaviour
- No young people that engaged within the project were made subject to custodial sentence

Table 23 Conwy Youth Justice Referrals, April to September 2021

Type of referral	Number
Yellow Cards	203
Flat Community Resolution	13
Prevention referrals	44
Community Resolution +	24

Total	290

Source: Local authority data

Denbighshire

2021 saw the establishment, via Children and Young People’s Transformation Programme funding of LIFT (Local Integrated Family Team). LIFT offers targeted early support for families experiencing difficulties with managing emotional and behavioural difficulties.

The team, which includes wellbeing navigators, occupational therapists, behavioural support specialists and a psychologist, works with families to understand the challenging behaviour and act as a source of information and support to help

develop and implement positive behavioural plans and to provide specialist consultation when required.

The multi-agency team consisting of multi-disciplinary professionals have developed a specific model of care and a partnership approach to support families in Denbighshire and Conwy. They are now operational and working directly with children and young people and their families.

The programme has also upskilled 78 local authority and health staff in therapies that the team will be using, this has encouraged a common approach and shared language, providing consistency across partner agencies and teams. The independent evaluation of the project stated:

- Strong partnership approach at senior level was a key driver in getting the new services up and running.
- Partner agency staff were impressed at how quickly the LIFT team came back to them in response to referrals and requests for advice and guidance.
- Opportunities for consultations and joint working which they felt was contributing to learning and development for the children's workforce.
- Families have engaged well.

Feedback from parents:

- "Life is so much better at home now since [staff members] made that video for us"
- "M is so much more in touch with his feelings as I am since LIFT has been helping us, his behaviour has also improved"
- "It has been lovely to have been listened to and not judged"

During the period where the Integrated Care Fund was provided to Denbighshire the provision of this edge of care support has worked with 122 families (accounting for 200 children).

Integrated Families First / Flying Start programme (IFFFS)

The IFFFS programme provides a range of Family and Parenting Support in Denbighshire. We aim to provide early intervention and prevention services for vulnerable families to avoid escalation and ensure children in our most deprived areas receive extra help.

In 2021-22, our Families First services received 302 referrals. We had an average monthly waiting list of 18, and an average waiting time of 26 days from receipt of referral to allocation of a worker. We supported 369 families and newly assessed 114 families' needs.

The Team Around the Family (TAF) coordinates multiple services and interventions around individual families, securing engagement, assessing need and planning support. Amidst ongoing issues and fluctuating needs around Covid-19, to date the TAF team have successfully concluded 29 action plans with families. Using a Welsh Government piloted methodology, we estimated the potential cost savings achieved by TAF for other services. The most recent available figures for January to December 2021 show savings of £122,823.

Table 24 Potential cost savings from TAF to services, January to December 2021

Service area	Estimated savings	Issues addressed
Crime	£52,272	Antisocial behaviour, domestic abuse & criminal behaviour
Education	£22,264	Absence, exclusion & school readiness
Health	£6,187	Drug misuse
Mental health	£18,052	Mental health issues in children, young people & adults
Employment	£24,048	Support to gain employment
Total	£122,823	

Source: Local authority data

In 2021, our Flying Start Health Visitors supported 1,182 children under 4 in the most multi-deprived parts of Prestatyn, Rhyl and Denbigh. We supported a further 52 families across the county through Outreach. Our Speech and Language therapists helped 102 children alongside our Early Language Development team, who delivered Portage and Laugh and Learn interventions to 36 children. From January to December 2021 we provided 31,998 free childcare sessions to 366 children, and provided 1,348 additional sessions.

Our Health Visitors contribute significantly to safeguarding children in Denbighshire. From January to December 2021 the team made 218 contacts with children in Child

Protection measures, 135 contacts with children with a Care & Support Plan and 115 with Looked After Children. They made 639 contacts with children needing a Tier 3 Intensive service.

Table 25 Denbighshire health visitor activities, 2021

Activity	Number
Child Protection Referrals	102
Court Reports / Police Statements	12
Case Conference reports/attended	77

Looked After Children Reviews attended	29
Safeguarding Pre-Birth Assessments	97
Safeguarding related meetings attended	337

Source: Local authority data

In January we appointed a new Safeguarding Nurse who attended four Case Conferences and six professionals' meetings (Core Groups/Care & Support Plans/Looked After Children).

Flintshire

REFLECT

The REFLECT Service supports women who have had one or more children removed through care proceedings and are at high risk of having children who will be subject to the same experience.

The Early Help Hub is a multi-agency early help resource for children and families demonstrating two or more Adverse Childhood Experiences (ACEs). Partners include Social Services, Police, Health, Youth Justice, Housing, Flintshire Customer Connects, Education, Family Information Service, Early Years Support and Flintshire Local Voluntary Council (FLVC).

The Early Help Hub received 2,641 referrals between April 2020 and end of March 2021 and the team have adapted to meet needs during the pandemic. All Early Help Hub members quickly reverted to having discussions online and agencies adapted well during lockdown and there was no interruption with meetings. Referrals slowed down slightly during April/May but started to pick back up again from June.

Parent and Child Together Placement'

The 'Parent and Child Together Placement' recruitment campaign is beginning to come to fruition. This aims to keep children with their parents in a specially assessed foster care setting.

Flintshire closely scrutinise decisions about whether older young people should be taken into care and, in particular, what difference can be achieved at this relatively late stage.

Flintshire Meeting Service

Flintshire Meeting Services approach is aimed at keeping families together wherever possible. Families are offered a Family Group Meeting at the earliest opportunity, to prevent them from reaching crisis. Family Group Meetings explore if wider family members or connected persons would be willing to put themselves forward to be assessed to care for the child. Further funding has been made available to strengthen this approach. We have seen an increase in referrals to the service and it's been noted that families during this period required additional support due to the impact of COVID19 and the strain and increased pressure / stress on family life. We have also seen a sharp increase in referrals from statutory services which again highlights the strain the pandemic has and is having on families.

Family Information Service (FISF)

The Family Information Service is a statutory local authority service providing free and impartial information, advice and guidance to families (and those working with families) on a range of topics and in various formats.

Topics include health, education, leisure, finance and registered childcare. The service processes an average of 20,000 enquiries each quarter either face to face, by telephone and email or on the website and via social media.

Wrexham

Throughout the year, the Department has made steady progress in the development of early intervention and preventative services. In November 2021, the Early Help and Prevention Framework document was published, following a multi-agency launch along with the Children's Services Threshold document.

The Prevention and Early Help Framework document is to assist all when planning Prevention and Early Intervention Services. It supports in considering who needs to be involved, what the principles are that will drive discussions and decisions and it enables individuals to develop a clear business case for enhancing, expanding or repurposing current services.

Since the development of the Prevention and Early Help Framework, a new Prevention and Early Help Partnership has been established and work is currently underway to develop a strategy that will help to focus both the Council's and its Partner's on ensuring that support to children, young people and families is available to them before issues worsen. It aims to help children, young people and families to help themselves in the first instance but when more help is needed, we aim to provide the right support much earlier. Further development of the Prevention and Early Help Partnership will continue throughout the coming year.

6. Fostering services

Population overview

The number of children is predicted to decrease

The estimated number of children (aged 0-15) in 2020 and the projections for 2040 demonstrate the number of children in North Wales is predicted to decrease over the coming years (Welsh Government, 2020). This decrease can be seen across all of the local authorities in North Wales, with the exception of Gwynedd which is predicted to have a slight increase (1.8%). Overall the number of children in North Wales is expected to reduce by 6.1%

The Market Position Statement update (2021) gave an overview of key statistics;

- The number of children who required a foster placement increased by 34% during the period April 2016 (600 children) to March 2020 (805 children).
- As at the 31st March 2020, there were 805 North Wales children living with a foster carer, 40% (325 children) were living with an independent foster carer and the majority of those children required a specialist placement in order to support their needs, which could not be supported by our in-house services.
- There are currently 11 children who are living in a children's home who could be supported by specialist foster carers. There are not enough foster carers with the right skills to support the needs profiles of our children.
- During the period April 2020 to the end of February 2021, there were 34 children who required a parent and child placement and assessment.

Demand for foster care has increased

The number of children in foster care in North Wales has increased year on year since 2015 to around 945 in 2020. Wrexham had the largest increase, with the number of children doubling. Gwynedd also saw a significant increase. Numbers in the other local authorities have fluctuated.

Table 26: Number of children looked after in foster placements at 31 March

Local council	2016	2017	2018	2019	2020
Anglesey	90	100	100	90	110
Gwynedd	145	145	145	165	200
Conwy	120	125	150	140	140
Denbighshire	125	110	110	115	115
Flintshire	135	140	135	150	140
Wrexham	120	135	170	175	240
North Wales	735	755	810	835	945
Wales	4,250	4,425	4,700	4,840	4,990

Numbers have been rounded so may not sum.

Source: Children looked after by local authorities in foster placements. Stats Wales, Welsh Government

Despite the increasing numbers in foster placements, the Market Position Statement (2019) expressed that a large increase was not expected in the future.

Local authorities have in-house foster care places and independent fostering agencies providing places. Some of the independent foster agencies are charities or co-operatives. The table below shows the number and percentage for each type of foster placement provision, broken down by Local Authority.

Table 27: Number of foster placements in the local authority area commissioned by provider type

Local council	In House (number)	Independent provider (number)	Total (number)	In House (percentage)	Independent provider (percentage)
Anglesey	37	32	69	54%	46%
Gwynedd	98	31	129	76%	24%
Conwy	82	41	123	67%	33%
Denbighshire	69	19	88	78%	22%
Flintshire	55	13	68	81%	19%
Wrexham	119	21	140	85%	15%
North Wales	460	157	617	75%	25%

Source: Provided by each local authority

Predicted increased demand for foster parents

The National Foster Network calculated a need for, an estimated, 550 new foster parents across Wales every year to keep up with demand. This suggests there could be a shortage of foster placements in coming years, given the increasing demand.

Sufficiency issues for some children

The Market Position Statement (Regional Partnership Board, 2019) identified sufficiency issues with finding placements for children with particular needs including:

- Respite care
- Young offenders
- Refugees, immigrants, asylum seekers
- Young parents
- Sibling groups
- Emergency situations

The stability of the workforce is an issue, with increasing demand for placements and the number of placements projected do not meet with the forecast demand.

The Foster Wales website facilitated the joining of the 22 Local Authorities to form a national network of local fostering expertise. Its focus is to make a bigger impact on a national level, working together with foster carers, to build better futures for local children. Sharing one brand and, one voice, to strengthen recruitment and support of foster carers.

The National Fostering Framework

The National Fostering Framework (2018) finds children who live with foster carers in their own locality more likely to thrive and children in local authority provision more likely to stay in their home authority, enabling them to maintain important links. It is vital local authorities increase local placements and reduce out of area placements. According to the National Fostering Framework (2018), connected fostering (with family or friends) has seen increased demand. It also finds that local authority placements have better outcomes for children. The framework states that local authorities need to be able to have capacity to facilitate this, or otherwise ensure that the child has opportunities to maintain connections if placed in alternative fostering.

Market overview

Regional market overview

The table below shows a breakdown of fostering provision by provider type.

Table 28: Fostering placements, beds and market share by provider type.

Provider Type	Market share (Percentage)	Placements (number)	Care settings (number)
In House	62%	776	453
Private	37%	469	206
Third sector	1%	16	7
North Wales	100%	1261	666

Numbers have been rounded so may not sum.

Source: Looked After Children Census. StatsWales, Welsh Government

Gwynedd market overview

Figures in the table below, show children in the Gwynedd area have been increasingly placed into foster placements within Gwynedd. The number placed outside of Gwynedd but still in Wales has reduced. However, placements outside of Wales have increased.

Table 31: Number of children in foster placements by area - Gwynedd

Location of Placement	2018	2019	2020	2021	Change No
Within Local Authority	110	120	140	135	25
Outside Local Authority Wales	35	40	50	50	15
Outside Wales	0	5	5	15	15

Numbers have been rounded so may not sum.

Source: Looked After Children Census. StatsWales, Welsh Government

The figures below show children in Gwynedd are increasingly placed into foster placements both within and outside Gwynedd. They have also seen increased numbers of placements with family/friends.

Table 32: Number of children in foster placements by type - Gwynedd

Type of Placement	2018	2019	2020	2021	Change No
With relative/ friend, within local authority	35	50	50	45	10
With local authority, within local authority	70	65	85	85	15
With agency, within local authority	0	0	0	0	0
With relative/ friend, outside local authority	5	10	15	25	20
With local authority, outside local authority	10	15	15	10	0
With agency, outside local authority	20	20	30	30	10

Numbers have been rounded so may not sum.

Source: Looked After Children Census. StatsWales, Welsh Government

Gwynedd local authority themselves report a “relatively good provision” of foster placements available within the county, when compared to other provision but recognise there is potential for shortages in foster carers in the near future. The local authority anticipate approximately 10 to 12 new foster placements would be required each year to maintain this and at least 18 to 20 to improve provision.

Conwy market overview

Conwy has increased foster placements inside the local authority and those outside of Wales have reduced significantly. However, those outside of Conwy but still in Wales have increased, see figures below.

Table 33: Number of children in foster placements by area - Conwy

Location of Placement	2018	2019	2020	2021	Change No
Inside Local Authority	95	85	100	100	5
Outside Local Authority Wales	20	35	35	35	15
Outside Wales	35	25	5	5	-30

Numbers have been rounded so may not sum.

Source: Looked After Children Census. StatsWales, Welsh Government

Conwy has seen a reduction in foster placements with the local authority and a small increase in agency placements.

Table 34: Number of children in foster placements by type - Conwy

Type of Placement	2018	2019	2020	2021	Change No
With relative/ friend, inside local authority	25	20	15	20	-5
With local authority, inside local authority	65	60	55	55	-10
With agency, inside local authority	25	30	35	30	5
With relative/ friend, outside local authority	10	10	10	15	5
With local authority, outside local authority	0	0	0	0	0
With agency, outside local authority	20	20	20	20	0

Numbers have been rounded so may not sum.

Source: Looked After Children Census. StatsWales, Welsh Government

Conwy report that both emergency and longer term placements are needed urgently. The local authority recognises the importance of local placements for children, they are considering a range of options to increase provision in the county and reduce reliance on costly temporary arrangements and out of county placements that are far from the family.

Denbighshire market overview

The figures in the table below show placements for children from Denbighshire have increased both inside Denbighshire and outside of Denbighshire but still in Wales.

Table 35: Number of children in foster placements by area - Denbighshire

Location of placement	2018	2019	2020	2021	Change No
Inside local authority	85	90	90	90	5
Outside local authority Wales	15	15	15	20	5
Outside Wales	10	10	10	10	0

Numbers have been rounded so may not sum.

Source: Looked After Children Census. StatsWales, Welsh Government

Denbighshire has seen increased agency use inside and outside of the area and increased placements with family/friends out of area.

Table 36: Number of children in foster placements by type - Denbighshire

Type of Placement	2018	2019	2020	2021	Change No
With relative/ friend, inside local authority	20	20	20	20	0
With local authority, inside local authority	60	70	65	65	5
With agency, inside local authority	0	5	10	5	5
With relative/ friend, outside local authority	5	10	10	10	5
With local authority, outside local authority	10	5	0	0	-10
With agency, outside local authority	10	10	10	15	5

Numbers have been rounded so may not sum.

Source: Looked After Children Census. StatsWales, Welsh Government

Denbighshire local authority have identified a need to increase care capacity to meet population needs within Denbighshire for foster care services. They also recognise a shortage in the availability of overnight respite accommodation for children with complex disabilities.

Flintshire market overview

In Flintshire children have increasingly been placed outside of Flintshire both in Wales and outside of Wales. The figures also show a reduction in placements in Flintshire.

Table 37: Number of children in foster placements by area - Flintshire

Location of Placement	2018	2019	2020	2021	Change No
Inside Local Authority	95	95	90	90	-5
Outside Local Authority Wales	25	35	30	45	20
Outside Wales	15	20	15	20	5

Numbers have been rounded so may not sum.

Source: Looked After Children Census. StatsWales, Welsh Government

Data in the table below shows a considerable increase in the use of agencies for Flintshire both inside and outside of the local authority.

Table 38: Number of children in foster placements by type - Flintshire

Type of Placement	2018	2019	2020	2021	Change No
With relative/ friend, inside local authority	35	35	35	30	-5
With local authority, inside local authority	60	60	50	55	-5
With agency, inside local authority	5	5	5	15	10
With relative/ friend, outside local authority	15	15	15	15	0
With local authority, outside local authority	15	15	10	15	0
With agency, outside local authority	5	15	20	25	20

Numbers have been rounded so may not sum.

Source: Looked After Children Census. StatsWales, Welsh Government

Flintshire report as of 31 March 2021, there were 109 children and young people in foster placements within and outside the Local Authority Area (not including kinship

placements) and as of 16 February 2022, this figure was 102. They state they are currently able to look after the majority of children under 8 within in house fostering services.

The local authority identified the following market sufficiency issues:

- Need to meet the forecast demand with in-house foster carers.
- Foster parents to support children in the age categories 10 to 14 and 15+.
- Sourcing appropriate local placements for those with complex needs.
- Meeting demand for children who need complex multi-agency care packages or have challenging risk management plans, example behaviours include anger management issues, verbal and physical aggression towards adults.
- Shortages for sibling groups and children with disabilities.
- Not enough skilled foster parents for children at the highest end of needs profile, those currently living in care homes.
- Insufficient placements lead to children being placed in unregulated settings.
- Not enough carers who speak Welsh.
- North Wales has a shortage of parent and child places, especially in Wrexham and Flintshire.

Wrexham market overview

The table shows how there has been an increase in all types of placements in Wrexham, including children placed out of area.

Table 39: Number of children in foster placements by area - Wrexham

Location of Placement	2018	2019	2020	2021	Change No
Inside Local Authority	115	120	145	150	35
Outside Local Authority Wales	30	40	65	75	45
Outside Wales	20	15	20	25	5

Numbers have been rounded so may not sum.

Source: Looked After Children Census. Stats Wales, Welsh Government

The table below demonstrates a sharp increase in the use of agencies for Wrexham, with the steepest increase outside of the local authority.

Table 40: Number of children in foster placements by type - Wrexham

Type of Placement	2018	2019	2020	2021	Change No
With relative/ friend, inside local authority	60	70	75	80	20
With local authority, inside local authority	65	55	70	70	5
With agency, inside local authority	15	20	25	30	15
With relative/ friend, outside local authority	0	0	0	0	0
With local authority, outside local authority	20	20	15	15	-5
With agency, outside local authority	15	15	40	55	40

Numbers have been rounded so may not sum.

Source: Looked After Children Census. StatsWales, Welsh Government

Progress has been made in the implementation of the 4C's Framework and a Placement Officer has been appointed to manage the Framework database within Wrexham. The usage and expectations of the 4C's Framework continues to be embedded into practice as evidence as best practice. We have experienced an increased demand for placements able to meet the need of highly complex young people. This has led to an increase in the number and cost of such placements. In order to deliver against the not for profit agenda, further investment will be needed in the development of local authority residential care.

Wrexham see reducing the number of looked after children as a priority, as well as removing profit from the children's placement market. The local authority also recognises a lack of intermediate or short term placements for children.

Market stability

Regional challenges

The Market Position Statement (2019) and 'Foster Wales' (2021) identified challenges to the stability of fostering services in North Wales and Wales as a whole listed below:

- Recruitment and retention issues
- Placements for children with particular needs including; respite care, young offenders, refugees/immigrants/asylum seekers, young parents, sibling groups and emergency situations
- It is estimated that Wales will need 550 new foster parents every year to meet demand

Isle of Anglesey market stability

The local authority recognises the following as issues affecting the future stability of the fostering service:

- Workforce – recruitment, retention, age profile of workforce, costs
- Supply and choices available
- Can the cost of living crisis impact the numbers of looked after children and therefore hamper the projection of decrease in demand?
- Impact of children seeking asylum on resources including placements and support available.
- Impact of unplanned arrivals to the Port of Holyhead.

Gwynedd market stability

Gwynedd have identified several factors that may influence fostering stability:

- Recruitment and retention of staff
- Potential shortage of foster placements, an estimated 10-12 new placements needed each year to maintain and at least 18-20 to improve provision
- Finance - concerns around maintaining quality services with limited resources
- Lack of funding often results in using out of county providers which results in higher costs contributing further to the problem

Conwy market stability

Conwy refer to key issues around future stability of their fostering service:

- Recruitment and retention (linked to pay and conditions but not exclusively)
- Emergency and longer term placements in county are needed urgently

Denbighshire market stability

Denbighshire recognises some key factors that may affect stability of the service:

- Increase in capacity to meet population needs within Denbighshire
- Staffing and recruitment issues
- Specialist training and knowledge
- Possibly long term funding problems
- Increased complexity of need
- Supply of specialist care not meeting demand
- Overnight respite care for children with complex disabilities
- Lack of placements for children with challenging/complex behaviour

Sustainability of provision

- Denbighshire recognises the following issues affecting sustainability of the service: Recruitment of in-house foster carers has been impacted by the pandemic with a lack of applicants coming forward, resulting in increased use of Independent Fostering Providers.
- Lack of availability has resulted in no offer or placements at a considerable distance, which is not always in the best interest of the young person.
- Children who require a placement but where foster care cannot be sourced are being escalated into residential care, but there is placement insufficiency and a perceived reluctance to offer placements to young people with complex needs. This can result in a placement at a distance away.
- Particular pressure if a child/young person presents with self-harm or suicidal ideation, providers show reluctance to offer placements to and emergency provision is extremely limited.

Preventative actions for children on the edge of care

During the period where the integrated care fund supported the provision of edge of care support, there were 122 families (200 children) supported including:

7 parents and 2 foster carers (19 children) attended new Parent Participation Group (collaboration with Parents and Carers Against Exploitation, North Wales Police, Health colleagues and Denbighshire Safeguarding Lead). Of these children, 6 no longer reach criteria for multi-agency oversight within Denbighshire's Exploitation Panel and 2 have been closed to social care.

2 children in long-term foster placements received an intensive intervention which stabilised their placement and enabled the foster carer and parent to have a shared understanding of each child's individual needs.

16 staff across Social Care, Early Intervention and Housing attended Dialectal Behavioural Therapy (DBT) Skills training and the Therapeutic Service will mentor these staff to develop DBT Skills groups for Foster and Kinship Carers, Looked After Children, Care Leavers and Semi-Independent and Homelessness Projects.

1 young person received an intensive intervention from the Therapeutic Service following police colleagues using their Powers of Police Protection. The young person required short-term foster care and was rehabilitated back to their family within 6 weeks, they are now closed to Social Care.

Engagement

Denbighshire list the following engagements used to help improve quality of service:

- A quality of care evaluation will be carried out of Denbighshire Fostering Service in April and May 2022. Questionnaires will be sent to gain views of children/young people, foster carers, kinship carers, panel members and parents, the results will assist in making improvements where required as well as recognising good practice.
- Closed Facebook group for foster carers developed with views from foster carers and is regularly being updated with information. Creating the page/group has provided another avenue to obtain feedback, information is circulated to a larger geographical area and accessibility has improved.
- Two children/young people's forums meet on a regular basis. They have not been able to meet over the last year, but staff running the forums kept in touch regularly.
- Kids in Care Young People's Forum (KIC Club) for young people aged 8 to 15 living with foster carers. They meet and do activities during half terms, share their experiences, say what is going well and what they would like to change.
- KWC Club (Kids who care) is a group of children/young people whose parents foster and are also part of the fostering process. They meet during half term, share experiences, say what's going well and what they would like to change.
- Foster carers virtual coffee mornings, invites were sent with a package containing a tea bag and packet of biscuits. To allow better conversation, foster carers were

split into groups based on their supervising social worker. Facilitated by the supervising social worker with drop-in appearances from; Head of Service, Service Manager, Fostering Team Manager and Placement Commissioning Officer/Recruitment Officer. It had good attendance, lots of laughter, discussion and feedback from attendees was very positive.

- The Fostering Service have increased the level of communication with Foster Carers with a regular newsletter and the Denbighshire Fostering Service Competition, whereby children have been asked for Christmas cards to be designed, pebbles to be painted and a Sunflower growing competition.

Flintshire market stability

Flintshire identified several issues impacting the stability of fostering services:

- Foster carers with skills/experience to support teenagers and sibling groups
- Increase in 14, 15 and 16 year olds entering care
- Parent and child placements

Action taken to improve stability

Recruitment of foster parents has been identified as an issue for Flintshire, in response the [Foster with Flintshire](#) portal has been developed to promote Fostering roles. The site contains a wealth of information, resources and stories from some of Flintshire's current foster parents. They have also targeted their recruitment strategy to address demand for foster parents with skills and experience to support children age 12 and over.

Mockingbird Programme

Flintshire was the first council in Wales to introduce the evidence-based Mockingbird model for foster placements. The programme nurtures the relationships between children, young people and foster families supporting them to build a resilient and caring community of six to ten satellite families called a constellation. The aim of the model is to improve foster care and outcomes for fostered young people.

Action for Children - Repatriation and Prevention (RAP) Service

The service provides intensive therapeutic support for Children Looked After with support from experienced foster carers. The service is a partnership between the local authority, health, CAMHS and Action for Children.

The aims of the service are to:

- Prevent placement breakdown and escalation to crisis point leading to out-of-county placements
- Return young people to stable placements in their home
- Ensure looked after children can access educational opportunities
- Increase resilience and confidence in children and carers

Adaptations to Foster Carers Homes Policy

'Adaptations to Foster Carers' Homes' policy was introduced in 2020, supporting foster carers make necessary adaptations to their home to provide adequate space for children/young people. It supports; sibling placements, the needs of children with multiple disabilities, secure extra capacity for foster placements and to meet health and safety requirements which would otherwise result in a child being moved.

Funding compliments existing support and is a step forward in securing local and stable placements for children. Applications for grant funding will be considered up to £36,000, and £20,000 for relocation to a more suitable property. To access the grant, carers and social worker must first exhaust other options/resources.

Grants are also available to; existing or prospective adoptive families, family and friends/carers of children under a Special Guardianship Order and carers who are committed to their caring role for the long term, or at least until the child reaches 18.

Placement stability meetings - Facilitated in house, when issues with maintaining a placement arise and the Independent Fostering Agency chair when requested.

Disruption meetings - The family group meeting service will bring together stakeholders and look at lessons learnt.

Wrexham market stability

Wrexham identified the following issues that may impact stability of fostering:

- A need to reduce the number of looked after children
- Removing profit from children's placement market
- Intermediate/short term care placements
- Staffing shortages
- Lack of appropriate placements

Carers are needed to support teenagers and mother and babies in the Wrexham area. To recruit carers to meet these needs, the local authority have;

- Commenced a review of rates of pay for carers, proposing an increased rate for specialist/skilled carers able to care for children with complex needs.
- Carried out a recruitment campaign using buses, billboards and social media.

Wrexham's Care Leavers Offer has been progressed throughout the year and the development of accommodation pathways for young people are underway. This will provide varying degrees of support on their pathway to independence and their own tenancy.

This will be achieved by developing in-house services including;

- Supported Lodging's Service
- Kick Start Project
- Step Down Project
- Use of a training flat.

The Leaving Care Team are located in accessible 'info shop' with their social workers while being able to take advantage of the 'one stop shop' for any identified areas of support including access to funding grants and employment support.

Consideration of market quality

The State of the Nation report from the Fostering Agency (2021) provided insight into the quality of foster services across the whole of Wales, the key findings were:

- 44% of independent and 51% of local authority foster carers said they were not supported to maintain contact with children they had cared for. Foster carers perceived this as 'cruel', ending significant relationships for children who have experienced so much loss already.
- Some fostering services are not maintaining foster carer approval, even if they intend to continue fostering. This, and dropping financial support, are barriers to young people entering 'When I am Ready'.

- 20% independent and 12% local authority foster carers have no children in their care. It recommended better use of foster carers skills to meet the needs of children.
- 57% local authority foster carers had an agreed learning and development plan, 31% did not and 12% didn't know. 66% independent foster carers had a learning and development plan, 22% didn't and 12% didn't know.
- Local authority foster approvals were more restrictive and limited than independent approvals, it recommends local authorities assessments use broader approval statuses, robust matching procedures and placement stability processes.
- Foster carers would like to build relationships with social workers and children in their care to have stability and continuity of social worker. Over the previous two years, 53% of foster carers had one supervising social worker, 29% had two, 12% had three and 6% had four or more.
- Foster carers felt 'dismissed', 'ignored' and their role is not valued by the social care workforce. Lack of respect for their commitment, skills and dedication is a long-term, well reported issue in fostering.
- Foster carers want allowances to cover the full cost of caring for a child and payment reflecting their value as a member of the team around the child. Sufficient payments are a must to attract new skilled, committed foster carers.
- Lack of placement choice. To secure good matches for children, services would need to see a significant increase in access to local, quality placements.
- Staffing levels are not sufficient to provide required support for foster families. Services would like staffing to enable best practice and improve standards.
- Trauma-informed practice – concerns about access to training and additional services for those caring for traumatised children. Services would like children looked after to have priority status for services across health and education.
- Support for foster carers with improved peer support services and out of hours provision. Services with this support saw improved retention and stability.

Current and projected trends

Key current trends and projections for the future of foster services:

- Increased demand for placements
- Lack of places for older children
- Lack of places for children with complex care plans/behavioural issues

- Lack of foster parents with skills to support children with complex needs
- Projected increase in demand for placements
- Predicted potential shortage of placements, supply not matching demand

Welsh language

A shortage of Welsh speaking foster parents was identified in Flintshire.

The provision of Welsh language across the rest of North Wales will be discussed within the children's services chapter of this report.

Other provision

There is a significant lack of foster or residential placements for children and young people with challenging or complex behaviour.

Recruitment of in-house foster carers has been impacted by the pandemic with a lack of applicants coming forward. This has resulted in an increased use of Independent Fostering Providers.

Lack of availability has resulted in no offer or placements only at a considerable distance, which is not always in the best interest of the young person.

Children who require a placement but where foster care cannot be sourced are being escalated into residential care, but there is both placement insufficiency and a perceived reluctance to offer placements to young people with complex needs. Again this can result in a placement at a distance away.

There is particular pressure if the child/young person presents with self-harm or suicidal ideation, with providers showing reluctance to offer placements to this cohort. Emergency provision is extremely limited.

Workforce

The National Fostering Framework (2018) highlighted a loss in the number of approved foster households. The framework states improvements need to be made to increase; enquiries, conversions, approvals and retention of foster parents.

The table below shows numbers of foster parents and places have seen a slight increase overall across North Wales. However, Gwynedd and Denbighshire saw a

drop in both the number of foster parents and places available, and Flintshire saw a drop in foster parents but increase in places. If reductions in foster parents or places continue this could result in insufficient spaces for children in these local authorities.

