ISLE OF ANGLESEY COUNTY COUNCIL					
REPORT TO:	EXECUTIVE COMMITTEE				
DATE:	MAY 26, 2015				
SUBJECT:	SCORECARD MONITORING REPORT - QUARTER 4 (2014/15)				
PORTFOLIO HOLDER(S):	COUNCILLOR ALWYN ROWLANDS				
HEAD OF SERVICE:					
REPORT AUTHOR:	GETHIN MORGAN				
TEL: E-MAIL:	01248 752111 GethinMorgan@anglesey.gov.uk				
LOCAL MEMBERS:	n/a				

A - Recommendation/s and reason/s

- **1.1** This is the final scorecard of the financial year 2014/15. It portrays the position of the Council against its operational objectives for the year.
- **1.2** It demonstrates that the continuous improvement agenda which the current Administration has established is being realised in that
 - **1.2.1** Attendance rates have improved
 - **1.2.2** The adherence to policies and management of sickness via the completion of return to work interviews are improving
 - 1.2.3 Stress related sickness has decreased
 - **1.2.4** The number of concerns raised and the number of referrals to the ombudsman have decreased
 - **1.2.5** Performance targets have been reached in the majority of indicators with 20 out of 27 indicators seeing an improvement
- **1.3** Further annual analysis of performance and comparator data with other local authorities will be completed via the Annual Performance report to be considered by both the Scrutiny Committee and the Executive over the coming months.
- **1.4** The Committee is requested to scrutinise the scorecard and note the areas which the Senior Leadership Team are managing to secure improvements into the future. These can be summarised as follows
 - **1.4.1** Sickness Management continuation of and further embedding of good management processes and practices with regards to learning from each other during 2015/16 so as to improve further on our sickness rates, costs and

management as an Authority.

- **1.4.2** Financial Management it is recommended that further consideration is given to the reporting of financial information within the scorecard for 15/16 quarterly reporting.
- **1.4.3** Performance Management it is recommended that the Council revises 2015/16 targets in the revised scorecard to ensure they are challenging but achieveable.
- **1.4.4** Customer Service Embed the principles of our Customer Charter throughout the Council and ensure the mystery shopper exercise is completed twice during 2015/16 to provide a baseline of customer focused data.
- 1.5 The Committee is asked to accept the mitigation measures outlined above and note that further workshop/s will be held with SLT / Executive and shadow executive members to revise the corporate scorecard for 2015/16 during late May / June 2015.

B - What other options did you consider and why did you reject them and/or opt for this option?

n/a

C - Why is this a decision for the Executive?

This matter is delegated to the Executive

CH - Is this decision consistent with policy approved by the full Council?

Yes

D - Is this decision within the budget approved by the Council?

Yes

DD - Who did you consult?			What did they say?				
	1	Chief Executive / Strategic Leadership Team (SLT) (mandatory)	This was considered by the SLT at their meeting on the 11th of May and their comments are reflected in the report				
	2	Finance / Section 151 (mandatory)	No comment				
	3	Legal / Monitoring Officer (mandatory)	No comment

• 2014/15 Scorecard monitoring report - Quarter 3 (as presented to, and accepted by, the Executive Committee in February 2015).

SCORECARD MONITORING REPORT – QUARTER 4 (2014/15)

1. INTRODUCTION

- 1.1 This is the final scorecard of the financial year 2014/15. It portrays the position of the Council against its operational objectives for the year.
- 1.2 It demonstrates that the continuous improvement agenda which the current Administration has established is being realised in that
 - 1.2.1 Attendance rates have improved
 - 1.2.2 The adherence to policies and management of sickness via the completion of return to work interviews are improving
 - 1.2.3 Stress related sickness has decreased
 - 1.2.4 The number of concerns raised and the number of referals to the ombudsman have decreased
 - 1.2.5 Performance targets have been reached in the majority of indicators with 20 out of 27 indicators seeing an improvement
- 1.3 Further annual analysis of performance and comparator data with other local authorities will be completed via the Annual Performance report to be considered by both the Scrutiny Committee and the Executive over the coming months.
- 1.4 Quarter 1 is the quarter where as a Council, we need to further develop the scorecard for the forthcoming year and its associated indicators to clarify our performance priorities for 2015/16. This process will be commenced during May, 2015.

2. CORPORATE SCORECARD

- 2.1 The scorecard continues to develop and embed, reflecting changes from year to year. Indicators included within the current scorecard were decided through a process of engagement and consultation with the Pennaethiaid, SLT, the Executive and Shadow Executive. This exercise will now be re-commenced for 2015/16.
- 2.2 The scorecard (Appendix 1) portrays the current end of quarter 4 position and is requested to be considered by the Executive & Corporate Scrutiny Committee (minus financial information).

