

## ISLE OF ANGLESEY COUNTY COUNCIL

<b>Report to</b>	<b>THE EXECUTIVE COMMITTEE</b>
<b>Date</b>	<b>18 FEBRUARY 2013</b>
<b>Subject</b>	<b>CAPITAL PLAN AND TREASURY MANAGEMENT</b>
<b>Portfolio Holder</b>	<b>COUNCILLOR JOHN CHORLTON</b>
<b>Lead Officer</b>	<b>HEAD OF FUNCTION (RESOURCES)</b>
<b>Contact Officers</b>	<b>CLARE WILLIAMS / EINIR THOMAS</b>
<b>Nature and reason for reporting:</b>  Budget Procedure Rules require the Executive to complete its final budget proposals to the County Council	

### A – Introduction / Background / Issues

#### 1. Background

- 1.1 As part of the budget process, the Executive Committee is required to make proposals in relation to a capital plan and budget, a treasury management strategy (incorporating an investment strategy and a Minimum Revenue Provision Policy) and a suite of prudential indicators. Draft documents are attached as appendices and this report presents the key points so that the proposals may be presented to the County Council on 5<sup>th</sup> March. Draft Prudential and Treasury Indicators will be available to this Committee on the 18<sup>th</sup> February.

### B – Considerations

#### 2. Capital Plan and Budget 2013/14 onwards

- 2.1 In March 2012, the County Council set an interim capital budget based on the previous three year plan. The intention was that a new capital strategy and plan would be developed with the Executive during the year. Since then other priorities, including concentrating on the revenue budget savings, have overtaken us.
- 2.2 The projects in the current capital budget have been reviewed. No significant change is required. The programmes and projects identified as key areas in previous years are developing and the time will be ripe to make decisions in these areas in the context of discussing and adopting new models for service delivery and revised asset plans.

**2.3** Core resources announced by WG in the recent settlement total £3.446m, made up of £1.306m capital grant and £2.140m supported borrowing. This is similar to that indicated in the provisional settlement but is £0.604m less than the current year.

**2.4** Capital Receipts are being realised as part of an initiative related to the Affordable Priorities Programme. The most recent budget monitoring report suggests that current year targets will not be achieved. Due to current market conditions, the value of capital receipts has been falling and the timing of sales extended. Work is in progress with Local Partnerships to review a range of proposals aligned with the transformation of services, delivery options and associated asset requirements. A report will be presented to the Executive for decisions in due course when the options appraisal work has been concluded.

**2.5** Capital grants have reduced over recent years with a number of longstanding formula based grants brought to an end. Additionally, the European Convergence Programme is drawing to a close and no further bids are currently possible. Those grants that remain available are the regeneration grants from Welsh Government, available on a project by project basis. It is also possible that the new status of Enterprise Zone and the other activity relating to regeneration will enable access to new funding sources.

Notable grants confirmed for 2013-14 are the Local Government Borrowing Initiative (LGBI) and Flying Start.

The LGBI programme is nearing the end of its first of three years, with approval having recently been received for funding into the following, and final, two years. The funding will enable £1.8m per annum to be invested in the Authority's highways infrastructure over the following two years. Additionally, the Flying Start grant will enable the Authority to invest up to £1.3m, over two years, into its Flying Start provision.

**2.7** Annual budgets were identified last year at £3.9m, with the proposal for 2013/14 being £3.4m to reflect the reduced WG capital settlement. Commitments have already been made of £3.5m over the following three years from core resources for specific projects and £1.0m for annual budgets. Due to the reduction in the General Capital Funding (GCF) it will be necessary to scale back the annual budgets. It is considered that the forecast slippage on the feasibility studies budget will be sufficient for 2013/14 and it is, therefore, proposed that the annual budget allocation is, on a one off basis, nil. Additionally, in line with other Private Sector Housing budget adjustments, it is proposed the budget for next year is set at £0.9m. This will result in the 'annual budget' for 2013/14 standing at £3.420m.

This idea of "annual budgets" has been used for a number of years, to underpin the capital budget and provide continuity and stability. It has become the equivalent in the capital budget of the revenue "standstill" budget. The budget lines are :-

	<b>2013/14 £000</b>	<b>Of which already committed £000</b>
Schools :refurbishment etc.	1,000	400
Roads (excluding any formula grant)	200	
Other Highways	300	
Disabled Access	200	200
Buildings Risk Management	450	
Smallholdings	Ring fenced capital receipts	
Vehicles	150	
Equipment/ICT	150	
Feasibility Studies	-	
Partnership Funding	70	
Private Sector Housing	900	400
	<b>3,420</b>	<b>1,000</b>

**2.8** The projected programme for the 2013/14 Housing Revenue Account has been included in the 30 year plan at £4.9m. The budget is significantly reduced from the current year as a result of the completion of the WHQS works in December 2012. The programme and funding requirements for 2013/14 will be finalised once this year's expenditure has been completed and the revenue contributions confirmed.

**2.9** Unallocated contingencies of £3.2m are projected to be carried forward into next year. This takes account of the £1m unsupported borrowing contingency for this year dropping out and £1m to support the revenue budget pressures in 2013/14.

**2.10** It will be necessary to consolidate the existing commitments with this proposed allocation and any expected grants, to prepare a document that can become the Executive's proposal to the County Council.

### **3. Treasury Management Strategy**

**3.1** The draft Treasury Management Strategy for 2013/14 (Appendix B) has been scrutinised by Audit Committee. The Strategy has been updated to reflect the changes in professional guidance. These are relatively minor.

**3.2** The key points are:-

- Full use of supported borrowing allocations and £1m p.a. unsupported borrowing as before;
- Unsupported borrowing to cover (a) the delayed capital receipts from the sale of schools (to fund the relocation of Ysgol y Bont and the 21<sup>st</sup> Century Schools Band A Scheme (new primary school Holyhead)) and (b) the Local Government Borrowing Initiative, and (c) the delayed capital receipts from the ring fenced small holdings improvements programme;
- Assumed fully externalised borrowing;
- Assumed investments @ £30m p.a. on average;
- Retain approved lending list as current.
- A need to adopt the revised CIPFA Treasury Management Code of Practice 2011 (Appendix B-8).