Table 41: Number of approved foster spaces as of 31 March

Local council	2016/17	2017/18	2018/19
Anglesey	86	69	43
Gwynedd	164	178	198
Conwy	113	130	127
Denbighshire	156	155	149
Flintshire	133	157	156
Wrexham	161	172	166
North Wales	813	861	839
Wales	4,075	4,170	4,317

Carer skill set & training desired:

Carers who are able to work with our internal services and are trained in the delivery of therapeutic trauma informed care.

Carers who are aware of the impact of county lines and have received training to support children who are vulnerable to exploitation via these gangs. This includes the resilience to work with children who are being exploited by gangs, frequently abscond and can display verbal and sometimes physical aggression.

- Resilient & trained to work with childhood trauma, absconding, exploitation and self-harm behaviours.
- Carers who are trained to understand the impact of adverse childhood experiences (ACEs) on children who they care for.
- Carers who are trained in crisis intervention, and can work calmly under the pressure of emergency planning.
- Resilient when faced with threat of physical harm & trained in de-escalation, with positive behaviour management planning, minimising use of restraints
- Carers with the ability to speak Welsh or commitment to learn.

Social value

Three providers offer a total of 16 beds in 7 care settings across the region, this accounts for 1.3% of market.

Taking profit out of care for looked after children

One of the wellbeing objectives established within the Welsh Government Programme 2021-2016 is to protect, rebuild and develop our services for children and young people. A key priority in this area of work is to eliminate private profit from the care of children looked after.

Commissioning placements to independent foster agencies can impact on provisions being provided from within the local authority., Local authorities are keen to work in partnership with independent care providers to ensure that both the in-house and independent sector market function to meet foster care needs. Flintshire local authority highlighted this as a potential risk and stated how they were focusing the use of independent foster agencies for those services that they struggle to provide with local authority services.

The foster care allowances survey from The Fostering Network (2020) found even though all local authorities in Wales are paying at or above the national minimum allowance, foster carers feel their current allowance does not meet the full costs of looking after a child. The network recommend foster payments must be transparent

so it is clear to foster carers how much constitutes the allowance, and must be spent on the child, and how much constitutes the fee and is payment for the foster carer's time and skills.

7. Adoption services

North Wales Adoption Service overview

The North Wales Adoption Service provides a regional adoption service on behalf of Wrexham, Flintshire, Denbighshire, Conwy, Gwynedd and Anglesey local authorities. Working regionally helps find new families more effectively, place children quicker and improve adoption support services. In April 2014 it was integrated into the National Adoption Service. The services comply with updated adoption legislation, regulations and statutory guidance in line with the Regulation and Inspection of Social Care (Wales) Act 2016 (RISCA) and with the policy and procedures of the service, within the resources allocated. There is a framework which aims to make it easier for adopters, children and young people get support when needed.

Services provided by the adoption service include:

- Preparing the child for adoption.
- Family finding and matching.
- Safeguarding children.
- Provision of adoption support.
- Recruitment, assessment and approval of adopters.
- Preparing to adopt training (pre/post approval).
- Adoption support (pre/post adoption, buddy system, post adoption contact).
- Birth parent counselling.
- Relinquished babies.
- Services for adopted adults.

Population overview

The table below shows the number of looked after children who were placed for adoption in each local authority. It is worth noting that the service has undergone significant transformation since 2020, therefore it is difficult to compare local data and it does not reflect the service now.

Table 43: Number of children looked after placed for adoption by local authority 2020/21

Local Council	No of Children
Anglesey	6
Gwynedd	2
Conwy	17
Denbighshire	7
Flintshire	1
Wrexham	11
North Wales	44

Source: Figures provided by each local authority

Current and predicted trends

The following issues were raised with regards to adoption services for children:

- Highest placement need is for children from the East.
- Highest number of adopters are from the East.
- Fewer adopters in the West and children needing to be placed away from the East.
- Nationally there are more children than approved adopters available
- Consideration of the number of Welsh language speakers (adopters/children).

The following issues were raised with regards to adoption services for adults:

- Adults requesting their birth records to find their birth parents was shut down during the pandemic, majority of services have resumed but there is a backlog.
- Staffing - 43 staff, 10 are off or due to go off on maternity leave, it is difficult to recruit to fixed term posts so the ability to assess may be impacted in 2022/23.

Quality reports

The Quality of Service Review from the North Wales Adoption Service (2020) highlighted the following areas to improve market stability:

- Increase the number of approved adopters.
- Reduce the number of children waiting for an adoptive family.
- Develop the adoption support service.
- Recruitment - sessional workers and adoption panel vacancies.

Care Inspectorate Wales (2019b) inspection identified these areas for improvement:

- Further develop quality assurance processes and assessment of the degree to which aims and objectives of the statement of purpose are met and evidence demonstrating how these support well-being outcomes for children.
- The availability of the 'Active Offer', to provide services in the Welsh language.
- The statement of purpose and adopters' information pack includes information about the independent review mechanism so adopters are aware of this.
- Intermediary files should include a clear audit trail of work undertaken.

8. Unpaid carers

Population overview

Under the Social Services and Well-being (Wales) Act 2014 carers have the same rights as those they care for and local councils have a duty to assess their needs and promote their well-being. Supporting unpaid carers is a preventative measure for both the individual carer and the sustainability of health and care services.

There are around 79,000 people of all ages providing unpaid care in North Wales, according to the 2011 census, and we expect this number to be increasing as the need for care and support increases. More unpaid carers came forward during the pandemic to access support.

Much of the support that unpaid carers need is provided through care to the person they care for, so lack of provision in the care market leads to additional demands on unpaid carers. The population assessment identified that issues within wider social care workforce recruitment and retention is leading to additional demands on unpaid carers. Specifically, this is impacting the complexity of care meaning that unpaid carers are experiencing caring responsibilities with higher needs of care. Other priorities were the early identification of carers, carer breaks (respite care), improving unpaid carer assessments and digital inclusion.

Market sufficiency

The number of carers is increasing. The largest growth is in those carers providing between 20 and 49 hours a week. There has also been a rise in the number of carers providing 50 or more hours of care per week, in Denbighshire approximately 46% of these carers are over 65 years. It is these carers who are likely to have more intensive caring roles and who will have the greater support needs.

These demographic trends are reflected in the increasing number of people living with long term conditions including learning disabilities, dementia and mental health conditions, as well as a general growth in the older population.

We know from talking to unpaid carers and the mapping work that has been done, that some carers who need support find it difficult to get alternative care and many have been unable to have a break for a long time, due to the impact of the Covid-19 pandemic.

“A short break is any break which strengthens and /or sustains informal caring relationships and enhances wellbeing of carers and people they support” Carers Trust Wales, Road to Respite Report, July 2021.

Welsh Government awarded local authorities a carers respite grant in 2021-22, with emphasis on supporting the development of flexible and person centred forms of respite instead of the more traditional sitting service or replacement care support.

The population needs assessment identified a wide range of services provided across the region to support carers. The Regional Project Manager leading on carers within the regional collaboration team continually maps the full range of services available to carers across North Wales, identifying any areas of duplication and also collaborative opportunities across all six councils and the health board.

In addition to the need for more carer breaks (respite care) provision across the region, the following local needs have been identified:

The following factors have an impact on unpaid carers;

- Gaps in general provision in services for carers of older people and the individuals receiving care.
- Waiting lists for domiciliary care support in each part of Gwynedd because of a lack of provision.
- Gaps in the provision for short term respite from caring when the individual who is being cared for has needs that cannot be met by voluntary/third sector support.
- day centres have been closed during the COVID period – we have been working to provide alternative support on a 1:1 basis. We are reopening day centres gradually and in the process of remodelling day care services for older people developing a more local provision for a smaller number of individuals.
- Respite care in residential homes came to an end during the COVID period as a result of the regulations. This provision has started again, but staffing challenges exist in the Council’s eleven residential homes.
- There are areas where there is a high percentage within the population of older people, and a low percentage of working age population – a recruitment

challenge and competing with other local services/younger individuals leaving the area for work opportunities.

- The geography of the area contributes to the gaps, with a number dependent on public transport for access to appropriate support.

Ynys Môn

The Council are committed to supporting unpaid carers by planning for the future. Forward Thinking Forward Planning is a project within Carers Outreach funded by Local Authority. The project focuses on having conversations with a carer about their current and future needs. Having a conversation at the earliest possible stage allows time to identify and arrange any changes or adaptations they require to support the person they care for, and themselves as the carer.

Gwynedd

The learning disability service has succeeded in continuing to offer respite for services over the Covid period. Over the past six months we have succeeded in increasing this provision, introducing individuals to respite for the first time e.g. transition age individuals, as well as being able to offer regular stays for individuals living at home with unpaid carers/family.

The demand for counselling services provided by the third sector (Carers Outreach) is substantially more than the provision which is currently available.

Day opportunities and support services are continuing to face a challenge regarding the staffing deficit/recruitment therefore a number of individuals are receiving less days/hours.

Use of a holiday bungalow (provided by Antur Waunfawr) has been extended for another six months, with the offer to anyone who is caring in Gwynedd to arrange a free short stay. A number of carers have taken advantage of this.

The Gwynedd community resilience work programme is looking at developing information hubs/community enterprises to meet needs on a local level.

There are respite opportunities for individuals with learning disabilities available through the Gwynedd and Môn Shared Lives Scheme and Seren Cyf. Work is continuing through the community hubs mentioned above to offer opportunities and activities locally and also through our Llwybrau Llesiant Team.

Denbighshire

There is increasing demand for more flexible provision of alternative and respite care covering weekends, overnight or pre-planned periods such as 'Respitivity' for older adults and for both children and adults with complex disabilities, to reduce carer breakdown, to reduce emergency admissions to residential care and to provide more life choices.

Flintshire

- Demand for respite and support for parent carers is a growing service demand, given the complexity of multiple health conditions some children have, as well as a high prevalence of children with Neurodevelopmental Conditions.
- Sourcing respite for children and adults with complex needs, including health needs, remains an ongoing challenge.
- Finding suitable Personal Assistants can be a challenge and an area that we need to develop as well as expanding community based support to build family resilience and capacity to sustain their caring role. Supporting the recruitment of Personal Assistants
- Local building based respite opportunities were severely impacted by the pandemic, with only emergency places being offered.

Wrexham

Engagement with unpaid carers in Wrexham has highlighted a number of significant challenges since the pandemic. Action plans have been developed in partnership with unpaid carers and support organisations. In order to drive the agenda forward, funding for an Unpaid Carers Lead Officer has been secured from the Regional Investment Fund 22/23.

The Unpaid Carers Direct Payment Scheme was launched in 2021/22. 31 payments were made last year. This enabled unpaid carers to purchase respite solutions which meet their needs flexibly.

Market stability

A wide range of support for unpaid carers in North Wales is grant funded or commissioned to third and voluntary sector organisations who have a long and

valued history of supporting unpaid carers. The third and voluntary sector can effectively draw in external funding to develop services for unpaid carers to provide added value to service provision. However, a reliance on grant funding can put the sustainability of some services at risk. Some carers services in North Wales are commissioned regionally or sub-regionally to try to streamline the commissioning and reporting requirements for organisations that work across the region.

The Population Needs Assessment identified that social value delivery models and added social value can be achieved through the shared experience of peer-carers, mutual support and reciprocity. Unpaid carers will require support to create co-operative arrangements and commissioners will need an investment strategy that builds capacity beyond the market.

It is important to have a balance of preventative services that address the health and wellbeing of carers and commissioned services that meet the assessed needs of carers.

The commissioning of services are set against the need to respond to budgetary pressures that are being faced nationally, and therefore investment in sustainable services is key to meeting demand.

We commission services that:

- are flexible, accessible county wide and meet the individual needs of carers
- are more sustainable in the long term.
- encourage engagement with, and access to, community based activities that support the carer and / or the cared for person.
- will enable carers to continue caring, including the provision of information, advice, peer support, training and short breaks away from the caring role.

Gwynedd

The domiciliary-care project is working to address the issues regarding domiciliary care and support for individuals in the community. The community resilience preventative agenda is looking at developing communities to support the preventative agenda. We are also adapting the Council's residential homes to create more dementia care units and day care and respite provision.

Denbighshire

Locally, a lot has been achieved to modernise support and ensure future services are commissioned with input from unpaid carers and families, to help identify 'what matters' and using Denbighshire's asset based approach to help them find solutions.

We encourage the creative use of direct payments and Bridging the Gap vouchers to support individual choice and allow unpaid carers to have a break or pursue social or leisure activities, with or without the cared-for person. For example, to enable unpaid carers to attend concerts, weddings, or pay for gym membership, flooring, new washing machine, training courses, driving lessons.

Identified needs in Denbighshire include:

- More specialist (condition specific) respite support to reflect the range of different needs, for example places that are suitable for people with acquired brain injury, stroke, dementia and other neurological conditions (in an emergency and also available to pre-book).
- Community based activities/events that provide respite care and benefit unpaid carers, with the capacity and trained staff/volunteers to continue to support people with progressive conditions who require higher levels of care.
- A wide range of flexible options including more sessional and community services spread across the whole of Denbighshire, especially in rural areas.
- Both emergency crisis support to keep people living independently at home and out of hospital and more regular, consistent respite options that are easy to book in advance.
- Group/individual support available in the evening and weekends, particularly for those carers who work and cannot attend support groups or access other services during the day.
- Good quality information, advice and assistance about the various respite options available.

Respite/short breaks work best when carers are confident with the arrangements, which in turn helps to reduce anxiety. The current recruitment crisis is impacting on providers who are finding it difficult to recruit staff and volunteers with the right skills and values to deliver high quality respite.

Respite support that works best for the carer and the cared-for person includes meaningful activities that fit in with their interests and hobbies. Denbighshire County

Council is promoting the development of Community Catalysts /Micro Employers and using additional volunteer capacity alongside commissioned services. We also encourage local social enterprises to run innovative projects to support unpaid carers.

We await further guidance from Welsh Government about developing respitality and a National Short Breaks Scheme. Locally carers can book guest accommodation in Extra Care schemes and two recently adapted properties in Ruthin and Corwen. Shared Lives is also available, mainly for people with complex disabilities who are matched with Shared Lives families. NEWCIS and Carers Outreach have respite property and a caravan.

Flintshire

We welcome the additional funding provided by Welsh Government to scale up a range of respite options for Carers to meet the anticipated spike in demand for respite services caused by the impact of the pandemic on the mental and physical health of carers.

We continue to explore flexible respite options for carers based on the outcomes the carer wants to achieve, alongside a meaningful activity to the cared for.

Our focus on ensuring stability of support for unpaid carers includes;

- Consider how micro-care can support an offer of day/ respite services.
- Further development of our Direct Payment offer for carers.
- Further development of Young Carers Services and the ID card.

9. Advocacy services

Advocacy means getting support from another person to help someone to express their views and wishes, and help stand up for their rights.

All people are very different from each other. Their needs for support are different, and may change during their life. A variety of advocacy has developed to recognise these differences.

All advocacy types are of equal value. What advocacy is used, and when, should depend on what is best suited to the person who seeks it. One type of advocacy is Independent Professional Advocacy which involves a professional, trained advocate working in a one-to-one partnership with an individual to ensure that their views are accurately conveyed and their rights upheld.

Children and young people

Advocacy is one of the key foundation stones in achieving our commitment to children's rights, ensuring children and young people can get help when they need it and from people that will listen to them and represent their views.

By law all local authorities in Wales must have advocacy services for children and young people to use, and that an Active Offer for advocacy must be made. Tros Gynnal Plant (TGP) provide advocacy services to children and young people in North Wales.

When children and young people need services, sometimes an advocate is required to meet with them to explain what these services are. This helps them to understand what is on offer and how the service is able to help them. This is called an Active Offer.

An active offer must be made to:

- Children in care.
- Young people leaving care.
- Children and young people who need extra support.

Councils have a statutory responsibility to provide an independent professional advocacy service for children and young people which complies with all regulations,

standards, legislation, directions, code of practice, outcome framework and any amendments or replacements relevant to the service.

This includes but is not limited to:

- The Social Services and Wellbeing (Wales) Act 2014.
- The Service is an 'advocacy' service for the purpose of paragraph 7(1) of Schedule 1 of the Regulation and Inspection of Social Care (Wales) Act 2016, and is accordingly a regulated service and must comply with the provisions/requirements set out within the Regulated Advocacy Service (Service Providers and Responsible Individuals) (Wales) Regulations 2019.
- Independent Professional Advocacy: National Standards and Outcomes Framework for Children and Young People in Wales.
- Social Services and Well-being (Wales) Act 2014: Part 10 Code of Practice (Advocacy).
- Statutory Guidance relating to Parts 2 to 15 of The Regulated Advocacy Services (Service Providers and Responsible Individuals) (Wales) Regulations 2019.

Young carers

A common need of young carers identified by service providers is advocacy support to have their voices heard.

Specific support for young carers and young adult carers has been commissioned across North Wales from the third sector. WCD / Credu Young Carers is commissioned to provide these services in Wrexham, Denbighshire and Conwy, NEWCIS provide the service in Flintshire and Action for Children provide the service across Gwynedd and Anglesey.

Adults

Local authorities must consider individuals' needs for advocacy support when carrying out various functions involving decisions that will have a significant impact on the person's day to day life, for example:

- Assessment of needs for care and support, support for carers and preventative services
- Provision of information, advice and assistance

- Preparing, maintaining or reviewing care and support plans
- Protecting property of persons cared for away from home
- Determination of person's ability to pay a charge
- Safeguarding and duty to report adults or children at risk
- Promoting integration of care and support with health services
- Receiving complaints or representations about social services

Advocacy:

- safeguards individuals who are vulnerable, discriminated against or whom services find difficult to serve
- speaks up on behalf of individuals who are unable to do so for themselves
- empowers individuals who need a stronger voice by enabling them to express their own needs and make their own informed decisions
- enables individuals to gain access to information, explore and understand their options, and to make their views, wishes and feelings known, and
- actively supports people to make informed choices.

Older people

The Golden Thread Advocacy Programme was funded by Welsh Government for four years from 2016 to 2020 to run alongside and support the implementation of Part 10 (Advocacy) of the Social Services and Well-being (Wales) Act 2014. The programme has now ended, but Age Cymru's commitment to advocacy in Wales continues through the HOPE project.

Anglesey, Gwynedd and Wrexham: North Wales Advice and Advocacy Association (NWAAA) offer advocacy to over 65s

Conwy and Denbighshire: DEWIS Centre for Independent Living offer advocacy to anyone over 65, or any carer.

People living with dementia (all counties): Alzheimer's Society offer support for anyone living with dementia, whether they have capacity or can communicate or not.

Mental Health

People receiving secondary mental health care may need help from an Independent Mental Health Advocate (The Mental Health (Wales) Measure 2010) or an Independent Mental Capacity Advocate.

Advocacy may be required for older people with dementia who have lost contact with all friends and family, or people with severe learning disabilities or long term mental health problems who have been in residential institutions for long periods and lack outside contacts.

Other people with mental health conditions may want support from another person when expressing their views, or to seek advice regarding decisions that impact them.

The following organisations provide specialist advocacy support for those with mental health needs;

- The Conwy and Denbighshire Mental Health Advocacy Service (CADMHAS) (Conwy and Denbighshire)
- Advocacy Services North East Wales (ASNEW) (Wrexham and Flintshire)
- Mental Health Advocacy Scheme (Gwynedd and Anglesey)

Learning disability

People with a learning disability often have poorer access to health improvement and early treatment services; for example, cancer screening services, diabetes annual reviews, advice on sex and relationships and help with contraception (Harris *et al.*, 2016). The Learning Disability Health Liaison Service in BCUHB work across North Wales to raise awareness and reduce inequalities.

Advocacy is also geared towards wellbeing outcomes. Local authorities have a duty to consider individuals' needs for advocacy when carrying out assessments and care planning. People with a Learning Disability may need support in ensuring that their voices are heard and their rights upheld.

Dewis Centre for Independent Living provide advocacy services for vulnerable adults aged 18 to 64, including people with learning disabilities. Anglesey also commission North Wales Advocacy Association (NWAA).

Autism

Advocacy for autistic adults, children and their carers ensures that individual rights are met. Advocacy can provide support in a number of ways including seeking a diagnosis, overcoming barriers and accessing services.

Self-advocacy

Additionally, there has been an appointment of a Regional Self Advocacy Officer as a result of a need to bring in new voices to self-advocacy groups across North Wales. This is being taken forward in a partnership between Conwy Connect, NWAAA and All Wales People First. The Self Advocacy Officer is a person with a learning disability and is employed by Conwy Connect. Their role is to link into local organisations and groups across North Wales to raise awareness and promote the benefits of self-advocacy to people with learning disabilities.

LOCAL MARKET STABILITY REPORT FOR ANGLESEY LOCAL AUTHORITY AREA	1
EXECUTIVE SUMMARY	3
CHAPTER 1 – TYPE OF REGULATED PROVISION: Care Home Services (Adult).....	6
CHAPTER 2 – TYPE OF REGULATED PROVISION: Care Home Services (Children)	24
CHAPTER 3 – TYPE OF REGULATED PROVISION: Secure Accommodation Services (Children)	34
CHAPTER 4 – TYPE OF REGULATED PROVISION: Residential Family Centre Services.....	37
CHAPTER 5 – TYPE OF REGULATED PROVISION: Adoption Services.....	42
CHAPTER 6 – TYPE OF REGULATED PROVISION: Fostering Services.....	49
CHAPTER 7 – TYPE OF REGULATED PROVISION: Adult Placement (‘Shared Lives’) Services.....	61
CHAPTER 8 – TYPE OF REGULATED PROVISION: Advocacy Services.....	66
CHAPTER 9 – TYPE OF REGULATED PROVISION: Domiciliary Care Support Services.....	75

EXECUTIVE SUMMARY

Key Market Sufficiency Factors

1. Care Home Services (Adult)

Demand for care home placements is likely to increase

2. Care Home Services (Children)

There are sufficiency issues with finding placements for children with particular needs including respite care, young offenders, refugees, immigrants, asylum seekers, young parents, sibling groups and emergency situations

3. Secure Accommodation Services (Children)

There is no secure accommodation provision for children in Anglesey or North Wales. There are no plans to extend this provision in North Wales. Market sufficiency therefore is not relevant for Isle of Anglesey County Council.

4. Residential Family Centre Services

There was insufficient demand to justify commissioning a full-time residential family centre unit. Current capacity is adequately fulfilled.

5. Adoption Services

Working regionally with the North Wales Adoption Service provides a regional adoption service on behalf of the Isle of Anglesey County Council. This helps find new families more effectively, place children quicker and improve adoption support services.

6. Fostering Services

The Market Position Statement (Regional Partnership Board, 2019) identified sufficiency issues with finding placements for children with particular needs including:

- Respite care
- Young offenders
- Refugees, immigrants, asylum seekers
- Young parents
- Sibling groups
- Emergency situations

The stability of the workforce is an issue, with increasing demand for placements and the number of placements projected to not meet with the forecast demand.

7. Adult Placement ('Shared Lives') Services

Due to the pandemic, take up has been slow and the project has been extended a further 12 months.

8. Advocacy Services

Based on the latest data, the Advocacy provision is sufficient and provides quality care and support to meet demand. Trained staff provide quality care and support

9. Domiciliary Care

Demand for services is currently exceeding supply due to shortage of domiciliary care providers, both external and internal.

Key Market Stability Factors

1. Care Home Services (Adult)

Overview of units available

A total of 118 Extra Care units are all currently occupied and 71 units of Supported Accommodation are all currently occupied. Demand currently outweighs capacity in regards to Extra Care and Supported Accommodation.

Extra Care Housing demand

Demand for Extra Care Housing outweighs current capacity.

2. Care Home Services (Children)

The number of children receiving care and support has increased

Children who are care experienced were more vulnerable to the pandemic

There is an increase in newly accommodated looked after children and young people

There is a shortage of local residential providers

There is a shortage of specialist provision for children and young people with complex behavioural and emotional needs

There is a shortage of emergency accommodation

The stability of the children's care home services workforce is an issue, with increasing demand for placements and the number of placements projected to not meet with the forecast demand.

3. Secure Accommodation Services (Children)

Market stability is not relevant for Isle of Anglesey County Council.

4. Residential Family Centre Services

There was insufficient demand to justify commissioning a full-time residential family centre unit. Current capacity is adequately fulfilled.

5. Adoption Services

It is worth noting that the service has undergone significant transformation since 2020, therefore it is difficult to compare local data and it does not reflect the service now.

6. Fostering Services

The challenges to the stability of fostering services in North Wales and Wales as a whole listed below:

- Recruitment and retention issues
- Placements for children with particular needs including; respite care, young offenders, refugees/immigrants/asylum seekers, young parents, sibling groups and emergency situations.
- It is estimated that Wales will need 550 new foster parents every year to meet demand.

7. Adult Placement ('Shared Lives') Services

The support provided is sufficient and is flexible and tailored to the individual's personal needs.

8. Advocacy Services

The service provided seems to be sufficient.

9. Domiciliary Care

Post pandemic, the recruitment and retention of staff remains an issue with the staff turnover rate in Social Services having increased during 2021/22.

There is an increasing demand for services, but budgets along with inflationary pressures are struggling to keep up with this demand.

Report Prepared by:.

Fôn Roberts, Director of Social Services and Head of Children & Families Services
Arwel Owen, Head of Adult Services
Emrys Bebb, Programme Manager

CHAPTER 1 – TYPE OF REGULATED PROVISION: Care Home Services (Adult)

SECTION 1A – MARKET SUFFICIENCY

Demand for care home placements is likely to increase

The population assessment shows that the number of people aged over 65 on Anglesey increased by 18.5% between 2011 and 2020 and is projected to increase by a further 17.2% to 2040. This is likely to increase the demand for care home services. The table below shows the expected change is slightly less than the regional and national figures for Wales.

Table 1: Estimated number of people aged over 65 in 2020 and projected number in 2040

Area	2020 number	2040 number	Change number	Change percent
Anglesey	18,650	22,500	3,850	17.2%
North Wales	164,700	207,600	42,900	20.7%
Wales	668,600	850,750	182,150	21.4%

Source: Mid-year 2020 population estimates, Office for National Statistics; and 2018-based population projections, Welsh Government

The increasing population of older people is not the only factor affecting demand. There are also changes in expectations and policy which mean demand may not increase at the same rate as the total population. For example, demand will change as people are supported to live in their own homes for longer, or take up extra care accommodation to retain independence with the option of receiving support as needed.

Table 2: Current number of adult care homes by type and area (all ages)

Area	Residential	Residential with mental health	Nursing	Nursing with mental health	Total
Anglesey	20	0	4	0	24
North Wales	111	42	35	12	90

Most homes have some mental health beds and these have not been separated out.

Table 3: Current number of permanent care home placements available to **older people**

Area (a)	Residential	Residential with mental health	Nursing	Nursing with mental health	Total
Anglesey	423	0	190	0	613
North Wales	3,077	1,075	1,320	475	5,947

(a) The categories of care have become more fluid since the introduction of the Regulation and Inspection of Social Care (Wales) Act 2016 so these categories are

only illustrative of the split between types of care. Most homes have some mental health beds so these have not been separated out.

The over 65 population on Anglesey is projected to increase from 26.4% of the island's population to 32.4% by 2040. This could lead to an increasing number of people experiencing age related conditions such as chronic physical and sensory diseases, dementia and falls. All of these have a potential negative impact on people's overall well-being and in turn is likely to increase the demand on services. This is borne out by statistics such as the **number of people aged 65+ admitted to hospital due to a fall** has increased.

In 2015, the number was 450. However, by 2020 this figure had increased to 501.

Current Care Home provision

The number of **registered beds by sector** has also increased since the previous Population Needs Assessment. In 2015, there were 614 beds (Local council - 162; Independent/ Private Sector - 452; Voluntary/ third sector - 0). The overall amount has increased by 10, in 2020, to a total of 624 (Local council - 161; Independent/ Private sector - 463; Voluntary/ third sector - 0).

Table 4

Year	Local council	Independent/ Private Sector	Voluntary/ third sector	Total
2015	162 26%	452 74%	0	614
2020	161 26%	463 74%	0	624

The number of **registered beds by county** has seen a sharp increase since 2016. In 2016, there was a total of 614 beds (Residential - 344; Residential Mental Health - 90; General Nursing – 124; Nursing Mental Health – 56). By 2020, there was a total of 755 beds (Housing with care - 117; Residential Care - 441; Nursing Care - 177).

What we know about the population

- We know that the **number of people aged 65 +** has increased from 17,000 in 2015, to 18,639 in 2020.
- Coinciding with the above, the **number of people aged 85+** has also increased. The number of people aged 85+ on Anglesey stood at 2,200 in 2015 but in 2020 there were 2,403 people who come under this bracket.

Table 5

Year	No. of people aged 65+	No. of people aged 85+
2015	17,000	2,200
2020	18,639	2,403

- We know that the **number of people aged 65+ and receiving services** has increased since 2015. In 2015, the number of people who fell in to this category was 1,200. For 2020, the number stands at 1,488.
- The **number of people aged 65+ receiving domiciliary care (hours of domiciliary care being received)** was 340 in 2015, with 3,900 hours of care provided per week (average of 11 hours per week). For 2020, the number had

declined with 316 people over the age of 65 receiving domiciliary care. This has also meant that 3,760 hours a week of care is provided on average per week (however the average hours per week, per client has increased to an average of 12 hours per week, per client).

- The **number of people aged 65+ with dementia** has stayed more or less the same since 2015. In 2015, the figure was 1,300. By 2020, there was slight increase to 1,305.
- The number of **registered beds, for each 100+ people aged 65+** has declined, however the average number of beds in each home has increased. In 2015, the number of homes stood at 23, the number of beds was 611 and the average beds in each home was 27. By 2020, the number homes was 19, the number of beds was 576, however the average number of beds in each home was 30.

Table 6

Year	No. of homes	No. of registered beds	Average no. of beds in each home
2015	23	611	27
2020	19	576	30

- In 2015, **the number of registered beds, for each 100 people aged 65+** showed that in total there was 3.5 beds per 100 people aged 65+. With 2.5 of those places coming from residential places and the remaining 1 coming from nursing places. In 2020 however the stats we were able to gather were not the same as those of 2015, but still helped create an overview of the situation. The total number of beds stood at 9.3. With 5.4 of those beds falling under residential care, 1.4 coming from housing care and 2.2 coming from nursing care.

SUPPORTED LIVING

In January 2020, a review was undertaken in respect of wellbeing, independence and to assess how connected tenants are to their estate & communities. This review was also in place to inform Tai Môn on tenants accommodation satisfaction levels and support future Council housing development within sheltered and OAP schemes.

Local Context

The table below shows that Anglesey will face an increase in older people way in excess of the national average.

Table 7

	Number & % of people 65 + (2012)		Number & % of people 65 + (2036)	
Wales	585,149	19.02%	869,846	26.09%
Isle of Anglesey	16,277	23.27%	22,199	32.62%
Gwynedd	25,990	21.34%	33,377	25.31%
Conwy	29,179	25.27%	40,725	35.32%
Denbighshire	20,539	21.78%	30,368	29.92%
Flintshire	28,452	18.59%	44,775	28.97%
Wrexham	24,002	17.60%	38,804	23.73%

In 2019, Housing LIN were commissioned by the Welsh Government to undertake research and provide an independent assessment of the demand for specialist housing and accommodation needs of older people up to 2035.