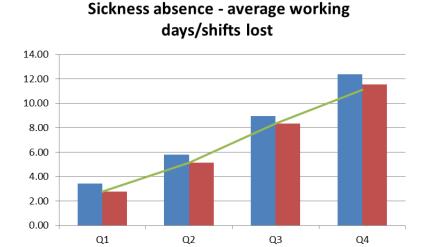

3. CONSIDERATIONS

- **3.1** This is the second year of collating and reporting performance indicators in a co-ordinated manner. The Council is seeing trends establish themselves with regards to a number of those indicators.
- 3.2 It is important to note that the formulation of this year's scorecard requested
 - further trend analysis
 - look back at previous year's performance
 - acknowledgement of specific indicators in relation to the quartile positioning

- This assists the quarterly analysis and enables performance to be considered using a number of different comparator elements.
- **3.3** For the purpose of quarter 4 analysis the introduction of data relating to year on year trends against performance has been included. i.e. to demonstrate whether indicators have improved or declined over the past year.

3.4 PEOPLE MANAGEMENT

- **3.4.1** Quarter 4 sickness rates (*indicator 1 on scorecard under people management*) have seen a very slight improvement against Q3 results, with an end of year average of 11.54 days/shifts lost per FTE against a target of 10 days for the year.
- 3.4.2 This is an improvement of approx. 1 day per FTE sickness compared to 2013/14 data. The improvement can be seen in the graph below (Table 1). This is a positive result to the year and is testimony to the continued drive to improve sickness absence throughout the Council. However, it is important to note that we continue to be 1.5 days per FTE over our current corporate target of 10.

---- Predicted Trend based on 13/14

Table 1

3.4.3 Analysis of the associated data shows that one of the main reasons for not achieving our corporate target this year, was due to the Long Term Sickness rates which have declined year on year. (see Table 2 below). This year we saw an approximate 2,000 days increase lost due to long term sickness.

2014/15

2013/14

LONG TERM SICK DAYS

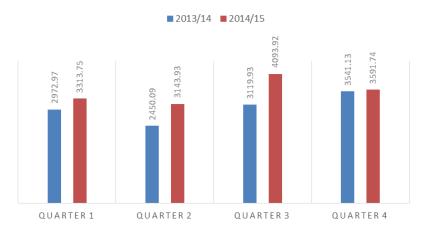

Table 2

- **3.4.4** Long Term sickness equated to 53% of our sickness for 2014/15 compared to 49% for 2013/14.
- **3.4.5** Our short term sickness for Quarter 4 (3,886.81 days) improved again from the same period last year (4,446.54 days) taking our overall short term sickness to 12,777 days sickness, an improvement of near 3,500 days sickness lost to short term sickness compared to 13/14 (16,272 days). This is illustrated below in Table 3.

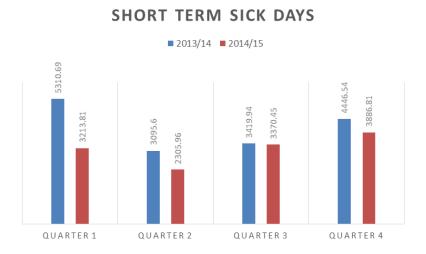

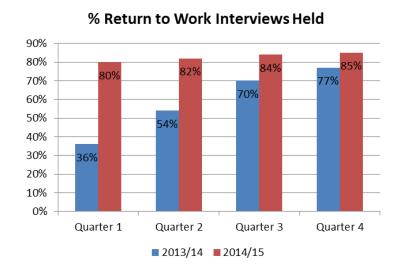

Table 3

- **3.4.6** Whilst this is a positive step in the right direction it would however, still demonstrate a poor performance in comparison with the rest of Local Authorities in Wales where it is envisaged our performance would be placed in the lower quartile.
- **3.4.7** Sickness rates for 2014/15 were identified as an indicator of national significance and have been categorised as a Public Accountability Measure (PAM) by Welsh Government. This means that its performance as comparator data will be used to provide a story for sickness across local authorities in Wales.

- 3.4.8 It is recommended therefore by the SLT, that Officers explore and manage the reasons behind our increased long term sickness rates and continue with our drive to decrease overall sickness rates for the future.
- **3.4.9** In relation to sickness absence figures each service has been attributed a different sickness target based on historical sickness data / trends. These targets have been calculated in a way which makes targets more achievable and as a result meaningful to the Services as a whole.
- **3.4.10** If all targets were met, the Council would have met its sickness absence target of 10 days per FTE.
- 3.4.11 It is recommended therefore, that all Services receive their revised sickenss absence targets for 2015/16 with associated methodology through the SLT by the end of the 1st quarter which will clearly articulate the Council's desire to decrease sickness rates further.
- **3.4.12** Associated with sickness rates is the 'management' of sickness. An integral part of the management process within the Council is staff's compliance with corporate sickness policies which include return to work interviews (*indicator 5 on scorecard*).
- **3.4.13** The Council continues to embed this working practice across its services. This improvement has been further embedded during the Q4, with Return To Work (RTW) interviews increasing from a year end position of 59% in 2013/14 to a cumulative figure of 85% achieved in 2014/15 (see table 4).
- **3.4.14** Q4 performance of 89% is further testimony to this improvement.