**3.3** Based on current portfolios and these foregoing assumptions, the proposed revenue budget for the Treasury Management function is: -

2012/13		Category	2013/14	
Council Fund £'000	HRA £'000		Council Fund £'000	HRA £'000
4,146	1,389	Interest payable	4,324	1,415
(115)	(20)	Disc/Premium – rescheduling	(103)	(32)
3,373	876	Minimum Revenue Provision	3,252	1,117
(385)	0	Interest Receivable	(325)	0
58	(20)	Recharges to other accounts	36	(3)
<b>7,077</b>	<b>2,225</b>		<b>7,184</b>	<b>2,497</b>

**3.4** Borrowing Strategy: A key part of the Treasury Management Strategy is the proposals for external borrowing. Existing plans are sufficient to justify the borrowing plans detailed at 3.2.

#### **4. Prudential Indicators**

**4.1** The prudential indicators are presented as part of the budget process. These form part of the process for ensuring prudence in setting the Council's budget. A small number of Treasury Management indicators are set as limits. Once the figures from the revenue and capital budget proposals are confirmed they will be incorporated into a schedule to present to the County Council.

The key points are:

- Projected additional supported and unsupported borrowing of £28.2m means a net increase of £14.7m to the borrowing requirement over 3 years;
- Projected additional supported and unsupported borrowing will add £2.0m (or £1.0m net) to the annual cost of borrowing over 3 years.

## TREASURY MANAGEMENT STRATEGY STATEMENT

### ANNUAL INVESTMENT STRATEGY, MINIMUM REVENUE PROVISION POLICY STATEMENT AND TREASURY MANAGEMENT POLICY STATEMENT 2013/14

#### 1. Introduction

##### 1.1 Background

The Council is required to operate a balanced budget, meaning that total revenue due during the financial year must be sufficient to meet expenditure, and also that actual cash inflows must be adequate to cover cash outflows. A key part of the treasury management operation is to ensure that this cash flow is adequately planned, with cash being available when it is needed. Surplus monies are invested in low risk counterparties or instruments commensurate with the Council's low risk approach, ensuring adequate liquidity before considering investment return.

The second main function of the treasury management service is the funding of the Council's capital plans. These capital plans provide a guide to the borrowing need of the Council, essentially the longer term cash flow planning to ensure that the Council can meet its capital spending obligations. This management of longer term cash may involve arranging long or short term loans, or using longer term cash flow surpluses. On occasion, debt previously drawn may be restructured to meet Council risk or cost objectives.

A particular point is that a local authority must calculate its budget requirement for each financial year to include the revenue costs that flow from capital financing decisions. This means that:-

- increases in revenue costs resulting from increases in interest charges, incurred to finance additional borrowing to finance capital expenditure; and
- any increases in running costs from new capital projects, must be limited to a level which is affordable within the Council's projected income.

The Treasury Management Policy Statement defines the policies and objectives of the treasury management activities. See Appendix 9.

##### 1.2 Reporting Requirements

The Council is required to receive and approve, as a minimum, three main reports each year, which incorporate a variety of policies, estimates and actuals. These reports are required to be adequately scrutinised by committee before being recommended to the Council. This role is undertaken by the Audit Committee.

**Prudential and Treasury Indicators and Treasury Strategy** - The first and most important report, covers:-

- the Treasury Management Strategy (how the investments and borrowings are to be organised) including treasury indicators;
- an investment strategy (the parameters on how investments are to be managed);
- a Minimum Revenue Provision (MRP) Policy (how residual capital expenditure is charged to revenue over time); and
- a Treasury Management Policy Statement (definition of the policies and objectives of the treasury management function).

Reporting is also required on the capital plans (including the associated prudential indicators).

**A Mid Year Treasury Management Report** - This will update members with the progress of the capital position, amending prudential indicators as necessary, and whether the treasury strategy is meeting its objectives or whether any policies require revision. Rather than this minimum requirement, these reports will be produced quarterly (with quarters one and three being reported only to the Audit Committee).

**An Annual Treasury Report** - This provides details of a selection of actual prudential and treasury indicators and actual treasury operations compared to the estimates within the strategy.

### **1.3 Treasury Management Strategy for 2013/14**

The suggested strategy for 2013/14 in respect of the following aspects of the treasury management function is based upon the treasury officers' views on interest rates, supplemented with leading market forecasts provided by the Council's treasury advisor, Sector Treasury Services.

The strategy for 2013/14 covers two main areas:-

#### **Capital Issues**

- the capital plans and the prudential indicators; and
- the minimum revenue provision (MRP) strategy.

#### **Treasury management Issues**

- the current treasury position;
- treasury indicators which will limit the treasury risk and activities of the Council;
- prospects for interest rates;
- the borrowing strategy;
- policy on borrowing in advance of need;
- debt rescheduling;
- the investment strategy;
- creditworthiness policy; and
- policy on use of external service providers.

These elements cover the requirements of the Local Government Act 2003, the CIPFA Prudential Code, the WG MRP Guidance, the CIPFA Treasury Management Code and the WG Investment Guidance.

### **1.4 Training**

The CIPFA Code requires the responsible officer to ensure that Members with responsibility for treasury management receive adequate training in treasury management. This especially applies to members responsible for scrutiny. In October 2012 Member training on treasury management issues was undertaken in order to support the scrutiny role of members of the Audit Committee. Further training will be arranged as required.

The training needs of treasury management officers are periodically reviewed.

### **1.5 Adoption of the Code**

The Council is required to indicate if it has adopted the CIPFA Code of Practice on Treasury Management. This original, 2001 Code, was adopted on 5 March 2002 by the full Council, a revised Code was adopted on 4 March 2010 and the current, 2011, Code now requires adoption.

## 2. Capital Considerations

The Council's current capital expenditure projection for 2013/14 is set out below. In respect of the years after 2012/13, the amounts shown are limited to existing commitments associated with ongoing schemes, but also account for the assumption that 'annual budgets' will continue, at their 2013/14 level, that an annual unsupported borrowing contingency of £1m is utilised in full in each year, that in 2014/15 and 2015/16 £5m per annum is spent on asset rationalisation, and that the HRA expenditure follows the current 30 year plan.

The key points to note are:

- the overall programmes will be limited to what is affordable, both in terms of actual capital spend and in terms of the revenue implications (see 1.1 above);
- the programmes for future years will be significantly reduced, compared to current levels, due, in part, to the HRA Welsh Housing Quality Standard Programme being completed in 2012.