Assumptions made by Housing LIN are based on local evidence, which are applied to estimate the future demand of housing and accommodation needs on Anglesey.

The below shows the current older people's housing and accommodation on the Isle of Anglesey expressed as a prevalence per 1,000 people aged 75+, the Welsh equivalent prevalence and the 2035 estimated prevalence rates.

Table 8

	Current beds / units	Current prevalence rate	Welsh prevalence rate	2035 estimated prevalence rate
Housing for older people	755	93	106	94
Housing with care	117	14	10	20
Residential care	441	54	38	36
Nursing care	177	22	36	25

Anglesey's estimated future housing demand by 2035. Current provision is subtracted from estimated future demand to identify the estimated shortfall for different types of older people's housing and accommodation.

Table 9

	Current provision Units / beds	2025	2030	2035
Housing for older people	1,381	966	1,061	1,146
Housing with care (Extra Care)	117	166	203	244
Residential care	441	441	441	441
Nursing care	177	239	271	305

Anglesey's net demand (shortfall in units / beds) by 2035:

Table 10

	2025	2030	2035
Housing for Older people	211	306	391
<i>For rent</i>	137	199	254
<i>For sale</i>	74	107	137
Housing with Care	49	86	127
<i>For rent</i>	32	56	82
<i>For sale</i>	17	30	44
Residential care	0	0	0
Nursing care	62	94	128

In summary, this indicates that the estimated net requirements for the Isle of Anglesey to 2035 are:

- Housing for older people: 391 units of which 254 for rent and 137 for sale
- Of the 254 units for rent, approximately 50% (127) age designated social housing and approximately 50% (127) contemporary sheltered housing
- Housing with care: 127 units of which 82 for rent and 44 for sale
- Approximately 3% of these rented housing with care units (2) are suggested for use as step up/step down units
- Residential care: ±0 beds
- Nursing care: 128 beds

Estimated shortfall in specialist accommodation for older people, by type and tenure, in each local authority and across Wales in total, by 2030.

Table 11

	Age designated social housing for rent (units)	Contemporary sheltered housing for rent (units)	Retirement housing for sale (units)	Housing with care for social rent (units)	Housing with care for sale (units)	Step up / step down housing (units)	Residential care beds (units)	Nursing care beds (units)
Units	100	100	107	55	30	1	0	94

Recommendations:

- Older persons' accommodation strategy to inform future demand, funding and how we aim to meet this projected increase
- Need to formulate an inter-departmental group Adult & Housing Services in order to forward plan this demand

SECTION 1B – MARKET STABILITY**Summary****Overview of units available (occupied / unoccupied)**

A total of 118 Extra Care units are all currently occupied and 71 units of Supported Accommodation are all currently occupied.

Capacity / Demand overview

Demand currently outweighs capacity in regards to Extra Care and Supported Accommodation.

Extra Care Housing demand

Demand for Extra Care Housing outweighs current capacity. There are currently 12 on the waiting list.

Providers

As stated above, even though the number of **registered beds by sector** has increased since the previous Population Needs Assessment, the provider base has remained stable with the Isle of Anglesey County Council providing 26% of the beds, whilst the remainder (74%) is provided by the Independent/ Private Sector.

Table 12

Year	Local council	Independent/ Private Sector	Voluntary/ third sector	Total
2015	162 26%	452 74%	0	614
2020	161 26%	463 74%	0	624

Individuals who need care and support have a say in their care and support by means of surveys sent to them. Several surveys have been sent out in recent years:

- An internal survey was sent to all sheltered and OAP housing tenants (1,200 in total) with 445 of the surveys being returned either completed, or partially completed. This equates to a 35% response rate.
- Regional engagement survey
- Adult Psychiatric Morbidity Survey
- National Survey for Wales
- A survey by Mind Cymru (June 2020)

Action Taken Due to Provider Failure

Identifying escalating concerns within care homes is part of the Council's quality assurance process, with the process leading to improvements in service. As of July 2022, there are no providers under escalating concerns.

SECTION 1C – OTHER MARKET STABILITY FACTORS
Consideration of Market Quality
<p>When asked what people felt was working well at the moment from an older people perspective, the majority of the respondents felt that the care they were being offered by staff had been very good. One respondent explained how weekly clubs, whereby people living with dementia are able to meet for a cup of tea without the assistance of a carer was something that they found pleasure in doing. The club allows individual's to enjoy each other's company, whilst carers are given the opportunity to receive peer support. Another respondent echoed the good work that is provided to those who live with dementia. They felt that the service being provided in Hafan Day centre for people with dementia had greatly benefitted the user, whilst allowing the carer a needed break.</p> <p>To add to the above point, respondents highlighted the good use of networking and communication that was being employed within the care homes across the island. One respondent noted that there was a good level of communication between key stakeholders, meaning that people are fully aware of what the day-to-day issues are. Another respondent's response concurred with this, expressing that there is support to allow people the option of engaging with services and their communities – both online and offline.</p> <p>Responders to the regional engagement survey who have sensory difficulties said that they thought that the Accessible Health Service and BCUHB's diversity work is working well, as well as the provision of aids, adaptations and the befriending service offered by the Live Well with Hearing Loss project. A service provider commented that partnership work with local social service departments and third sector organisations is strong, which supports delivery of a wide range of quality services, networking and sharing good practice.</p>
Current and Projected Trends
<p>The trends in provision on Anglesey are as follows:</p> <p>Post pandemic, the recruitment and retention of staff remains an issue with the staff turnover rate in Social Services having increased in 2021/22. There is an increasing demand for services but budgets along with inflationary pressures are struggling to keep up with this demand.</p> <p>The rate of older people (65+) in Residential Care Homes has decreased in the last 2 years as older people are staying at home longer with a support package. When they do need a care home placement their needs are more complex and require more intense intervention.</p>
Impact of Commissioning practices on the market
<p>Anglesey Council has systems in place to support and liaise with providers, including regular meetings and discussions with providers and support with training and resources.</p> <p>Supported Living</p> <p>North Wales commissioners from the six local councils and health board worked together to develop a Supported Living Framework which went live on 1 April 2020. Multiple service providers have already been admitted to the framework agreement following the requisite</p>

due diligence and quality checks. This enables commissioners to commission services adopting the framework agreement which can streamline processes while remaining in accordance with relevant legislation and the local authority Contract Procedure Rules.

Provision of service in the Welsh Language

The Welsh language skills of Social Services workforce were analysed in 2022 and the results were as follows:

Adults

Number of staff in the service: 422

Number of returns 422

Percentage returns: 100%

Table 13

Level	L0	L1	L2	L3	L4	L5
Number	19	41	31	20	57	254
Percentage	5%	10%	7%	5%	14%	60%

Childrens

Number of staff in the service: 238

Number of returns: 238

Percentage returns: 100%

Table 14

Level	L0	L1	L2	L3	L4	L5
Number	8	6	14	12	52	146
Percentage	3%	3%	6%	5%	22%	61%

A total of 74% of the staff in the Adults section speak Welsh to at least level 4 (Able to speak the language in the majority of situations using some Welsh / English words). In the Childrens section the corresponding percentage was 83%.

This meets the demand for care provision in Welsh.

[Review of services currently provided](#)

Strategic Equality Plan 2020-2024 – Priorities / Actions - Progress as at December 2020

- During 2020, presentations regarding implementation of the Welsh Language Standards, and communication and customer care (including the requirement to make the proactive offer of a service through the medium of Welsh to all customers) have been delivered at staff conferences.

- Raising awareness of More than Just Words and the Welsh Language Standards continues to be a required element of all departmental staff inductions.
- All staff on the email system have been sent a written reminder of the importance of answering telephones bilingually.
- Ways of monitoring the recording of the Active Offer and language choice of service users by deriving statistics from the electronic case records system are being developed, in order for performance in relation to the recording of this to be monitored.
- Services continue to monitor and ensure that there are sufficient Welsh-speaking staff across all areas of the Services in order to be able to provide Welsh-medium services across all areas.

Services continue to encourage staff who are learning Welsh to participate in relevant training in order to develop their language skills.

- **Mwy na Geiriau**

The Welsh Language Training programme is available to staff who wish to learn, improve or develop confidence in their Welsh Language abilities. A range of Welsh Language Development resources have been offered over the past year; including residential 'Learn Welsh' courses; weekly lessons; online self-study and confidence building sessions. A Welsh Language Awareness workshop was arranged for the Social Work Students and Occupational Trainees as part of their induction which included a presentation and opportunity for everyone to share experiences and reflect.

A new page has been created on our Learning Pool to assist in promoting and to showcase all the options available to all staff and partnership members.

Sustainability of provision

The provider base has remained stable since 2015 with the Isle of Anglesey County Council providing 26% of the beds, whilst the remainder (74%) is provided by the Independent/Private Sector.

Risks to market stability

Risks to market stability

- The increasing population of older people. These in turn could lead to an increasing number of people experiencing age related conditions such as chronic physical and sensory diseases, dementia and falls. This could have a potential negative impact on people's overall well-being and in turn is likely to increase the demand on services
- Changes in expectations and policy which mean demand may not increase at the same rate as the total population.
- Recruitment and retention of social care workers.
- Increase to the cost of living.
- Since the beginning of 2022, the rate of inflation has increased at a faster rate and higher than the rate of increase for fees that are paid to care home providers. Utilities, fuel and insurance costs have also increased dramatically. This is proving

very challenging for many providers, who, after managing through the pandemic, are finding it difficult to absorb these costs at a time when government financial support for COVID-19 has stopped.

SECTION 1D – NON-REGULATED PROVISION [PREVENTATIVE SERVICES, STEP-DOWN FROM A SECURE PLACEMENT, OR MOVING ON ARRANGEMENTS SUCH AS WHEN I AM READY etc]

Linc Cymunedol Môn is the Single Point Of Access for Third Sector Information, Advice and Assistance. Linc Cymunedol Môn is also the referral point for the Anglesey social prescribing project which is based within Medrwn Môn. The team have four Local Asset Coordinators who work across Anglesey, will have a 'What Matters' conversation with the individual that requires support, and having had that conversation they will agree on a plan of action to help the individual achieve what's important to them. Many people who have benefitted from the service were lonely, isolated, or widowed. Having said that, the service provides a variety of support for a wide range of people.

The Community Hub Model is well established on Anglesey. A Community Hub is a multi-purpose community resource that provides access to support and a range of services that have been selected to meet the needs of the local community. It also provides a focal point and facilities to encourage and enable greater local community activity and bring residents together to improve the quality of life in their areas. The next stage of the work is ensuring that as many of our Community Hubs on Anglesey are accessible to all, and that activities and events provide opportunities for integration. Currently the Community Hubs have a range activities across Anglesey which support the prevention work by ensuring social interaction and increased participation. Just some of the examples are, Men's Shed, Friendship Groups, Dementia Actif, IT Classes, History Groups, Arts and Crafts. Local Authority also fund the post of Anglesey Community Hub Liaison and Support Officer at Age Cymru Gwynedd a Môn.

Forward Thinking Forward Planning is a project within Carers Outreach funded by Local Authority. The project focuses on having conversations with a carer about their current and future needs. Having a conversation at the earliest possible stage allows time to identify and arrange any changes or adaptations they require to support the person they care for, and themselves as the carer.

The Benllech & District Good Turn Scheme was originally formed in August 2000 and its main aim was to motivate local people to help local people. Over 20 years later, the scheme goes from strength to strength, providing community transport for local residents to attend medical, leisure, and social appointments. Not only does the scheme support individuals to attend their appointments, but the phone conversation to arrange the journey, and the car journey itself provides valuable interaction for both service user and volunteer. The Benllech Good Turn Scheme have also added a befriending telephone service to support individuals who wish to receive a phone call from a volunteer.

Falls Prevention

Our Môn Actif team provide a variety of physical activity classes for older people, that include Falls Prevention, Free Swimming, Chair Exercises. Increasing activity in older people can reverse physical decline and frailty, and help people to live independently as they get older. It also seeks to educate and empower people with the skills and knowledge to understand the benefits of being active as well as including the social element which is equally important. The sessions are conducted at our Leisure Centres, Community hubs, as well as online.

Dementia Centre

We are currently working in partnership with Carers Trust and Mencap Môn to establish a Dementia Centre at the Mencap Hub, making it a multi-use hub that supports the implementation of the North Wales Dementia Action Plan here on Anglesey.

Digital Inclusion

Digital exclusion was highlighted at the beginning of the pandemic, and therefore The Isle of Anglesey County Council have invested significantly in support services and devices that are available for Community Hubs and Groups to promote Digital Inclusion. Once again, through the Regional Integrated Fund we have been able to fund the My Health Online post at Medrwn Môn. The post supports people to arrange and access appointments online, but also increases people's skills to find more information online that will support their health and well-being.

In partnership with Age Cymru Gwynedd a Môn and Medrwn Môn, the Isle of Anglesey County Council have created the 'CYMUNED' Website, which is a virtual village hall. CYMUNED provides information about Hub activities on Anglesey, and it's also a platform for partners to share both information and activities. We will aim to share information about the accessibility of each Hub in the near future.

Promoting and actively encouraging age friendly workplaces

Through our Age Friendly Communities work, we will provide information sessions and presentations to promote and actively encourage work places to be age friendly. Raising awareness and supporting work places to make positive changes that will support the increasing number of older workers and carers in our workforce.

We will work with Carers Wales and other Carer groups to deliver awareness sessions to employers on Anglesey about the benefits of having a Carers Policy within the organisation

SECTION 1E - OTHER CONSIDERATIONS AFFECTING THE MARKET**Social value****Social value and preventative services**

The concept of social value includes the following.

The value experienced by the users of a service, delivering 'what matters' and co-producing services with people who use them.

The added social, environmental or economic value a contract can provide over and above the core requirements.

The duty local councils have to promote social care and preventative services provided by social enterprises, co-operatives, co-operative arrangements, user led services, and the third sector (Welsh Government, 2014).

The Wales Cooperative Centre (2021) has produced a guide to raise awareness of potential social enterprise and co-operative models in the care home sector.

We want to promote 'social value models of delivery' that:

Achieve well-being outcomes.

Work co-productively – giving users a strong voice and real control.
Have a preventative and dependency-reducing orientation.

Incorporate collaboration, co-operation and partnership.
Add value - social, economic and environmental.

As well as to promote activities that maintain or strengthen the well-being of unpaid carers and community capacity beyond the market – without which the market cannot be stable.

Each county supports a range of preventative services which can help people to remain in their homes and avoid the need for residential or nursing care. This includes regional projects funded through the Integrated Care Fund (ICF) including falls prevention projects and step up / step down care. 'Step up' is an intermediate care function to receive patients from home/community settings to prevent unnecessary acute hospital admissions or premature admissions to long term care. 'Step down' is an intermediate care function to receive patients from acute care for rehabilitation and to support timely discharge from hospital.

Projects include; community agents, navigator and social prescribing projects which link people up to support and activities available in their local community. They also include; befriending, advocacy and respite services.

The Micro Care and Community Catalysts projects provides support to micro providers to enter the care markets. Direct payments are used to help people access personal care and live as independently as possible.

See section 1D above for preventative services.

Resources

Many users feel that the shift to digital support has been a welcome change. One respondent noted that through having more methods of programme delivery, people are now more open to utilising IT options. Another respondent agreed with this point. They explained that during lockdown a number of statutory services which people attended closed down. However, there was a huge effort in the third sector to go online, and more so, ensure that they were able to get people with disabilities to get online and feel comfortable in doing so. The respondent believed that a hybrid approach is now the future, and that by helping people maintain their wellbeing (reducing isolation and loneliness) when providing support will be very important in the long run.

Responders to the regional engagement survey said that they thought that the Accessible Health Service and BCUHB's diversity work is working well, as well as the provision of aids, adaptations and the befriending service offered by the Live Well with Hearing Loss project. A service provider commented that partnership work with local social service departments and third sector organisations is strong, which supports delivery of a wide range of quality services, networking and sharing good practice.

- Additionally and due to Covid-19, shielding households have relied heavily on local volunteers to support with shopping and have had to therefore, adapt their shopping list and budgets to ensure they were able to be supported.

Direct payments

Contracts are tendered through the regional framework or commissioned through direct payments.

Further developments are underway to boost recruitment and arm individuals with information in regards to the benefits of choice and control. Work in regards to worker and service user co-operatives is being developed. This will strengthen the direct payments network on the island.

Self-funders

The total number of people who fund their own care home placements across North Wales is not available for every county due to differing Council policy. However, the figure for Anglesey can be seen in the table below:

Table 15

Provider	Vacant	LA	Other LA (region)	Other LA (national)	Non welsh LA's	Welsh Health Boards	Self funders
Care Home 1(YM only)	2	14	3	0	1	17	15
Care Home 2 (YM + Gwy)	0	12	2	0	1	0	7
Dom Care provider	0	108	2	0	0	10	6
Total	2	134	7	0	2	27	28

Placements relate to provision in care homes, packages of care relate to provision in supported living.

Workforce

IoACC workforce

Below is a table showing the staff turnover within the Adults and Childrens sections of Social Services compared to the average for the Authority:

Table 16

Service	Staff turnover					
	2017-18	2018-19	2019-20	2020-21	2021-22	Average
Adults	6%	12%	10%	8%	14%	10%
Childrens	18%	10%	11%	6%	15%	12%
Authority Average	11%	11%	9%	6%	10%	9%

In general, staff turnover has been higher within the Children's section than within the Adults section but the average for both sections are higher than the average for the Authority. The staff turnover rate decreased in 2019/20 and 2020/21 which may be due to the pandemic.

However in 2021/22, the staff turnover rate increased in both sections which in turn likely contributed to the increased staff turnover rate for the Authority.

The comparatively high staff turnover rate for 2021/22 may be due to staff deciding to move on after the pandemic and may be indicative of a problem with staff retention.

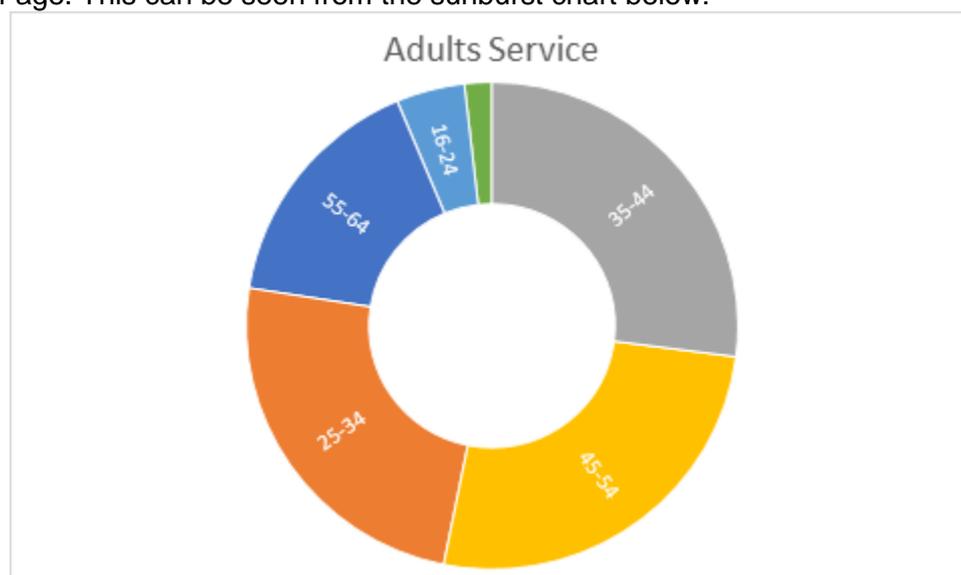

Age profile

Below is a table of IoACC's Social Services staff:

Table 17

Service	16-24	25-34	35-44	45-54	55-64	65+	No. of staff 31.03.22
Adults	5	27	30	29	18	2	111
%	5%	24%	27%	26%	16%	2%	
Provider	14	49	43	82	138	27	353
%	4%	14%	12%	23%	39%	8%	
Children's	32	79	52	56	29	3	251
%	13%	31%	21%	22%	12%	1%	

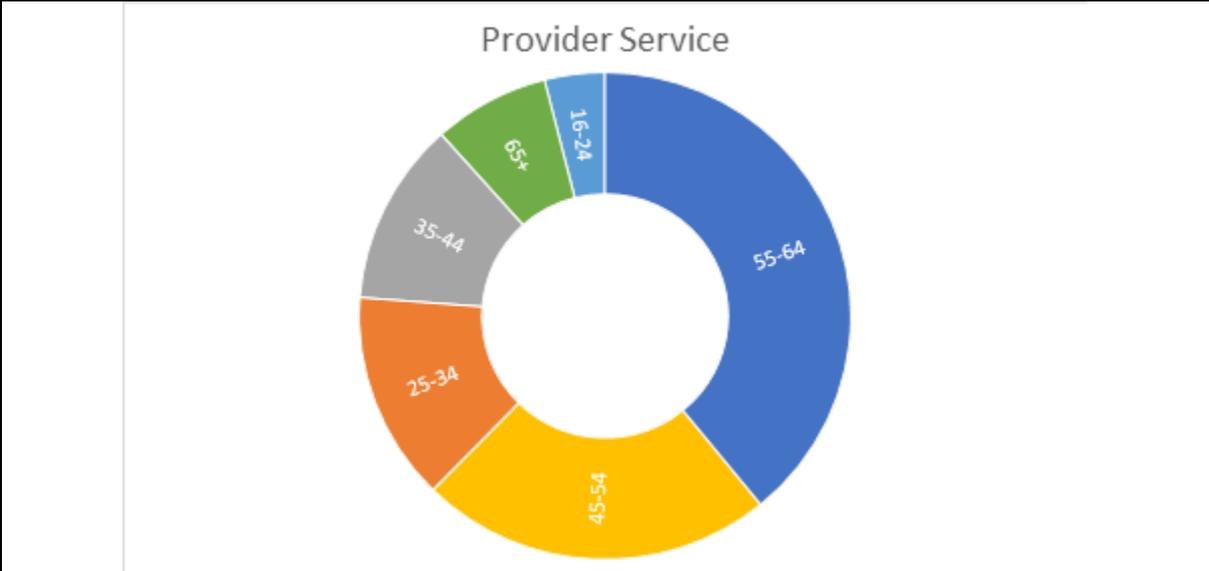

The age profile of the Adults Services staff shows that 77% of staff are between 35 and 64 years of age. This can be seen from the sunburst chart below:

The average age of staff in the Adults service is 45 years of age.

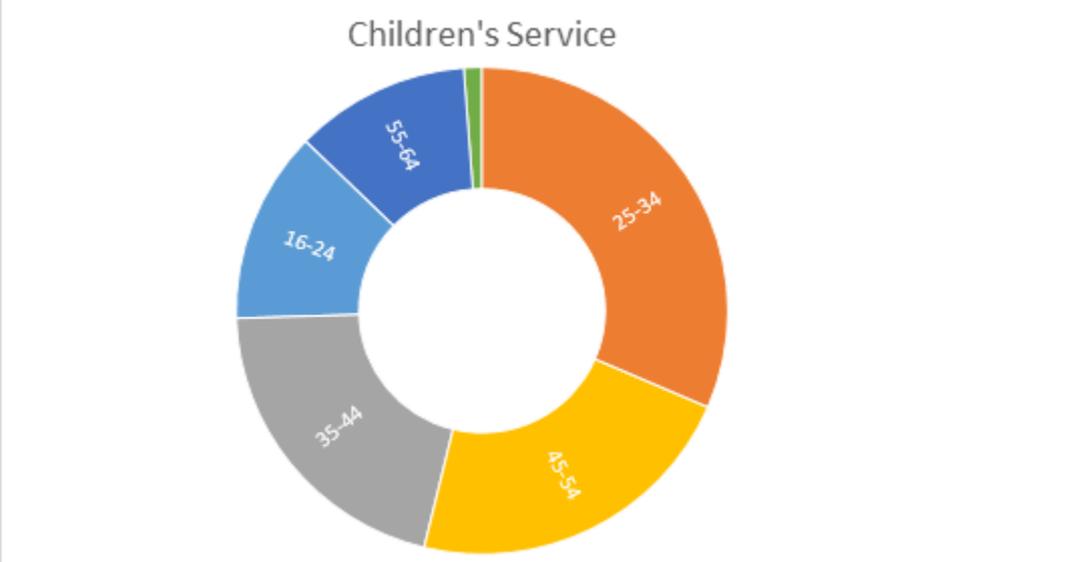

Provider Service

However, the age profile of the Provider Service staff is different with almost half the staff (47%) being 55 years of age or over. A total of 39% of staff are aged between 55 and 64. This could lead to staff shortages in the near future when the members of staff in the 55-64 age group retire

Childrens

The age profile of the Childrens Service staff is somewhat younger than the Provider Service staff. Almost two thirds off the staff (65%) are aged between 16 and 44.

The average age of staff in the Childrens Service is 40 years of age.

Table 18

Section	Average age
Adults	45
Childrens	40
Provider	50

Succession planning and recruitment and retention of staff are issues that need to be addressed.

In the MSR provider survey, respondents revealed the issues they're currently facing with the recruitment and retention of their workforce. These are:

Low rate of pay

The level of skills needed to work with adults with learning disabilities when they have challenging behaviour and mental health needs is way above the rate of pay. Pay levels in the sector are low, the amount of staff available to fill the hours paid for, need to be extremely diverse in their abilities. There is not enough money to be able to get staff that specialise in part of the tasks needed like a co-ordinator and a cook. All staff need to be able to do all the tasks between them but ideally, individually too so the residents call always have their needs met.

Rising cost of fuel

Other employment paying a higher rate of pay. Long hours, increased pressure on staff due to absence / sickness / Covid and general shortage of staff available.

Rural area

Recruitment is always a challenge, especially social workers as the areas we cover are the whole of North Wales across all six Local Authorities as well as North Powys.

WORKFORCE DEVELOPMENT 2021-22

How we do what we do – Our Workforce and how we support their professional roles

The Workforce Development Unit continues to administer the Social Care Wales Workforce Development Programme (SCWWDP) grant to provide Training and Development opportunities for Social Services and the wider Social Care Partnership on Anglesey.

National, Regional and Local priorities are taken into account when planning development opportunities for the workforce and every opportunity is taken to work in partnership with our neighbouring Local Authorities, NHS and other Agencies in order to deliver on the plan. Key supported priority areas are as noted within the Social Care Wales Annual Circular.

The plan formulated for 2021/2022 was again impacted due to the pandemic, however the well-established remote digital training methods introduced in the previous year had proved invaluable to ensure continuation of learning events. Due to the restrictions in the ability to offer face to face/classroom sessions a few key programmes were however affected and limited i.e. digital skills; health and safety; manual handling etc.

Summary

As we move forward, it's essential that we continue to ensure that relevant and timely learning and development opportunities are offered to staff across the Social Care sector so that the workforce have the skills, qualities and abilities to provide the necessary level and quality of service.

In noting this, it is also essential to ensure that well-being initiatives remain a focus in the forthcoming plan in order to maintain and develop resilience. A key part of the plan is also to re-connect and progressing with the digital strategy in order to ensure maximum accessibility to information and training opportunities.

Workforce

The table below shows the number of registered adult care home managers in North Wales at the 1 April 2020. Analysis of the data shows:

In the last year 46 managers left the register and 31 joined, a turnover of 14%. The ratio of women to men is 6:1 and 230 are aged over 51.

Around a third of registered managers have some Welsh language skills and 20% are fluent.

Table 19: Number of registered adult care home managers, 31 March 2020

Local Council	No. of Care Home Managers
Anglesey	30
Gwynedd	61
Conwy	67
Denbighshire	66
Flintshire	39
Wrexham	47
North Wales	310

Source: Social Care Wales, Registered adult care home managers

A regional survey carried out for the Market Stability Report identified that 1 in 5 care worker roles are vacant across the region, including senior care worker and care worker roles.

There are some concerns that since the introduction of the Regulation and Inspection of Social Care (Wales) Act 2016 more homes are offering both residential care and older people's mental health (EMI) residential care without necessarily providing separate facilities for different residents and possibly without having suitable skill sets and arrangements in place.

There is an increase in training needs due to the lack of available training on offer during the pandemic, which include basic training such as inductions and manual handling.

There are some concerns that staff may have moved away from a reablement ethos due to pressures during the pandemic. For example, individuals becoming very deconditioned due to lack of activity and staff not promoting simple forms of independence, such as going to the toilet unaided.

Equality, socio-economic duty and human rights

See Impact Assessment

SECTION 1F – SUMMARY OF THE MARKET FOR Care Home Services (Adult) REGULATED PROVISION

- The demand for care home placements is likely to increase
- Over 65 and over 85 population forecast to increase
- A total of 118 Extra Care units are all currently occupied and 71 units of Supported Accommodation are all currently occupied. Demand currently outweighs capacity in regards to Extra Care and Supported Accommodation.
- Demand for Extra Care Housing outweighs current capacity.
- Recruitment and retention of social care workers.

- Increase to the cost of living.
- The workforce for Anglesey is aging.

CHAPTER 2 – TYPE OF REGULATED PROVISION: Care Home Services (Children)

SECTION 2A – MARKET SUFFICIENCY

Sufficiency issues for some children

The Market Position Statement (Regional Partnership Board, 2019) identified sufficiency issues with finding placements for children with particular needs including :

- Respite care
- Young offenders
- Refugees, immigrants, asylum seekers
- Young parents
- Sibling groups
- Emergency situations

The stability of the workforce is an issue, with increasing demand for placements and the number of placements projected to not meet with the forecast demand.

The Foster Wales website facilitated the joining of the 22 Local Authorities to form a national network of local fostering expertise. Its focus is to make a bigger impact on a national level, working together with foster carers, to build better futures for local children. Sharing one brand and, one voice, to strengthen recruitment and support of foster carers.

SECTION 2B – MARKET STABILITY

Market stability

The work to date on developing the '**North Wales Market Stability Report**' has identified the following:

The number of children receiving care and support has increased

In 2020, there were almost 2,900 children receiving care and support across North Wales. This is 2,300 children for each 100,000 children in the population, which is slightly lower than the rate for Wales as a whole of 2,550 children in need for each 100,000 children in the population. The numbers vary across North Wales and over time with no clear trend.

In 2018-19, there were 575 children on the child protection register in North Wales. Although the numbers vary year to year for each local authority, overall for North Wales, the level has remained similar, with a small decrease of 3% (15 children). Due to the small numbers involved it is not possible to identify clear trends as, for example, a dramatic change from one year to the next may be due to one family moving to or from an area. The number of looked after children is not expected to continue to increase.

Although the overall figures for all looked after children have shown a steady increase year-on-year to date this is not expected to continue in the future (Regional Partnership Board, 2019).