- Table 4
- **3.4.15** With regards to the 'management' of sickness, and staff's compliance with corporate sickness policies, significant improvements have been evidenced regarding return to work practise (see 3.3.10).
- 3.4.16 It is recommended by the SLT, that further consideration and focus is given to the management of recurring short-term sickness absence where trigger points are reached and the completion of attendance review meetings (ARM's) are undertaken.

- **3.4.17** A 'worrying trend' identified in the Q2 report was the % of staff who received professional development reviews within timeframe (*indicator 9 under People Management*). The sample of 10% of staff, undertaken by HR, resulted in a figure of only 53% of all staff within the Authority who were provided a review.
- 3.4.18 Following the PDR window in Q4, HR again sampled 10% of staff and following the analysis a total of 76% were completed within the timeframe (performance indicator 9 in people management). This demonstrates improvements on last years achievement but also indicates that further improvements are required to align staff working practises with service and Council priorities.
- 3.4.19 The SLT recommends therefore to continue to further embed good management processes and practices with regards to sickness management by learning from each other during 2015/16 so as to improve further on our sickness rates, costs and management as an Authority.

3.5 FINANCIAL MANAGEMENT

- **3.5.1** No financial information for Q4 was available for the completion of this report.
- 3.5.2 The SLT therefore recommends that further consideration is given to the reporting of financial information within the scorecard for 15/16 quarterly reporting.

3.6 PERFORMANCE MANAGEMENT

- **3.6.1** The scorecard for Performance Management has been amended for this quarter to show performance against a year on year trend. This has been completed for two reasons
 - 3.6.1..1 to ease analysis
 - 3.6.1..2 demonstrate improvements.

It can be seen from these trends that 20 of the indicators have improved while 7 of the indicators have declined year on year.

- **3.6.2** At the end of Q4 we have 6 indicators that are underperforming against their annual target for the year.
- 3.6.3 One indicator within Adult Services shows an underperformance
 - (i) 03 SCA/018b the % of carers of Adults who had a review/assessment of their needs which shows as **RED** on the scorecard. The result for Q4 (57.1%) has improved in comparison with the out-turn for Q3 (50.3%), however the result is well below its target of 70%.

A total of 564 requested an assessment or review and 92% (521) of these where assessed. In addition to these an additional 348 clients who declined assessment must be calculated within this performance indicator. These additional clients give the false impression of low performance within this PI.

It is noted that this result for 14/15 would continue to place us in the <u>upper quartile</u> when compared with the 13/14 and therefore a revised target setting should be sought for 15/16.

3.6.4 One indicator within Childrens Services shows an underperformance –

(i) 11 – SCC/041a – the % of eligible, relevant and former relevant children that have pathway plans as required shows as **RED** on the scorecard. The result for the year of 78.26% is a slight improvement on last year but would still result in us being in the lower quartile when compared to 2013/14 results.

The reason for not hitting our target for this indicator is that 4 of 23 relevant young people had chosen not to participate in this process.

3.6.5 One indicator within Housing shows an underperformance –

(i) 14 - HHA/017a - The average number of days all homeless households spent in bed & breakfast is **RED** on the scorecard. The result for 2014/15 (76.9 days) has improved when compared with 2013/14 (90.8 days) but we again would continue to be in the lower quartile when compared to 2013/14 results.

3.6.6 Two indicators within Learning shows an underperformance –

(i) 17 - LCL/004 - The no. of library materials issued during the year is **RED** on the scorecard. The result of 287.5k issues is down 21.5k from the 2013/14 result of 309k. When compared to 2013/14 national results we would still see this indicator in the lower median quartile for the year.

Although the above indicator has declined, the service managed to increase visits to the library service (indicator 16 on the scorecard) by 73k from 219k to 292k during the year.

The Council now needs to ensure that these extra visits result in an increased number of materials issued for 2015/16, whilst also continuing to increase visits to the libraries.

(ii) 23 – No of days lost to temp exclusion – Primary is shown as **RED** on the scorecard. There has been 27 days lost due to exclusions during the Autumn Term. This compares unfavourably against last years grand total of 37.5 days for the whole of the 2013/14 academic year.