£m	2011/12 Actual £m	2012/13 Projected £m	2013/14 Estimate £m	2014/15 Estimate £m	2015/16 Estimate £m
<b>TOTAL</b>	21.6	25.6	23.9	27.2	16.2

## 3. Borrowing

The capital expenditure plans, set to be out in a separate report to the Executive Committee, provide details of the service activity of the Council. The treasury management function ensures that the Council's cash is organised in accordance with the relevant professional codes, so that sufficient cash is available to meet this service activity. This will involve both the organisation of the cash flow and, where capital plans require, the organisation of appropriate borrowing facilities. The strategy covers the relevant treasury/prudential indicators, the current and projected debt positions and the annual investment strategy.

### 3.1 Current Portfolio Position

The Council's treasury portfolio position at 16 January 2013 comprised:-

		Principal (£m)	Average Rate (%)
Fixed Rate Funding	PWLB	96.1	5.53
Variable Rate Funding	n/a	0.0	n/a
<b>Total Debt</b>		<b>96.1</b>	<b>5.53</b>

*PWLB: Public Works Loans Board*

A more detailed breakdown of external debt is shown at Appendix 1.

### 3.2 Treasury Indicators: Limits to Borrowing Activity

It is a statutory duty under Section 3 of the Act and supporting regulations, for the Council to determine and keep under review how much it can afford to borrow. The amount so determined is termed the "Affordable Borrowing Limit". The Prudential Code refers to this as the Authorised Limit.

The Council must have regard to the Prudential Code when setting the Authorised Limit, which essentially requires it to ensure that total capital investment remains within sustainable limits and, in particular, that the impact upon its future council tax and council rent levels is 'acceptable'.

Whilst termed an "Affordable Borrowing Limit", the capital plans to be considered for inclusion incorporate financing by both external borrowing and other forms of liability, such as credit arrangements. The Authorised Limit is to be set, on a rolling basis, for the forthcoming financial year and two successive financial years.

### 3.3 Prospects for Interest Rates

The Council's appointed treasury advisor is Sector Treasury Services and part of their service is to assist the Council to formulate a view on interest rates. Appendix 3 draws together a number of current City forecasts for short term (Bank Rate) and longer fixed interest rates. The following table gives the Sector central view.

Annual Average (%)	Bank Rate (%)	PWL B Borrowing Rates (including certainty rate adjustment)		
		5 year	25 year	50 year
Dec 2012	0.50	1.50	3.70	3.90
March 2013	0.50	1.50	3.80	4.00
June 2013	0.50	1.50	3.80	4.00
Sept 2013	0.50	1.60	3.80	4.00
Dec 2013	0.50	1.60	3.80	4.00
March 2014	0.50	1.70	3.90	4.10
June 2014	0.50	1.70	3.90	4.10
Sept 2014	0.50	1.80	4.00	4.20
Dec 2014	0.50	2.00	4.10	4.30
March 2015	0.75	2.20	4.30	4.50
June 2015	1.00	2.30	4.40	4.60
Sept 2015	1.25	2.50	4.60	4.80
Dec 2015	1.50	2.70	4.80	5.00
March 2016	1.75	2.90	5.00	5.20

The economic recovery in the UK since 2008 has been the worst and slowest recovery in recent history, although the economy returned to positive growth in the third quarter of 2012. Growth prospects are weak and consumer spending, the usual driving force of recovery, is likely to remain under pressure due to consumers focusing on repayment of personal debt, inflation eroding disposable income, general malaise about the economy and employment fears.

The primary drivers of the UK economy are likely to remain external. 40% of UK exports go to the Eurozone so the difficulties in this area are likely to continue to hinder UK growth. The US, the main world economy, faces similar debt problems to the UK, but urgently needs to resolve the fiscal cliff now that the Presidential elections are out of the way. The resulting US fiscal tightening and continuing Eurozone problems will depress UK growth and is likely to see the UK deficit reduction plans slip.

This challenging and uncertain economic outlook has several key treasury management implications:-

- The Eurozone sovereign debt difficulties provide a clear indication of high counterparty risk. This continues to suggest the use of higher quality counterparties for shorter time periods;
- Investment returns are likely to remain relatively low during 2013/14 and beyond;
- Borrowing interest rates continue to be attractive and may remain relatively low for some time. The timing of any borrowing will need to be monitored carefully; and
- There will remain a cost of carry - any borrowing undertaken that results in an increase in investments will incur a revenue loss between borrowing costs and investment returns.

A detailed review of the current economic background is contained within Appendix 5 to this report.

### 3.4 Borrowing Requirement

The forecast movements in the Council's capital financing requirement (CFR) are:-

<b>ESTIMATED MOVEMENTS IN THE CAPITAL FINANCING REQUIREMENT AND REPLACEMENT BORROWING 2012/13 TO 2015/16</b>				
	<b>2012/13 Projected £'000</b>	<b>2013/14 Estimate £'000</b>	<b>2014/15 Estimate £'000</b>	<b>2015/16 Estimate £'000</b>
<b>Movement in the CFR</b>				
New borrowing to support capital expenditure				
<i>Supported Borrowing</i>	3,758	4,820	2,140	2,140
<i>Unsupported Borrowing</i>	5,720	6,308	6,850	6,000
<b>Total</b>	<b>9,478</b>	<b>11,128</b>	<b>8,990</b>	<b>8,140</b>
<i>Reduce by: Minimum Revenue Provision and set aside capital receipts</i>	(4,380)	(4,618)	(5,120)	(5,167)
<b>Net movement in the CFR</b>	<b>5,098</b>	<b>6,510</b>	<b>3,870</b>	<b>2,973</b>
<b>Potential movements in actual borrowing</b>				
Movement in the CFR (above)	5,098	6,510	3,870	2,973
Externalisation of pre 2012/13 internal borrowing	4,564	-	-	-
Replacement Borrowing	6	6,507	7	8
<b>Total potential new borrowing</b>	<b>9,668</b>	<b>13,017</b>	<b>3,877</b>	<b>2,981</b>

This incorporates the full impact of the draft Capital Programme for 2013/14. For the following financial years, the amounts of new borrowing are limited to the notified (indicative) allocations for supported borrowing, plus an annual amount of £1m of additional unsupported borrowing, plus cover for delayed capital receipts and the effect of the Local Government Borrowing Initiative. It also assumes the capital receipt from the sale of the current Ysgol y Bont site will be as budgeted and will arise in 2014/15, reducing the requirement for unsupported borrowing in that year.

The likelihood is that not all of this requirement will be met by external borrowing (see 3.4.1 below).