Children who are care experienced were more vulnerable to the pandemic

The Rapid Review of the Population Needs Assessment (Regional Partnership Board, 2020) highlighted the impact of the pandemic on care experienced children which included isolation and loneliness and disruptions in access to services. In North Wales, there was an

initial dip in child protection referrals but then the rate of referrals returned to expected levels. An increased level of monitoring visits took place to households where there were children on the child protection register – weekly visits instead of the 10-day timescale.

There is an increase in newly accommodated looked after children and young people

In 2021, there were 1,470 local children and young people looked-after by North Wales local authorities, which is similar to the national picture across the whole of Wales. The number of children looked after in North Wales has increased by 350 during the time frame between 2017 and 2021. North Wales has a lower number of children looked after per 100,000 population than the rest of Wales, however there are significant variations across the region, from 800 in Flintshire to 1,300 in Wrexham. It is important to note that the number is currently fluctuating rapidly with a significant increase in newly accommodated young people.

Market overview

Despite a shared commitment to prevention and early intervention, there will always be a small proportion of looked after children who need residential placements. Depending on care needs this may be in a:

- Residential Care Homes with paid care staff
- Secure Accommodation Unit
- Residential Family Unit

The updated Market Position Statement (Regional Partnership Board, 2019) provided a breakdown of residential care provision in North Wales. As at 31st March 2020, there were 70 North Wales children living in a care home. The total number of children living in a children's home increased by 133% in North Wales between 2016 (30 children) and 2020 (70 children).

There is a shortage of local residential providers

In August 2020, ADSS Cymru published a report which examined the case for rebalancing social care provision in Children's Services (ADSS Cymru, 2020). The report identified a significant imbalance of power in the children's residential care market, which is affecting placements and choice, the ability to make the best match to a child's needs, the workload, and the outcomes for children. Without rebalancing, there will be a continued reliance on private providers with, in some cases, high cost, and questionable value for money, greater instability for children and poor outcomes. The aim of any rebalancing must be to develop stable, resilient markets, which offer options and choice, quality care, fewer placement breakdowns, and good outcomes for children.

An increasing demand for residential placements and a lack of supply in local residential providers has resulted in a 'providers market'. Providers are able to be more selective of the young people they accept, which may result in those with higher levels of complex needs and behavioural challenges being more difficult to place. This may be due to the skill / expertise of the provider, a concern about how behaviour might impact other residents and the local community, and worries that all of this might impact upon the outcomes of the service.

Alongside the financial pressure, there is also a pressure on staff time. In the event of a bed becoming available, a number of local services may be seeking to secure it, resulting in competition.

This high demand puts pressure on local authority finances, with providers able to dictate the cost of the provision. There is a risk that expenditure on out of county placements increases as placement costs increase in a demand led market.

North Wales is currently reliant on the independent sector for children's residential care provision. The Children's Transformation Programme and Integrated Care Funding has been used to increase in house provision and fund preventative activity. Local authorities continue to explore opportunities to facilitate a different approach to help reduce the reliance on out of county placements which lead to unsustainable financial pressures for social services and education.

[There is a shortage of specialist provision for children and young people with complex behavioural and emotional needs](#)

In 2019 for over half of children placed in residential care were receiving care primarily due to emotional and behavioural needs and two thirds of those children were aged between 13 to 16 years old (Regional Partnership Board, 2019).

There is a significant shortage of specialist placements for young people with significant emotional and behavioural needs in North Wales. Children are often placed in England, away from their families. There is limited provision in England. Social workers struggle to place children with severe needs as providers tend to reserve places to try to place a child with less severe needs.

Some children may have received their education through the Welsh language and therefore have difficulty coping in an English medium school and needing tutor or assistant to provide additional support.

Young people in crisis often attend Accident and Emergency and stay in hospital settings in an emergency situation.

[There is a shortage of emergency accommodation](#)

Social services across the UK are facing increased pressures to find placements in emergencies. Locally, we do have situations where no placement can be sourced for a child. This necessitates the development of a holding position to provide accommodation and support until a placement can be found. These situations may arise from difficulties in placing young people following the breakdown of relationships at home, transfer of children where the police have used their powers of protection to remove children and a lack of secure beds for young people with high level needs and welfare risks.

It is important to emphasise that these arrangements are used as a last resort in emergency situations, due to exceptional circumstances and for a short period until a regulated provision can be sourced. Safeguards around unregulated placements include the need for senior manager approval, notification to Care Inspectorate Wales (CIW) as our regulator, a care and support plan, completion of social work visits, involvement of Independent Reviewing Officers and supervision of social workers to look at arrangements/ move on plans.

The arrangements that local authorities have to put in place in emergencies can amount to unregulated placements. Under the Regulation and Inspection of Social Care (Wales) Act 2016 it is an offence for a person to provide a regulated service without being registered in respect of that service.

[Local market overview](#)

The Market Position Statement 2021 appraised the market and set out what is happening, residential services needed for children in the region and aspirations for future providers.

- The number of children who live in a children's home has increased, some of these children are able to live in a foster placement but there are currently not enough foster carers with the right skills to support them.

<ul style="list-style-type: none"> • Some of our children who live in a children’s home live outside of local authority boundary despite sufficient in-area capacity. <p>What we don’t need:</p> <ul style="list-style-type: none"> • We do not encourage expansion in North Wales by independent providers of residential care for children whose services are not developed to meet the needs of our children. • We do not want providers to operate children’s homes without a clear model of care or deliver standard provision only. <p>What we want:</p> <ul style="list-style-type: none"> • We want to work with new and existing providers and support them to deliver models of care that will meet the needs of our children. • We want to work with new and existing providers and encourage them to develop their businesses in a way that, in addition to improving outcomes for our children, also provide a wider social value to our communities. • We want providers who are able to safely care for our children with multiple high needs and are able to provide alternative accommodate to secure welfare provision. • We want providers who will work in partnership with us during periods of transition including stepping down to live with a foster carer or reunification with their family. • Welsh culture is very important to us as a region and we want more providers who are able to deliver their services in Welsh.
Action Taken Due to Provider Failure
Not applicable

SECTION 2C – OTHER MARKET STABILITY FACTORS
Consideration of Market Quality
<p>Consideration of market quality</p> <p>Regional</p> <p>Children’s Commissioning Consortium Cymru (4C’s) are a Welsh National Team working to support Local Authority Children’s Social Services Departments to commission and contract placements for Children Looked After. They manage the the All Wales Residential Framework for the Provision of Services for Children & Young People Looked After across Wales.</p> <p>Framework monitoring of Quality Assurance and Risk Management processes within the Framework identifies trends in relation to providers and issues.</p> <p>Isle of Anglesey</p> <p>Anglesey has two registered Small Group Homes – known as “Catrefi Clyd Môn” - that are registered and running – Cartref Clyd Bryn Hwfa, and Cartref Clyd Llanfairpwll, - both of which have been running at full capacity throughout the year, working with young</p>

people with complex care needs who have suffered early childhood trauma and struggle with attachment disorders.

Following the success of the first two homes, Anglesey is currently nearing opening its third Catrefi Clyd Môn in Caergybi (Holyhead), a specialist small group home, which will be an opportunity for respite for children supported by the specialist children's services.

During the next twelve months a fourth property will be opened, which is still in its planning and registration phase -Cartrefi Clyd Môn Rhosybol.

There is another project with the planning and registration phase of Catrefi Clyd Môn Llangristiolus, which will be a modern facility specialising in Day Services for its Specialist Children's Services. With the opening of these 2 new facilities in 2022, out of county placements will be reduced further.

The facilities at Cartref Clyd Bryn Hwfa in Llangefni and Cartref Clyd Llanfairpwll were inspected by CIW in 2020 and both were judged to be Excellent.

Current and Projected Trends

Current and projected trends

- Challenges in accessing secure welfare beds and local alternatives that provide crisis intervention and diversion from secure accommodation.
- Challenges in sourcing appropriate local placements for children and young people with complex needs.
- Need for additional and appropriate short term care arrangements and facilities for children. This also includes children with additional needs and on occasions their siblings.
- Children aged 16+ often have complex needs and placement options are limited, a strategic approach is needed in supporting the accommodation and support needs of young people ages 16-18 and for care leavers.

Impact of Commissioning practices on the market

Impact of commissioning practices on the market

All Wales Frameworks are used to commission individual placements across a range of placement types. These frameworks deliver strategic level partnerships with providers in fostering and residential services. The frameworks are used where either the Regions Sufficiency Duty necessitates external commissioning or where best quality, outcome delivery and value for money is achieved through external commissioning rather than internal service delivery. The All Wales Frameworks are managed by the Children's Commissioning Consortium Cymru (4C's).

The vehicle used for e-tendering external fostering and residential placements is the Children's Commissioning Support Resources (CCSR) which offers transparent and outcomes focused placement commissioning for both Framework and Non-Framework regulated placements and allows compliance with the relevant procurement guidance and regulation that underpins commissioning.

Provision of service in the Welsh Language
<p><u>Provision of service in the Welsh language</u></p> <p>Some children may have received their education through the Welsh language and therefore have difficulty coping in an English medium school and need a tutor or assistant to provide additional support. Children who are placed out of country due to lack of specialist placements do not have the option to receive care services in Welsh. This is a particular issue in Anglesey.</p>
Sustainability of provision
<p>Under the Future Generations Act (Wales) 2015, Ynys Môn has a duty to take into account the well-being of individuals when creating sustainability plans. The well-being goals of the act will inform how sufficient alternative accommodation will be sourced, taking into account its effect on the wellbeing of the individual as well as its wider impact on sustainability in Wales.</p>
Risks to market stability
<p>Whilst the number of 'looked after' children within Anglesey has plateaued during the last two years or so, the demand for placements to support children and young people with complex presentations has remained, whilst the market has not responded in a way that can offer placements and meet the needs of children and young people with complex presentations.</p> <p>The primary risk in respect of this instability in the market is the increasing pressure to utilise non-regulated arrangements for children and young people looked after by the Local Authority. This is a pressure/risk faced across North Wales.</p> <p>In such circumstances, the Local Authority consistently works closely with providers and the Care Inspectorate Wales to mitigate risk and support future regulation.</p>

SECTION 2D – NON-REGULATED PROVISION [PREVENTATIVE SERVICES, STEP-DOWN FROM A SECURE PLACEMENT, OR MOVING ON ARRANGEMENTS SUCH AS WHEN I AM READY etc]

When I'm Ready:

There are currently ten When I'm Ready arrangements (approximately 17% of children receiving leaving care services).

Stepdown from secure placement:

The Authority has experience of one stepdown from secure accommodation within the last twelve months. The experience indicates a significant national shortfall in residential establishments equipped to support with the needs of this cohort of young people.

SECTION 2E - OTHER CONSIDERATIONS AFFECTING THE MARKET

Social value

There is some reference to the use of social enterprises/co-operatives as providers of independent foster placements

Resources

The Local Authority's commitment to investment in the small group homes project has paid dividends. To date, the quality of care provided has been independently audited (CIW) and found to deliver care to a high standard. Additionally, there has been zero breakdowns in any of the arrangements to date.

Direct payments

Any post adoption support that had been assessed prior to the Child's placement would be included in the Adoption Support Plan agreed for the individual child. It would be the responsibility of the adoptive parents to finance universal child care services that may be needed i.e. child minder or private day nursery.

If a child is 'looked after' by the local authority and placed with registered foster carers, their 'care and support needs' would be assessed prior to and on an ongoing basis by the child's social worker and Independent Reviewing Officer via the LAC Review process.

Any support that had been assessed prior to the Child's placement would be included in the Placement Agreement and Care and Support plan.

Direct payments would be unlikely to be used in this situation at the moment as the majority take up of Direct Payments are families of disabled children who utilise direct payments to employ personal assistants to provide 'carers relief' or 'care and support' via Carers Assessment and or Care and Support Assessment. Foster Carers can be identified as being 'Paid Carers'.

To date there have been no Direct Payment packages used to support the Adoption Process prior or after a child has been identified and matched to adoptive parents. However this type of support could meet the assessed needs of individual children and their families and is therefore an area that warrants further research and exploration as a service option

There are no Direct Payment packages used to support the children and their foster carers prior or after a child has been identified and matched to the foster family. However this type of support could meet the assessed needs of individual children and their families and is therefore an area that warrants further research and exploration as a service option for the future.

Self-funders

It is possible that adoptive parents could fund private therapeutic services for the children or themselves if they felt that the services they required were not available or accessible via Social Services, The Adoption Agency, or Health Board.

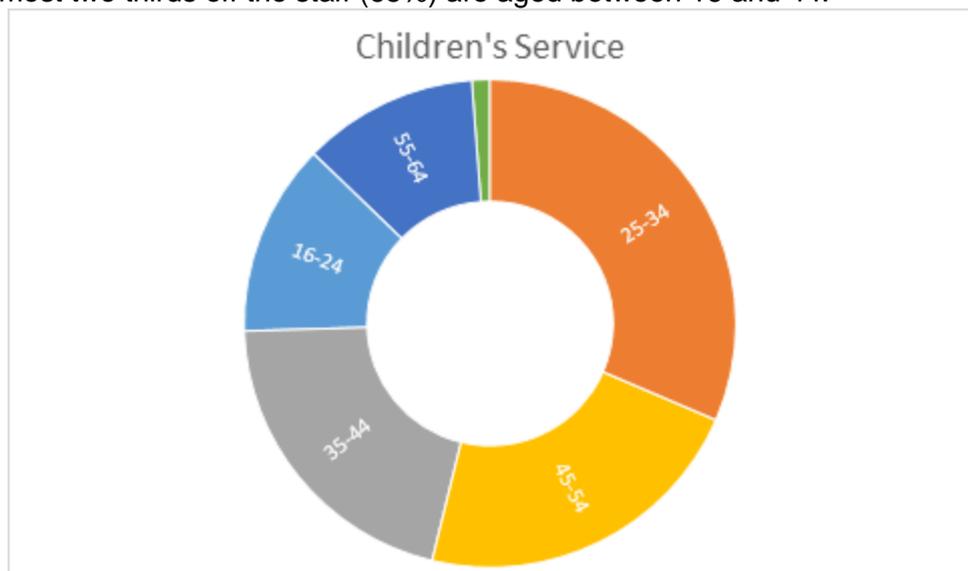

If a child is taken into the care of the Local Authority their assessed needs would be identified and met by Children and Families Social Services.

It is unlikely that a care and support package would be self-funded by foster carers unless it was to access some types of universal child care/activity services to enhance the child's quality of life and experiences.

Workforce

The stability of the workforce is an issue, with increasing demand for placements and the number of placements projected to not meet with the forecast demand.

The age profile of the Childrens Service staff is somewhat younger than the Provider Service staff. Almost two thirds off the staff (65%) are aged between 16 and 44.

The average age of staff in the Childrens Service is 40 years of age.

Succession planning and recruitment and retention of staff are issues that need to be addressed.

In the MSR provider survey, respondents revealed the issues they're currently facing with the recruitment and retention of their workforce. These are:

Low rate of pay

The level of skills needed to work with adults with learning disabilities when they have challenging behaviour and mental health needs is way above the rate of pay. Pay levels in the sector are low, the amount of staff available to fill the hours paid for, need to be extremely diverse in their abilities. There is not enough money to be able to get staff that specialise in part of the tasks needed like a co-ordinator and a cook. All staff need to be able to do all

the tasks between them but ideally, individually too so the residents call always have their needs met.

Other employment paying a higher rate of pay. Long hours, increased pressure on staff due to absence / sickness / Covid and general shortage of staff available.

Rural area

Recruitment is always a challenge, especially social workers as the areas they cover are extensive.

Rising cost of fuel

Within rural areas the cost of travelling to and between packages of care can be a factor especially as packages have to be provided at predetermined intervals.

Equality, socio-economic duty and human rights

See Impact Assessment

SECTION 2F – SUMMARY OF THE MARKET FOR **Care Home Services (Children) REGULATED PROVISION in MEETING THE SUFFICIENCY DUTY: LOOKED AFTER CHILDREN [Section 6 of the SSWA]**

Challenges:

- Increase demand for care homes across Wales – 133% 2016-20
- Number of placements forecast to not meet future demand
- Shortage of local providers
- Shortage of providers in respect of children with complex emotional/behavioural presentations
- Shortage of emergency placements

Potential Impact:

- Children with needs not being met
- Increase in placement moves for most vulnerable children
- Increased use of unregulated settings
- Increase in costs as demand outstrips supply

Mitigation:

- Use of 4Cs to manage market and risks
- Small Group Homes Project – two homes in operation with another two planned for 2022
- Effective use of ‘When I’m Ready’

SECTION 2G – SUMMARY OF THE MARKET FOR Care Home Services (Children) REGULATED PROVISION

Service Users:

- Increased demand across the range of care & support through to ‘Looked After’ Children
- Impact of pandemic upon vulnerable children and families
- Projected impact of cost of living on poverty levels

Resources:

- Market supply not meeting demand, particularly for most vulnerable ‘looked after’ children – similar on national, regional and local levels
- Over-reliance upon independent sector
- Increased reliance upon unlawful unregulated settings
- Pressure on budgets due to increased costs of provisions

Meeting the Challenge:

- We want to work with new and existing providers and support them to deliver models of care that will meet the needs of our children.
- We want to work with new and existing providers and encourage them to develop their businesses in a way that, in addition to improving outcomes for our children, also provide a wider social value to our communities.
- We want providers who are able to safely care for our children with multiple high needs and are able to provide alternative accommodate to secure welfare provision.
- We want providers who will work in partnership with us during periods of transition including stepping down to live with a foster carer or reunification with their family.
- Welsh culture is very important to us as a region and we want more providers who are able to deliver their services in Welsh
- Further work internally to develop small group homes project

CHAPTER 3 – TYPE OF REGULATED PROVISION: Secure Accommodation Services (Children)

SECTION 3A – MARKET SUFFICIENCY
<p>Secure accommodation</p> <p>There is no secure accommodation provision for children in Anglesey or North Wales. There is a national purpose built secure children’s home in South Wales. Hillside can accommodate up to 18 children and young people of either gender between the ages of 12 to 17 years.</p> <p>The children placed in secure accommodation are done so by order of a court and numbers are very low, between 0 to 2 per authority each year with no clear trend. There are no plans to extend this provision in North Wales.</p> <p>Market sufficiency therefore is not relevant for Isle of Anglesey County Council.</p>
SECTION 3B – MARKET STABILITY
<p>Not relevant for Isle of Anglesey County Council.</p>

SECTION 3F – SUMMARY OF THE MARKET FOR *Secure Accommodation Services (For Children)* REGULATED PROVISION in MEETING THE SUFFICIENCY DUTY: LOOKED AFTER CHILDREN [Section 6 of the SSWA]

Not relevant for Isle of Anglesey County Council.

SECTION 3G – SUMMARY OF THE MARKET FOR *Secure Accommodation Services (For Children)* REGULATED PROVISION

Not relevant for Isle of Anglesey County Council.

CHAPTER 4 – TYPE OF REGULATED PROVISION: Residential Family Centre Services

SECTION 4A – MARKET SUFFICIENCY

Residential Family Centre Services are accommodation where parents and children stay together to be assessed / receive care.

The Transformation Team on Anglesey is a new service that will provide a multi-agency provision of intensive services in Anglesey.

The Team will work with families, aged 0 to 25, who are either at risk of coming into the care of the local authority or where there is a possibility for them to return to the home or remain in the care of their parents / carers safely.

The team consists of a practice leader, psychologist, social worker and two support workers. Their focus is on working with children and young people where a neurological condition may be impacting their behaviours at home, school or out in the community.

SECTION 4B – MARKET STABILITY

Isle of Anglesey and Gwynedd Councils and BCUHB (West)

There was insufficient demand to justify commissioning a full-time residential family centre unit. Current capacity is adequately fulfilled.

Action Taken Due to Provider Failure

Not applicable

SECTION 4C – OTHER MARKET STABILITY FACTORS

Consideration of Market Quality

IoACC has two Small Group Homes – known as “Catrefi Clyd Môn” - that are registered and running – Cartref Clyd Bryn Hwfa, and Cartref Clyd Llanfairpwll, - both of which have been running at full capacity throughout the year, working with young people with complex care needs who have suffered early childhood trauma and struggle with attachment disorders.

Following the success of the first two homes, IoACC is currently nearing opening its third Catrefi Clyd Môn in Caergybi (Holyhead), a specialist small group home, which will be an opportunity for respite for children supported by the specialist children’s services.

During the next twelve months IoACC will work towards opening the fourth property, which is still in its planning and registration phase - Cartrefi Clyd Môn Rhosybol.

IoACC is also working in the planning and registration phase of Catrefi Clyd Môn Llangristiolus, which will be a modern facility specialising in Day Services for its Specialist Children's Services. With the opening of these 2 new facilities in 2022, out of county placements will be reduced further.

The facilities at Cartref Clyd Bryn Hwfa in Llangefni and Cartref Clyd Llanfairpwll were inspected by CIW in 2020 and both were adjudged to be Excellent.

Current and Projected Trends

For the Isle of Anglesey and Gwynedd Councils and BCUHB (West), there is insufficient demand to justify commissioning a full-time residential family centre unit. Current capacity is adequately fulfilled.

Impact of Commissioning practices on the market

Impact of commissioning practices on the market

All Wales Frameworks are used to commission individual placements across a range of placement types. These frameworks deliver strategic level partnerships with providers in fostering and residential services. The frameworks are used where either the Regions Sufficiency Duty necessitates external commissioning or where best quality, outcome delivery and value for money is achieved through external commissioning rather than internal service delivery. The All Wales Frameworks are managed by the Children's Commissioning Consortium Cymru (4C's).

The vehicle used for e-tendering external fostering and residential placements is the Children's Commissioning Support Resources (CCSR) which offers transparent and outcomes focused placement commissioning for both Framework and Non-Framework regulated placements and allows compliance with the relevant procurement guidance and regulation that underpins commissioning.

Provision of service in the Welsh Language

Provision of service in the Welsh language

Some children may have received their education through the Welsh language and therefore have difficulty coping in an English medium school and need a tutor or assistant to provide additional support. Children who are placed out of country due to lack of specialist placements do not have the option to receive care services in Welsh. This is a particular issue in Anglesey.

Sustainability of provision

As there is insufficient demand to justify commissioning a full-time residential family centre unit for the Isle of Anglesey and Gwynedd Councils, the service is considered sustainable. Current capacity is adequately fulfilled.

Risks to market stability

We currently have 3 Small group home resources on Ynys Môn with a potential to offer 5 bed spaces for children that require the service. Our 4th property is being renovated and the works will be finished by August 2022. This will enable the local authority to offer another 3 potential bed spaces locally on the Island to reach a total of 8 bed spaces.

Outcomes

- Be able to develop and offer an increased 'shared care' option for individuals and families to delay complete family breakdown
- Be an opportunity for the young person to develop new skills and experiences that may enable them to move on to alternative supported accommodation to meet their individual needs
- Be able to provide longer term care and the opportunity to work in Partnership at an earlier stage with Adult Learning Disability Services in the interests of the identified young people to support them through the transition process.
- Be available to meet the needs of other young people who have complex care and support needs, dependent on their assessed needs.

SECTION 4D – NON-REGULATED PROVISION [PREVENTATIVE SERVICES, STEP-DOWN FROM A SECURE PLACEMENT, OR MOVING ON ARRANGEMENTS SUCH AS WHEN I AM READY etc]

When I'm Ready:

There are currently ten When I'm Ready arrangements (approximately 17% of children receiving leaving care services).

Stepdown from secure placement:

The Authority has experience of one stepdown from secure accommodation within the last twelve months. The experience indicates a significant national shortfall in residential establishments equipped to support with the needs of this cohort of young people.

SECTION 4E - OTHER CONSIDERATIONS AFFECTING THE MARKET

Social value

There is some reference to the use of social enterprises/co-operatives as providers of independent foster placements

Resources

The Local Authority's commitment to investment in the small group homes project has paid dividends. To date, the quality of care provided has been independently audited (CIW) and found to deliver care to a high standard. Additionally, there has been zero breakdowns in any of the arrangements to date.

See Impact Assessment
SECTION 4F – SUMMARY OF THE MARKET FOR Residential Family Centre Services REGULATED PROVISION in MEETING THE SUFFICIENCY DUTY: LOOKED AFTER CHILDREN [Section 6 of the SSWA]
<p>Cartref Clyd have been able to bring one child back from an out of county placement. It has also prevented two children being placed out of county. Cartref Clyd have been able to help one young person to transition back home to family and another young person will be transitioning back home to family at the end of the year.</p> <p>In moving to Cartref Clyd, one child has been able to increase the amount of time he sees family and has commented that he has only been able to see his mum on birthdays / Christmas since living in Cartref Clyd.</p> <p>Cartref Clyd were able to support one young person to complete her education within the school setting and move on to complete a college course, she is now looking for employment which is also being supported by the team. Another young person who had been out of education for a long time, was supported to engage in education again by the team.</p>

SECTION 4G – SUMMARY OF THE MARKET FOR Residential Family Centre Services REGULATED PROVISION

Cartref Clyd Llanfair and Cartref Clyd Bryn Hwfa are already operational, with Cartref Clyd Caergybi opening imminently to provide short breaks for children with learning difficulties and complex needs. Cartref Clyd Rhosybol will soon be ready to go through the CIW registration process and be ready to welcome more Ynys Môn young people back in to the community.

CHAPTER 5 – TYPE OF REGULATED PROVISION: Adoption Services

SECTION 5A – MARKET SUFFICIENCY

North Wales Adoption Service overview

The North Wales Adoption Service provides a regional adoption service on behalf of the Isle of Anglesey County Council. Working regionally helps find new families more effectively, place children quicker and improve adoption support services. In April 2014 it was integrated into the National Adoption Service. The services comply with updated adoption legislation, regulations and statutory guidance in line with the Regulation and Inspection of Social Care (Wales) Act 2016 (RISCA) and with the policy and procedures of the service, within the resources allocated. There is a framework which aims to make it easier for adopters, children and young people get support when needed.

Services provided by the adoption service include:

- Preparing the child for adoption
- Family finding and matching
- Safeguarding children
- Provision of adoption support
- Recruitment, assessment and approval of adopters
- Preparing to adopt training (pre/post approval)
- Adoption support (pre/post adoption, buddy system, post adoption contact)
- Birth parent counselling
- Relinquished babies
- Services for adopted adults or anyone affected by adoption.
- Partner of Parent Assessment (Annex A)
- Adoption with a foreign element.

The Isle of Anglesey County Council continues to contribute to the regional **North Wales Adoption Service**. During 2020-21, five children from Anglesey were placed with families for adoption and of those five, one has subsequently become the subject of an adoption order and has therefore been formally adopted. It is likely that the other four children will be formally adopted during 2021-22.

SECTION 5B – MARKET STABILITY

Population overview

The number of looked after children who were placed for adoption in Anglesey was 6 in 2020/21. It is worth noting that the service has undergone significant transformation since 2020, therefore it is difficult to compare local data and it does not reflect the service now.

Action Taken Due to Provider Failure

Not applicable

SECTION 5C – OTHER MARKET STABILITY FACTORS

Consideration of Market Quality

Quality reports

The Quality of Service Review from the North Wales Adoption Service (2020) highlighted the following areas to improve market stability:

- Increase the number of approved adopters
- Reduce the number of children waiting for an adoptive family
- Develop the adoption support service
- Recruitment - sessional workers and adoption panel vacancies

Care inspectorate Wales (2019b) inspection identified these areas for improvement:

- Further develop quality assurance processes and assessment of the degree to which aims and objectives of the statement of purpose are met and evidence demonstrating how these support well-being outcomes for children
- The availability of the 'Active Offer', to provide services in the Welsh language
- The statement of purpose and adopters' information pack includes information about the independent review mechanism so adopters are aware of this
- Intermediary files should include a clear audit trail of work undertaken

Current and Projected Trends

Current and predicted trends

The following issues were raised with regards to adoption services for children:

- Highest placement need is for children from the East
- Highest number of adopters are from the East
- Fewer adopters in the West and children need to be placed away from the East
- Nationally there are more children than approved adopters available
- Consideration of the number of Welsh language speakers (adopters/children)

The following issues were raised with regards to adoption services for adults:

- Adults requesting their birth records to find their birth parents was shut down during the pandemic, majority of services have resumed but there is a backlog
- Staffing - 43 staff, 10 are off or due to go off on maternity leave, it is difficult to recruit to fixed term posts so the ability to assess may be impacted in 2022/23

Impact of Commissioning practices on the market
<p>The implementation of the Welsh Adoption Register has been fundamental in searching for adoptive families across Wales for children waiting, particularly children that cannot be placed within North Wales.</p> <p>All approved adopters and children waiting in Wales are registered on the Adoption register Wales. Adopters and practitioners are able to share information on children waiting, reducing the time children are waiting.</p>
Provision of service in the Welsh Language
<p>The ethnicity of Anglesey's 'looked after' children (LAC) population is overwhelmingly white Welsh/British (98%+). Two children are designated 'Unaccompanied Asylum Seeking Children'.</p> <p>The majority of the population is first language Welsh speaking. Services are provided by the Council in the language choice of the service user. The Council encourages its partner agencies to adopt a similar approach with regard to the services they offer.</p>
Sustainability of provision
<p>The adoption agency continues to work closely with the private and 3rd sector providers such as Barnardo's, St David's and adoption UK.</p> <p>Private and 3rd Sector providers are part of the National Adoption Service collaboration framework working across Wales in developing regional and national service for adoptive families.</p>
Risks to market stability
<p>One of the identified key areas for NWAS 2022/2023 Targeted recruitment drives Increase the number of adopters 2022/2023 to 42 approved adoptive families. Increase the number of Welsh speaking adopters to meet the needs of Welsh speaking children' older children, sibling groups and children with disability Reduce the time children are waiting.</p> <ul style="list-style-type: none"> • Staffing - 43 staff, 10 are off or due to go off on maternity leave, it is difficult to recruit to fixed term posts so the ability to assess may be impacted in 2022/23. This is likely to impact on the availability of adoptive placement for children waiting, increasing the waiting time scales and delays for children being placed in adoptive placement. <p>Annexe A assessments for Partner of Parent adoptions, continues to place considerable pressure on resources. There is currently a waiting list of Partner of Parents who wish to adopt. However, children who are looked after have to take priority.</p>

SECTION 5D – NON-REGULATED PROVISION [PREVENTATIVE SERVICES, STEP-DOWN FROM A SECURE PLACEMENT, OR MOVING ON ARRANGEMENTS SUCH AS WHEN I AM READY etc]

Preventative Services

The children and families service continues to invest in preventative services to decrease the number of children and young people requiring to be looked after. The main preventative provision is the resilient families team which provide intensive support for families where substance misuse, domestic abuse and parental mental health difficulties have been identified and contribute to the risks that the children and young people may face at home. Through utilising strength based and psychological informed interventions the team has consistently demonstrated that these are effective ways of decreasing risk, facilitating change that allow families to remain together. In addition we have developed a peer mentor programme and although it's early days we expect this to be an effective addition to the offer.