Data for the Spring Term was not available at the time of preparing this report and will be presented in the Q1 scorecard for 2015/16.

3.6.7 One indicator within Economic & Community Regeneration shows an underperformance –

(i) 19 – LCS/002b – The number of visits to local authority sport and leisure centres during the year where visitors will be participating in physical activity is **RED** on the scorecard. The result of 591k visits is 29k below the target of 620k and is a decrease in performance from the 13/14 result of 614k.

This indicator has been hitting the targets throughout the year and was not foreseen to miss the target during Q4. However, it is believed that works in Holyhead Leisure Centre and a decrease in visits to Outdoor facilities, namely Llangefni Golf Course are the reasons for the decrease in performance.

The performance for the year when compared to 13/14 results would see us drop a quartile from the upper median to the lower median.

It should also be noted therefore that future performance is likely to remain in the lower quartile due to the closure of the golf course. This can and should be offset however by a projected and planned for increase of visits to the leisure centres during 2015/16 (11,000).

- 3.6.8 Whilst the remaining indicators are all ragged GREEN within the performance management section it should be noted that this does not mean that our position on a national basis will improve across all areas. Based on 13/14 quartile results we would achieve a change in quartile for 7 of our indicators
 - 3.6.8..1 5 of which would improve on their 13/14 quartile result
 - 3.6.8..2 2 of which would see a decline.
- **3.6.9** Whilst this is a positive story overall, we will not know how we have performed in comparison with others until the results for 14/15 are published in September. The overall picture will be articulated in the body of our Annual Performance Report, to be considered by the Corporate Scrutiny Committee and the Executive prior to adoption by the Council in the autumn.
- 3.6.10 A large amount of the indicators have hit their targets for the year. This is encouraging and demonstrates improvements locally. However, if we are to progress and improve our standing as an achieving Council, the SLT is recommended that to revise 2015/16 targets to ensure they are challenging yet achieveable and that we do not rest on our laurels.

3.7 CUSTOMER SERVICE

- **3.7.1** Regarding Customer Complaints Management, by the end of Q4 65 formal complaints were received. 61 of the 65 have received a response and of these complaints 5 were upheld in full, 11 were partially upheld whilst the remaining 45 were not upheld. The final figure of 65 complaints is the same as it was for 13/14.
- **3.7.2** A total of 90.8% of complaints have been responded to within timescale with only 6 late responses. This reflects the council's overall management of arising issues and trying our utmost to become customer, citizen and community focused as noted in the Corporate Plan 2013-17.
- 3.7.3 With regards to adopting a customer centred approach one area which Officers have demonstrated a difficulty in achieving target is that of responding to FOI requests within timeframe. The final result of 65% is below the target of 80% for the year, however this has improved over the year and is a step in the right direction. In total there were 894 FOI requests received during the year with 3541 separate questions for the services to answer. This equates to approximately 14 questions a day.
- 3.7.4 Another important indicator when looking at a customer centred approach would be the % of telephone calls abandoned (number 12 on the customer service table). This indicator has seen a drop to 16%, below the 15% target, for the first time this year. This will be monitored again during 2015/16 and will be tracked as one of the indiciators associated with our Customer Charter which will need to be fully embedded during the year.
- 3.7.5 As the Customer Charter has been in a pilot period and has not been fully embedded within working practise, the indicators which form part of the Mystery Shopper exercises have not been completed as anticipated. The SLT recommends therefore that a baseline of customer focused data be recorded during 2015/16 as part of the Customer Service Excellence Project and that the mystery shopper exercise is completed twice to achieve this.

4. RECOMMENDATIONS

- **4.1** The Committee is requested to scrutinise the scorecard and note the areas which the Senior Leadership Team are managing to secure improvements into the future. These can be summarised as follows
 - 4.1.1 Sickness Management continuation of and further embedding of good management processes and practices with regards to learning from each other during 2015/16 so as to improve further on our sickness rates, costs and management as an Authority.
 - 4.1.2 Financial Management it is recommended that further consideration is given to the reporting of financial information within the scorecard for 15/16 quarterly reporting.
 - 4.1.3 Performance Management it is recommended that the Council revises 2015/16 targets in the revised scorecard to ensure they are challenging but achieveable.
 - 4.1.4 Customer Service Embed the principles of our Customer Charter throughout the Council and ensure the mystery shopper exercise is completed twice during 2015/16 to provide a baseline of customer focused data.
- **4.2** The Committee is asked to accept the mitigation measures outlined above and note that further workshop/s will be held with SLT / Executive and shadow executive members to revise the corporate scorecard for 2015/16 during late May / June 2015.

Corporate Scorecard C-Q4