### 3.5 Borrowing Strategy

The Council is currently in an under-borrowed position. This means that the capital borrowing need (the Capital Financing Requirement), has not been fully funded with loan debt as cash supporting the Council's reserves, balances and cash flow has been used as a temporary measure. This approach is prudent as investment returns are low and counterparty risk is high, and will continue to be followed where appropriate (see 3.4.1 below for a more detailed consideration of internal and external borrowing).

Against this background and the risks within the economic forecast, caution will be adopted with the 2013/14 treasury operations. The S151 Officer will monitor interest rates in financial markets and adopt a pragmatic approach to changing circumstances:-

- if it was felt that there was a significant risk of a sharp FALL in long and short term rates, e.g. due to a marked increase of risks around relapse into recession or of risks of deflation, then long term borrowings will be postponed, and potential rescheduling from fixed rate funding into short term borrowing will be considered.

- if it was felt that there was a significant risk of a much sharper RISE in long and short term rates than that currently forecast, perhaps arising from a greater than expected increase in world economic activity or a sudden increase in inflation risks, then the portfolio position will be re-appraised with the likely action that fixed rate funding will be drawn whilst interest rates were still relatively cheap.

Any decisions will be reported to the appropriate decision making body at the next available opportunity.

In view of the above, the Council's borrowing strategy will be based upon the following sources providing value:-

- Temporary borrowing from the money markets or other local authorities;
- PWLB variable rate loans for up to 10 years;
- Short dated borrowing from non PWLB sources;
- There will be a flexible approach to the mix of internal and external borrowing (see 3.4.1 below);
- Long term fixed rate market loans, where rates are significantly below PWLB rates for the equivalent maturity period, and to maintain an appropriate balance between PWLB and market debt in the debt portfolio;
- PWLB borrowing for periods under ten years where rates are expected to be significantly lower than rates for longer periods. This offers a range of options for new borrowing which will spread debt maturities away from a concentration in longer dated debt.

The S151 Officer will also keep under review potential opportunities to join in bond issues or other collaborative borrowing arrangements.

### 3.5.1 External v. internal borrowing

The comparison of gross and net debt positions as at year end is as follows (this is on the basis of being fully funded):-

NET BORROWING 2011/12 TO 2015/16					
	2011/12 Actual £'000	2012/13 Projected £'000	2013/14 Estimate £'000	2014/15 Estimate £'000	2015/16 Estimate £'000
Total Borrowing	96,103	105,764	112,274	116,347	119,367
Total Investments	16,151	20,967	20,000	20,000	20,000
<b>Net Borrowing</b>	<b>79,952</b>	<b>84,797</b>	<b>92,274</b>	<b>96,347</b>	<b>99,367</b>

Current conditions indicate a need for a flexible approach to the choice between internal and external borrowing. Many of the factors which lay behind the previous policy to externalise all borrowing remain valid, e.g.:

- To protect the council tax payer from losses caused by the method of calculation of Housing Revenue Account Subsidy in the current system;
- To mitigate any liquidity issues caused by the implementation in the future of the long stop provisions to limit unsupported borrowing;
- With a continuing historically abnormally low Bank Rate, there remains an unique opportunity for local authorities to actively manage their strategy of undertaking new external borrowing.

However, it remains the case that there are certain limitations to this approach, as previously noted, e.g.:-

- The policy can cause exposure to credit risk, so this aspect must be very carefully managed;
- Careful on going consideration needs to be given to the difference between borrowing rates and investment rates to ensure the Council obtains value for money once an appropriate level of risk management has been attained to ensure the security of its investments.

In favour of internalisation, over the next three years investment rates are expected to be below long term borrowing rates. This means that value for money considerations would indicate that value could best be obtained by avoiding new external borrowing and by using internal cash balances to finance new capital expenditure, or to replace maturing external debt (this is referred to as internal borrowing). This would maximise short term savings.

However, short term savings by avoiding new long term external borrowing in 2013/14 must also be weighed against the potential for incurring additional long term extra costs, by delaying unavoidable new external borrowing until later years when PWLB long term rates are forecast to be significantly higher.

Potential changes to Housing Subsidy will have a bearing on the balance of the internalisation/externalisation, but further information on this is awaited from WG.

The Council has examined the potential for undertaking early repayment of some external debt to the PWLB in order to reduce the difference between its gross and net debt positions. However, the introduction by the PWLB of significantly lower repayment rates than new borrowing rates in November 2007, compounded by a considerable further widening of the difference between new borrowing and repayment rates in October 2010, has potentially meant that large premiums would be incurred by such action; such levels of premiums are unlikely to be justifiable on value for money grounds. This situation will be monitored in case these differentials are narrowed by the PWLB at some future date.

Against this background, caution will be adopted with the 2013/14 treasury operations. The S151 Officer will monitor the interest rate market and adopt a pragmatic approach to changing circumstances, reporting any decisions to the appropriate decision making body at the next available opportunity.

### **3.6 Policy on borrowing in advance of need**

The Council will not borrow more than, or in advance of, its needs, solely in order to profit from the investment of the extra sums borrowed. Any decision to borrow in advance will be within forward approved Capital Financing Requirement estimates, and will be considered carefully to ensure that value for money can be demonstrated and that the Council can ensure the security of such funds.

In determining whether borrowing will be undertaken in advance of need the Council will:-

- ensure that there is a clear link between the capital programme and maturity profile of the existing debt portfolio which supports the need to take funding in advance of need;
- ensure the ongoing revenue liabilities created, and the implications for the future plans and budgets, have been considered;
- evaluate the economic and market factors that might influence the manner and timing of any decision to borrow;
- consider the advantages and disadvantages of alternative forms of funding;

- consider the alternative interest rate bases available, the most appropriate periods to fund and repayment profiles to use; and
- consider the impact of borrowing in advance on temporarily (until required to finance capital expenditure) increasing investment cash balances and the consequent increase in exposure to counterparty risk, and other risks, and the level of such risks given the controls in place to minimise them.

Risks associated with any borrowing in advance activity will be subject to prior appraisal and subsequent reporting through the mid-year or annual reporting mechanism.