In 2021 a new transformation team was established with monies from the transformation programme for the West area of North Wales. The Transformation Team is a new service that will provide a multi-agency provision of intensive services in Ynys Môn. The Team work with families, aged 0 - 25, who are either at risk of coming into the care of the local authority or where there is a possibility for them to return to the home or remain in the care of their parents / carers safely. The team consists of a Practice leader, psychologist, social worker and two support workers. Their focus is on working with children and young people where a neurological condition may be impacting their behaviours at home, school or out in the community. In 2022 the team will be incorporated into the resilient families team widening the remit and scope of that team.

Our aim is to provide at the earliest possible early intervention and prevention services to families. Provisions include the team around the family that has recently been increased in size from 6 to 8 support workers. Our commissioned services include GORWEL domestic abuse service, Action for children emotional wellbeing and young carers, Adferiad parental mental health support and the early Help Hub and One Front door multi agency meetings.

When I'm Ready:

There are currently ten When I'm Ready arrangements (approximately 17% of children receiving leaving care services).

Stepdown from secure placement:

The Authority has experience of one stepdown from secure accommodation within the last twelve months. The experience indicates a significant national shortfall in residential establishments equipped to support with the needs of this cohort of young people.

SECTION 5E - OTHER CONSIDERATIONS AFFECTING THE MARKET

Social value

Adoption is a positive option for some children who are 'looked after' by the local authority and offers permanency for individuals in a family environment.

The impact of the social value linked to the adoption process is ultimately about the potential long term stability this can offer vulnerable children with varying needs. The adoptive parents legally welcome a child or children to be part of their family.

NWAS works with all local authorities in the region and has the management oversight of Adoption social workers in each local authority to ensure that the service meets the needs of the population of 'looked after' children in each local authority.

Independent/private adoption agencies work with NWAS and the local authority to meet local needs. Prospective adopters are recruited and supported through the assessment process by the adoption agency and do have opportunities to meet others going through the same process and provide mutual support to others on the same journey. However if and when a child is successfully matched and linked with prospective adoptive parents they may not wish to continue to be identified as being different to any other family. They will continue to receive post adoption support from the local authority dependent on the plan that has been assessed and agreed prior to the placement being made.

The model of delivery for the Adoption process is unique and guided by robust processes, managed by registered services within a clear legal framework. Therefore links to the regional social value forum are limited and would be primarily via the North Wales Adoption Service.

Resources

Local authorities all contribute to the funding of the North Wales Adoption Service and are then linked to the National Service. This enables local authorities to benefit from the economies of scale that are available to promote national recruitment campaigns and also have specialist workers in each local authority to meet the needs of the local area of Ynys Môn.

Direct payments

Any post adoption support that had been assessed prior to the Child's placement would be included in the Adoption Support Plan agreed for the individual child.

It would be the responsibility of the adoptive parents to finance universal child care services that may be needed i.e. child minder or private day nursery.

Direct payments would be unlikely to be used in this situation at the moment as the majority take up of Direct Payments are families of disabled children who utilise direct payments to employ personal assistants to provide 'carers relief' or 'care and support' via Carers Assessment and or Care and Support Assessment.

To date there have been no Direct Payment packages used to support the Adoption Process prior or after a child has been identified and matched to adoptive parents.

However this type of support could meet the assessed needs of individual children and their families and is therefore an area that warrants further research and exploration as a service option

Self-funders

It is possible that adoptive parents could fund private therapeutic services for the children or themselves if they felt that the services they required were not available or accessible via Social Services, The Adoption Agency, or Health Board.

Workforce

There are currently no gaps within the staffing establishment across regulated services, albeit three posts are currently filled by agency social workers.

The service is currently in the process of advertising for four unqualified social care practitioners to assist with demand on a temporary twelve month basis.

Equality, socio-economic duty and human rights

See Impact Assessment

SECTION 5F – SUMMARY OF THE MARKET FOR [Adoption Services](#) REGULATED PROVISION in MEETING THE SUFFICIENCY DUTY: LOOKED AFTER CHILDREN [Section 6 of the SSWA]

Further development alongside the National adoption service is being undertaken to improve recruitment drives to increase the number of approved adopters.

Marketing and Recruitment to target prospective adopters for Welsh speaking children, sibling groups, older children or children with disabilities.

Reduce the time children are waiting.

Further development within the Intermediary service is being considered with regards to offering support groups to birth parents affected by adoption and to offer support groups to adopted adults.

SECTION 5G – SUMMARY OF THE MARKET FOR Adoption Services REGULATED PROVISION

Further development alongside the National adoption service is been undertaken to improve recruitment drives to increase the number of approved adopters.

Marketing and Recruitment to target prospective adopters for Welsh speaking children, sibling groups, older children or children with disabilities.

Reduce the time children are waiting.

Further development within the Intermediary service is being considered with regards to offering support groups to birth parents affected by adoption and to offer support groups to adopted adults.

CHAPTER 6 – TYPE OF REGULATED PROVISION: Fostering Services

SECTION 6A – MARKET SUFFICIENCY

Market overview by local authority

Anglesey market overview

The table shows how many children in Anglesey are increasingly being placed outside of their local authority.

Table 20: Number of children in foster placements by area - Anglesey

Location of placement	2018	2019	2020	2021	Change No
Inside local authority	65	60	70	80	-45
Outside local authority (Wales)	30	30	30	20	50
Outside Wales	0	0	0	0	0

Numbers have been rounded so may not sum.

Table 21: Number of children in foster placements by type - Anglesey

Type of Placement	2018	2019	2020	2021	Change no
With relative/ friend, inside local authority	30	25	25	35	5
With local authority, inside local authority	20	20	40	40	20
With agency, inside local authority	15	15	10	10	-5
With relative/ friend, outside local authority	5	0	0	0	-5
With local authority, outside local authority	0	0	0	0	0
With agency, outside local authority	25	25	25	25	0

Numbers have been rounded so may not sum.

Source: Looked After Children Census. StatsWales, Welsh Government

Population overview

The number of children is predicted to decrease

The estimated number of children (aged 0-15) in 2020 and the projections for 2040 demonstrate the number of children in North Wales is predicted to decrease over the coming years (Welsh Government, 2020). This decrease can be seen across all of the local authorities in North Wales, with the exception of Gwynedd which is predicted a slight increase (1.8%). Overall the number of children in North Wales is expected to reduce by 6.1%

The Market Position Statement update 2021 gave an overview of key statistics;

- The number of children who required a foster placement increased by 34% during the period April 2016 (600 children) to March 2020 (805 children).

- As at the 31st March 2020, there were 805 North Wales children living with a foster carer 40% (325 children) were living with an independent foster carer and the majority of those children required a specialist placement in order to support their needs, which could not be supported by our in house services.
- There are currently 11 children who are living in a children's home who could be supported by specialist foster carer. There are not enough foster carers with the right skills to support the needs profile of our children.
- During the period April 2020 to the end of February 2021, there were 34 children who required a parent and child placement and assessment.

Sufficiency issues for some children

The Market Position Statement (Regional Partnership Board, 2019) identified sufficiency issues with finding placements for children with particular needs including:

- Respite care
- Young offenders
- Refugees, immigrants, asylum seekers
- Young parents
- Sibling groups
- Emergency situations

The stability of the workforce is an issue, with increasing demand for placements and the number of placements projected to not meet with the forecast demand.

The Foster Wales website joined the 22 Local Authorities to form a national network of local fostering expertise. Its focus to make a bigger impact on a national level, working together and with foster carers, to build better futures for local children. Sharing one brand, one voice, to strengthen recruitment and support of foster carers.

The National Fostering Framework

The National Fostering Framework (2018) finds children who live with foster carers in their own locality more likely to thrive and children in local authority provision more likely to stay in their home authority, enabling them to maintain important links. It is vital local authorities increase local placements and reduce out of area placements. According to the National Fostering Framework (2018), connected fostering (with family or friends) has seen increased demand. It also finds that local authority placements have better outcomes for children. The framework states that local authorities need to be able to have capacity to facilitate this or otherwise ensure that the child has opportunities to maintain connections if placed in alternative fostering.

SECTION 6B – MARKET STABILITY

Demand for foster care has increased

The number of children in foster care on Anglesey from 90 to 110 by 2020 and in North Wales, it has increased year on year since 2015 to around 945 in 2020. Wrexham had the largest increase, with the number of children doubling. Gwynedd also saw a significant increase. Numbers in the other local authorities have fluctuated.

Table 22: Number of children looked after in foster placements at 31 March

Local council	2015	2017	2018	2019	2020
Anglesey	90	100	100	90	110
Gwynedd	145	145	145	165	200
Conwy	120	125	150	140	140
Denbighshire	125	110	110	115	115
Flintshire	135	140	135	150	140
Wrexham	120	135	170	175	240
North Wales	735	755	810	835	945
Wales	4,250	4,425	4,700	4,840	4,990

Numbers have been rounded so may not sum.

Source: Children looked after by local authorities in foster placements. StatsWales, Welsh Government

Despite the increasing numbers in foster placements, the Market Position Statement (2019) expressed that a large increase was not expected in the future. Local authorities have in-house foster care places and independent fostering agencies providing places. Some of the independent foster agencies are charities or co-operatives. The table below shows the number and percentage for each type of foster placement provision, broken down by Local Authority.

Table 23: Number of foster placements in the local authority area commissioned by provider type

Local council	In House (number)	Independent provider (number)	Total (number)	In House (percentage)	Independent provider (percentage)
Anglesey	37	32	69	54%	46%

Predicted increased demand for foster parents

The National Foster Network calculated a need for, an estimated, 550 new foster parents across Wales every year to keep up with demand. This suggests there could be a shortage of foster placements in coming years, given the increasing demand.

Anglesey market stability

The local authority recognises the following as issues affecting the future stability of the fostering service:

- Workforce – recruitment, retention, age profile of workforce, costs
- Supply and choices available
- The cost of living crisis could impact the numbers of looked after children and therefore hamper the projection of decrease in demand
- Impact of Unaccompanied Asylum Seeking Children (UASC) on LA's resources including placements and support available.
- Impact of unplanned arrivals to the Port of Holyhead.

Market stability**Regional challenges**

The Market Position Statement (2019) and 'Foster Wales' identified challenges to the stability of fostering services in North Wales and Wales as a whole listed below:

- Recruitment and retention issues
- Placements for children with particular needs including; respite care, young offenders, refugees/immigrants/asylum seekers, young parents, sibling groups and emergency situations
- It is estimated that Wales will need 550 new foster parents every year to meet demand

Action Taken Due to Provider Failure

None

SECTION 6C – OTHER MARKET STABILITY FACTORS**Consideration of Market Quality**

The primary factor in relation to market quality is the readiness providers tend to have in giving 28 days' notice to terminate contracts at times of challenge, rather than persevering. This often results in multiple moves for young people, which, in turn, compounds the difficulties.

Current and Projected Trends**Current and projected trends**

Key current trends and projections for the future of foster services:

- Increased demand for placements
- Lack of places for older children
- Lack of places for children with complex care plans/behavioural issues
- Lack of foster parents with skills to support children with complex needs
- Projected increase in demand for placements
- Predicted potential shortage of placements, supply not matching demand

Taking profit out of care for looked after children

One of the wellbeing objectives established within the Welsh Government Programme 2021-2016 is to protect, rebuild and develop our services for children and young people. A key priority in this area of work is to eliminate private profit from the care of children looked after.

Commissioning placements to independent foster agencies can impact on provisions being provided from within the local authority. Competition with independent providers over provision of services is a situation that should be avoided, as there is the risk of services then being driven by profit. Flintshire local authority highlighted this as a potential risk and

stated how they were focusing the use of independent foster agencies for those services that they struggle to provide with local authority services.

The foster care allowances survey from The Fostering Network (2020) found even though all local authorities in Wales are paying at or above the national minimum allowance, foster carers feel their current allowance does not meet the full costs of looking after a child. The network recommend foster payments must be transparent so it is clear to foster carers how much constitutes the allowance, and must be spent on the child, and how much constitutes the fee and is payment for the foster carer's time and skills.

Impact of Commissioning practices on the market

Fostering placements are usually commissioned by the service via the National CSSR database system on an individual child basis. This process has been set up to link placement enquiries with providers who have potential vacancies i.e. Independent Fostering Agencies (IFA) and local authorities.

Some IFAs however are not part of this process and are approached directly in relation to individual placement requests. If no placements are identified by using CSSR and the need remains placements would be sought by contacting known registered providers locally, regionally, nationally and across the other UK Nations.

As the current demand for foster placements exceeds the availability, the commissioning process makes it difficult to negotiate on price, quality and overall stability of individual placements.

This is why there needs to be ongoing resources allocated to the recruitment and retention of local authority foster carers who are able to meet the spectrum of need. The Maethu Cymru initiative now supports all local authority Fostering Teams to compete positively with the Independent Fostering Agencies in the recruitment of foster carers. They provide professional advertising campaigns e.g. on national TV, recruitment resources, and have created a positive identity for local authority fostering teams and keeping the message – 'local foster carers to meet the needs of local children'.

This has then made it possible for local authorities to develop their own individual support packages to attract and retain foster carers to provide a more sustainable service and promote stable placements.

Provision of service in the Welsh Language

Welsh language

The proportion of Welsh speaking foster carers is below the proportion of Welsh speakers across the island.

The provision of Welsh language across the rest of North Wales will be discussed within the children's services chapter of this report.

Sustainability of provision

All recruiting is carried out bi-lingually. This includes all merchandise and public facing documentation and resources i.e. flyers, postcards, and even PR merchandise such as balloons and t-shirts.

Our non-Welsh speaking Foster carers are encouraged to learn Welsh, and courses are available for them to attend. The 'take-up' on the courses are relatively low.

However, the main drive of the service is to get Foster Carers registered with the authority as there is a national shortage – this is whether they speak Welsh or not. The demand for Foster Care places continues to outweigh the current number of Foster Carers registered.

Risks to market stability

The local authority recognises the following as issues affecting the future stability of the fostering service:

- Workforce – recruitment, retention, age profile of workforce, costs
- Supply and choices available
- The cost of living crisis could impact the numbers of looked after children and therefore hamper the projection of decrease in demand
- Impact of Unaccompanied Asylum Seeking Children (UASC) on LA's resources including placements and support available.
- Impact of unplanned arrivals to the Port of Holyhead.

SECTION 6D – NON-REGULATED PROVISION [PREVENTATIVE SERVICES, STEP-DOWN FROM A SECURE PLACEMENT, OR MOVING ON ARRANGEMENTS SUCH AS WHEN I AM READY etc]

Preventative Services

The children and families service continues to invest in preventative services to decrease the number of children and young people requiring to be looked after. The main preventative provision is the resilient families team which provide intensive support for families where substance misuse, domestic abuse and parental mental health difficulties have been identified and contribute to the risks that the children and young people may face at home. Through utilising strength based and psychological informed interventions the team has consistently demonstrated that these are effective ways of decreasing risk, facilitating change that allow families to remain together. In addition we have developed a peer mentor programme and although it's early days we expect this to be an effective addition to the offer.

In 2021 a new transformation team was established with monies from the transformation programme for the West area of North Wales. The Transformation Team is a new service that will provide a multi-agency provision of intensive services in Ynys Môn. The Team work with families, aged 0 - 25, who are either at risk of coming into the care of the local authority or where there is a possibility for them to return to the home or remain in the care of their parents / carers safely. The team consists of a Practice leader, psychologist, social worker

and two support workers. Their focus is on working with children and young people where a neurological condition may be impacting their behaviours at home, school or out in the community. In 2022 the team will be incorporated into the resilient families team widening the remit and scope of that team.

Our aim is to provide at the earliest possible early intervention and prevention services to families. Provisions include the team around the family that has recently been increased in size from 6 to 8 support workers. Our commissioned services include GORWEL domestic abuse service, Action for children emotional wellbeing and young carers, Adferiad parental mental health support and the early Help Hub and One Front door multi agency meetings.

When I'm Ready:

There are currently ten When I'm Ready arrangements (approximately 17% of children receiving leaving care services).

Stepdown from secure placement:

The Authority has experience of one stepdown from secure accommodation within the last twelve months. The experience indicates a significant national shortfall in residential establishments equipped to support with the needs of this cohort of young people.

SECTION 6E - OTHER CONSIDERATIONS AFFECTING THE MARKET

Social value

There is some reference to the use of social enterprises/co-operatives as providers of independent foster placements

Resources

Other provision

There is a significant lack of foster or residential placements for children and young people with challenging or complex behaviour.

Recruitment of in-house foster carers has been impacted by the pandemic with a lack of applicants coming forward. This has resulted in an increased use of Independent Fostering Providers.

Lack of availability has resulted in no offer or placements only at a considerable distance, which is not always in the best interest of the young person.

Children who require a placement but where foster care cannot be sourced are being escalated into residential care, but there is both placement insufficiency and a perceived reluctance to offer placements to young people with complex needs. Again this can result in a placement at a distance away.

There is particular pressure if the child/young person presents with self-harm or suicidal ideation, with providers showing reluctance to offer placements to this cohort. Emergency provision is extremely limited.

Direct payments
<p>If a child is 'looked after' by the local authority and placed with registered foster carers their 'care and support needs' would be assessed prior to and on an ongoing basis by the child's social worker and Independent Reviewing Officer via the LAC Review process.</p> <p>Any support that had been assessed prior to the Child's placement would be included in the Placement Agreement and Care and Support plan.</p> <p>Direct payments would be unlikely to be used in this situation at the moment as the majority take up of Direct Payments are families of disabled children who utilise direct payments to employ personal assistants to provide 'carers relief' or 'care and support' via Carers Assessment and or Care and Support Assessment. Foster Carers can be identified as being 'Paid Carers'.</p> <p>There are no Direct Payment packages used to support the children and their foster carers prior or after a child has been identified and matched to the foster family.</p> <p>However this type of support could meet the assessed needs of individual children and their families and is therefore an area that warrants further research and exploration as a service option for the future.</p>
Self-funders
<p>If a child is taken into the care of the Local Authority their assessed needs would be identified and met by Children and Families Social Services.</p> <p>It is unlikely that a care and support package would be self-funded by foster carers unless it was to access some types of universal child care/activity services to enhance the child's quality of life and experiences.</p>
Workforce
<p>Workforce</p> <p>The National Fostering Framework (2018) highlighted a loss in the number of approved foster households. The framework states improvements need to be made to increase; enquiries, conversions, approvals and retention of foster parents.</p> <p>The table below shows numbers of foster parents and places have seen a slight increase overall across North Wales. However, Gwynedd and Denbighshire saw a drop in both the number of foster parents and places available, and Flintshire saw a drop in foster parents but increase in places. If reductions in foster parents or places continue this could result in insufficient spaces for children in these local authorities.</p>

Table 24: Number of approved foster spaces as of 31 March

Local council	2016/17	2017/18	2018/19
Anglesey	86	69	43
Gwynedd	164	178	198
Conwy	113	130	127
Denbighshire	156	155	149

Carer skill set & training desired:

- Carers who are able to work with our internal services and are trained in the delivery of therapeutic trauma informed care.
- Carers who are aware of the impact of county lines and have received training to support children who are vulnerable to exploitation via these gangs. This includes the resilience to work with children who are being exploited by gangs, frequently abscond and can display verbal and sometimes physical aggression.
- Resilient & trained to work with childhood trauma, absconding, exploitation and self-harm behaviours.
- Carers who are trained to understand the impact of adverse childhood experiences (ACEs) on children who they care for.
- Carers who are trained in crisis intervention, and can work calmly under the pressure of emergency planning.
- Resilient when faced with threat of physical harm & trained in de-escalation, with positive behaviour management planning, minimising use of restraints;
- Carers with the ability to speak Welsh or commitment to learn.

Equality, socio-economic duty and human rights

SECTION 6F – SUMMARY OF THE MARKET FOR Fostering Services REGULATED PROVISION in MEETING THE SUFFICIENCY DUTY: LOOKED AFTER CHILDREN [Section 6 of the SSWA]
<p>Challenges:</p> <ul style="list-style-type: none"> • Workforce – recruitment, retention, age profile of workforce, costs • The cost of living crisis could impact the numbers of looked after children and therefore hamper the projection of decrease in demand • Impact of Unaccompanied Asylum Seeking Children (UASC) on LA's resources including placements and support available • Impact of unplanned arrivals to the Port of Holyhead • Placements for children with particular needs including; respite care, young offenders, refugees/immigrants/asylum seekers, young parents, sibling groups and emergency situations • Estimated Wales will need 550 new foster parents every year to meet demand <p>Potential Impact:</p> <ul style="list-style-type: none"> • Most vulnerable children with most complex presentations experiencing instability in placements – moving between placements • Increase in children living outside of their local communities • Cultural needs of UASC failing to be met • Increase in children placed in residential care settings • Increase in homelessness of those young people leaving care <p>Mitigation:</p> <ul style="list-style-type: none"> • Development of Foster Wales to drive recruitment of foster carers nationally • Local drivers for recruitment • Local incentives to recruit and retain foster carers (e.g. Council Tax reductions)

SECTION 6G – SUMMARY OF THE MARKET FOR Fostering Services REGULATED PROVISION

Service Users:

- The number of children cared for by IOACC has plateaued over the last three years. This bucks the trend across the region and Wales as a whole, which have each experienced an upward trajectory

Resources:

- A local decrease in the number of children placed outside of Anglesey
- A local increase in the number of children placed on Anglesey
- Increase in number of children placed with connected persons

Meeting the challenge:

- Development of small group homes project to accommodate those children for whom foster placements are not identified, on the island
- Focus upon national and local recruitment via Foster Wales
- No detriment policy introduced to encourage applications for special guardianship orders so children no longer need to be in state care.

CHAPTER 7 – TYPE OF REGULATED PROVISION: Adult Placement ('Shared Lives') Services

SECTION 7A – MARKET SUFFICIENCY

The Shared Lives programme operates across Gwynedd and Anglesey believe that people should be able to lead the lives that they want, whilst they receive the support they require in the home of their choice.

The Shared Lives Scheme helps to arrange to have short breaks or long term placements for people with additional support needs in the homes of carefully selected people called Shared Lives Enablers. The support provided is flexible and tailored to the individual's personal needs.

The service concentrates on a family sharing their home, family life, interests, experiences and skills with vulnerable individuals who need support to live as independent as possible.

Shared Lives enablers provide a familial environment that can help someone who needs support to live life to their full potential, to access the community, promote their independence and develop their skills.

Support can be provided through the following placements:

- Long term
- Short term
- Respite
- Day support

Support is targeted:

- adults with learning difficulties
- adults with mental health problems
- adults with physical disabilities
- adults with sensory impairment

SECTION 7B – MARKET STABILITY

The Shared Lives project was first set up to attract new provision to create respite opportunities for individuals with dementia. Due to limited take up the project was extended to all older people in 2021. However the effect of the pandemic and individuals and carers being restricted in opening up their homes for this kind of respite, take up for the project even after broadening the horizons has been limited and only 2 respite Shared Lives enablers were recruited over the period. Given that the project hasn't had the fair opportunity to develop because of the pandemic. The project has been extended a further 12 months.

Action Taken Due to Provider Failure

There has been no action taken by Isle of Anglesey County Council in relation to provider failure.

SECTION 7C – OTHER MARKET STABILITY FACTORS

Consideration of Market Quality

Adult placement officers sent out questionnaires in September 2021, to the individuals supported through their services in order to assess the quality of their outcomes and gain feedback.

Table 26: Survey responses

Category	No. sent out	Replies received	Reply rate (%)
Individuals	33	9	27%
Enablers	32	9	28%
Families of individuals	6	2	33%
Professional workers	15	3	20%

From feedback received, it appears that IoACC Shared Lives staff listen to the voice of the individual and that IoACC Shared Lives staff meet their needs and ensure their well-being. The development in their personal objectives is central to the service and IoACC Shared Lives staff ensure that they build on this regularly. IoACC Shared Lives staff reviewed and monitored placements and have adapted the Person Centred Plan forms to gather information on the results the individuals managed to achieve during Covid. The relationship between the Scheme, the enablers on individuals has strengthened over the last few months as everyone has been supporting each other in many different ways to ensure that the welfare of the individuals is central in everything IoACC Shared Lives staff do.

Current and Projected Trends

The Wales Audit Office (2018) estimate that local councils in Wales will need to 'increase investment in accommodation by £365 million in the next twenty years to address both a growth in the number of people with learning disabilities who will need housing, and the increase in the number with moderate or severe needs'. This figure includes increases in costs due to inflation. For North Wales, this will mean we need to plan for between 80 and 190 additional placements by 2035. There should be a range of options and a person-centred approach to planning to find the model of housing and care that is right for the individual. This may include supported housing, extra care housing, shared lives, residential care, home ownership and different types of tenancies.

The Wales Audit Office (2018) estimates that local councils in Wales will need to 'increase investment by £365 million in accommodation in the next twenty years to address both a growth in the number of people with learning disabilities who will need housing, and the increase in the number with moderate or severe needs'. This figure includes increases in costs due to inflation.

For North Wales, this will mean needing to plan for between 80 and 190 additional placements by 2035.

Impact of Commissioning practices on the market
Not applicable
Provision of service in the Welsh Language
<p>There are 11 registered carers on Anglesey of which 5 (45%) can offer the service through the medium of Welsh. Shared Lives Enablers are self-employed and not technically Council employees which makes it difficult to arrange any training to learn Welsh for them.</p> <p>Of the 14 individuals who are part of the Shared Lives Scheme, 2 are Welsh first language.</p>
Sustainability of provision
There are no other providers offering Adult Placements on Ynys Môn.
Risks to market stability
The Adult Placements on Ynys Môn is funded jointly by Gwynedd and Ynys Môn. Therefore, reduction in funding the service is a risk to the stability of the service.

SECTION 7D – NON-REGULATED PROVISION [PREVENTATIVE SERVICES, STEP-DOWN FROM A SECURE PLACEMENT, OR MOVING ON ARRANGEMENTS SUCH AS WHEN I AM READY etc]
Not applicable

SECTION 7E - OTHER CONSIDERATIONS AFFECTING THE MARKET
Social value
Not applicable as the Shared Lives Scheme is not a social enterprise.
Resources
Sufficient at the moment
Direct payments
Not applicable - Adult Placement are paid for directly and not through Direct Payments

Self-funders
Not applicable - There are no self-funders on Ynys Môn currently accessing Adult Placement
Workforce
<p>There are 11 registered carers on Ynys Môn and 26 in whole across Gwynedd and Ynys Môn. The average ages are: Ynys Môn (58) Gwynedd (63) Average for both counties (61)</p> <p>Over the last 5 years, 12 have been recruited (8 in Gwynedd, 4 in Ynys Môn). Currently, 6 are being assessed (2 in Ynys Môn, 4 in Gwynedd).</p>
Equality, socio-economic duty and human rights
See Impact Assessment

SECTION 7F – SUMMARY OF THE MARKET FOR **Adult Placement ('Shared Lives') **Services** REGULATED PROVISION**

The Shared Lives Service was established in 2005 across Gwynedd and Ynys Môn and offers opportunities and support for adults over 18 years of age in an enabler's home as a full member of the family. The Service currently consists of 26 enablers, 11 on Ynys Môn, who can provide long term, short term or respite support. Their aim is to support individuals to lead the lives that they want, provide flexible and tailored support to the individuals needs whilst they receive the support that they require in the home of their choice. Enablers within the registered scheme can offer a placement for up to 3 individuals

The Scheme is managed under the Regulation and Inspection of Social Care (Wales) Act 2016. The agreement is managed by Gwynedd and was reviewed and agreed in 2022 following a delay due to COVID-19.

The service remit is to support adults with:

- adults with learning difficulties
- adults with mental health problems
- adults with physical disabilities
- adults with sensory impairment

Diversifying the access to the service is an area for development as this is primarily accessed by adults who have a learning disability.

The positive of the services are that it can allow flexibility as there are no prescribed hours and the support can be as and when the individual requires it. The drawback to this is that there is less monitoring of ensuring individuals receive the level of support required to develop skills and ensure they achieve their outcomes. The Service aims to provide support through an active support and positive behaviour support model but this is something that needs to be reviewed and evidenced during personal reviews as commissioners.

CHAPTER 8 – TYPE OF REGULATED PROVISION: Advocacy Services

SECTION 8A – MARKET SUFFICIENCY

Advocacy means getting support from another person to help someone to express their views and wishes, and help stand up for their rights.

All people are very different from each other. Their needs for support are different, and may change during their life. A variety of advocacy models has been developed to recognise these differences.

All advocacy types are of equal value. What advocacy is used, and when, should depend on what is best suited to the person who seeks it. One type of advocacy is Independent Professional Advocacy which involves a professional, trained advocate working on a one-to-one basis with an individual or with the individual and families to ensure that their voice is heard.

Children and young people

Advocacy is one of the key foundation stones in achieving IoACC's commitment to children's rights, ensuring children and young people can get help when they need it and from people that will listen to them and represent their views.

By law all local authorities in Wales must have advocacy services for children and young people to use and that an Active Offer for advocacy must be made.

When children and young people need services, sometimes an advocate is required to meet with them to explain what these services are. This helps them to understand what is on offer and how the service is able to help them. This is called an Active Offer.

An active offer must be made to:

Children in care.

Young people leaving care.

Children and young people who need extra support.

Councils have a statutory responsibility to provide an independent professional advocacy service for children and young people which complies with all regulations, standards, legislation, directions, code of practice, outcome framework and any amendments or replacements relevant to the service.

This includes but is not limited to:

The Social Services and Wellbeing (Wales) Act 2014.

The Service is an 'advocacy' service for the purpose of paragraph 7(1) of Schedule 1 of the Regulation and Inspection of Social Care (Wales) Act 2016, and is accordingly a regulated service and must comply with the provisions/requirements set out within the Regulated Advocacy Service (Service Providers and Responsible Individuals) (Wales) Regulations 2019.

Independent Professional Advocacy: National Standards and Outcomes Framework for Children and Young People in Wales.

Social Services and Well-being (Wales) Act 2014: Part 10 Code of Practice (Advocacy).

Statutory Guidance relating to Parts 2 to 15 of The Regulated Advocacy Services (Service Providers and Responsible Individuals) (Wales) Regulations 2019.

IoACC currently contracts NNAS and Trosgrwnnal to provide Independent Professional Advocacy for Children and Young people, as part of the Regional service.

During 2020-21, a total of 99 children and young people received Issue Based Advocacy (IBA) which included 211 issues.

For some children and young people there is a statutory duty to provide an active offer of advocacy. The Active Offer involves a designated meeting between a child or young person and an advocate where the advocate is able to explain to the child or young person about their rights – UNCRC and Article 12: explanation of advocacy and the different types of advocacy (not just IPA) and information about relevant support and services. A total of 29 Active Offer referrals were received by the provider during this year

During 2021-22 and 2022/23, IoACC established in a partnership with TGPCYMRU, a pilot Parent Advocacy Service to empower parents to participate in the child protection process and looked after children process from an informed position, speaking for themselves wherever possible, and to promote good communication, and a positive working relationship, between the parents and the Local Authority.