### 3.7 Debt Rescheduling

The introduction by the PWLB in 2007 of a spread between the rates applied to new borrowing and repayment of debt, which was compounded on 20 October 2010 by a considerable further widening of the difference between new borrowing and repayment rates, has meant that PWLB to PWLB debt restructuring is now much less attractive than it was before these events. In particular, consideration would have to be given to the large premiums which would be incurred by prematurely repaying existing PWLB loans and it is very unlikely that these could be justified on value for money grounds if using replacement PWLB refinancing. However, some interest savings might still be achievable through using LOBO (Lenders Option Borrowers Option) loans, and other market loans, in rescheduling exercises rather than using PWLB borrowing as the source of replacement financing.

As short term borrowing rates will be considerably cheaper than longer term fixed interest rates, there may be potential opportunities to generate savings by switching from long term debt to short term debt. However, these savings will need to be considered in the light of the current treasury position and the size of the cost of debt repayment (i.e. premiums incurred).

The reasons for any rescheduling to take place will include:-

- the generation of cash savings and/or discounted cash flow savings;
- helping to fulfil the treasury strategy;
- enhance the balance of the portfolio (amend the maturity profile and/or the balance of volatility).

Consideration will also be given to identify if there is any residual potential for making savings by running down investment balances to repay debt prematurely as short term rates on investments are likely to be lower than rates paid on current debt.

All rescheduling will be reported to the Audit Committee, at the earliest practicable meeting following its action.

## 4. Annual Investment Strategy

### 4.1 Current Portfolio Position

The Council's treasury portfolio position at 16 January 2013 comprised:-

	Principal (£m)	Average Rate (%)
Deposits – Call to 30 days	14.4	0.74
Deposits – Fixed Term < 1 year	10.0	1.63
Deposits – Fixed Term 1 year +	-	-
<b>Total Deposits</b>	<b>24.4</b>	<b>1.11</b>

## 4.2 Investment Policy

The Council's investment policy has regard to the WG's Guidance on Local Government Investments ("the Guidance") and the 2011 revised CIPFA Treasury Management in Public Services Code of Practice for Local Authorities and Cross-Sectorial Guidance Notes ("the CIPFA TM Code"). The Council's investment priorities will be security first, liquidity second, and then return.

In accordance with the above, and in order to minimise the risk to investments, the Council has clearly stipulated the minimum acceptable credit quality of counterparties for inclusion on the lending list (see Appendix 5). The creditworthiness methodology used to create the counterparty list fully accounts for the ratings, watches and outlooks published by all three ratings agencies with a full understanding of what these reflect in the eyes of each agency. Using the Sector ratings, service banks' ratings are monitored on a real time basis with knowledge of any changes notified electronically as the agencies notify modifications.

Furthermore, the Council's officers recognise that ratings should not be the sole determinant of the quality of an institution and that it is important to continually assess and monitor the financial sector on both a micro and macro basis and in relation to the economic and political environments in which institutions operate. The assessment will also take account of information that reflects the opinion of the markets. To this end, the Council will engage with its advisors to maintain a monitor on market pricing such as "Credit Default Swaps" and overlay that information on top of the credit ratings. This is fully integrated into the credit methodology provided by the Council's advisors, Sector, in producing its colour codings which show the varying degrees of creditworthiness.

Other information sources used will include the financial press, share price and other such information pertaining to the banking sector in order to establish the most robust scrutiny process on the suitability of potential investment counterparties.

The aim of the strategy is to generate a list of highly creditworthy counterparties which will also enable diversification and thus avoidance of concentration risk.

The intention of the strategy is to provide security of investment and minimisation of risk.

Investment instruments identified for use in the financial year are listed in Appendix 6 under the 'Specified' and 'Non-Specified' Investments categories.

**The Council will also from time to time, make loans, deposits and investments 'for the purpose of delivery of its Service'. These transactions will require the authority of the County Council for amounts over £100k. All transactions will be subject to adequate credit quality and the approval of the Section 151 Officer in consultation with the Portfolio Holder for Finance.**

## 4.3 Creditworthiness policy

The Chief Finance Officer will maintain a counterparty list in compliance with the criteria set out in Appendix 5 and will revise the criteria and submit them to Council for approval as necessary.

The minimum rating criteria uses the lowest common denominator method of selecting counterparties and applying limits. This means that the application of the Council's minimum criteria will apply to the lowest available rating for any institution. For instance, if an institution is rated by two agencies, one meets the Council's criteria, the other does not, the institution, on the basis of credit rating, will fall outside the lending criteria. Credit rating information is supplied by Sector, our treasury consultants, on all active counterparties that comply with the criteria below. Any counterparty failing to meet the criteria could be omitted from the counterparty list. Any rating changes, rating watches (notification of a likely change), rating outlooks (notification of a possible longer term change) are provided to officers almost immediately after they occur and this information is considered before dealing.

As an additional layer to the minimum credit rating criteria described above, this Council also employs the creditworthiness service provided by Sector. This service employs a sophisticated modelling approach utilising credit ratings from the three main credit rating agencies - Fitch, Moody's and Standard and Poor's. The credit ratings of counterparties are supplemented with the following overlays:-

- credit watches and credit outlooks from credit rating agencies;
- Credit Default Swaps (CDS) spreads to give early warning of likely changes in credit ratings;
- Sovereign ratings to select counterparties from only the most creditworthy countries.

This modelling approach combines credit ratings, credit watches and credit outlooks in a weighted scoring system which is then combined with an overlay of CDS spreads from which the end product is a series of colour coded bands which indicate the relative creditworthiness of counterparties. These colour codes are used by the Council to assist in determining the duration for investments. The Council will, therefore, normally use counterparties within the following durational bands:-

- Yellow 5 years
- Purple 2 years
- Blue 1 year (only applies to nationalised or semi nationalised UK Banks)
- Orange 1 year
  
- Red 6 months
- Green 3 months
- No Colour not to be used without specific approval by S151 Officer

The Sector creditworthiness service uses a wider array of information than just primary ratings and, by using a risk weighted scoring system, does not give undue preponderance to just one agency's ratings.

All credit ratings will be monitored weekly. The Council is alerted to changes to ratings of all three agencies through its use of the Sector creditworthiness service.

- if a downgrade results in the counterparty/investment scheme no longer meeting the Council's minimum credit rating criteria, its further use for new investment will cease immediately, unless otherwise authorised; and
- in addition to the use of credit ratings, the Council will be advised of information in movements in Credit Default Swap spreads against the iTraxx benchmark and other market data on a weekly basis. Extreme market movements may result in downgrade of an institution or removal from the Council's lending list.

Reference will also be made to market data and market information, information on government support for banks and the credit ratings of that supporting government.

#### 4.4 Country limits

The Council has determined that it will only use approved counterparties from countries with a minimum sovereign credit rating of AA- from Fitch Ratings (or equivalent from other agencies if Fitch does not provide). The list of countries that qualify using this credit criteria as at the date of this report are shown in Appendix 7. This list will be added to or deducted from by officers should ratings change in accordance with this policy.

#### 4.5 Investment Strategy

**In-house funds:** Based on cash flow forecasts, the S151 Officer anticipates that the available cash balances in 2013/14 will be up to £30m on average and will range between £15m and £35m. This estimate is based on available cash balances, on a fully funded basis, of £30m on average this year to date (with a range of £16m to £34m). There is a core balance of up to £15m available for investment over a 2-3 year period. Investments will accordingly be made with reference to the core balance and cash flow requirements and the outlook for short-term interest rates (i.e. rates for investments up to 12 months).

As at the date of this report the Council holds no investments with a maturity of more than one year.

**Investment returns expectations:** Bank Rate has been unchanged at 0.50% since March 2009. Bank Rate is forecast to commence rising in quarter 4 of 2014. Bank Rate forecasts for financial year ends (March) are: -

- **2012/2013** 0.50%
- **2013/2014** 0.50%
- **2014/2015** 0.75%
- **2015/2016** 1.75%

There are downside risks to these forecasts (i.e. start of increases in Bank Rate is delayed even further) if economic growth remains weaker for longer than expected. However, should the pace of growth pick up more sharply than expected there could be upside risk, particularly if Bank of England inflation forecasts for two years ahead exceed the Bank of England's 2% target rate.

The Council will avoid locking into longer term deals while investment rates are down at historically low levels unless exceptionally attractive rates are available which make longer term deals worthwhile.

The suggested budgeted investment earnings rates for returns on investments placed for periods up to three months during each financial year for the next four years are as follows:-

2012/13	0.50%
2013/14	0.50%
2014/15	0.60%
2015/16	1.50%

For its cash flow generated balances, the Council will seek to utilise its business reserve instant access and reserve accounts, and short-dated deposits (overnight to three months) in order to benefit from the compounding of interest.

#### **4.6 End of year investment report**

At the end of the financial year, the Council will report on its investment activity as part of its Annual Treasury Report.

#### **4.7 External fund managers**

The Council has not appointed external fund managers. The need for this will be kept under review and a report will be made to the Executive before such an appointment is made.

#### **4.8 Policy on the use of external service providers**

In order to acquire access to specialist skills and resources, the Council uses Sector Treasury Services as its external treasury management advisors. The terms of their appointment and the methods by which their value will be assessed are properly agreed and documented, and subjected to regular review.

Final responsibility for treasury management decisions remains with the Council.

#### **4.9 Delegation**

The Treasury Management scheme of delegation and the role of the Section 151 Officer are outlined in Appendix 7.

### **APPENDICES**

1. Loan maturity profile

**Minimum Revenue Provision Policy Statement 2013/14**

The Council implemented the new Minimum Revenue Provision (MRP) guidance in 2008/09, and will assess the MRP for 2013/14 having regard to the main recommendations contained within the guidance issued by Welsh Ministers under section 21(1A) of the Local Government Act 2003. This relates to Council Fund only, not to HRA.

The major proportion of the MRP for 2013/14 will relate to the more historic debt liability that will continue to be charged at the rate of 4% of Capital Financing Requirement (in accordance with *option 2* of the guidance). Certain expenditure, generally that funded from unsupported borrowing, reflected within the debt liability at 31<sup>st</sup> March 2007 will be subject to MRP (under *option 3*), in accordance with the asset life method as below.

Although the regulations give discretion to charge MRP on new expenditure either at 4% as previously, or according to estimated asset life, MRP will normally be charged at 4%. However, expenditure financed by unsupported borrowing will be charged in accordance with the asset life method. This distinction will be kept under review.

Under the Asset Life method, MRP is charged over a period which is reasonably commensurate with the estimated useful life applicable to the nature of expenditure, using the equal annual instalment method. For example, capital expenditure on a new building, or on the refurbishment or enhancement of a building, will be related to the estimated life of that building.

Estimated life periods will be determined by the S151 Officer. To the extent that expenditure is not on the creation of an asset and is of a type that is subject to estimated life periods that are referred to in the guidance, these periods will generally be adopted by the Council. However, the Council reserves the right to determine useful life periods and prudent MRP in exceptional circumstances where the recommendations of the guidance would not be appropriate.

The S151 Officer will determine the appropriate and prudent use of the paragraph 13 exception to defer charging MRP until the year following the one in which the asset became operational.

As some types of capital expenditure incurred by the Council are not capable of being related to an individual asset, asset lives will be assessed on a basis which most reasonably reflects the anticipated period of benefit that arises from the expenditure. Also, whatever type of expenditure is involved, it will be grouped together in a manner which reflects the nature of the main component of expenditure and will only be divided up in cases where there are two or more major components with substantially different useful economic lives.

The Housing Revenue Account share of the Capital Financing Requirement is generally subject to a 2% MRP charge; however, unsupported borrowing will be charged to HRA revenue over a shorter period according to the approved 30 year business plan.

## Economic Background

### The Global economy

The Eurozone debt crisis has continued to cast a pall over the world economy and has depressed growth in most countries. This has impacted the UK economy which is unlikely to have grown significantly in 2012 and is creating a major headwind for recovery in 2013. Quarter 2 of 2012 was the third quarter of contraction in the economy; this recession is the worst and slowest recovery of any of the five recessions since 1930. A return to growth @ 0.9% in quarter 3 is unlikely to prove anything more than a washing out of the dip in the previous quarter before a probable return to negative growth in quarter 4; this would leave overall growth in 2012 close to zero and could then lead into negative growth in quarter 1 of 2013, which would then mean that the UK was in its first triple dip recession since records began in 1955.

The **Eurozone sovereign debt crisis** abated following the ECB's commitment to a programme of Outright Monetary Transactions i.e. a pledge to buy unlimited amounts of bonds of countries which ask for a bailout. The immediate target for this statement was Spain which continues to prevaricate on making such a request, (for a national bailout), and so surrendering its national sovereignty to IMF supervision. However, the crisis in Greece has subsided, for the time being, as a result of the Eurozone agreement to provide a further €50bn financial support package in December. Many commentators, though, still view a Greek exit from the Euro as being likely in the longer term as successive rounds of austerity packages could make it more difficult to bring down the annual deficit and total debt as ratios of GDP due to the effect they have on shrinking the economy and reducing employment and tax revenues. However, another possible way out would be a major write down of total Greek debt; this has now been raised by the German Chancellor as a possible course of action, but not until 2014-15, and provided the Greek annual budget is in balance.