Adults

Local authorities must consider individuals' needs for advocacy support when carrying out various functions involving decisions that will have a significant impact on the person's day to day life, for example:

Assessment of needs for care and support, support for carers and preventative services

Provision of information, advice and assistance Preparing, maintaining or reviewing care and support plans Protecting property of persons cared for away from home Determination of person's ability to pay a charge (This would only appropriate if there was reason to believe that the individual lacked mental capacity in relation to finances.)

Safeguarding and duty to report adults or children at risk.

Promoting integration of care and support with health services Receiving complaints or representations about social services

Consideration for advocacy will always be made if the individual lacks mental capacity in relation to a specific issue and a best interest decision is required. Likewise, if the person has capacity but it is felt that a ruling is required by a court under inherent jurisdiction. In all cases, the advocate can be someone nominated by the individual,, family or friend. Where this is not possible, paid advocacy would be instructed.

Advocacy:

- safeguard individuals who are vulnerable, discriminated against or whom services find difficult to serve
- speaks up on behalf of individuals who are unable to do so for themselves
- empowers individuals who need a stronger voice by enabling them to express their own needs and make their own informed decisions
- enables individuals to gain access to information, explore and understand their options, and to make their views, wishes and feelings known, and
- actively supports people to make informed choices.

IoACC currently contracts North Wales Advocacy Services (NWAS) to carry out our Adult Services advocacy support services. The service data shows that 98 contacts were made in 2020/21.

IoACC funds section 1.2 representative for some individuals. This is the name given by the court to a person who is able to consider whether from the perspective of individuals best interests you agree or do not agree that the Court should authorise the individuals package of care and support resulting in a deprivation of their liberty. This is usually a family member, however in cases where the person has no family an Independent Advocate may be appointed as Rule 1.2 representative.

Under the Deprivation of Liberty Safeguards (DoLS) we also fund paid Relevant Person's Representative (RPR) for some individuals. Where a person lacks the mental capacity to consent to their accommodation care and treatment and are 'deprived of their liberty' in a care homes, that person has a right to have a person to support them to exercise their rights under the Mental Capacity Act. This person is call the Relevant Person's Representative (RPR). The RPR is often a family member or friend of the person. Where there is not an appropriate person to be an RPR for a person, then a paid RPR is appointed and advocates as RPR in this situation. This is known as the Paid Relevant Person's Representative (Paid RPR).

Older people

The Golden Thread Advocacy Programme was funded by Welsh Government for four years from 2016 to 2020 to run alongside and support the implementation of Part 10 (Advocacy) of the Social Services and Well-being (Wales) Act 2014. The programme has now ended, but Age Cymru's commitment to advocacy in Wales continues through the HOPE project.

Anglesey, Gwynedd and Wrexham: North Wales Advice and Advocacy Association (NWAAA) offer advocacy to over 65s

Conwy and Denbighshire: DEWIS Centre for Independent Living offer advocacy to anyone over 65, or any carer.

People living with dementia (all counties): Alzheimer's Society offer support for anyone living with dementia, whether they have capacity or can communicate or not.

Mental Health

People receiving secondary mental health care may need help from an Independent Mental Health Advocate (The Mental Health (Wales) Measure 2010) or an Independent Mental Capacity Advocate. (IMCA, commissioned by the Health Board if required)

IoACC also uses Independent Mental Capacity Advocacy for individuals to act on behalf of individual who lack capacity to make certain decisions. In Wales they are appointed by a local Health Board. They are appointed when there is an assessment in response to a request for a standard authorisation made by the care home/hospital, or a concern about a potentially unauthorised deprivation of liberty. Usually this would be family or friends. If the person has nobody else who is willing and able to represent them or be consulted in the process of working out their best interests, other than paid staff

Advocacy may be required for older people with dementia who have lost contact with all friends and family, or people with learning disabilities or long term mental health problems who have been in residential institutions for long periods and lack outside contacts.

Other people with mental health conditions may want support from another person when expressing their views, or to seek advice regarding decisions that impact them.

The following organisations provide specialist advocacy support for those with mental health needs;

The Conwy and Denbighshire Mental Health Advocacy Service (CADMHAS) (Conwy and Denbighshire)

Advocacy Services North East Wales (ASNEW) (Wrexham and Flintshire) Mental Health Advocacy Scheme (Gwynedd and Anglesey)

Autism

Advocacy for autistic adults, children and their carers ensures that individual rights are met. Advocacy can provide support in a number of ways including seeking a diagnosis, overcoming barriers and accessing services.

Safeguarding and Self-Neglect

Advocacy should always be considered both as part of the s126 enquiry and during the individuals safeguarding journey, if there person lacks mental capacity in relation to their safeguarding outcomes, This would normally be a family member, or friend however, where no appropriate person is appropriate, a paid advocate would be appointed. Likewise, when supporting individuals under the North Wales Self-Neglect Protocol, advocacy should be considered throughout and where no appropriate individual is able to undertake this role, a paid advocate would be commissioned.

SECTION 8B – MARKET STABILITY

Based on the latest data, the Advocacy provision is sufficient and provides quality care and support to meet demand. Trained staff provide quality care and support

Action Taken Due to Provider Failure

As of August 2022, no part of the advocacy service on Anglesey was under the Escalating Concerns process.

SECTION 8C – OTHER MARKET STABILITY FACTORS
--

Consideration of Market Quality
--

Data from the Commissioners Report on the Anglesey Advocacy Service for Q1 2022/23 shows that all advocacy partners said they valued the advocacy input they'd had. The Advocacy Service was able to provide ongoing support despite the issues the clients had.
--

Current and Projected Trends

Data from Q1 2022/23 shows a steady rate of referral for both independent advocacy and Paid RPR (Paid Relevant Persons Representative*). Age ranges are representative with no concerning gaps. Similarly demographics of those referred are broad showing that a range of adults with social care needs in Anglesey are accessing advocacy. Referrals not eligible for IoACC's services are either signposted to an appropriate services or listed as No Further Action. In all cases the referrer is contacted and the reason for not allocating is discussed.
--

*What is a Paid Relevant Persons Representative?

Everyone who has a standard Deprivation of Liberty Safeguard authorisation must have a representative to ensure any conditions are being met; inform the person of their rights and how to exercise those rights.

If there is no unpaid person who can take on this role the Local Authority appoint a Paid Person's Representative from NWAAA and their Paid Representatives are independent from the care home or hospital as well as the Local Authority and Supervisory Body.

Impact of Commissioning practices on the market
--

Young carers

A common need of young carers identified by service providers is advocacy support to have their voices heard.

Specific support for young carers and young adult carers has been commissioned across North Wales from the third sector. WCD / Credu Young Carers is commissioned to provide these services in Wrexham, Denbighshire and Conwy, NEWCIS provide the service in Flintshire and Action for Children provide the service across Gwynedd and Anglesey.

Learning disability

People with a learning disability often have poorer access to health improvement and early treatment services; for example, cancer screening services, diabetes annual reviews, advice on sex and relationships and help with contraception (Harris et al., 2016). The
--

Learning Disability Health Liaison Service in BCUHB work across North Wales to raise awareness and reduce inequalities.

Advocacy is also geared towards wellbeing outcomes. Local authorities have a duty to consider individuals' needs for advocacy when carrying out assessments and care planning. People with a Learning Disability may need support in ensuring that their voices are heard and their rights upheld.

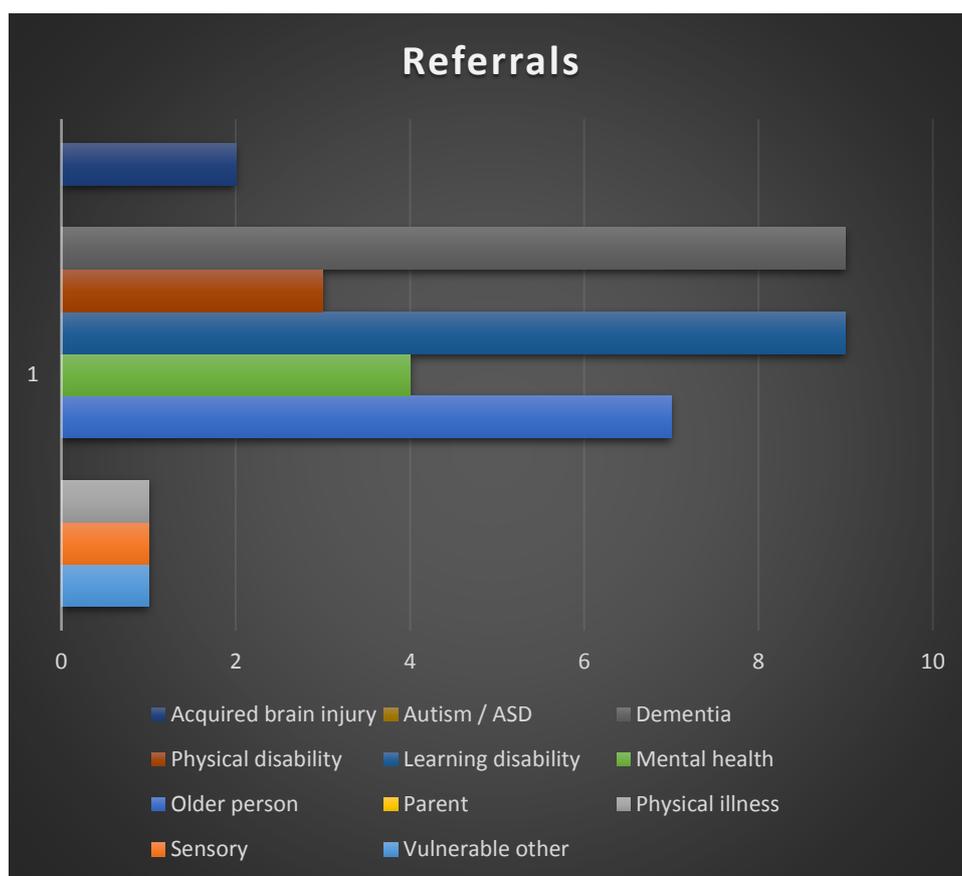

Dewis Centre for Independent Living provide advocacy services for vulnerable adults aged 18 to 64, including people with learning disabilities. Anglesey also commission North Wales Advocacy Association (NWAA).

Provision of service in the Welsh Language

As a service, advocacy is available bilingually for both children and adults.

Sustainability of provision

Referrals to the Advocacy service for Q1 2022/23 show that a range of adults with social care needs on Anglesey are accessing advocacy.

Risks to market stability

Under the Deprivation of Liberty Safeguards (DoLS) IoACC funds paid Relevant Person's Representative (RPR) for some individuals. Where a person lacks the mental capacity to consent to their accommodation care and treatment and are 'deprived of their liberty' in a care home or hospital, that person has a right to have a person to support them to exercise their rights under the Mental Capacity Act. This person is call the Relevant Person's Representative (RPR). The RPR is often a family member or friend of the person. Where there is not an appropriate person to be an RPR for a person, then a paid RPR is appointed and advocates as RPR in this situation. This is known as the Paid Relevant Person's Representative (Paid RPR).

During the Covid-19 pandemic, IoACC staff were able to maintain a full service throughout the period by adapting quickly and supporting staff to work safely. During the pandemic only two staff members contracted Covid-19 but since January 2022, all but one of the Advocacy team have contracted Covid-19 and been on sick leave. Stresses accrued during the pandemic, whether due to pandemic related difficulties at home, or working harder to keep things going for clients, colleagues are now showing signs of strain and needing time off to recoup. This is something that wasn't fully anticipated and staff are now developing a strategy for this.

The Deprivation of Liberty Safeguards (DoLS) is the existing scheme for the assessment and authorisation of deprivations of liberty and were introduced to protect the human rights of those individuals who lack the mental capacity to consent to being deprived of their liberty. Following the Supreme Court judgement in the case of Cheshire West, the UK Government introduced the Mental Capacity (Amendment) Act 2019, with the view to repealing DoLS and replacing it with the Liberty Protection Safeguards (the LPS). Unlike DoLS (which only applied to arrangements in care homes and hospitals and to people aged 18 and above), the LPS will apply in all settings. For the first time, the LPS will extend to people's homes and will also apply to anyone aged 16 and over. It is likely that this will increase the need for advocacy for these potential additional individuals and additional resources could well be needed when LPS comes into force.

SECTION 8D – NON-REGULATED PROVISION [PREVENTATIVE SERVICES, STEP-DOWN FROM A SECURE PLACEMENT, OR MOVING ON ARRANGEMENTS SUCH AS WHEN I AM READY etc]

Not applicable?

SECTION 8E - OTHER CONSIDERATIONS AFFECTING THE MARKET

Social value

Advocacy promotes social value as:

- Advocates can support a person to understand information and options so that the person can make choices that are good for them.

<ul style="list-style-type: none"> • Advocates can support people to make sure that the choices they make are heard by others and respected by others • Advocates can tell people about their rights and entitlements • Advocates can go to meeting with a person to help them take part. Or go to a meeting instead of a person if they cannot go themselves • Advocates can stand up for the rights and entitlements of people who do not have capacity to take part themselves
Resources
IoACC anticipates further pressure on budgets in 2023/24.
Direct payments
<p>The Direct Payments Support Service for the people of Anglesey is provided for people living on Anglesey by the North Wales Advice and Advocacy Association (NWAAA).</p> <p>Direct Payments are a way of paying for care and support needs that gives the person more control. Social Services assess the person's needs, work out how much it would cost to meet those needs, then give the money to the person so they can be in control. This money is called a Direct Payment.</p>
Self-funders
<p>Self-advocacy</p> <p>There have been ups and downs with the Roaring Mon's group this quarter. Whilst there is a lot of enthusiasm for self-advocacy from members, there has been difficulty in guaranteeing they regularly attend the meetings arranged. NWAAA have adapted its approach by speaking with individuals one-to-one about their role in different pieces of work so that they can buy-in. This has been partially successful in increasing attendance at group meetings. One of these one-to-one pieces has been about continuing with the healthy diet promotion project. The member and facilitator have worked together on developing topics and info sheets to shape drop-in or presentations which they plan to deliver in Anglesey. The background work is being progressed, but it has been difficult to pin down delivery opportunities. Similarly we were unable to persuade any of the Roaring Mon members to attend the AWPf national conference held in Deganwy in June. There were a range of hitches from already having plans, to not wanting to pay for an overnight stay. NWAAA have a strategy to increase membership which will ease some of the problems with non-attendance, however we ideally want the members themselves to be part of this awareness raising and recruitment. On a more positive note, the regional representative for the Roaring Mon's has been attending the regional partnership meetings- now re-branded as The North Wales Flyers, where she has helped shape the way the group will be working, and their priorities for this year.</p>
Workforce
Post pandemic, the recruitment and retention of staff remains an issue with the staff turnover rate in Social Services having increased in 2021/22.

There is an increasing demand for services, but budgets along with inflationary pressures are struggling to keep up with this demand.

Below is a table showing the staff turnover within the Adults and Childrens Services of Social Services compared to the average for the Authority:

Table 27: Staff turnover

Service	Staff turnover					Average
	2017-18	2018-19	2019-20	2020-21	2021-22	
Adults	6%	12%	10%	8%	14%	10%
Childrens	18%	10%	11%	6%	15%	12%
Authority Average	11%	11%	9%	6%	10%	9%

In general, staff turnover has been higher within the Children's section than within the Adults section but the average for both sections are higher than the average for the Authority. The staff turnover rate decreased in 2019/20 and 2020/21 which may be due to the pandemic. However in 2021/22, the staff turnover rate increased in both sections which in turn likely contributed to the increased staff turnover rate for the Authority.

The comparatively high staff turnover rate for 2021/22 may be due to staff deciding to move on after the pandemic and may be indicative of a problem with staff retention.

Equality, socio-economic duty and human rights

See Impact Assessment

SECTION 8F – SUMMARY OF THE MARKET FOR **Advocacy Services** REGULATED PROVISION

1. When Liberty Protection Safeguards (LPS), it is likely that this will increase the need for advocacy for these potential additional individuals and additional resources could well be needed when LPS comes into force.
2. Workforce – the age profile of the Social Services workforce is increasing and staff turnover has also increased post pandemic.
3. Recruitment and retention of social care workers is difficult and especially the recruitment of specialist workers e.g. Occupational Therapists – this is a national problem.

CHAPTER 9 – TYPE OF REGULATED PROVISION: Domiciliary Care Support Services

SECTION 9A – MARKET SUFFICIENCY

Market balance

In terms of the balance of the market, on average more than 80% of the North Wales domiciliary care market is comprised of independent sector providers with the remainder being a mixture Local Authority and Third Sector providers. However, this does vary considerably according to local authority as shown in the table below:

Table 28: Percentage market estimated share of domiciliary care sector by type

County	In House	Independent sector
Anglesey	18.5	81.5
Gwynedd	44	56.0
Conwy	9.7	90.3
Denbighshire	10	90.0
Flintshire	10.5	89.5
Wrexham	3	97
North Wales	16	84

The split for **Anglesey** at 18.5% : 81.5% is closer to the regional average split of 16% : 84%. However, in Gwynedd, 44% of domiciliary care is provided internally currently and 56% is provided through the independent sector.

It was recommended that the in-house/external provider (independent sector and third sector) split be 30/70%. In recent years, Anglesey has provided 15-25% of the domiciliary care market in house.

Market overview

The average number of hours of domiciliary care per week commissioned by the local authority is compared with regional average in the table below. For Anglesey and the other North Wales local authorities, the total of commissioned domiciliary care hours per week is proportional to the population of the county:

Table 29: Average commissioned domiciliary care hours per week

Average commissioned domiciliary care hours per week	Older person	Learning disability	Older person mental health	Physical disability	Total	Percentage of total hours
Anglesey	3,644	390	-	582	4,616	9%
North Wales	5,829	1,866	533	899	8,562	-

In terms of hours of commissioned domiciliary care hours each week, it should be similar to the population. The hours of commissioned domiciliary care hours each week is 9% of the total for the North Wales local authorities and Anglesey's population is 10% of the North Wales total.

Providers

The domiciliary care provided on Anglesey is provided by 3 main providers who work on a patch basis regionally (Abacare, Carelink, Plas Garnedd (consortium))

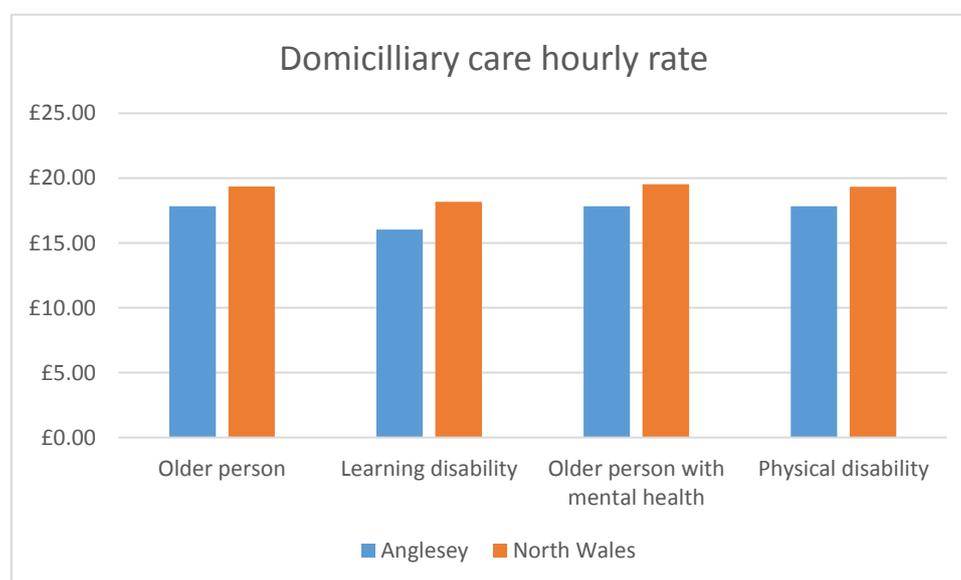

Market rates

The average hourly rate of domiciliary care for Anglesey for the population groups specified in the table below is less than the average for the North Wales region:

Table 30: Average hourly rate of domiciliary care by population group (£)

Area	Older person	Learning disability	Older person with mental health	Physical disability
Anglesey	£17.83	£16.04	£17.83	£17.83
North Wales	£19.35	£18.17	£19.53	£19.34
Difference	-£1.52	-£2.13	-£1.70	-£1.51
%age	-8%	-12%	-9%	-8%

This is shown in graphical form below:

Isle of Anglesey market overview

In common with other areas, demand for services is currently exceeding supply (March 2022) due to shortage of domiciliary care providers, both external and internal.

Regional market overview

Domiciliary care is a priority market identified by commissioners, with current independent and 3rd sector providers struggling to fulfil the demand for a significant amount of time now. As such, growth and development of services including general domiciliary care (includes homecare, reablement; community living and recovery) have been identified as opportunities for the future.

SECTION 9B – MARKET STABILITY

Market stability

Isle of Anglesey market stability

Post pandemic, the recruitment and retention of staff remains an issue with the staff turnover rate in Social Services having increased during 2021/22.

There is an increasing demand for services, but budgets along with inflationary pressures are struggling to keep up with this demand.

Below is a table showing the staff turnover within the Adults and Childrens Services of Social Services compared to the average for the Authority:

Table 31: Staff turnover

Service	Staff turnover					Average
	2017-18	2018-19	2019-20	2020-21	2021-22	
Adults	6%	12%	10%	8%	14%	10%
Childrens	18%	10%	11%	6%	15%	12%
Authority Average	11%	11%	9%	6%	10%	9%

In general, staff turnover has been higher within the Children's section than within the Adults section but the average for both sections are higher than the average for the Authority. The staff turnover rate decreased in 2019/20 and 2020/21 which may be due to the pandemic. However in 2021/22, the staff turnover rate increased in both sections which in turn likely influenced turnover rate for the Authority.

The comparatively high staff turnover rate for 2021/22 may be due to staff deciding to move on after the pandemic and may be indicative of a problem with staff retention.

Regional challenges

A gap in services exists in relation to short home calls for support with medication. Neither health nor social care services provide calls only for medication, but older people with memory problems do need this vital care (Regional Partnership Board, 2022).

The current economic situation with rising inflation and fuel costs, and wider cost of living pressures are creating instability and uncertainty for domiciliary care providers and some staff potentially facing in-work poverty.

Decreasing budgets could present further challenges around the level of services which can be commissioned and provided. Across North Wales, providers have appreciated the

support funding throughout the COVID-19 pandemic. For example, an additional £1m for domiciliary care helped provide stability during the pandemic. There is concern over the impact the end of the financial support will have.

Action Taken Due to Provider Failure

Not applicable

SECTION 9C – OTHER MARKET STABILITY FACTORS

Consideration of Market Quality

Consideration of market quality

As of August 2022, no residential / nursing home on Anglesey or any Domiciliary Care provider is under the Escalating Concerns process.

Current and Projected Trends

Newly released Census figures from 2021 released in June 2022 show Anglesey's general population has fallen by 1.2% in 2011 to 68,900 in 2021. However, the total population of Wales grew by 1.4%, increasing by 44,000 to 3,107,500.

Significantly Anglesey has also seen an increase of 16.3% in people aged 65 years and over, a decrease of 7.9% in people aged 15 to 64 years, and an increase of 0.1% in children aged under 15 years. These new Census figures confirm that the island's age profile has changed. Ynys Môn has an ageing population and this will have an impact on IoACC's services over the coming years, especially health and social care as IoACC will experience an increase in demand and a smaller workforce to support the population.

Table 32: Population

Area	Population	Population over 65		Population over 85	
	(June 2022)	Number	%	Number	%
Ynys Môn	68,900	18,200	26.4%	2,200	3.2%
Gwynedd	117,400	27,300	23.3%	3,800	3.2%
Conwy	114,800	31,400	27.4%	4,500	3.9%
Denbighshire	95,800	23,800	24.8%	3,000	3.1%
Flintshire	155,000	33,200	21.4%	3,800	2.5%
Wrexham	135,100	27,300	20.2%	3,300	2.4%
North Wales	687,000	161,201	23.5%	20,600	3.0%
Wales	3,107,500	662,000	21.3%	82,500	2.7%

The percentage of the population who are over 65 is higher for Anglesey (26.4%) compared to both the average for North Wales (23.5%) and Wales (21.3%). The table also shows that the percentage of over 65s and over 85s is higher in the western counties (Anglesey, Gwynedd and Conwy – 25.5% and 3.5%) compared to the counties in North East Wales (Denbighshire, Flintshire and Wrexham – 21.8% and 2.6%).

It is people over 85 who tend to require the highest service input from the Local Authority and if these residents of Anglesey do not have family support living locally, it tends to mean the Council has to provide more service input. As the island's population gets older and younger people of working age move away, there will be a decrease in those of working age available to provide the services for the Council.

A change in the number and age profile of Anglesey's population, compared to the rest of Wales, may impact on the financial resources the Council receives directly from Welsh Government to fund its services. The Council Plan for 2022-27 will play a vital role in determining our aims and objectives and look towards future service delivery priorities.

Impact of Commissioning practices on the market

Impact of commissioning practices on the market

The Integrated Care Fund and Transformation Funding now referred to as Regional Investment Fund's (RIF) five-year programme is welcomed but we continue to work through the guidance and impact of the changes. Due to the value of this funding, it is critical that any changes in criteria are articulated with ample notice so local authorities and other partners can consider and plan services with this in mind.

Where there has been a need to commission directly with a provider, current procurement practice has often been a barrier to facilitate some rapid change. Procurement processes have proved onerous and unattractive to certain providers, particularly in the third sector, which then hinders the number of suppliers submitting tender applications and flexibility within the market.

The Contracts and Commissioning Teams in each Local Authority and the Health Board have facilitated regular meetings with residential care, domiciliary care and Supported Living providers. Whilst these meetings existed before the pandemic, their frequency has now increased. The support and networking became a vital resource for providers during period of change and uncertainty. The meetings were also attended by colleagues from the Environmental Health Team, Health and Safety Officers and BCUHB officers so partners could advise and support when needed and arrangements have persisted beyond the pandemic at a lower level.

The commissioning team have also had regular contact with providers to collect data, enquire about PPE supplies, and discuss any arising issues or just to be there to listen and support in this difficult time.

Provision of service in the Welsh Language

Provision of service in the Welsh language

Information from the Population Needs Assessment (2022) detailed that many care homes and domiciliary care providers find it difficult to fully implement expectations with the provision of a Welsh speaker. More needs to be done to attract Welsh speakers to the profession and to support staff to improve their Welsh. This needs to include opportunities for both complete beginners and those who need to gain confidence. Many organisations provide Welsh language training to their staff, either formally or informally. Examples include:

Courses offered by the local council or health board. Lunchtime Welsh language groups.

Welsh speaking staff delivering workshops to their non-Welsh speaking peers.

In the Provider Survey (February 2022) providers note that it is a challenge to recruit Welsh speakers within their setting, help and support to advertise/translate would be helpful moving forward for smaller companies.

Providers are actively trying to increase their use of the Welsh language, but difficult to sustain any learning when not using it frequently enough (on a personal level as well as for the organisation).

The Welsh language skills of Anglesey's Social Services workforce were analysed in 2022 and the results were as follows:

Adults

Number of staff in the service: 422

Number of returns 422

Percentage returns: 100%

Table 33

Level	L0	L1	L2	L3	L4	L5
Number	19	41	31	20	57	254
Percentage	5%	10%	7%	5%	14%	60%

Table 34

Childrens

Number of staff in the service: 238

Number of returns: 238

Percentage returns: 100%

Table 35

Level	L0	L1	L2	L3	L4	L5
Number	8	6	14	12	52	146
Percentage	3%	3%	6%	5%	22%	61%

A total of 74% of the staff in the Adults section speak Welsh to at least level 4 (Able to speak the language in the majority of situations using some Welsh / English words). In the Childrens section the corresponding percentage was 83%.

Sustainability of provision
<p>Sustainability of provision</p> <p>The domiciliary care provided on Anglesey is provided by 3 main providers who work on a patch basis regionally (Abacare, Carelink, Plas Garnedd consortium)). The important characteristics of patch commissioning are security, consistency and reliability.</p>
Risks to market stability
<p>Risks to market stability</p> <p>Both in-house and independent care providers continue to have significant staff vacancies as existing carers vacate the care sector for a variety of reasons. This is of concern with regard to market stability, and particularly the ability to deliver care particularly in the more rural areas which are harder to reach.</p> <p>Whilst Welsh Government. have made provision for the delivery of the Real Living Wage to direct care workers, this will have an impact on pay compression and ability to recruit / provide career progression to more senior roles. This may have an impact on market stability as the next financial year unfolds.</p> <p>Business costs, outside of wages are also increasing with inflation escalating and fuel costs in particular increasing significantly. For domiciliary care this has a significant impact on the attractiveness of the role and the financial viability of existing business models.</p>

SECTION 9D – NON-REGULATED PROVISION [PREVENTATIVE SERVICES, STEP-DOWN FROM A SECURE PLACEMENT, OR MOVING ON ARRANGEMENTS SUCH AS WHEN I AM READY etc]

Not applicable

SECTION 9E - OTHER CONSIDERATIONS AFFECTING THE MARKET

Social value

The North Wales Population Needs Assessment 2022 notes “Co-production and social value: Delivering services for older people must include the views of the population. Older people should have a voice in shaping services that they may access. The Wales Cooperative Centre has published a paper outlining how services, such as domiciliary care, can be commissioned using an outcomes based approach for provision, which focuses on well-being as well as any immediate need” (Regional Partnership Board, 2022).

Resources
IoACC anticipates further pressure on budgets when it retenders its services during 2023.
Direct payments
<p>Direct payments</p> <p>Ynys Môn County Council's aim is to promote Direct Payment through highlighting a person centred service that reflects voice, choice and control by empowering individuals to be as independent as possible in their own local community.</p> <p>Some benefits of choosing Direct Payments are:</p> <ul style="list-style-type: none"> • Service users are able to choose who delivers their care and support • Service users choose when their care is delivered to suit their everyday life • Direct payments is flexible to meet their individual requirements <p>Ynys Môn is dedicated to developing the service by consulting regularly with its direct payments experts (service users) and to make sure that the service is fit for purpose.</p> <p>IoACC's vision and our way of implementing change has resulted in the increase in service take up and its success resulting in 243 individuals taking control of their care package and choosing to receive support through direct payments on the island compared to 35 individuals in 2015. The subsequent savings were estimated as follows:</p> <ul style="list-style-type: none"> • £5 of every hour commissioned is saved by the local authority. • £2,070,000 expenditure, • £870,000 savings per year when compared to other types of service provision.
Self-funders
There are other private care providers operating on Anglesey but the extent of their provision and value of work is difficult to determine as these arrangements are mostly organised directly without the intervention of local authorities
Workforce
<p>Workforce</p> <p>As outlined in The North Wales Social Care and Community Health Workforce Strategy, the sector is under significant pressure as a result of:</p> <p style="padding-left: 40px;">Changes to legislation as a result of the Regulation & Inspection of Social Care (Wales) Act 2016 (RISCA)</p> <p style="padding-left: 40px;">A new qualification framework</p> <p style="padding-left: 40px;">Competitive pay structures with other sectors Competition from other sectors</p> <p>There is an urgent priority around ensuring a sufficient workforce is in place for the delivery of social services and social care functions. The recruitment and retention of Social</p>

Workers, Occupational Therapists and direct care workers has become a particular challenge across North Wales.