Sentiment in financial markets has improved considerably since this ECB action and additional financial support for Greece to ensure that the Eurozone remained intact during 2012. However, the foundations to this "solution" to the Eurozone debt crisis are still weak and do not address the huge obstacle of unemployment rates of over 25% in Greece and Spain. It is also possible that the situations in Portugal and Cyprus could deteriorate further in 2013 and, although they are minor economies, such developments could unnerve financial markets. There are also general elections coming up in Italy and Germany which could potentially produce some upsets on the political scene. It is, therefore, quite possible that sentiment in financial markets could turn during 2013 after the initial burst of optimism at the start of the year. While equity prices have enjoyed a strong start to 2013, the foundations for this stock market recovery are shallow given the economic fundamentals in western economies. In addition, QE has to come to an end at some point in time and there is a distinct increase in doubt in the central banks of the US and UK as to the effectiveness of any further QE in stimulating economic growth. An end to central purchases of bonds may lead to a fall in bond prices.

**The US economy** has only been able to manage weak growth in 2012 despite huge efforts by the Federal Reserve to stimulate the economy by liberal amounts of quantitative easing (QE) combined with a commitment to a continuation of ultra low interest rates into 2015. Unemployment levels have been slowly reducing but against a background of a fall in the numbers of those available for work. The fiscal cliff facing the President at the start of 2013 has been a major dampener discouraging business from spending on investment and increasing employment more significantly in case there is a sharp contraction in the economy in the pipeline. The fiscal cliffs, and raising the total debt ceiling, still await final resolution by the end of February. The housing market, though, does look as if it has, at long last, reached the bottom and house prices are now on the up.

Hopes for a broad based recovery have, therefore, focused on the **emerging markets**. Recent news from China appears to indicate that the economy has returned to a healthier rate of growth. However, there are still concerns around the unbalanced nature of the economy which is heavily dependent on new investment expenditure. The potential for the bubble in the property sector to burst, as it did in Japan in the 1990s, could have a material impact on the economy as a whole.

## The UK economy

The Government's austerity measures, aimed at getting the public sector deficit into order, have now had to be extended, in the autumn statement, over a longer period than the original four years. Achieving this new extended timeframe will still be dependent on the UK economy returning to a reasonable pace of growth towards the end of this period.

Currently, the UK is enjoying a major financial benefit from some of the lowest sovereign borrowing costs in the world as the UK is seen as a safe haven from Eurozone debt. However, the subsiding of market concerns over the Eurozone has unwound some of the attractiveness of gilts as a safe haven and led to a significant rise in gilt yields. There is little evidence that UK consumer confidence levels are recovering, nor that the manufacturing sector is picking up. The dominant services sector disappointed in December with the PMI survey indicating the first fall in activity in two years. On the positive side, banks have made huge progress since 2008 in shrinking their balance sheets to more manageable levels and also in reducing their dependency on wholesale funding. However, availability of credit remains tight in the economy and the Funding for Lending scheme, which started in August 2012, has not yet had time to make a significant impact in respect of materially increasing overall borrowing in the economy. Finally, the housing market remains tepid and the outlook is for house prices to be little changed for a prolonged period.

**Economic Growth.** Economic growth has basically flat lined since the election of 2010 and, worryingly, the economic forecasts for 2012 and beyond were revised substantially lower in the Bank of England Inflation quarterly report for August 2012 and were then further lowered in the November Report. Quantitative Easing (QE) increased by £50bn in July 2012 to a total of £375bn. Many forecasters are expecting the MPC to vote for a further round of QE in early 2013 to try to stimulate economic activity. The announcement in November 2012 that £35bn will be transferred from the Bank of England's Asset Purchase Facility to the Treasury (representing coupon payments to the Bank by the Treasury on gilts held by the Bank) was also effectively a further addition of QE.

**Unemployment.** The Government's austerity strategy has resulted in a substantial reduction in employment in the public sector. Despite this, total employment has increased to the highest level for four years as over one million jobs have been created in the private sector in the last two years.

**Inflation and Bank Rate.** Inflation has fallen sharply during 2012 from a peak of 5.2% in September 2011 to 2.2% in September 2012. However, inflation increased back to 2.7% by the end of the year, though it is expected to fall back to reach the 2% target level within the two year horizon.

**AAA rating.** The UK continues to enjoy an AAA sovereign rating. However, the three main credit rating agencies have stated that they will be reviewing this rating in early 2013; they will, thereafter, also be carefully monitoring the rate of growth in the economy as a disappointing performance in that area could lead to a major derailment of the plans to contain the growth in the total amount of Government debt over the next few years.

### Sector's forward view

Economic forecasting remains difficult with so many external influences weighing on the UK. There does, however, appear to be consensus among analysts that the economy remains relatively fragile and whilst there is still a broad range of views as to potential performance, expectations have all been downgraded during 2012. Key areas of uncertainty include:

- the potential for the Eurozone to withdraw support for Greece at some point if the Greek government was unable to eliminate the annual budget deficit and the costs of further support were to be viewed as being prohibitive, so causing a worsening of the Eurozone debt crisis and heightened risk of the breakdown of the bloc or even of the currency itself. The same considerations could also apply to Spain;
- inter government agreement on how to deal with the overall Eurozone debt crisis could fragment;
- the impact of the Eurozone crisis on financial markets and the banking sector;

- the impact of the Government's austerity plan on confidence and growth and the need to rebalance the economy from services to manufactured goods;
- the under-performance of the UK economy which could undermine the Government's policies that have been based upon levels of growth that are unlikely to be achieved;
- the risk of the UK's main trading partners, in particular the EU and US, falling into recession;
- stimulus packages failing to stimulate growth;
- elections due in Italy and Germany in 2013;
- potential for protectionism i.e. an escalation of the currency war/trade dispute between the US and China;
- the potential for action to curtail the Iranian nuclear programme;
- the situation in Syria deteriorating and impacting other countries in the Middle East.

The focus of so many consumers, corporates and banks on reducing their borrowings, rather than spending, will continue to act as a major headwind to a return to robust growth in western economies.