The North Wales Social Care and Community Health Workforce is in a time of unprecedented change whereby they are required to deliver services differently with a focus on prevention, protection, intervention, partnership and integrated working, coproduction and empowerment; requiring a different emphasis on workforce skills and training.

Much has been written on the issues surrounding recruitment and selection in the Domiciliary Care workforce. In March 2016, WG published a research report on the 'Factors that affect the recruitment and retention of domiciliary care workers and the extent to which these factors impact upon the quality of domiciliary care' (Atkinson, Crozier and Lewis, 2016). The research, undertaken by Manchester Metropolitan University sought to identify factors that influence whether people choose to 'become and remain working as domiciliary care workers'.

There are approximately 17,000 domiciliary care staff employed by commissioned care providers in Wales (Social Care Wales, 2018a). WG's consultation in to the Domiciliary Workforce (Welsh Government, 2016) recommends that those working in the sector are recognised as the skilled professionals they are. The negative image of the sector must be challenged to encourage people to join the social care workforce.

The key factors highlighted by this consultation included:

Low wages

- Work pressures
- Unsociable hours

Poor terms and conditions

- 'Zero hours' or 'non-guaranteed hours' contracts deterring people from joining the sector, as there were no guaranteed hours

- Some call times not enough to address the needs of the individual Lack of training and career development opportunities

Seen as a low status job compared to healthcare

Local Authorities have extended their Care First and other Employee Assistance Programmes to the external [non local authority] workforce. Care First/Employ Assistance Programmes provide confidential, impartial advice and support 24 hours a day, 365 days a year, online or via the free-phone telephone number. The service is free for all employees to access whenever they need it.

The care provided by domiciliary carers for those with mental health needs could be improved by ensuring staff are encouraged to work in the field where they have most talent. Those working with people living with dementia require specialist training and extra time to complete tasks. There is a lack of dementia trained care workers, which should be addressed by the local authorities. Commissioners are keen to ensure the agencies they employ to provide dementia care are fulfilling their obligations and following care plans carefully. The profile of the profession needs to be raised to attract a high calibre of staff. (Regional Partnership Board, 2022).

IoACC workforce

Below is a table showing the staff turnover within the Adults and Childrens Services of Social Services compared to the average for the Authority:

Table 36

Service	Staff turnover					Average
	2017-18	2018-19	2019-20	2020-21	2021-22	
Adults	6%	12%	10%	8%	14%	10%
Childrens	18%	10%	11%	6%	15%	12%
Authority Average	11%	11%	9%	6%	10%	9%

In general, staff turnover has been higher within the Children's section than within the Adults section but the average for both sections are higher than the average for the Authority. The staff turnover rate decreased in 2019/20 and 2020/21 which may be due to the pandemic. However in 2021/22, the staff turnover rate increased in both sections which in turn likely contributed to the increased staff turnover rate for the Authority.

The comparatively high staff turnover rate for 2021/22 may be due to staff deciding to move on after the pandemic and may be indicative of a problem with staff retention.

Age profile

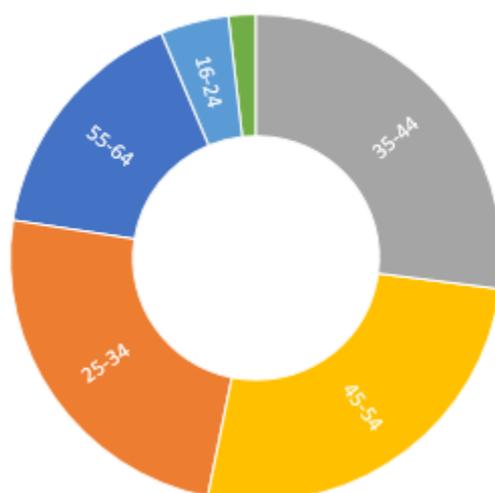

Below is a table of IoACC's Social Services staff:

Table 37

Service	16-24	25-34	35-44	45-54	55-64	65+	No. of staff 31.03.22
Adults	5	27	30	29	18	2	111
%	5%	24%	27%	26%	16%	2%	
Provider	14	49	43	82	138	27	353
%	4%	14%	12%	23%	39%	8%	
Children's	32	79	52	56	29	3	251
%	13%	31%	21%	22%	12%	1%	

The age profile of the Adults Services staff shows that 77% of staff are between 35 and 64 years of age. This can be seen from the sunburst chart below:

Adults Service

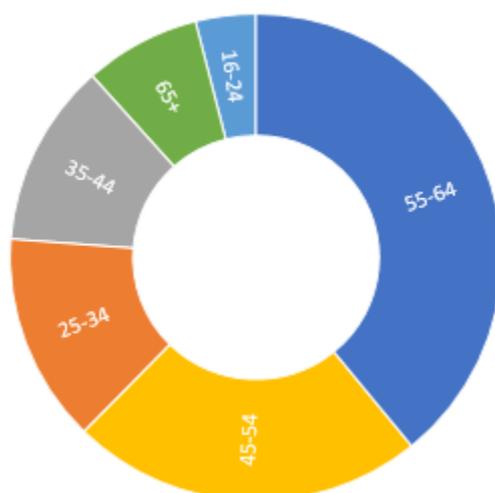

The average age of staff in the Adults service is 45 years of age.

Provider Service

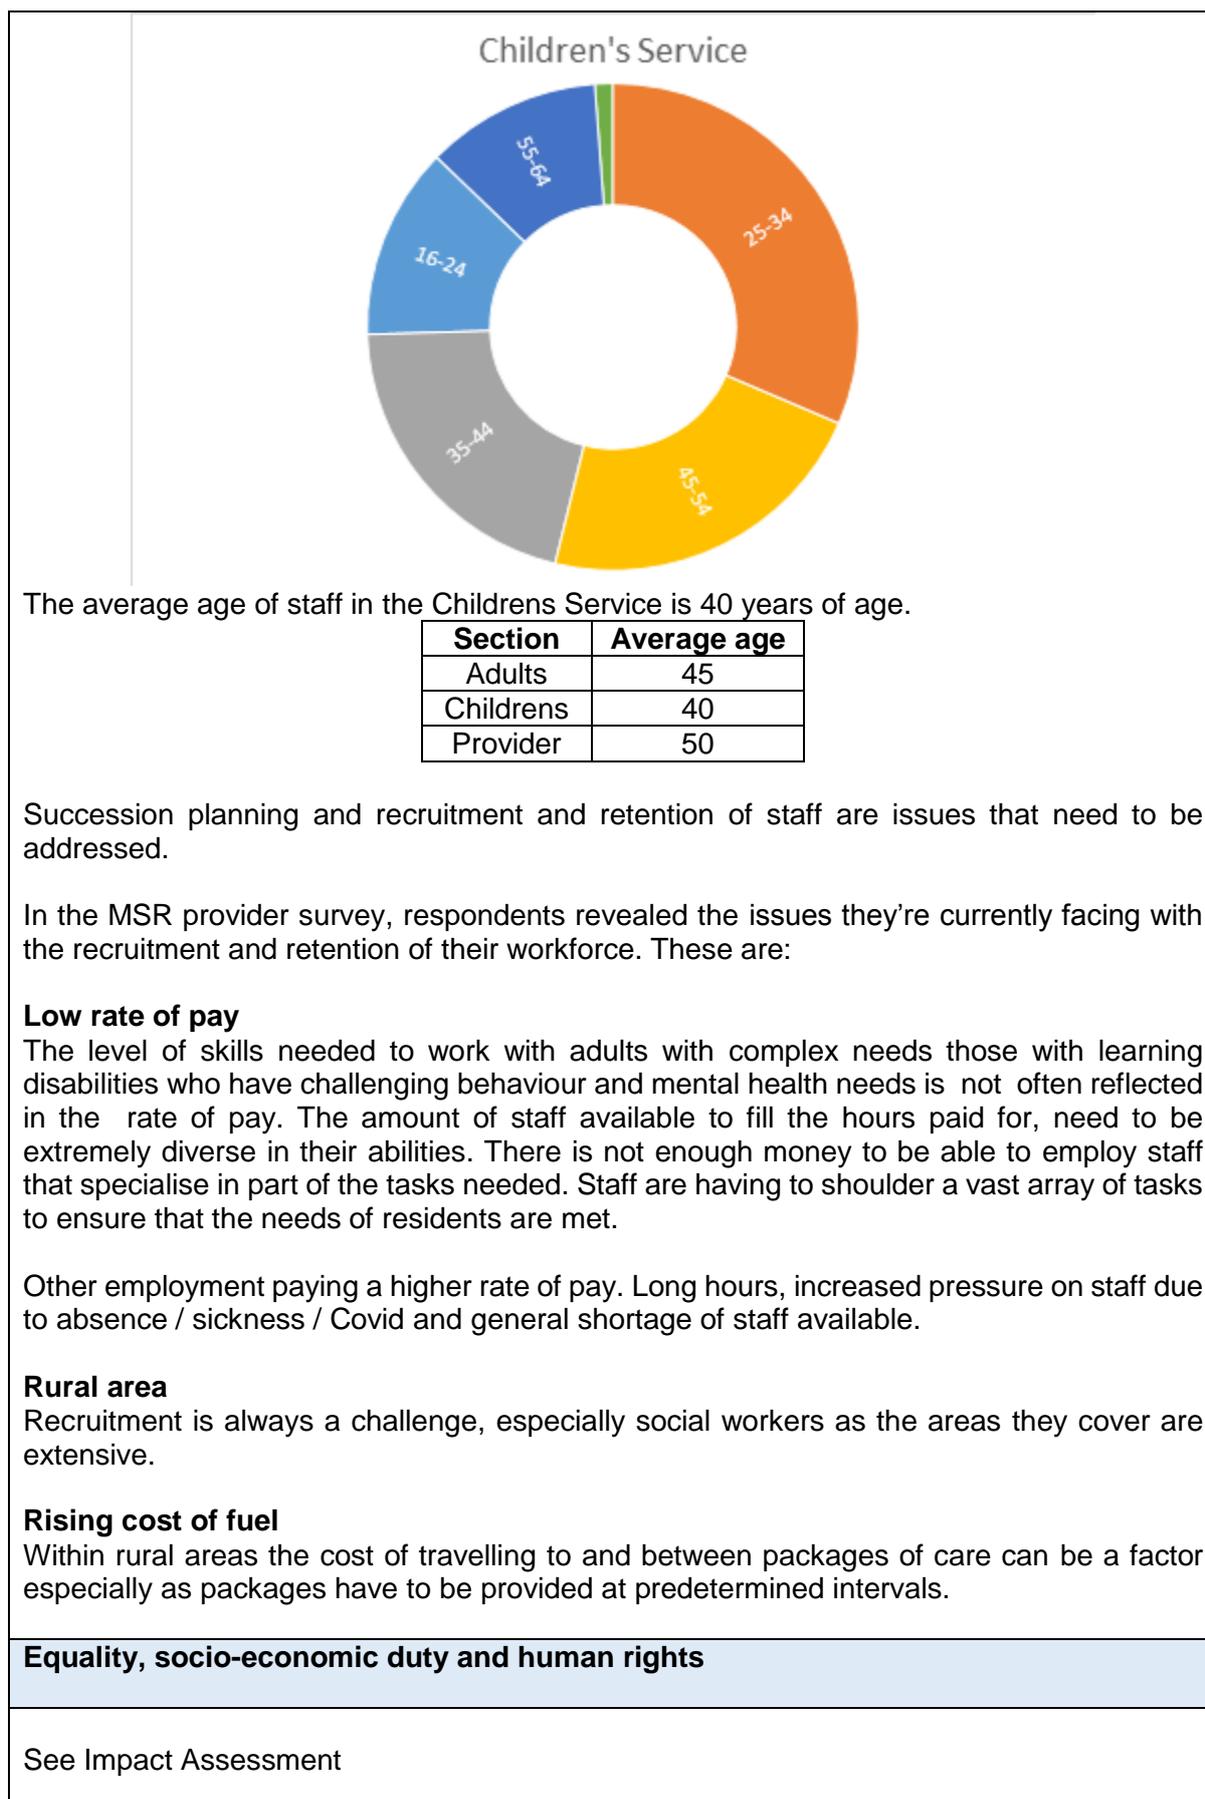

However, the age profile of the Provider Service staff is different with almost half the staff (47%) being 55 years of age or over. A total of 39% of staff are aged between 55 and 64. This could lead to staff shortages in the near future when the members of staff in the 55-64 age group retire

Provider Service

Childrens

The age profile of the Childrens Service staff is somewhat younger than the Provider Service staff. Almost two thirds off the staff (65%) are aged between 16 and 44.

SECTION 9F – SUMMARY OF THE MARKET FOR Domiciliary Care Support Services REGULATED PROVISION

- In Anglesey, demand is currently exceeding supply (March 2022) due to shortage of staff within domiciliary care providers and inability to attract new staff in sufficient numbers.
- As shown by figures from the 2021 Census, the over 65 population is increasing significantly as is the over 85 population. This will in turn likely lead to additional demands and resources being required to provide these services.
- Workforce – The age profile of the workforce is increasing and staff turnover has also increased post pandemic.

ISLE OF ANGLESEY COUNTY COUNCIL Scrutiny Report Template	
Committee:	Partnership and Regeneration Scrutiny Committee
Date:	19 th September, 2022
Subject:	Education Scrutiny Panel
Purpose of Report:	Provide an update on progress of the Education Scrutiny Panel
Scrutiny Chair:	Cllr. Dylan Rees
Portfolio Holder(s):	Cllr. Ieuan Williams
Head of Service:	Rhys H Hughes, Deputy Chief Executive Marc Berw Hughes, Director of Education, Skills and Young People
Report Author:	Anwen Davies, Scrutiny Manager
Tel:	01248 752578
Email:	AnwenDavies@ynysmon.llyw.cymru
Local Members:	n/a

1 - Recommendation/s

The Partnership and Regeneration Scrutiny Committee is requested to :
R1 Note the initial progress to date regarding the work of the Education Scrutiny Panel.

2 – Link to Council Plan / Other Corporate Priorities

Direct link to the Council Plan / transformation priorities. The Council's Plan includes an ambition to work with the people of Anglesey, their communities and with partners to ensure provision of the best possible services that will improve the quality of life for everyone across the Island. One of the Plan's 3 aims is to "create conditions that will enable everyone to fulfil their full potential." The work of the Panel is crucial in supporting schools and the Council in achieving that objective.

3 – Guiding Principles for Scrutiny Members

To assist Members when scrutinising the topic:-

- 3.1** Impact the matter has on individuals and communities [**focus on customer/citizen**]
- 3.2** A look at the efficiency & effectiveness of any proposed change – both financially and in terms of quality [**focus on value**]
- 3.3** A look at any risks [**focus on risk**]
- 3.4** Scrutiny taking a performance monitoring or quality assurance role [**focus on performance & quality**]
- 3.5** Looking at plans and proposals from a perspective of:
 - Long term
 - Prevention

- Integration
 - Collaboration
 - Involvement
- [focus on wellbeing]**

4 - Key Scrutiny Questions

At the Panel's request:

1. To what extent is the Scrutiny Committee satisfied with initial direction of the Panel's work?
2. What suggestions does the Committee have to further strengthen the Panel's work?
3. What other areas does the Panel need to scrutinise?

5 – Background / Context

1. CONTEXT

Members will be aware that scrutiny has developed during the previous Administration through the work of 3 scrutiny panels. The new Administration¹ has confirmed that the structure of the scrutiny panels for the current Council will be as follows:

- Social Services/ Corporate Parenting Scrutiny Panel
- Finance Scrutiny Panel
- **Education Scrutiny Panel.**

The Panel's Governance Arrangements

The Panel's terms of reference has been confirmed by the Scrutiny Committee² to create the conditions that will allow the Panel to broaden the scope of its work with the following key benefits:

- i. Develop a model of working in Education which focuses on a smaller group to enable Members to be more involved, to develop a level of subject expertise and to encourage good attendance and teamwork
- ii. Further strengthen the capacity of Members to challenge performance by improving the quality of their general information and also their understanding of schools' performance data
- iii. Forum to discuss information around Service risks as a basis to inform the forward work programme of the Partnership and Regeneration Scrutiny Committee
- iv. Forum to develop a group of Members with the expertise and ownership to lead discussions on Education matters in the Partnership and Regeneration Scrutiny Committee.

Members will be aware of the robust governance arrangements in place to underpin the work of the Panel³ and it is intended to continue to hold monthly meetings of the Panel in the future. Furthermore, a process has been established for Cllr Gwilym Owen Jones,

¹ Meeting of the Partnership and Regeneration Scrutiny Committee held on 21st June, 2022

² Partnership and Regeneration Scrutiny Committee, 21st June, 2022

³ Meeting of the Partnership and Regeneration Scrutiny Committee held on 20th April and 27th June 2017

Panel chair to report progress on a quarterly basis to the Partnership and Regeneration Scrutiny Committee.

Membership of the Panel:

Councillor	Scrutiny Committee
Gwilym O Jones (Chair of the Panel)	Partnership and Regeneration Scrutiny Committee
Margaret M Roberts (Vice-Chair of the Panel)	
Non Dafydd	
Derek Owen	
Arfon Wyn	Corporate Scrutiny Committee
Dyfed Wyn Jones	
Alwen Watkin	
Keith Roberts	

In terms of local context, it is noted that 2/3 of the membership of the Education Scrutiny Committee comprises of Members newly elected in May of this year⁴. It will therefore be necessary for the Council to create the conditions for all Members to fully take part in the Panel's scrutiny work eg skills for effective scrutiny, effective questioning, understanding of the Education system, raise awareness of national education work streams etc. It is therefore the intention to make full use of the forward work programme to ensure appropriate and timely inputs to support members of the Education Scrutiny Panel.

2. FOCUS OF WORK OF THE EDUCATION SCRUTINY PANEL

This is the Education Scrutiny Panel's first progress report and covers quarter 1 of the current administrative year.

The Panel⁵ met once during this period and the following matters were considered:

2.1 The Panel's terms of reference and the context of its work

The terms of reference was considered in detail noting that education accountability and Member scrutiny of the broader education system is critically important. Reference was also made to the expectations of Estyn, namely – that Members have a comprehensive knowledge and understanding of the education provision to enable them to discharge their responsibilities effectively:

- **Standards** – challenge performance in order to raise standards around education attainment
- **Quality** – an understanding of the breadth and quality of education provision
- **Leadership** – understanding of the effectiveness of education leadership at all levels in the County.

The clarity of role of the Education Scrutiny Panel was also noted:

⁴ Local Government Elections May, 2022

⁵ Education Scrutiny Committee held on 14 July, 2022

- i. Monitor and scrutinise – standards, performance, progress and distance travelled
- ii. Understanding → the breadth and quality of education provision; education leadership at all levels
- iii. Ensure that the voice of learners is heard
- iv. Provide assurance to the Partnership and Regeneration Scrutiny Committee.

2.2 Forward Work Programme of the Scrutiny Panel for the period July → December, 2022

There were discussions regarding the need for a robust forward work programme supporting the Panel's contribution to the governance arrangements of the Council. It was noted that the next meeting of the Scrutiny Panel⁶ will focus on the Estyn inspection report on the Education Authority (June, 2022) and the post inspection action plan.

6. MATTER TO BE ESCALATED TO THE PARENT COMMITTEE FOR CONSIDERATION

None to be escalated by the Panel.

6 – Equality Impact Assessment [including impacts on the Welsh Language]

n/a

7 – Financial Implications

n/a

ISLE OF ANGLESEY COUNTY COUNCIL <u>Scrutiny Report Template</u>	
Committee:	Partnership and Regeneration Scrutiny Committee
Date:	26 September 2022
Subject:	Annual Report of the Anglesey and Gwynedd Public Service Board
Purpose of the report	To review the Annual Report of the Anglesey and Gwynedd Public Service Board including an update on the work of the sub-groups
Scrutiny Chair:	Cllr Dylan Rees
Portfolio Member(s):	Cllr Llinos Medi
Head of Service:	Dylan Williams, Chief Executive
Author of the Report: Telephone Number: E-mail:	Sandra Thomas, Gwynedd and Anglesey Public Services Board Programme Manager 01286 679906 sandrallynnethomas@gwynedd.llyw.cymru
Local Members:	Not relevant to any specific ward

1 - Recommendation(s)

The Scrutiny Committee is requested to note and offer observations on the Annual Report and on the progress against the current Well-being Plan (2018 - 2023). For information, as a statutory consultee, this Autumn the Scrutiny Committee will have an opportunity to validate and scrutinise the new Well-being Plan which is to be published in May 2023.

2 - Link to the Council's Plan / Other Corporate Priorities

Isle of Anglesey County Council is committed to the principles within the Well-being of Future Generations (Wales) Act 2015. The Council provides a range of services which will fulfil its individual well-being objectives, as well as contributing to supporting the well-being objectives of the Public Services Board.

3 - Principles as a Guide for Scrutiny

To assist Members when scrutinising the subject:-

- 3.1** Impact the matter has on individuals and communities [focus on the customer/citizen]
- 3.2** Look at efficiency and the effectiveness of any proposed change - financially and in terms of quality [focus on value]
- 3.3** Look at any risks [focus on risks]
- 3.4** Scrutiny taking a performance monitoring or quality assurance role [focus on performance and quality]
- 3.5** Look at plans and proposals in terms of:
 - Long term

- Prevention
- Integration
- Collaboration
- Inclusion

[focus on wellbeing]

3.6 Potential impact this decision would have on:

- the groups protected under the Equality Act 2010
- those who experience socio-economic disadvantage in their lives (when making strategic decisions)
- opportunities for people to use the Welsh language and not treat the Welsh language less favourably than English

[focus on equality and the Welsh language]

4- Key Scrutiny Questions

1. What main successes can be evidenced during 2021/22?
2. The current Anglesey and Gwynedd Well-being Plan is coming to an end. What lessons have been noted about the process for setting the next Well-being Plan?
3. To what extent will it be necessary to look again at the priority areas for the next period?

5 - Background / Context

5.1 Introduction and context

5.1.1 The [Well-being of Future Generations \(Wales\) Act 2015](#) places a duty on public bodies to improve the social, economic, environmental and cultural well-being of Wales. The act is based on the principle of sustainable development and places a duty on public bodies to set and publish well-being objectives and to take all reasonable steps to achieve those objectives. The Act also established Public Service Boards with representation from key public bodies. Every five years the Public Services Boards must prepare and publish an assessment of the state of economic, social, environmental and cultural wellbeing in their areas and use this as the basis of the Wellbeing Plan for the following five years.

5.1.2 We are now in the final year of the 2017 -22 Wellbeing Plan for Gwynedd and Anglesey in which the Board had prioritised six areas:

- The Welsh language;
- Homes for local people;
- The effect of poverty on the well-being of our communities;
- The impact of climate change on the well-being of communities;
- Health and care of adults and
- The welfare and achievement of children and young people.

5.1.3 Over the five years the Board has adjusted its approach to both The homes for local people and The effect of poverty on our communities priorities to account for work being undertaken elsewhere. Since a number of the Board's members were already working together to respond to these matters it was agreed that the role of the Board would therefore be to maintain an overview of the work and seek assurance that we as public bodies are responding appropriately.

5.1.4 To address the remaining priorities, the Board currently has three operational sub-groups:

- Climate Change
- Integrated Health and Social Care
- The Welsh Language

5.1.5 During 2021/22 we completed the process of revising the Wellbeing Assessments. These are undertaken for 13 different areas – 8 areas for Gwynedd and 5 for Anglesey and will inform one Wellbeing Plan for Gwynedd and Anglesey for the period 2023 – 2028.

The Assessment pulled together a range of information about Gwynedd and Anglesey's communities. We looked at up to date research, collected data and engaged with our community groups to find out what is good about our communities, and what isn't as good. The regional PSB grant was used to commission Glyndŵr University to collaborate on the well-being assessments in north Wales. In addition, a regional workshop has been arranged in order to hear from under-represented groups, in relation to matters that affect their well-being.

The Wellbeing Assessments were published in May 2022 and give an opportunity for us to consider the challenges and opportunities faced by our communities, particularly the effects of the Covid-19 pandemic and Brexit. They will now set the direction for the Boards' priorities for the 2023-28 Wellbeing Plan which will be published in May 2023.

5.2 Reflecting on this year and looking forward to the year ahead

With the support of the team at Co-production Wales we have held workshops to enable our PSB members to reflect on whether current priorities are still relevant and to review our role and purpose as a Board going forward. Given the excellent network of collaborations across the area it was acknowledged that it is a challenge to find those spaces where the PSB can add the most value.

The PSB members are eager to make a meaningful contribution to the partnership landscape without duplicating the work of other partnerships and so the next Wellbeing Plan will be clear about whether the PSB has a leadership or delivery role in relation to the wellbeing priorities.

We are currently making progress in developing the Wellbeing Plan and have used the workshops to specifically assess where we can have the greatest impact. We will be undertaking a light touch engagement exercise on the draft Wellbeing plan over the winter months with a view to publishing the final plan with detailed goals in May 2023.

5.3 An update on the work of the sub-groups:

5.3.1 Objective 1 – Communities that thrive and flourish in the long term

5.3.1.1 The Welsh language Sub-group:

<p>Why is this important to the residents of Gwynedd and Anglesey?</p>
<p>The Board understands how important the Welsh language is to our communities across Gwynedd and Anglesey, and that it is part of the social fabric and cultural identity of the area. Being able to live their lives through the medium of Welsh and access community services and activities in Welsh is important to our communities and we are committed to working together to increase the use of the Welsh language within public bodies in Gwynedd and Anglesey. We are also committed to promoting Welsh as the language of choice for communication among public organisations across both counties.</p> <p>Of course, the Covid-19 crisis has presented some significant challenges for organisations in trying to ensure the continuity of their services. The conditions and restrictions of having to work virtually, as well as the lack of ability for community groups to come together have made it difficult to maintain some services and opportunities to use the Welsh language. We as public bodies have sought to ensure that the citizen continues to engage with the public bodies in the language of their choice, and we continue to be equally passionate about contributing to the Welsh Government's target of having a million Welsh speakers by 2050.</p>
<p>Update on the work to date:</p>
<p>During 2021/22 the sub-group has undertaken a project relating to linguistic behaviour in reception areas. The aim was to pilot different types of interventions in order to be able to provide guidance to reception staff from different organisations on how to encourage the use of Welsh with a view to increasing public confidence to use Welsh when engaging with public bodies.</p> <ul style="list-style-type: none"> • The objective was to normalise the Welsh language as people go about their public business and ultimately, that could lead to not only more people using services through the medium of Welsh but also an increase in the number of people seeking and expecting it from organisations of all kinds. From the resident's perspective, expression is often easier when using their first language especially when discussing sensitive and personal issues, so the aim is to simplify the process of getting appropriate support. <p>This project was originally approved by Board members in March 2020, but had to be postponed due to lockdown restrictions. The original project proposal was reviewed and amended to take into consideration the changes in the way the public communicates with public organisations and any change in the role of reception areas following the pandemic.</p> <p>During 2022, the project finally got underway and IAITH was commissioned to undertake the field work which has included:</p> <ul style="list-style-type: none"> • Working with 10 pilot reception services across different public sector organisations in Gwynedd and Anglesey and formally observing interactions between customers and staff at those locations • Undertaking focus groups and questionnaires with the staff and speaking with customers to identify barriers to engaging in their language of choice • Analysis of baseline data and comparison to data post intervention.

<p>The final report and recommendations for wider roll out is due to be presented to the Board in October 2022. The sub-group is also currently considering other potential projects to address the commitment in the Gwynedd and Anglesey Well-being Plan so that a work programme for the coming year can be put in place.</p>
<p>How does the sub-group contribute to the Well-being of Future Generations (Wales) Act 2015?</p>
<p>The sub-group operates a number of the ways of working that have been developed as part of the sustainable development principle of the Act, as well as the additional ways agreed by the PSB namely the Welsh Language and Equality by:</p> <ul style="list-style-type: none"> • ensuring that the Welsh Language is a natural part of the work of Gwynedd and Anglesey's Public Services • working together to raise awareness, share good practice, develop the skills and confidence of public services to use Welsh with service users and to encourage them to make use of the language time and again, including the views of relevant stakeholders as they introduce new projects.
<p>5.3.1.2 The Climate Change Sub-group:</p>
<p>Why is this important to the residents of Gwynedd and Anglesey?</p>
<p>A Climate Change sub-group was established to encourage collaboration among public organisations on mitigating the impact of climate change, and in particular the impact of coastal and inland flooding on our communities. We have identified the need to educate and work with our communities to prepare them for the current challenges of climate change and those facing us in future. The aim is to try to mitigate the impact that any events of extreme weather have on those communities. During lockdown many of us realised the importance of the natural environment - we used our cars less and saw positive impacts on the quality of our air and water.</p>
<p>Update on the work to date:</p>
<p>Although the Covid-19 crisis has taken our attention in the past two years, climate change issues are still a major challenge for us. We cannot meet the challenges ahead on our own so a collaborative effort will be essential.</p> <p>During 2020/21 Natural Resources Wales commissioned work to look at a regional approach to mitigating the impact of Climate Change. This was on behalf of all Public Services Boards in North Wales and the North Wales Leadership Board. The main output was an agreement to work together across the public sector in North Wales to respond to the challenge by establishing a Climate Change group for North Wales. The main aim of this group is to achieve the Welsh Government's aims to reduce carbon emissions. The focus of the work by the Gwynedd and Anglesey Public Services Board has been to continue to provide a local response to the challenges of climate change.</p>

<p>Following a series of workshops with a large number of organisations were invited to contribute and agree short, medium and long-term action plans. In addition, Natural Resources Wales has held conversations with our communities as part of their Area Statements. The talks provided us with an opportunity to think about what we need to do as individuals, communities and organisations to respond to Climate Change. The findings and key messages from these conversations have been considered by the climate change sub-group and an action plan for the year ahead is being prepared.</p>
<p>How does the sub-group contribute to the Well-being of Future Generations (Wales) Act 2015?</p>
<p>The sub-group operates a number of the ways of working that have been developed as part of the Sustainable Development principle of the Act by:</p> <ul style="list-style-type: none"> • understanding the needs of specific communities that enable us to plan for the long term • working with a number of public bodies and our communities • involving our stakeholders as an integral part of the sub-group's work
<p>5.3.2 Objective 2 – Residents that are healthy and independent with a good standard of living</p> <p>Two priority fields, namely 'Health and Care of adults' and 'Welfare and success of children and young people' address objective 2. It was agreed in 2017 to establish one sub-group to address both priorities, namely the Integrated Health and Care of the West Group.</p>
<p>5.3.2.1 The Health and Care Sub-group:</p>
<p>Why is this important to the residents of Gwynedd and Anglesey?</p>
<p>The purpose of the health and social care sub-group is to establish a collaborative working regime in the sector and to maintain an overview of the development and transformation of services, and the way in which we support individuals in our communities.</p> <p>The work in the health and social care field proved to be of key importance as we dealt with the Covid-19 crisis and moved to supporting recovery. New ways of working have been developed virtually which have been of great benefit to the multi-disciplinary teams. A willingness to work together and adapt to very challenging working circumstances has been demonstrated.</p>
<p>Update on the work to date in the <u>Anglesey Council</u> Area:</p>
<p>Learning Disabilities – Anglesey:</p> <ul style="list-style-type: none"> • A community service has been developed in Holyhead and this is provided on five days which has proved popular. There are joint plans to develop activities across the island by working alongside our partners in the third sector and create a menu of activities for each individual with a learning disability. • The project support individuals to attend activities, which gives carers a break and supports individuals who are feeling lonely and isolated. At present, we are working

in partnership with our leisure department to upgrade adults' changing facilities via the ICF fund in order to promote access and interaction.