Given the weak outlook for economic growth, Sector sees the prospects for any changes in Bank Rate before 2015 as very limited. There is potential for the start of Bank Rate increases to be even further delayed if growth disappoints.

Sector believes that the longer run trend is for gilt yields and PWLB rates to rise due to the high volume of gilt issuance in the UK, and the high volume of debt issuance in other major western countries. The interest rate forecast in this report represents a balance of downside and upside risks. The downside risks have already been commented on. However, there are specific identifiable upside risks as follows to PWLB rates and gilt yields, and especially to longer term rates and yields:-

- UK inflation being significantly higher than in the wider EU and US causing an increase in the inflation premium in gilt yields;
- Reversal of QE; this could initially be allowing gilts held by the Bank to mature without reinvesting in new purchases, followed later by outright sale of gilts currently held;
- Reversal of Sterling's safe haven status on an improvement in financial stresses in the Eurozone;
- Investors reverse de-risking by moving money from government bonds into shares in anticipation of a return to worldwide economic growth;
- The possibility of a UK credit rating downgrade.

## Treasury management scheme of delegation

### (i) County Council

- receiving and reviewing reports on treasury management policies, practices and activities; and
- approval of annual strategy.

### (ii) County Council or Executive

- approval of/amendments to the organisation's adopted clauses, treasury management policy statement and treasury management practices;
- budget consideration and approval;
- approval of the division of responsibilities; and
- approving the selection of external service providers and agreeing terms of appointment.

### (iii) Audit Committee

- reviewing the treasury management policy and procedures and making recommendations to the responsible body; and
- receiving and reviewing regular monitoring reports and acting on recommendations.

## The treasury management role of the section 151 officer

### The S151 (responsible) officer's role includes:

- recommending clauses, treasury management policy/practices for approval, reviewing the same regularly, and monitoring compliance;
- submitting regular treasury management policy reports;
- submitting budgets and budget variations;
- receiving and reviewing management information reports;
- reviewing the performance of the treasury management function;
- ensuring the adequacy of treasury management resources and skills, and the effective division of responsibilities within the treasury management function;
- ensuring the adequacy of internal audit, and liaising with external audit; and
- recommending the appointment of external service providers.

### Capital Issues

- the capital plans and the prudential indicators; and
- the MRP strategy.

## The CIPFA Treasury Management in the Public Services: Code of Practice

This Authority adopts the key principles of CIPFA's *Treasury Management in the Public Services: Code of Practice (2011 Edition)*, as described in Section 4 of that Code as follows:-

### Key Principle 1:

Public service organisations should put in place formal and comprehensive objectives, policies and practices, strategies and reporting arrangements for the effective management and control of their treasury management activities.

### Key Principle 2:

Their policies and practices should make clear that the effective management and control of risks are prime objectives of their treasury management activities and that responsibility for these lies clearly within their organisations. Their appetite for risk should form part of their annual strategy, including any use of financial instruments for the prudent management of those risks, and should ensure that priority is given to security and liquidity when investing funds.

### Key Principle 3:

They should acknowledge that the pursuit of value for money in treasury management and the use of suitable performance measures are valid and important tools for responsible organisations to employ in support of their business and service objectives; and that, within the context of effective risk management, their treasury management policies and practices should reflect this.

The Code then goes on to say that:

“In framing these recommendations, CIPFA acknowledges the difficulties of striving for effective risk management and control, whilst at the same time pursuing value for money. This code does not seek to be prescriptive about how this issue should be handled, particularly since it covers such a wide variety of organisations. However, where appropriate, the sector specific guidance notes give suitable advice. CIPFA recognises that no two organisations in the public services are likely to tackle this issue in precisely the same manner but success in this area of treasury management is likely to be viewed, especially in value for money terms, as an indicator of a strongly performing treasury management function.”

“Even though it dates back to 1991, CIPFA considers that the report by the Treasury and Civil Service Committee of the House of Commons on the BCCI closure is still pertinent, wherein it was stated that:”

*“In balancing risk against return, local authorities should be more concerned to avoid risks than to maximise returns.”*

“Indeed this view was supported by the Communities and Local Government Select Committee report into local authority investments in 2009.”

“It is CIPFA’s view that throughout the public services the priority is to protect capital rather than to maximise return. The avoidance of all risk is neither appropriate nor possible. However, a balance must be struck with a keen responsibility for public money.”

Accordingly the Authority will adopt, as part of the standing orders, the following four clauses;

1. The Authority will create and maintain, as the cornerstones for effective treasury management:
  - a treasury management policy statement, stating the policies, objectives and approach to risk management of its treasury management activities; and
  - Suitable treasury management practices (TMPs) setting out the manner in which the Authority will seek to achieve those policies and objectives, and prescribing how it will manage and control those activities.

The content of the Policy Statement and TMPs will follow the recommendations contained in Sections 6 and 7 of the Code, subject only to amendment where necessary to reflect the particular circumstances of the Authority. Such amendments will not result in the Authority materially deviating from the Code's key principles.

2. The Authority will also have regard for the Guidance on Local Government Investments issued by the Welsh Assembly Government and effective from 1st April 2010.
3. Full Council will receive reports on its treasury management policies, practices and activities, specifically; an annual strategy and plan in advance of the year, a mid year review and an annual report after its close, in the form prescribed in the TMPs. In addition to this the Audit Committee will receive quarterly review reports for first and third quarters.
4. The Authority delegates responsibility for the implementation and regular monitoring of its treasury management policies and practices to the Audit Committee, and for the execution and administration of treasury management decisions to the Chief Financial Officer, who will act in accordance with the Authority's policy statement and TMPs and, if he/she is a CIPFA member, CIPFA's Standard of Professional Practice on Treasury Management.
5. The Authority nominates Audit Committee to be responsible for ensuring effective scrutiny of treasury management policies, practices and performance.

## Treasury Management Policy Statement

1. The Authority defines its treasury management activities as: “The management of the authority’s investments and cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks”.
2. This organisation regards the successful identification, monitoring and control of risk to be the prime criteria by which the effectiveness of its treasury management activities will be measured. Accordingly, the analysis and reporting of treasury management activities will focus on their risk implications for the organisation, and any financial instruments entered into to manage these risks.
3. This organisation acknowledges that effective treasury management will provide support towards the achievement of its business and service objectives. It is therefore committed to the principles of achieving value for money in treasury management, and to employing suitable comprehensive performance measurement techniques, within the context of effective risk management.”