Older Adults – Anglesey:

- The **Community Resources Teams (CRTs)** were established, and the Adults Services restructured into three designated CRT areas and collaborated with health agencies and partners in order to drive the integration agenda forwards.
- An agreement was established between the Isle of Anglesey County Council, Betsi Cadwaladr University Health Board and Medrwn Môn to provide a social prescription service on Anglesey. Referrals are received into the service from GPs, reablement teams and self-referrals. The well-being scores show that 83.5% feel happier, 71.4% deal better with problems and 79.9% report a reduction in anxiety, whilst the health scores from the 'Green prescribing hub' note a reduction in BMI and weight, and a small increase in their physical activity levels.
- The 'Cynllunio Lle' Project focuses on community vision exercises across Anglesey. The Project is seeking to engage with communities in order to include them in the work of planning and providing services locally, and looking at alternative methods of providing services by means of collaborative working.
- Three formal Community Alliances were established in three communities that have agreed on a community vision and 11 supported 'Tro Da' Schemes (voluntary groups that provide community support - an essential element of support during the recent lockdowns).

Mental Health – Anglesey:

- The aim of developing the ICAN Community Hubs is to improve the availability, awareness and contact with general integrated support and well-being, the third sector and other community services. They will also look at how to improve the understanding of how the hubs can help people, in particular with low level mental health problems or to help maintain recovery. On Anglesey, these centres have been developed at the Citizens Advice Bureau in Holyhead and Llangefni. 650 individuals are supported in the hubs each quarter.

Children – Anglesey:

- We continue to be busy in our Foster Carer @Maethu Cymru – Ynys Môn recruitment drive with newly approved Foster Carers joining our foster family.
- We also continue to develop our Cartrefi Clyd model and will be opening two properties in the new year. One property will be to replace Bryn Hwfa our Learning Disability Day Care provision and we also will be opening a respite provision for children with complex needs.
- Regionally we have contributed to the "No Wrong Door" work, NYTH/NEST and lead on the development of the Children's Sub Group of the RPB which will be launched in the new year.

How does the sub-group contribute to the Well-being of Future Generations (Wales) Act 2015?

The sub-group operates a number of the ways of working that have been developed as part of the Sustainable Development principle of the Act and is in line with many of the national design principles in 'A Healthier Wales', the Government's Health and Social Care Strategy, by:

- taking account of **future** trends and responding to changes in demographics

- putting the sustainability of our health system as an output for the sub-group in order to plan for the future
- developing a **preventative** model
- **integrating** our health and social care services to make a real difference to the lives of our residents
- recognising a wide range of factors that influence health and well-being (including education, housing, reduced homelessness, economic growth, regeneration, leisure and the environment)
- realising the benefits **of partnership working**

5.4 Monitoring

5.4.1 The three sub-groups noted above are accountable to the Public Services Board in relation to delivering any commissioned work. The sub-groups will update the Board on progress every quarter, and their submitted progress reports will be challenged and discussed at Board meetings.

5.4.2 The Board's support team also has a role to play between Board meetings to support and maintain the work of the sub-groups. In addition, the annual report summarising progress is published by the Board as it works towards achieving its strategic aims.

5.5 Scrutiny arrangements

5.5.1 The work of the Public Services Board is subject to scrutiny by the designated Scrutiny Committees of both Gwynedd and Anglesey local authorities.

5.5.2 The Well-being of Future Generations Act and associated national guidelines note three roles for scrutiny committees of Local Authorities when providing democratic accountability for the Public Services Board:

- Reviewing the governance arrangements of the PSB
- Statutory consultee on the Well-being Assessment and the Well-being Plan
- Monitoring progress of the efforts of the PSB in the implementation of the Well-being Plan

6 – Equality Impact Assessment [including impacts on the Welsh Language]

6.1 Potential impact on the groups protected under the Equality Act 2010

No negative impact

6.2 Potential impact on those experiencing socio-economic disadvantage in their lives (strategic decisions)

No negative impact

6.3 The potential impact on the opportunities for people to use Welsh and treat the Welsh language no less favourably than the English language

The Support Team of the Public Services Board has already considered and identified

the need for impact assessments (e.g. Language and Equality) and assessments will be developed and used when the Board engages with our communities on specific points and to update the Well-being Assessments.

Anglesey and Gwynedd Wellbeing Plan 2018-2023 Anglesey and Gwynedd Wellbeing Assessments 2022
--

Anglesey and Gwynedd Public Services Board Annual Report 2022

1. The Chair's Foreword

Here we present our fourth annual report. In this report we will reflect on what has been achieved against our [Well-being Plan \(2018\)](#). Of course, it is not possible to look back at 2021/22 without referring to the Covid-19 crisis and the impact it has had on our services, businesses and residents. Dealing with the crisis has highlighted the importance of the services provided by the voluntary and public sector to our communities, and the importance of the collaboration between them. In addition, the crisis has magnified existing issues e.g. cost of living, mental health issues, community resilience, over-tourism, second homes and threats to the Welsh language. It will be important that we, as a Public Services Board ensure that our well-being objectives are addressed as a key part of the recovery following the crisis.

2. Executive Summary

During 2021/22 the Anglesey and Gwynedd Public Service Board (PSB) has achieved the following:

- Completed the Wellbeing Assessments for the 14 Wellbeing Areas in Anglesey and Gwynedd. The Assessment pulled together a range of information about Gwynedd and Anglesey's communities. We looked at up to date research, collected data and engaged with our community groups to find out what is good about our communities, and what isn't as good. These findings will be used to set the direction for the next Wellbeing Plan.
- Welsh language Sub Group:
 - We committed to promoting Welsh as the language of choice for communication among public organisations across both counties
 - During 2021/22 the sub-group has undertaken a project relating to linguistic behaviour in reception areas. The aim was to pilot different types of interventions in order to be able to provide guidance to reception staff from different organisations on how to encourage the use of Welsh with a view to increasing public confidence to use Welsh when engaging with public bodies.
- Climate Change Sub Group:
 - Collaborated to provide a local response to the challenges of climate change.
 - Held a series of workshops with a number of organisations to agree short, medium and long-term action plans.
 - Supported Natural Resources Wales to hold conversations with our communities as part of their Area Statements which provided an opportunity to think about what we need to do as individuals, communities and organisations to respond to Climate Change.
- Health and Care Sub Group:
 - Operate as the Area Integrated Service Board for Anglesey and Gwynedd
 - Ensure the governance of service transformation projects across the learning disabilities, older people, mental health and children's Services.
- With the support of the team from Co-production Wales Network, we held workshops with the PSB members to begin the process of drafting the new Wellbeing Plan. The objectives for these workshops were:
 - To ensure all PSB partners can influence the new plan
 - To understand what we can do together as a PSB
 - To ensure that the PSB officers have a clear direction to move forward with drafting the new plan

3. Introduction

The Well-being of Future Generations (Wales) Act 2015 places a duty on public bodies to improve the social, economic, environmental and cultural well-being of Wales. The act is based on the principle of sustainable development and places a duty on public bodies to set and publish well-being objectives and to take all reasonable steps to achieve those objectives.

The Act also established Public Service Boards with representation from key public bodies. Every five years the Public Services Boards must prepare and publish an assessment of the state of economic, social, environmental and cultural wellbeing in their areas and use this as the basis of the Wellbeing Plan for the following five years.

We are now in the final year of the 2017 -22 Wellbeing Plan for Anglesey and Gwynedd in which the Board had prioritised six areas: The Welsh language; Homes for local people; The effect of poverty on the well-being of our communities; The impact of climate change on the well-being of communities; Health and care of adults and The welfare and achievement of children and young people. Over the five years the board has adjusted its approach to these priorities to account for work being undertaken elsewhere. To address the remaining priorities, the Board currently has three operational sub-groups:

- ♣ Climate Change
- ♣ Integrated Health and Social Care
- ♣ The Welsh Language

This report will refer to the work of the above sub-groups.

4. Achievements this year:

The last two years have been dominated by the coronavirus pandemic and all our PSB member organisations have been focusing on recovery and building community resilience.

Many issues have come to the fore including increases in the cost of living, the impact of second homes on our communities, mental health issues and youth unemployment. Since a number of the Board's members were already working together to respond to these matters it was agreed that the role of the Board would therefore be to maintain an overview of the work and seek assurance that we as public bodies are responding appropriately.

During 2021/22 we completed the process of revising the Wellbeing Assessments. These are undertaken for 14 different areas – 8 for Gwynedd and 6 for Anglesey and will inform one Wellbeing Plan for Gwynedd and Anglesey for the period 2023 – 2028.

The Assessment pulled together a range of information about Gwynedd and Anglesey's communities. We looked at up to date research, collected data and engaged with our community groups to find out what is good about our communities, and what isn't as good. It is an opportunity for us to consider the challenges and opportunities faced by our communities, particularly the effects of the Covid-19 pandemic and Brexit.

The Wellbeing Assessments were published in May 2022 (see links) and will now set the direction for the Boards' priorities for the Wellbeing Plan.

5. Reports on the work of the Public Services Board's Subgroups

5.1 Climate Change Sub Group:

Why is this important to the residents of Gwynedd and Anglesey?

A Climate Change sub-group was established to encourage collaboration among public organisations on mitigating the impact of climate change, and in particular the impact of coastal and inland flooding on our communities. We have identified the need to educate and work with our communities to prepare them for the current challenges of climate change and those facing us in future. The aim is to try to mitigate the impact that any events of extreme weather have on those communities. During lockdown many of us realised the importance of the natural environment - we used our cars less and saw positive impacts on the quality of our air and water.

Update on our work to date

Although the Covid-19 crisis has taken our attention in the past two years, climate change issues are still a major challenge for us. We cannot meet the challenges ahead on our own so a collaborative effort will be essential.

During 2020/21 Natural Resources Wales commissioned work to look at a regional approach to mitigating the impact of Climate Change. This was on behalf of all Public Services Boards in North Wales and the North Wales Leadership Board. The main output was an agreement to work together across the public sector in North Wales to respond to the challenge by establishing a Climate Change group for North Wales. The main aim of this group is to achieve the Welsh Government's aims to reduce carbon emissions. The focus of the work by the Gwynedd and Anglesey Public Services Board has been to continue to provide a local response to the challenges of climate change.

Following a series of workshops with a large number of organisations were invited to contribute and agree short, medium and long-term action plans. In addition, Natural Resources Wales has held conversations with our communities as part of their Area Statements. The talks provided us with an opportunity to think about what we need to do as individuals, communities and organisations to respond to Climate Change. The findings and key messages from these conversations have been considered by the climate change sub-group and an action plan for the year ahead is being prepared.

How does the sub-group contribute to the Well-being of Future Generations (Wales) Act 2015?

The sub-group operates a number of the ways of working that have been developed as part of the Sustainable Development principle of the Act by:

- understanding the needs of specific communities that enable us to plan for the **long term**
- **working with** a number of public bodies and our communities
- **involving** our stakeholders as an integral part of the sub-group's work

5.2 The Integrated Health and Social Care Sub Group (AISB)

Why is this important to the residents of Gwynedd and Anglesey?

The purpose of the health and social care sub-group is to establish a collaborative working regime in the sector and to maintain an overview of the development and transformation of services, and the way in which we support individuals in our communities.

The work in the health and social care field proved to be of key importance as we dealt with the Covid-19 crisis and moved to supporting recovery. New ways of working have been developed virtually which have been of great benefit to the multi-disciplinary teams. A willingness to work together and adapt to very challenging working circumstances has been demonstrated.

Update on the work to date in the Gwynedd Council Area:

Learning Disabilities – Gwynedd:

- Establishing the Well-being Team within the service, which promotes the well-being of individuals with Learning Disabilities by means of social sessions, group work and 1:1 work. Many of the activities have had to change their form due to the pandemic, but here are some examples - art group, Makaton choir, establishing the 'Lleisiau Llawen' radio station, football sessions, walking groups, etc.
- Developing plans for the Community Hub on the site of Dolfeurig, Dolgellau, which will be a more suitable resource for supporting individuals with Learning Disabilities, hand in hand with the rest of the community. There was some delay with the work due to planning matters, but work is continuing and the construction work has commenced in the summer of 2022. While this work is taking place, we will make temporary use of Llanelltud Community Hall and other temporary resources to ensure provision in the area. The hope, in due course, is that we will have a network of hubs across the county - in Caernarfon, Y Felinheli, Y Ffôr and Dolgellau.
- Commencing a training and work opportunities project, looking to promote training opportunities and work opportunities for adults with Learning Disabilities in Gwynedd, using Glynllifon as a 'training and skills development hub'.
- Commencing a 'Cwrs a Sgwrs' project in the Y Ffôr area - this in due course will create work opportunities for individuals with Learning Disabilities to create, cook and deliver hot meals on wheels to vulnerable individuals in the nearby communities. Work has commenced after upgrading an industrial kitchen so that it is fit for purpose, funded by a grant.
- Closer collaboration with the North Wales Advocacy Service, in order to secure an input and a voice for individuals with Learning Disabilities in all of our decisions.

Older Adults – Gwynedd:

- Work on the Community Health and Care Transformation Programme is progressing with emphasis on integrating the essential culture within the five **Community Resources Teams** and empowering leaders and staff to ensure that they keep what matters to the individuals at the root of their care. These teams, which include health, care, third sector and independent sector staff, receive regular contact on a patch level; share information and resources, collaborate to understand the local situation and address any barriers.
- Other elements of the programme include projects that facilitate hospital discharges, a project for sharing information across agencies, and the project on redesigning domiciliary care across the county.
- The work of developing the new model of domiciliary care provision continues and now a number of the Council's domiciliary care teams have moved to work shift patterns, which offers better flexibility to the individuals who receive care and better stability for staff.
- In addition, the adaptations were completed in Dolgellau early in 2022 which offers bespoke care for individuals with severe physical needs. We hope that these resources will assist to meet the various needs of the people of Gwynedd, and promote independence and dignity.

Work on the development of an Extra Care Housing facility in Pwllheli is continuing, led by Adra housing association.

- The Covid-19 crisis highlighted the recruitment challenges more than ever in the field, and it is particularly prominent in the domiciliary care field as we failed to provide care packages in some circumstances due to a lack of staff. We have been striving to try to better understand the challenge that exists across the field, and in response to this a work programme was developed in an attempt to address some of the concerns. The work of establishing a new domiciliary care provision system will have a positive impact on elements such as the salaries of front-line staff in the private sector, lengths of work contracts and the promotion of career pathways in the field. To coincide with this work, a campaign was held this year to increase the size of the care workforce in the Adults field in order to respond to the workforce shortages to ensure service continuity. The #SOSGalwGofalwyr campaign was established in an attempt to recruit over 100 new staff members, both part-time and full-time.

Mental Health – Gwynedd:

- The Council is continuing to work with the Health Board to develop the county's mental health services, and work on the ICAN centres is focusing on early intervention, in collaboration with third sector organisations. This service provides a one-stop shop for individuals who need support, and it enables us to make the contact between them and any housing agencies, Citizens Advice Bureau, etc. as required in order to help them with matters that are causing them stress and negatively affecting their mental health. During the Covid-19 crisis, this support was provided virtually to a broad range of individuals.

Children – Gwynedd

- Work to understand to understand what matters to the families of Gwynedd, agree on principles, and ways of improving what we do and how we work in order to provide the required support is progressing. In addition, we are developing a "Keeping Families Together" strategy which will look to avoid bringing children from coming into care unnecessarily; however, if care is required, then ensure that the child is cared for in a suitable, appropriate and local placement; and that every effort and support is provided in order to return children to their families.
- Although the pandemic has delayed the transformation programme "Ensure a specialist appropriate local provision for children with the most complex needs", work has recommenced on the project jointly with the Health Board and Anglesey Council. The Multi-agency Team is in place since September; and the training programme to upskill the current workforce to support children with complex needs in health, education and social care teams is ongoing.
- A project group has been established and it has completed a review of the current experiences of families with autistic children. The group has created a draft Autism Plan, which shows what needs to be done in response to the recommendations in the review and the plan is to present to the Cabinet soon. Funding has been secured to appoint a Co-ordinator to progress the implementation for the plan, and the recruitment process will start shortly.
- The work of supporting the well-being of people over the past months has continued to focus on responding to the challenges and side-effects of the pandemic. Task and Finish arrangements have been put in place for the prioritized work streams and some of those work streams are moving forward well such as homelessness prevention, support for unpaid carers, children and young people's wellbeing. Further work is required to confirm arrangements in other work streams such as Community Resilience, Council Services' Front Doors and Tackling Poverty.

- The changes to Universal Credit, rising living costs such as food and fuel, over the last few months are a matter of concern and work in ongoing with our partners to increase our capacity to help residents with financial advice, dealing with debt, and food poverty.

Update on the work to date in the Anglesey Council Area:

Learning Disabilities – Anglesey:

- A community service has been developed in Holyhead and this is provided on five days which has proved popular. There are joint plans to develop activities across the island by working alongside our partners in the third sector and create a menu of activities for each individual with a learning disability.
- The project support individuals to attend activities, which gives carers a break and supports individuals who are feeling lonely and isolated. At present, we are working in partnership with our leisure department to upgrade adults' changing facilities via the ICF fund in order to promote access and interaction.

Older Adults – Anglesey:

- The **Community Resources Teams (CRTs)** were established, and the Adults Services restructured into three designated CRT areas and collaborated with health agencies and partners in order to drive the integration agenda forwards.
- An agreement was established between the Isle of Anglesey County Council, Betsi Cadwaladr University Health Board and Medrwn Môn to provide a social prescription service on Anglesey. Referrals are received into the service from GPs, reablement teams and self-referrals. The well-being scores show that 83.5% feel happier, 71.4% deal better with problems and 79.9% report a reduction in anxiety, whilst the health scores from the 'Green prescribing hub' note a reduction in BMI and weight, and a small increase in their physical activity levels.
- The 'Cynllunio Lle' Project focuses on community vision exercises across Anglesey. The Project is seeking to engage with communities in order to include them in the work of planning and providing services locally, and looking at alternative methods of providing services by means of collaborative working.
- Three formal Community Alliances were established in three communities that have agreed on a community vision and 11 supported 'Tro Da' Schemes (voluntary groups that provide community support - an essential element of support during the recent lockdowns).

Mental Health – Anglesey:

- The aim of developing the ICAN Community Hubs is to improve the availability, awareness and contact with general integrated support and well-being, the third sector and other community services. They will also look at how to improve the understanding of how the hubs can help people, in particular with low level mental health problems or to help maintain recovery. On Anglesey, these centres have been developed at the Citizens Advice Bureau in Holyhead and Llangefni. 650 individuals are supported in the hubs each quarter.

Children – Anglesey:

- We continue to be busy in our Foster Carer @Maethu Cymru – Ynys Môn recruitment drive with newly approved Foster Carers joining our foster family.

- We also continue to develop our Cartrefi Clyd model and will be opening two properties in the new year. One property will be to replace Bryn Hwfa our Learning Disability Day Care provision and we also will be opening a respite provision for children with complex needs.
- Regionally we have contributed to the “No Wrong Door” work, NYTH/NEST and lead on the development of the Children’s Sub Group of the RPB which will be launched in the new year.

How does the sub-group contribute to the Well-being of Future Generations (Wales) Act 2015?

The sub-group operates a number of the ways of working that have been developed as part of the Sustainable Development principle of the Act and is in line with many of the national design principles in 'A Healthier Wales', the Government's Health and Social Care Strategy, by:

- taking account of **future** trends and responding to changes in demographics
- putting the sustainability of our health system as an output for the sub-group in order to plan for the future
- developing a **preventative** model
- **integrating** our health and social care services to make a real difference to the lives of our residents
- recognising a wide range of factors that influence health and well-being (including education, housing, reduced homelessness, economic growth, regeneration, leisure and the environment)
- realising the benefits **of partnership working**

5.3 The Welsh language

Why is this important to the residents of Gwynedd and Anglesey?

The Board understands how important the Welsh language is to our communities across Gwynedd and Anglesey, and that it is part of the social fabric and cultural identity of the area. Being able to live their lives through the medium of Welsh and access community services and activities in Welsh is important to our communities and we are committed to working together to increase the use of the Welsh language within public bodies in Gwynedd and Anglesey. We are also committed to promoting Welsh as the language of choice for communication among public organisations across both counties.

Of course, the Covid-19 crisis has presented some significant challenges for organisations in trying to ensure the continuity of their services. The conditions and restrictions of having to work virtually, as well as the lack of ability for community groups to come together have made it difficult to maintain some services and opportunities to use the Welsh language. We as public bodies have sought to ensure that the citizen continues to engage with the public bodies in the language of their choice, and we continue to be equally passionate about contributing to the Welsh Government's target of having a million Welsh speakers by 2050.

Update on the work to date

During 2021/22 the sub-group has undertaken a project relating to linguistic behaviour in reception areas. The aim was to pilot different types of interventions in order to be able to provide guidance

to reception staff from different organisations on how to encourage the use of Welsh with a view to increasing public confidence to use Welsh when engaging with public bodies.

- The objective was to normalise the Welsh language as people go about their public business and ultimately, that could lead to not only more people using services through the medium of Welsh but also an increase in the number of people seeking and expecting it from organisations of all kinds. From the resident's perspective, expression is often easier when using their first language especially when discussing sensitive and personal issues, so the aim is to simplify the process of getting appropriate support.

This project was originally approved by Board members in March 2020, but had to be postponed due to lockdown restrictions. The original project proposal was reviewed and amended to take into consideration the changes in the way the public communicates with public organisations and any change in the role of reception areas following the pandemic.

During 2022, the project finally got underway and IAITH was commissioned to undertake the field work which has included:

- Working with 10 pilot reception services across different public sector organisations in Gwynedd and Anglesey and formally observing interactions between customers and staff at those locations
- Undertaking focus groups and questionnaires with the staff and speaking with customers to identify barriers to engaging in their language of choice
- Analysis of baseline data and comparison to data post intervention.

The final report and recommendations for wider roll out is due to be presented to the Board in October 2022.

The sub-group is also currently considering other potential projects to address the commitment in the Gwynedd and Anglesey Well-being Plan so that a work programme for the coming year can be put in place.

How does the sub-group contribute to the Well-being of Future Generations (Wales) Act 2015?

The sub-group operates a number of the ways of working that have been developed as part of the sustainable development principle of the Act, as well as the additional ways agreed by the PSB namely the Welsh Language and Equality by:

- ensuring that the **Welsh Language** is a natural part of the work of Gwynedd and Anglesey's Public Services
- **working together** to raise awareness, share good practice, develop the skills and confidence of public services to use Welsh with service users and to encourage them to make use of the language time and again
- **including** the views of relevant stakeholders as they introduce new projects.

6. Reflecting on this year and looking forward to the year ahead

With the support of the team at Co-production Wales we have held workshops to enable our PSB members to reflect on whether current priorities are still relevant and to review our role and

purpose as a Board going forward. Given the excellent network of collaborations across the area it was acknowledged that it is a challenge to find those spaces where the PSB can add the most value.

The PSB members are eager to make a meaningful contribution to the partnership landscape without duplicating the work of other partnerships and so the next Wellbeing Plan will be clear about whether the PSB has a leadership or delivery role in relation to the wellbeing priorities.

We are currently making progress in developing the Wellbeing Plan and have used the workshops to specifically assess where we can have the greatest impact. We will be undertaking a light touch engagement exercise on the draft Wellbeing plan over the winter months with a view to publishing the final plan with detailed goals in May 2023.

End

ISLE OF ANGLESEY COUNTY COUNCIL Scrutiny Report Template	
Committee:	Partnership and Regeneration Scrutiny Committee
Date:	26 th September, 2022
Subject:	Partnership and Regeneration Scrutiny Committee Forward Work Programme
Purpose of Report:	Assist the Scrutiny Committee in considering, agreeing and reviewing its forward work programme for 2022/23
Scrutiny Chair:	Cllr Dylan Rees
Portfolio Holder(s):	Not applicable
Head of Service:	Lynn Ball, Director of Function (Council Business) / Monitoring Officer
Report Author:	Anwen Davies, Scrutiny Manager
Tel:	01248 752578
Email:	AnwenDavies@ynysmon.gov.uk
Local Members:	Applicable to all Scrutiny Members

25

1 - Recommendation/s
The Committee is requested to: R1 agree the current version of the forward work programme for 2022/23 R2 note progress thus far in implementing the forward work programme.

2 – Link to Council Plan / Other Corporate Priorities
Effective work programming is the foundation of effective local government scrutiny. Our Scrutiny rolling forward work programmes are aligned with the corporate priorities of the Council and corporate transformation programmes – ensuring the role of Member scrutiny makes a tangible contribution to the Council’s improvement priorities.

3 – Guiding Principles for Scrutiny Members
To assist Members when scrutinising the topic:-
3.1 Impact the matter has on individuals and communities [focus on customer/citizen]
3.2 A look at the efficiency & effectiveness of any proposed change – both financially and in terms of quality [focus on value]
3.3 A look at any risks [focus on risk]
3.4 Scrutiny taking a performance monitoring or quality assurance role [focus on performance & quality]
3.5 Looking at plans and proposals from a perspective of: <ul style="list-style-type: none"> • Long term • Prevention • Integration • Collaboration • Involvement [focus on wellbeing]

3.6 The potential impacts the decision would have on:

- protected groups under the Equality Act 2010
- those experiencing socio-economic disadvantage in their lives (when making strategic decisions)
- opportunities for people to use the Welsh language and treating the Welsh language no less favourably than the English language

[focus on equality and the Welsh language]

4 - Key Scrutiny Questions

5 – Background / Context

1. Background

1.1 Effective work programming is the bedrock of an effective local government scrutiny function¹. Done well, work programming can help lay the foundations for targeted and timely work on issues of local importance demonstrating where Member scrutiny can add value. Good practice advocates two key issues at the heart of the scrutiny forward work programme:

- i. Challenge around prioritising work streams
- ii. Need for a member-led approach and interface with officers.

1.2 Basic principles of good work programming²

- Work programming should not be a “start-stop” process
- Complementary work programmes for separate scrutiny committees
- Balance between different methods of work
- An effective process for reporting / escalating issues to the Executive
- Input and views of internal stakeholders
- Close working with the Executive
- Links with the Annual Scrutiny Report (evaluation and improvement tool).

2. Local context

2.1 There is now a well-established practice of forward work programming which are now rolling programmes focusing on the quality of scrutiny with fewer items, to add value. They are an important tool to assist Members in prioritising their work and are discussed with the Strategic Leadership Team and Heads of Service. Both committees review the content of their work programmes on a regular basis, to ensure that they remain relevant and keep abreast with local priorities. Our local forward planning arrangements now ensure greater focus on:

- Strategic aspects
- Citizen / other stakeholder engagement and outcomes
- Priorities of the Council Plan and transformation projects
- Risks and the work of inspection and regulation
- Matters on the forward work programme of the Executive.

¹ A Cuning Plan? Devising a scrutiny work programme, Centre for Public Scrutiny (March, 2011)

² A Cuning Plan? Devising a scrutiny work programme, Centre for Public Scrutiny (March, 2011)

Outcome: rolling work programmes for scrutiny committees which are aligned with corporate priorities.

2.2 Committee chairs lead on developing the forward work programmes and are submitted to the monthly Scrutiny Chairs and Vice-chairs Forum and for approval at each ordinary meeting of the scrutiny committees. The Forum is considered an important vehicle to oversee these programmes and jointly negotiate priorities.

2.3 **“Whole council” approach to Scrutiny:** our work programmes provide a strong foundation for our improvement programme, ensuring the role that Scrutiny plays in the Authority’s governance arrangements:

- i. Supports robust and effective decision-making
- ii. Makes a tangible contribution to the Council’s improvement priorities
- iii. Continues to evolve.

3. Issues for consideration

3.1 The Scrutiny Committee receives regular update reports on the implementation of its forward work programme. A copy of the current 2022/23 work programme is attached as **APPENDIX 1** to this report for reference and includes changes made to the work programme since the Committee last considered the document.³

3.2 Where appropriate, items may be added to the Committee’s forward work programme during the municipal year. Requests for additional matters to be considered for inclusion on the work programme can be submitted via the Members Request Form for an item to be considered for Scrutiny. Requests are initially considered by the Scrutiny Chairs and Vice-chairs Forum, using the following criteria:

- the Council’s strategic objectives and priorities (as outlined in the Council Plan)
- the ability of the Committee to have influence and/or add value on the subject (A Scrutiny Test of Significance Form will be completed).

6 – Equality Impact Assessment [including impacts on the Welsh Language]

6.1 Potential impacts on protected groups under the Equality Act 2010

6.2 Potential impacts on those experiencing socio-economic disadvantage in their lives (strategic decisions)

6.3 Potential impacts on opportunities for people to use the Welsh language and treating the Welsh language no less favourably than the English language

Not applicable for this overarching issue but will be considered as an integral part of preparing for specific proposals to be submitted for consideration by the Committee.

7 – Financial Implications

Not applicable.

8 – Appendices:

³ Meeting of the Corporate Scrutiny Committee convened on 21st June, 2022

Partnership and Regeneration Scrutiny Committee Forward Work Programme 2022/23

ITEMS SCHEDULED FOR SCRUTINY → MAY, 2022 – APRIL, 2023
[Version dated 16/09/22]

Note for Stakeholders and the Public:

A [Protocol for Public Speaking at Scrutiny Committees](#) has been published by the Council.

Should you wish to speak on any specific item at a Scrutiny Committee then you should register your interest by submitting a written request using the form available as soon as possible and at least 3 clear working days prior to the specific Committee meeting. You can access information about the meeting and which items being discussed by reading this Forward Work Programme. Contact the Scrutiny Manager if you have any queries
